
This natural breakthrough now helps REGROW JOINT CARTILAGE from the inside out

Pain and aching replaced by smooth, comfortable joints! Helps the body repair cartilage in your joints.

Full details below ↓

These statements have not been evaluated by the FDA. This product is not intended to diagnose, treat, prevent, or cure any disease.

What I'm about to reveal in the next 27 seconds may go against everything you've been told by your doctor or pharmacist. But the truth is...

You don't have to just "live with your aches and pains."

And you don't have to accept that your joint discomfort from "over doing it" will continue to get worse as time goes on...

Not anymore.

In fact, there's now an easy, natural way to actually help **support the body's ability to regrow** cartilage... so your overworked joints feel smoother, easier and younger!

If you want more comfortable joints with healthy, cushioning cartilage...

...pay attention, because I've discovered an amazing secret...

And I'm going to show it to you now

Not only that, I'll tell you **EXACTLY** how you can use this breakthrough for yourself.

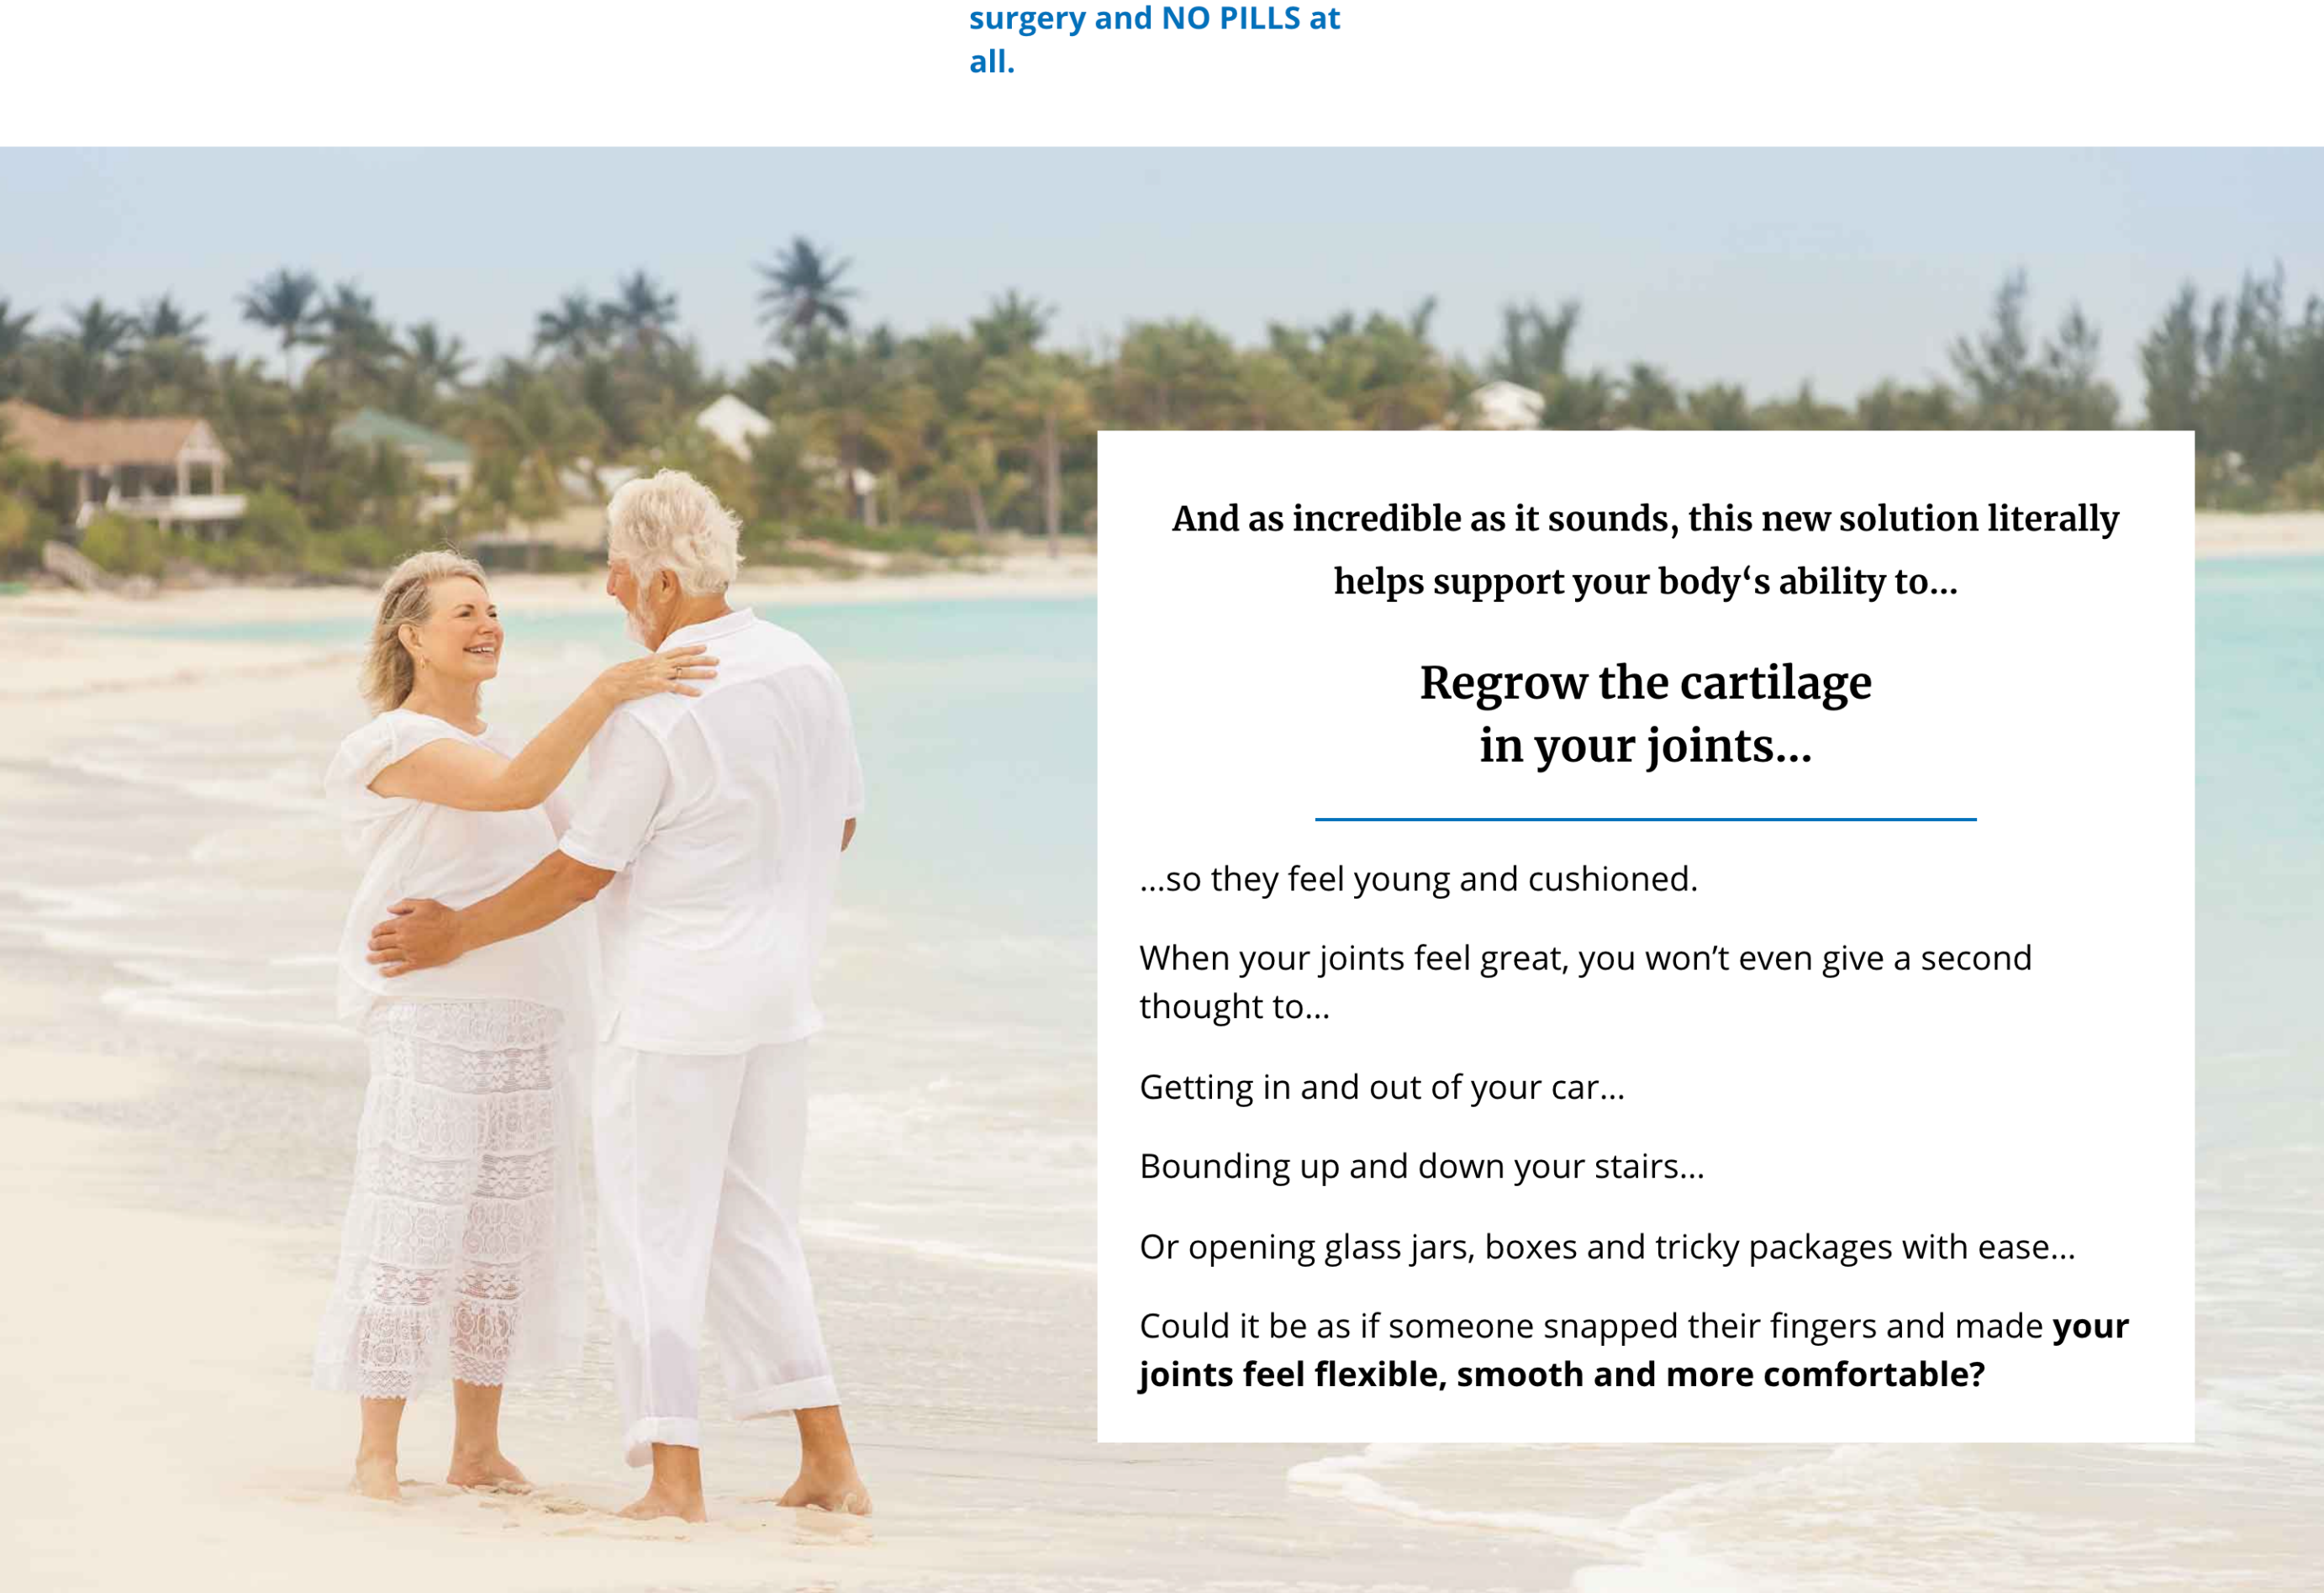
It's easy, no matter your age or current condition...

PAIN FREE

It's painless... *even enjoyable...*

It requires no additional exercise, no needles, no surgery and NO PILLS at all.

It takes less than 60 seconds per day...



And as incredible as it sounds, this new solution literally helps support your body's ability to...

Regrow the cartilage in your joints...

...so they feel young and cushioned.

When your joints feel great, you won't even give a second thought to...

Getting in and out of your car...

Bounding up and down your stairs...

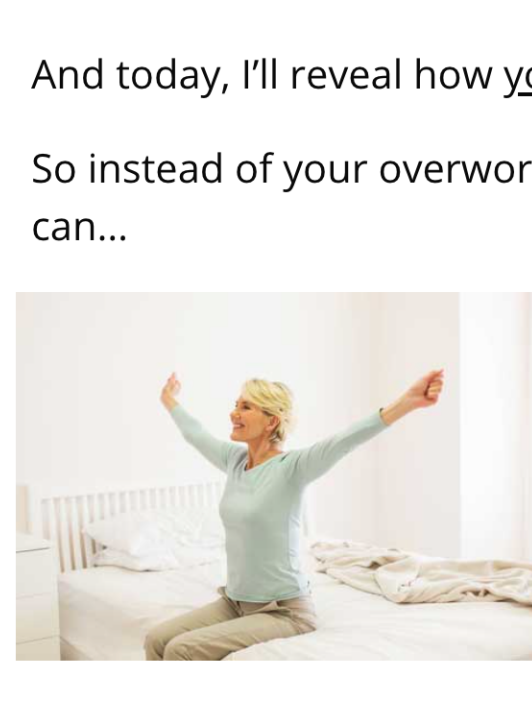
Or opening glass jars, boxes and tricky packages with ease...

Could it be as if someone snapped their fingers and made **your joints feel flexible, smooth and more comfortable?**

It's even being used by professional athletes...

And today, I'll reveal how you can use it for yourself.

So instead of your overworked joint discomfort getting worse with every passing year, you can...



Leap right out of bed...

Ready to take on the day, *feeling strong and active...*

Play nine holes of golf with ease...

And then feel ready to take on nine more (while your buddies trail behind you, rubbing their knees and backs in frustration)...

Is *this* the year you shoot your personal best score?

Work in your garden for hours on end... squatting, digging, cleaning, reaching... with nary a twinge or ache...

Maybe it's time to think about that big house project you've been putting off... *you can do it!*

And, finally, keep up with your grandkids as they run around the house. *Maybe YOU'LL outlast THEM this time!*

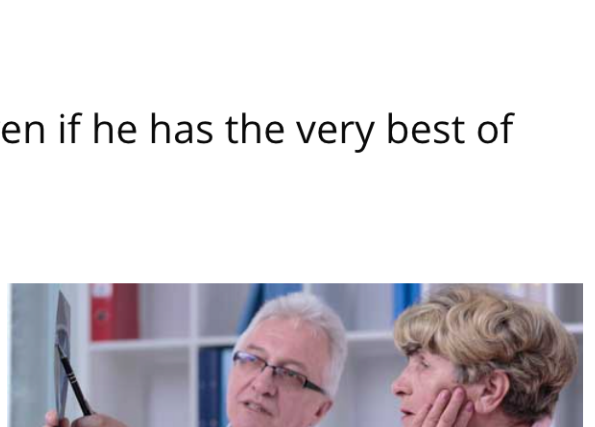
Whatever you love doing... and whatever your overworked joints are stopping you from enjoying to the fullest...

You could do it all again. Soon.

With a natural breakthrough that is simply unlike anything else you've ever heard of...

In fact, you probably won't hear about this from your doctor... even if he has the very best of intentions.

I'll explain why in a moment...



And you won't hear a word about it from Big Pharma because they'd lose billions in profits.

Even the natural supplement industry hasn't fully caught on to the power of this new solution...

The fact is they still make wads of money selling cheap, inferior products like glucosamine and chondroitin.

If you're over the age of 60 (like me), you've probably forked over your hard-earned cash for bottles of pills containing these two ingredients...

...and you probably waited weeks and weeks for them to work... without noticing any difference. You weren't imagining it...

Because a study from Spain has found glucosamine and chondroitin...

Completely fail to reduce joint pain!

It's a fact: They just don't work.

But this new breakthrough does. *In a way no other natural or artificial solution can...*

Especially considering this solution has been shown in one study to be absorbed in one hour of using it for the first time. So that it can begin to work its magic.

So if you've tried everything for your achy joints and you're still frustrated by how you feel after a long day doing yardwork... let me tell you this good news...

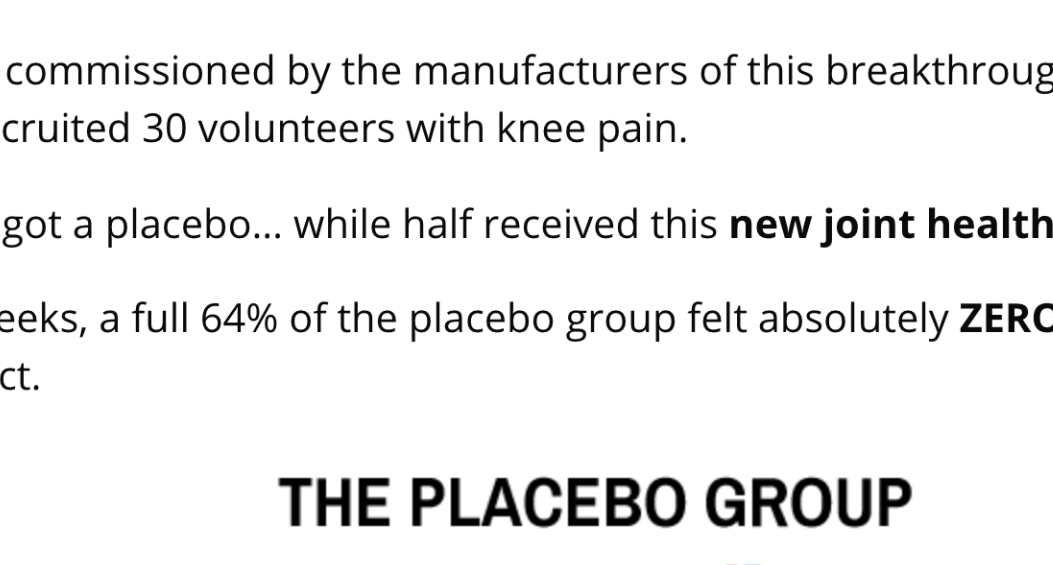
A groundbreaking study by top scientists is now showing *exactly* how powerful this new breakthrough is for **relieving overworked joint pain**...

This study was commissioned by the manufacturers of this breakthrough solution. Researchers recruited 30 volunteers with knee pain.

Half the group got a placebo... while half received this **new joint health secret**...

And after 13 weeks, a full 64% of the placebo group felt absolutely **ZERO** improvement. Just like you'd expect.

THE PLACEBO GROUP

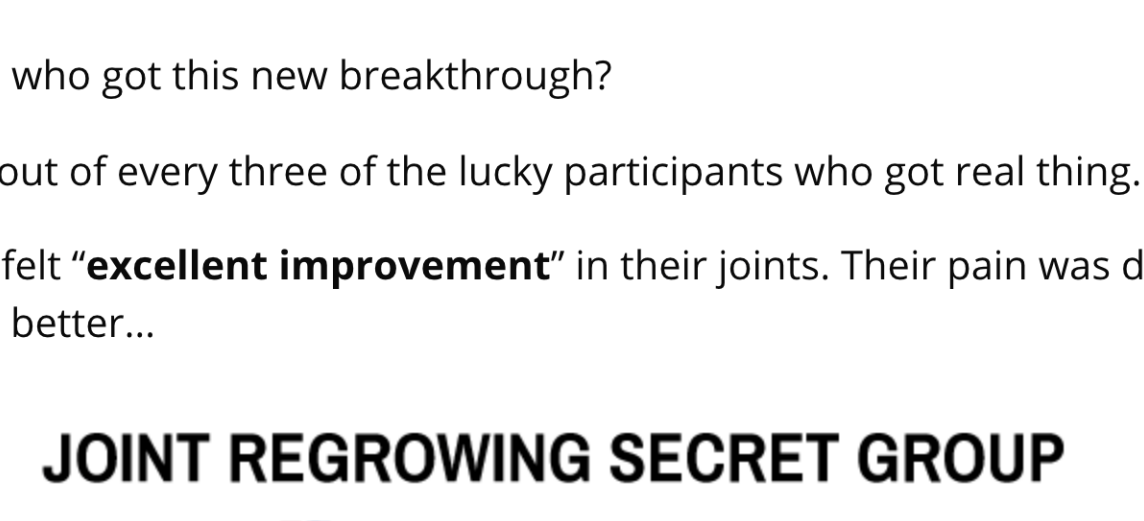


But for the group who got this new breakthrough?

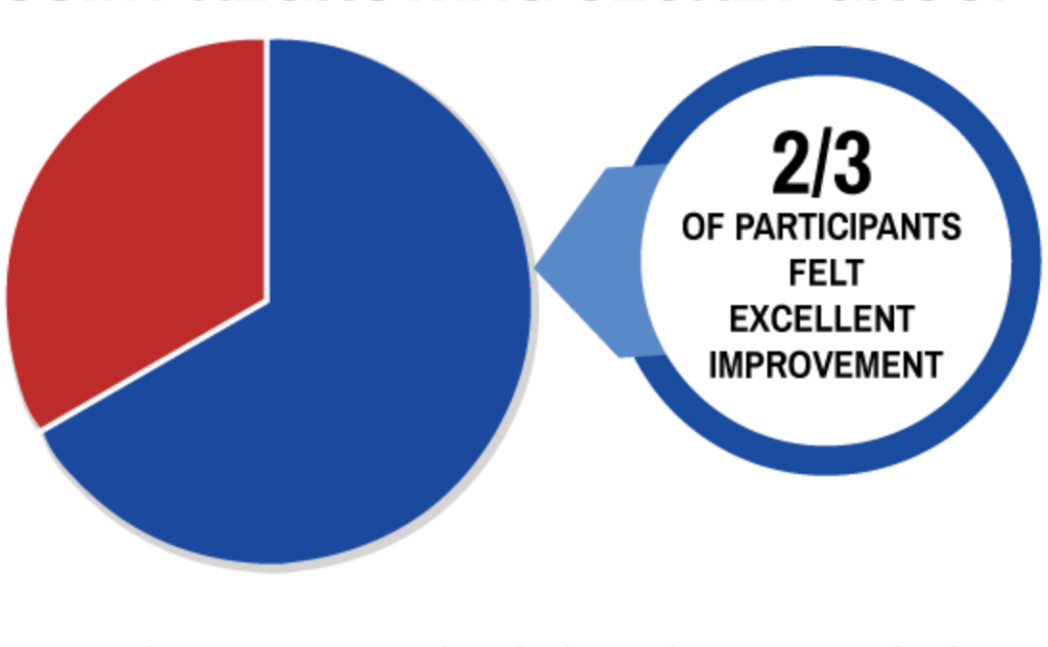
Well, almost two out of every three of the lucky participants who got real thing...

...exclaimed they felt "**excellent improvement**" in their joints. Their pain was disappearing... they felt so much better...

JOINT REGROWING SECRET GROUP



But that's not all. Because these scientists decided to take X-RAYS of a few of the volunteers' joints...



Look at the "BEFORE" image from just one of the study participants. Look how close the bones are together. That's because the cartilage has naturally worn away over time from overuse.

But now look at the "AFTER" image.

See how much farther apart the bones are... with a clear, dark space in between?

As incredible as it is... the X-ray clearly shows...

Real... regrown... cartilage!

But how could a natural solution deliver such staggering health benefits to your joints?

It's because only this solution has been shown in animal and human research to have the unique power to **actually help** support the body's ability to **repair and protect cartilage**.

In other words, it quite simply... **makes your joints healthier and more comfortable.**

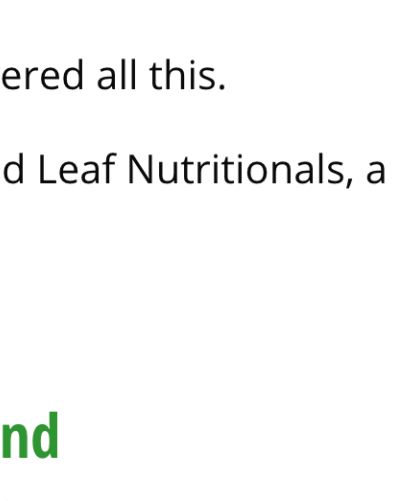
Are you ready to get started? OK, I'm about to reveal exactly what this solution is and where to get it.

But first, let me introduce myself, so you'll understand how I uncovered all this.

My name is Rebecca Walker, and I'm the Research Manager for Gold Leaf Nutritionals, a premiere nutraceutical research firm.

And the truth is, a couple years ago...

I did start to feel that stiffness and discomfort settling into my joints...



You see, I've pounded the pavement as a runner for years.

And I know what it's like for aching joints to hold you back from enjoying your life to the fullest.

And how it feels like you can't do all the fun things you enjoyed when you were younger.

But, I also know what it's like to overcome that feeling... and actually help regain more comfortable joints.

It's not genetics.

The truth is...

You just have to know the secret

Fortunately, I discovered it... thanks to my work as Research Manager.

Time is still passing for me, but it feels like I've hit the "pause button" on my joints' aging!

And whether you're 60... 70... 80... or older... I'm confident it will work for you too.

But if you're skeptical, keep in mind...

Dr. David Trentham of Harvard Medical School says ingesting this solution "reinstructs the body to [keep joints healthy]."

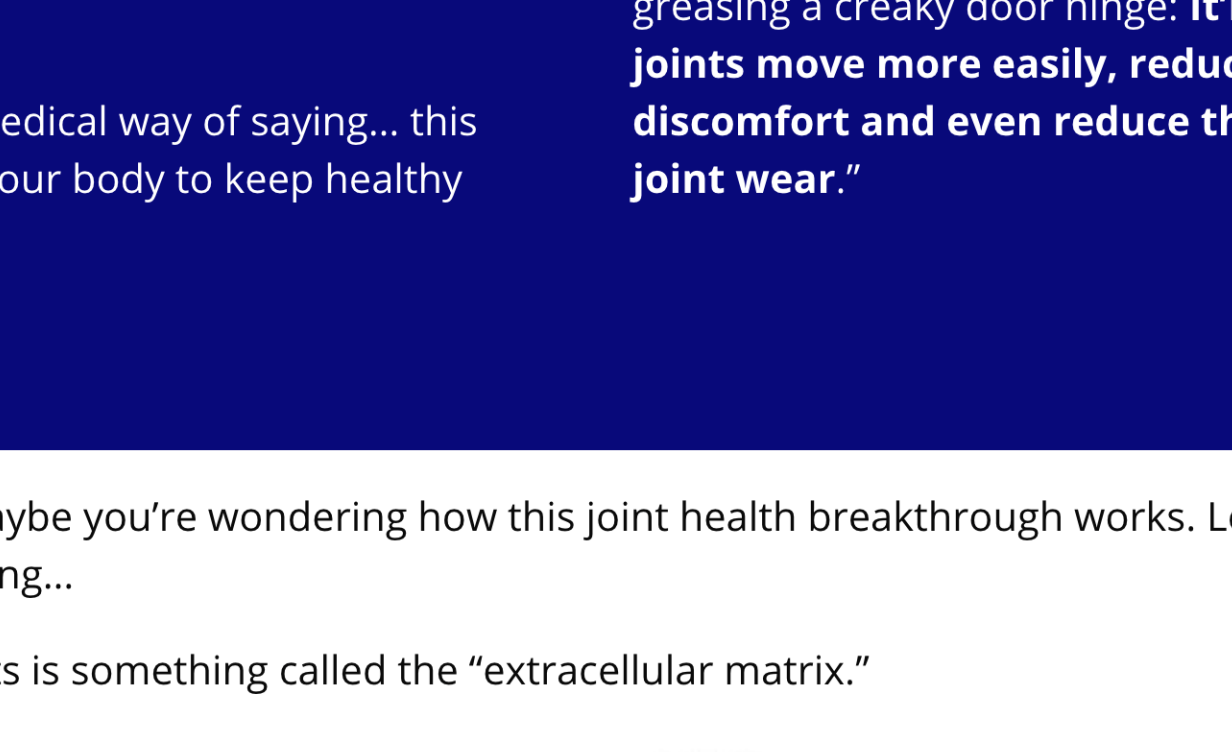
That's a fancy medical way of saying... this solution "tells" your body to keep healthy joint cartilage**!**

And health author Dr. Josh Axe writes:

"Think of ingesting [this solution] like greasing a creaky door hinge: It'll help your joints move more easily, reduce joint discomfort and even reduce the risk of joint wear."

At this point, maybe you're wondering how this joint health breakthrough works. Let me explain everything...

Inside your joints is something called the "extracellular matrix."



Basically, it's the microscopic structure that makes up your joint cartilage.

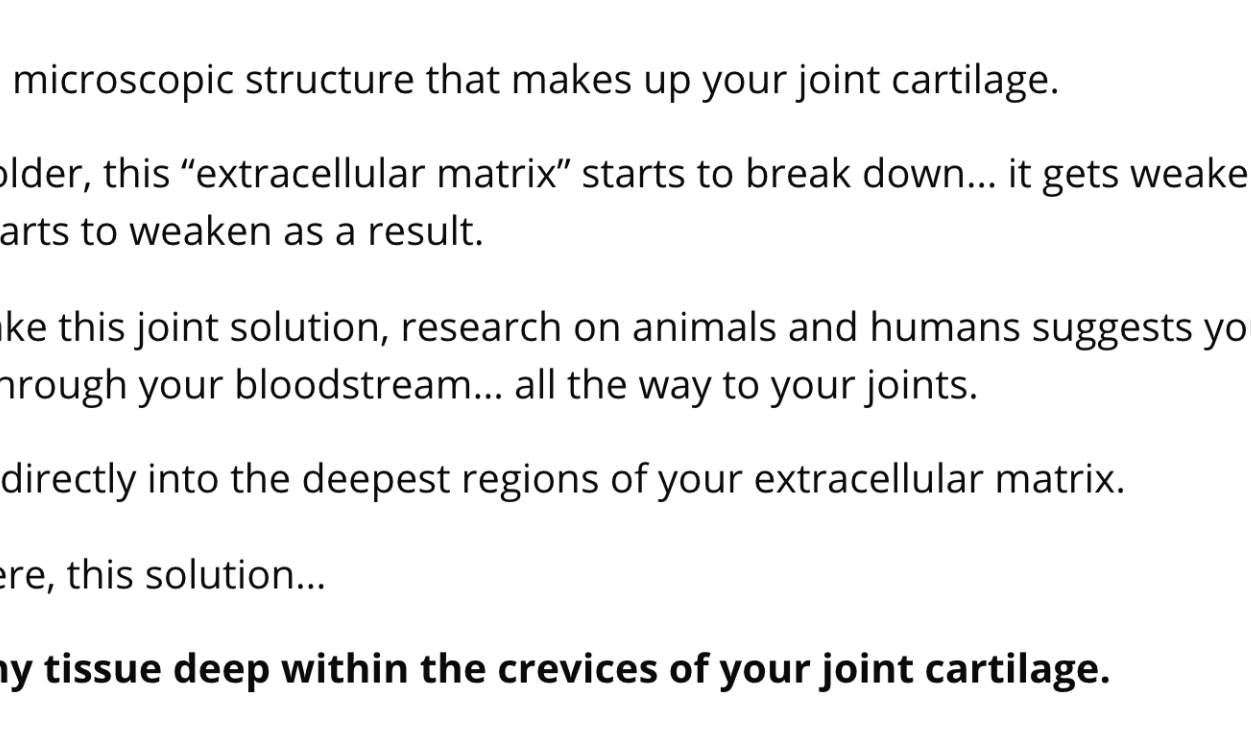
And as you get older, this "extracellular matrix" starts to break down... it gets weaker... and your cartilage starts to weaken as a result.

But when you take this joint solution, research on animals and humans suggests your body is able to carry it through your bloodstream... all the way to your joints.

There, it rushes directly into the deepest regions of your extracellular matrix.

And once it's there, this solution...

Supports **healthy tissue deep within the crevices of your joint cartilage.**

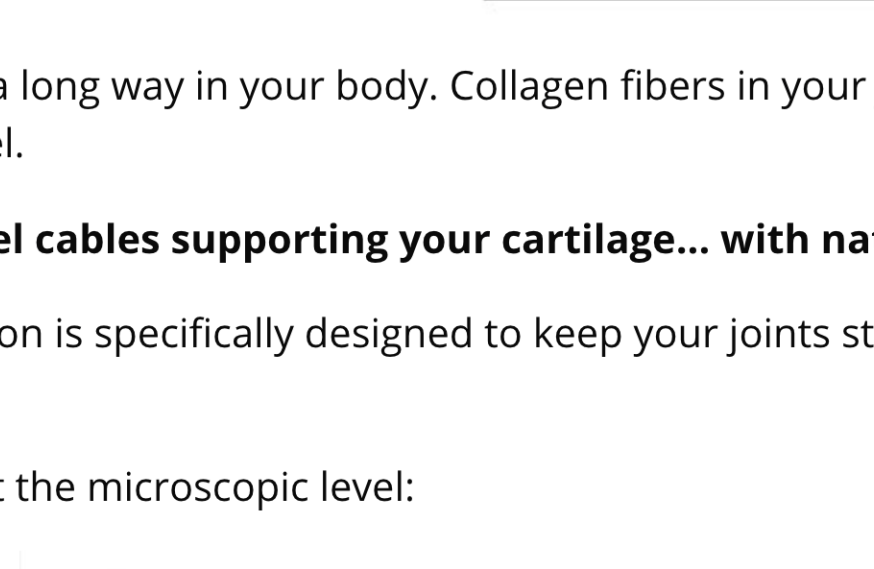


And even a little bit goes a long way in your body. Collagen fibers in your joints are... gram for gram... stronger than steel.

It's almost like little steel cables supporting your cartilage... with natural, healthy tissue.

In other words, this solution is specifically designed to keep your joints strong... robust... stable... and comfortable!

Here's what it looks like at the microscopic level:



Imagine infusing your joints with MILLIONS and MILLIONS of these cartilage supporters... *every single day...*

Helping your body repair the cartilage in your joints, so they feel young and cushioned...

Helping protect against the wear and tear that affects your joints as you get older...

So your joints feel solid and smooth.

As you can tell, this is more than some surface-level quick fix that ends up disappointing you... or a numbing, smelly cream that only works for 30 minutes if you're lucky...

And it's not some harsh pill that only dulls the discomfort for a few hours...

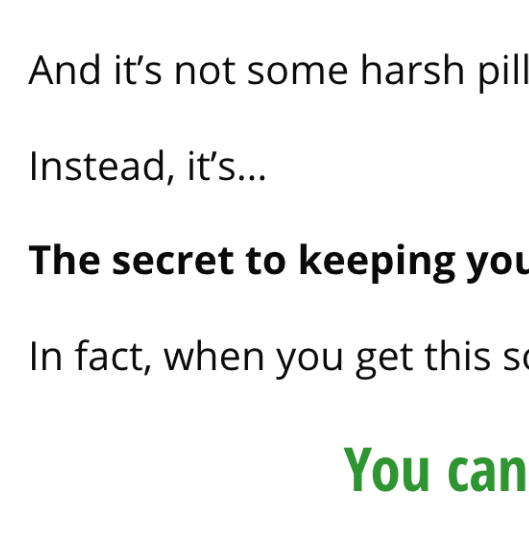
Instead, it's...

The secret to keeping your joints in a perpetually youthful state.

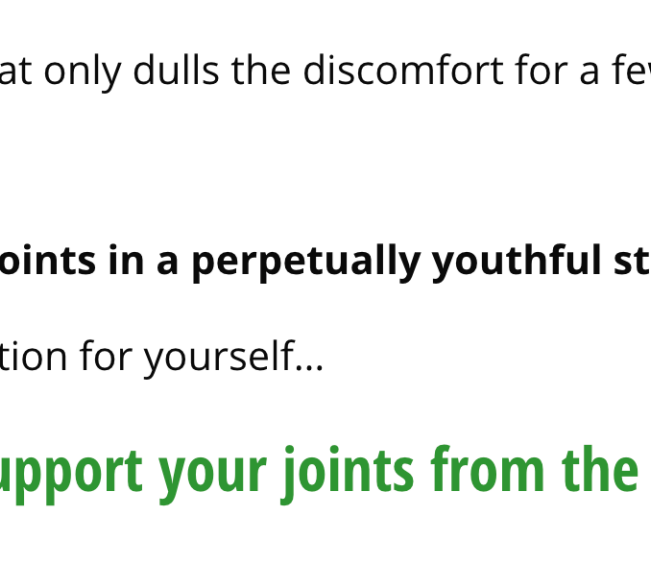
In fact, when you get this solution for yourself...

You can support your joints from the inside out

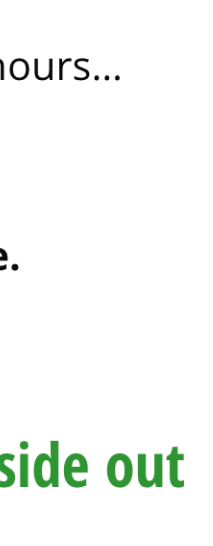
Imagine if you had results just like the study participants experienced...



You could knit or go bowling without your hands getting bothered...



Exercise like you've been meaning to without those dull aches...



Or even surprise your spouse with some fun dance lessons!

You just need this one solution today.

But in case you're wondering...

*How can I be sure it **works**? And how can I be sure it's **safe**?*

The answer to both those questions is...

Because it's something the body already produces NATURALLY.

Let me explain exactly what this new joint breakthrough is...

Perhaps you've heard the term "essential amino acid."

Over 70 years ago, scientists discovered your body requires this solution to maintain healthy tissue.

It makes up the "brick and mortar" of your body.

Scientists also discovered that your body is capable of creating this solution on its own, as long as your body is nourished properly.

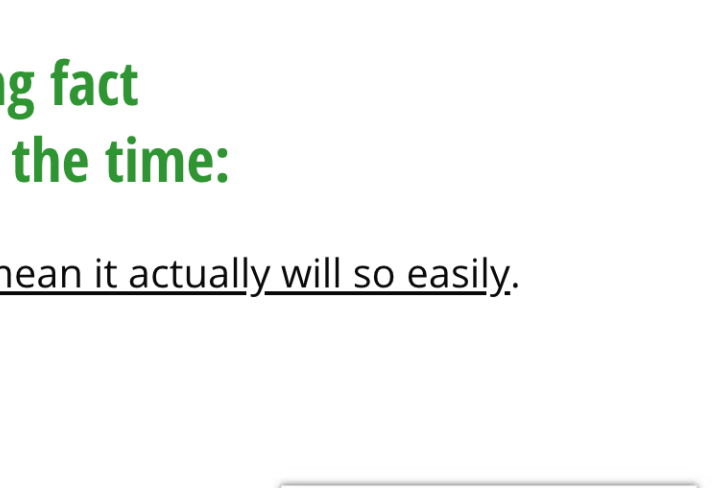
From then on, ingesting this solution was considered "nonessential."

And that was a mistake... because this "nonessential" solution is actually ***incredibly essential*** for your joint health...

And here's an alarming fact scientists didn't realize at the time:

Just because your body *can* make this solution... doesn't mean it actually will so easily.

Especially as you get older.



When you pass age 60, your production starts to plummet.

That means your body is making less of the component it needs to help keep your joint tissue healthy.

The result... it becomes easier to overwork your joints, leaving them stiff and achy.

So what's the solution?

It's called collagen.

And maybe you've heard of it before.

But did you know collagen is packed with the amino acids you need for your joints to remain strong and healthy?

In fact... **your joints are 70% collagen!**

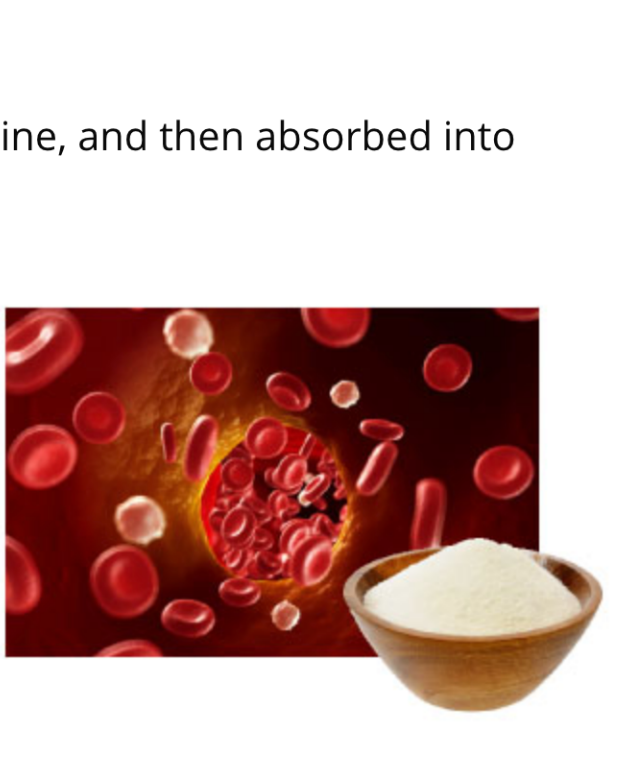
Unfortunately, the collagen levels in your joint cartilage drops as you age...

When your joints starve for collagen... you may experience more discomfort as a result

I'm sure you know how this feels after a long day working in the garden or chasing your grandkids around the park.

That's why it's crucial to get collagen into your diet.

When you do, it's broken down by enzymes in your small intestine, and then absorbed into your bloodstream.



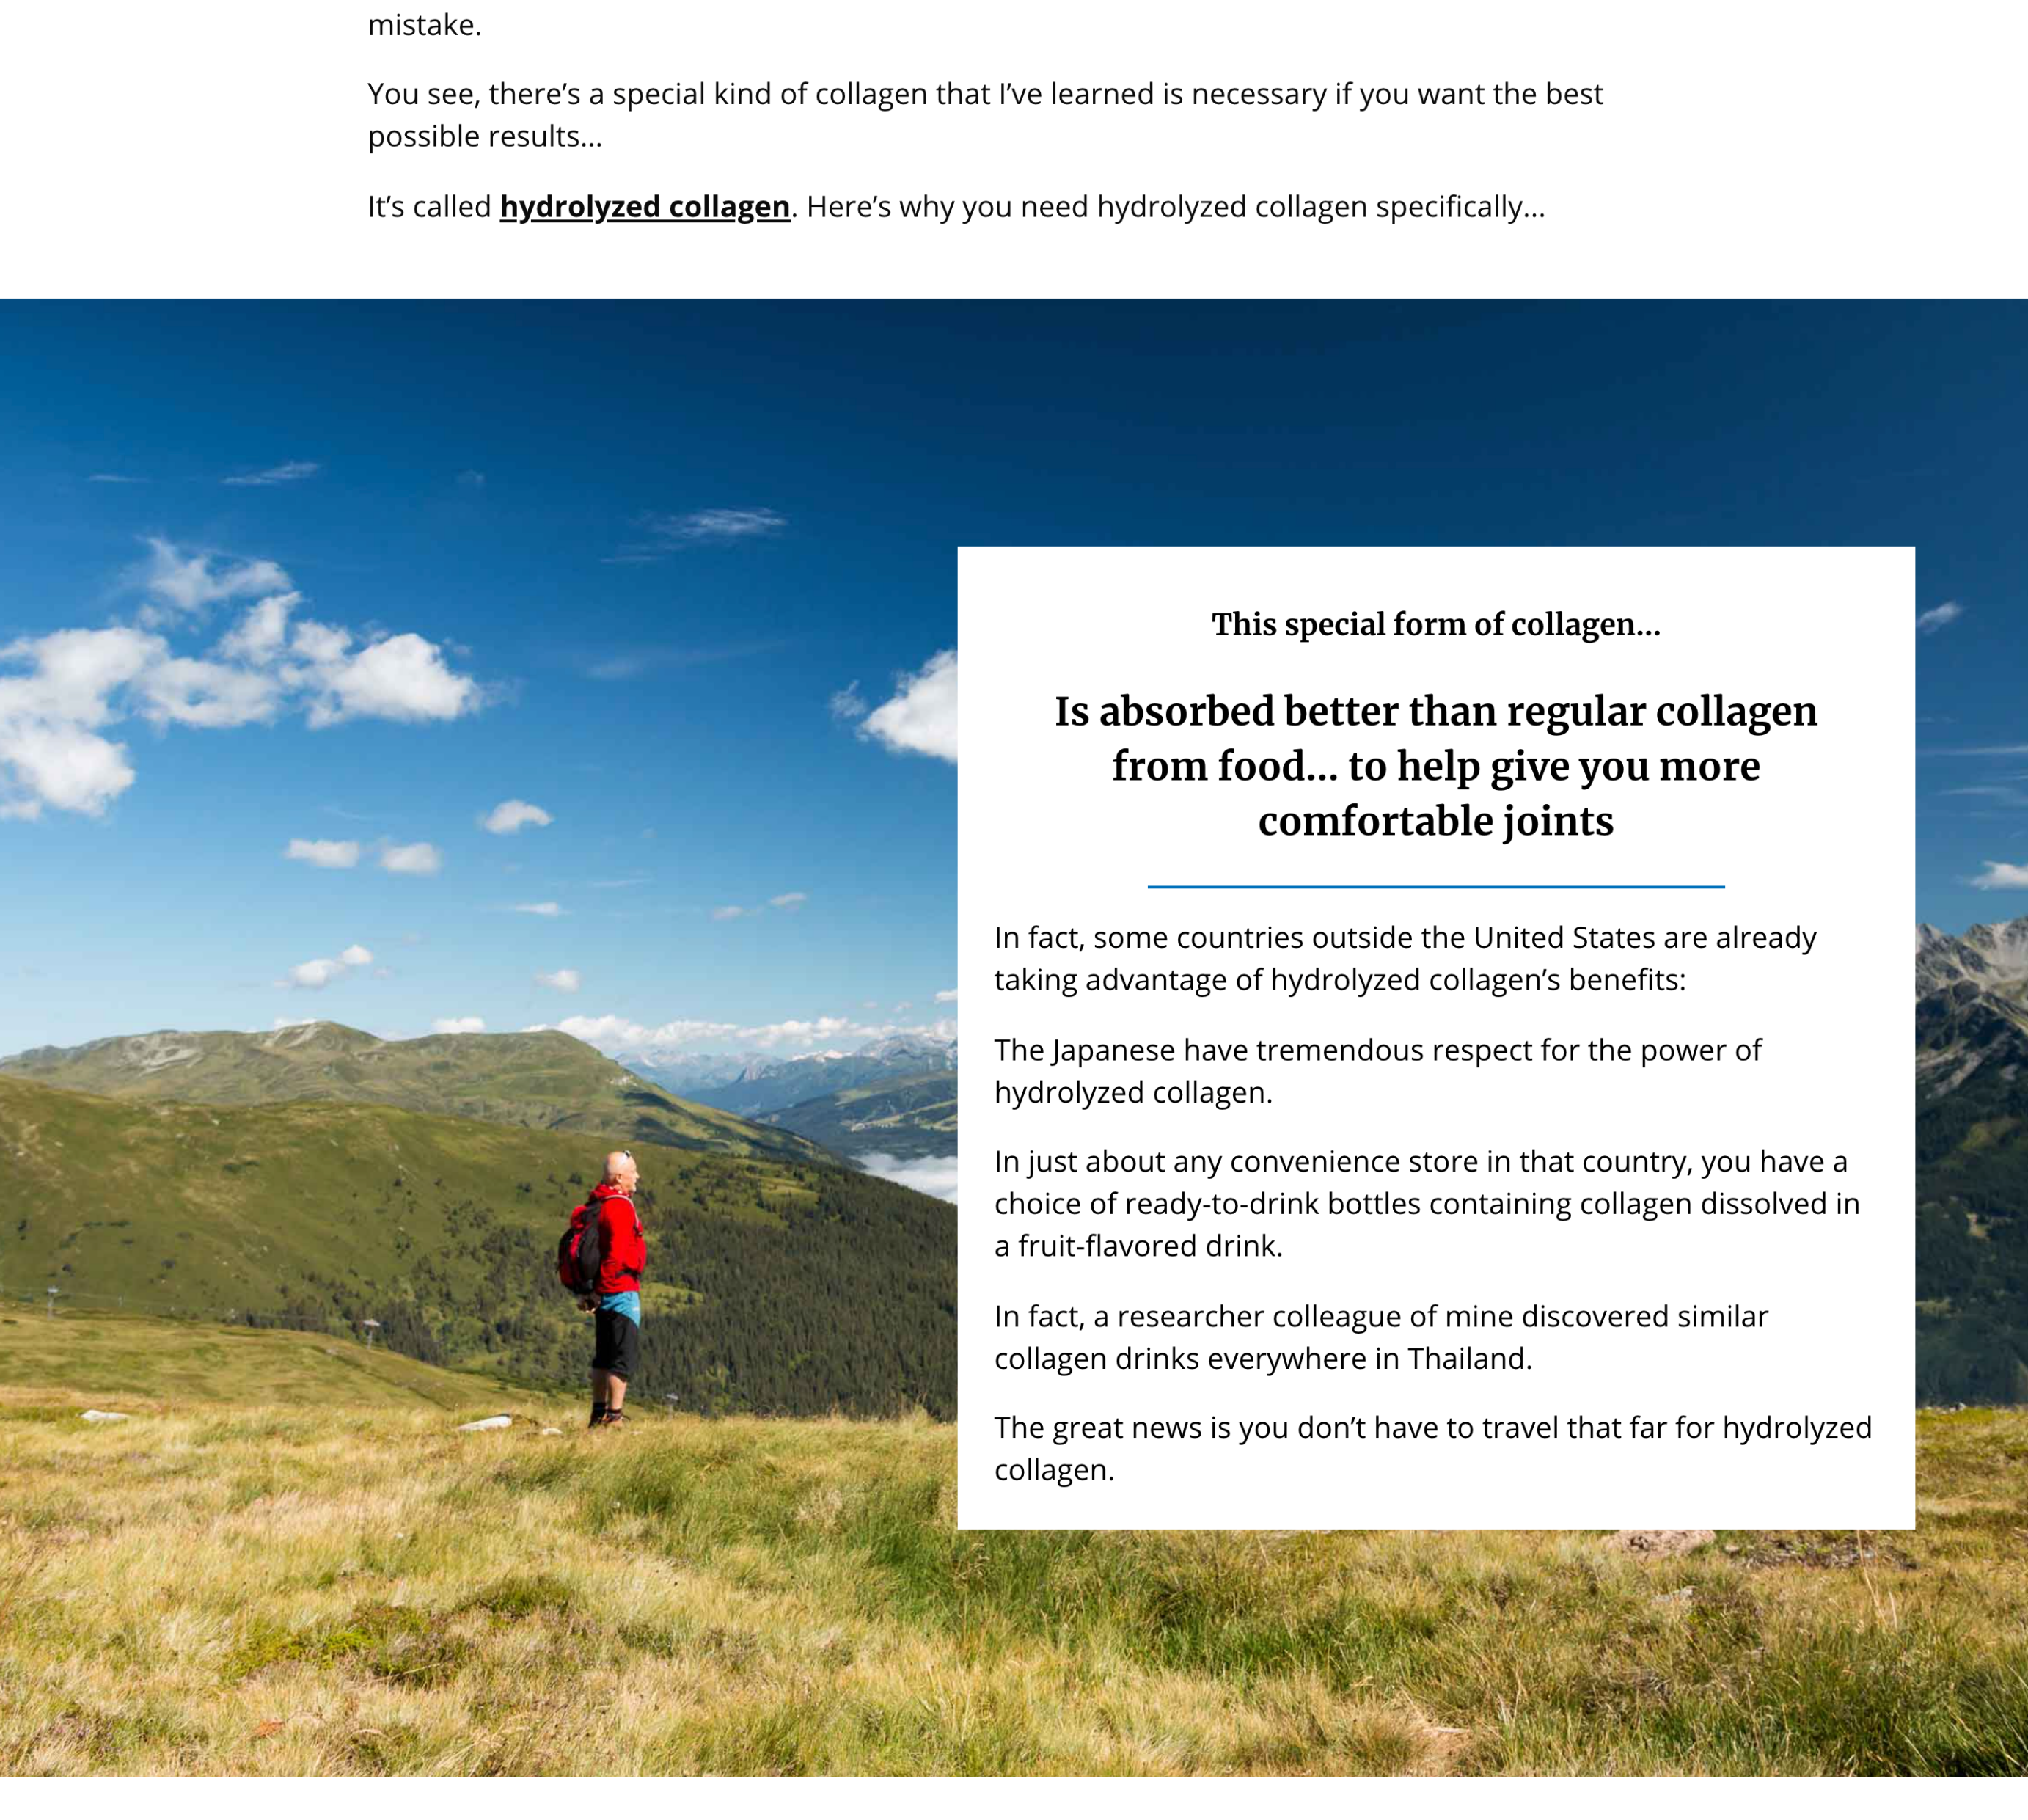
From there, it's transported to your joint cartilage, where it's absorbed into the extracellular matrix... supporting it and strengthening it.

Because of all you've just learned, it's easy to see why getting a full clinical dose of collagen is essential to keep your joints strong and healthy, and can help keep them comfortable.

But if you just take regular collagen, you're making a mistake.

You see, there's a special kind of collagen that I've learned is necessary if you want the best possible results...

It's called **hydrolyzed collagen**. Here's why you need hydrolyzed collagen specifically...



This special form of collagen...

Is absorbed better than regular collagen from food... to help give you more comfortable joints

In fact, some countries outside the United States are already taking advantage of hydrolyzed collagen's benefits:

The Japanese have tremendous respect for the power of hydrolyzed collagen.

In just about any convenience store in that country, you have a choice of ready-to-drink bottles containing collagen dissolved in a fruit-flavored drink.

In fact, a researcher colleague of mine discovered similar collagen drinks everywhere in Thailand.

The great news is you don't have to travel that far for hydrolyzed collagen.

I'll show you the best source in a moment

But first, I want to let you in on something amazing.

I've already told you how the right kind of hydrolyzed collagen can help improve cartilage repair in joints... helping them feel smooth and limber...

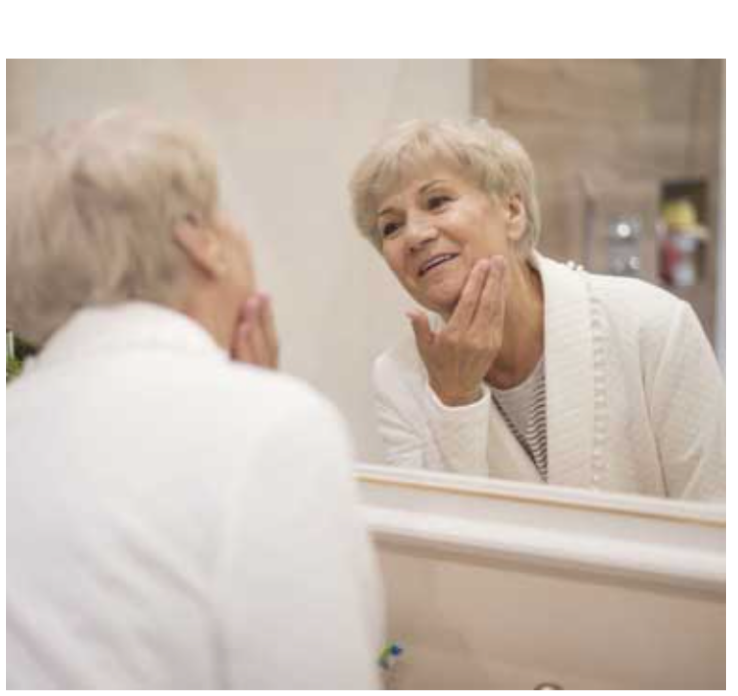
So you can do all the things in life you LOVE... without letting stiff, overworked joints ruin the fun...

But there's more than that. In fact, hydrolyzed collagen does more than just support the body's ability to regrow cartilage in your knees...

In fact, it can also help support health throughout your body.

Listen to this...

It helps promote healthy, younger-looking skin...



Studies show that just 30 days of collagen supplementation gave elderly women more elastic skin.

Its skin health benefits are, however, just the beginning: **It could make your hair the envy of all your friends...**

In a double-blind, placebo-controlled study, researchers from the Kitasato University School of Medicine gave women 5 grams of collagen every day for eight weeks.

And they found… after just eight weeks… the volunteers taking collagen **had thicker, more luscious hair**!

It gets even better… because another study showed that when elderly male volunteers were given either 15 grams of daily collagen combined with resistance training, or a placebo…

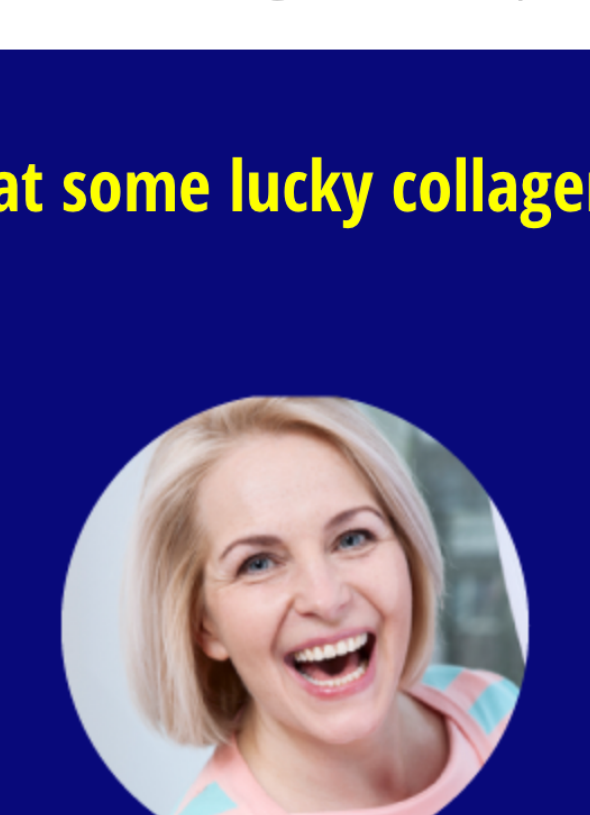
The men who got the collagen had stronger muscles and burned more fat

I've still just scratched the surface of how collagen can help support your health.

Just take a look at what some lucky collagen users have reported:

PREV

NEXT



I've been taking [this special collagen] nearly 2 years. My recent body X-ray was great with both my knees. My body has been repairing itself. My doctor was surprised and said that whatever I was doing to keep it up!

Hilda W., Baton Rouge, LA

Incredible, right? Are you ready to get started?

Well, before I reveal where to get this special hydrolyzed collagen, so you could begin experiencing the health-supporting benefits you heard about today, you need to understand…

The "catch" to collagen's astonishing benefits…

After learning how collagen can help so many parts of your body, you might be wondering if it's too good to be true. To be frank, there is some bad news.

Think right now about all the parts of your body you've learned collagen can help:

- **The bones in your arms, legs and torso…**
- **Your connective tissues supporting your muscles…**
- **Your skin…**

…The bottom line is, no teeny-tiny pill is going to contain enough collagen to cover everything.

Think of it like you're wandering in a desert, dying of thirst… and you come upon a single thimble full of water.

As nice as that is, it won't save you.

Same thing with collagen.

Which means I believe…

Some companies trying to sell you collagen in a pill are committing a scam I call "fairy dusting"

They're putting a fantastic ingredient into a product so they can brag about it on the label… but you never get enough of the product to actually help support your joints or skin.

I'm afraid some itty-bitty pill will never be enough…

Not a chance.

And if a company DID put enough collagen in pill form… you might have to choke down half a dozen horse pills per day, minimum!

So what's the solution?

The secret is contained in this glass:

Do you see it?

Probably not, even if you look closely.

I just took an ordinary glass of water, and mixed in the Gold Leaf Nutritionals' premier collagen supplement **RenewGen™**.

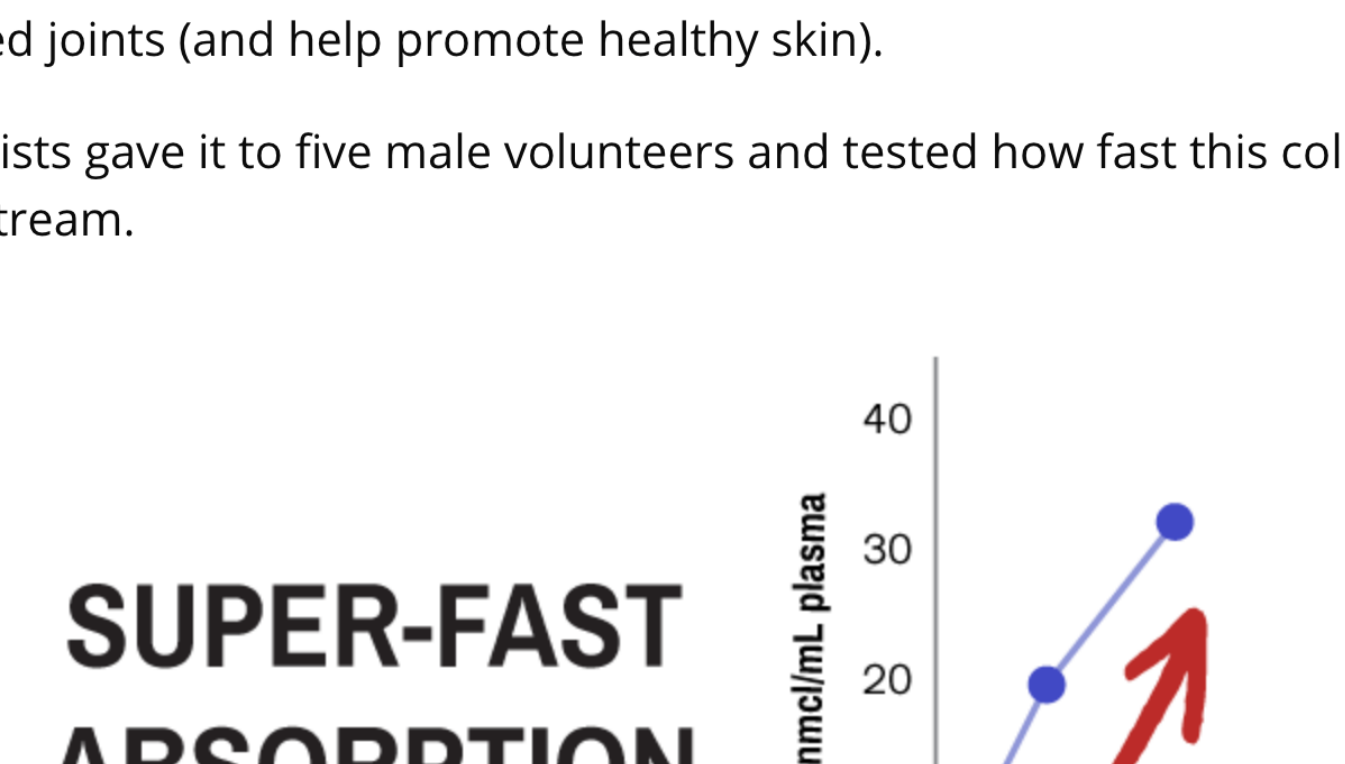
RenewGen consists of **the highest-quality hydrolyzed collagen** in powder form.

It's virtually:

- **Tasteless…**
- **Odorless…**
- **Easy to mix…**
- **Easy to digest. (It can even help your digestion.)**

And it conveniently delivers you the daily supply of hydrolyzed collagen you need to soothe your overworked joints (and help promote healthy skin).

Japanese scientists gave it to five male volunteers and tested how fast this collagen absorbs into the bloodstream.



They confirmed this bovine-based collagen delivers the joint- and skin-healthy amino acids straight to your bloodstream…

…beginning in less than one hour!

You can mix **RenewGen** into any liquid: coffee, juice, milk or water.

You can also add it to smoothies, soups and stews, or even add it to many of your favorite recipes!

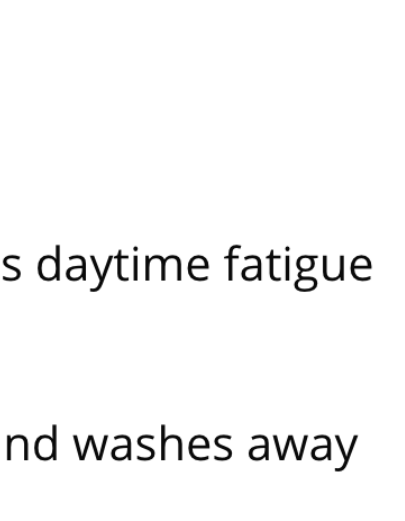
Because it's been hydrolyzed, the collagen dissolves into the liquid nearly instantly, with just a couple stirs of your spoon.

No pills and no chalky powder to choke down.

Plus, this is the best quality collagen I've ever found. It's natural and free from any additives or preservatives.

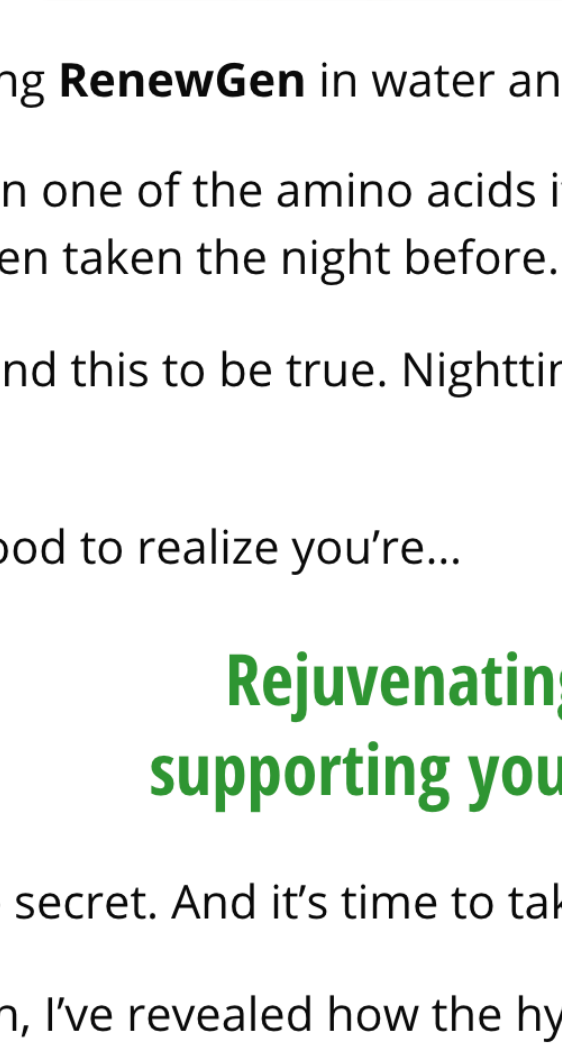
It's also non-GMO.

The hydrolyzed collagen in **RenewGen** is packaged in an NSF-certified GMP-compliant facility right here in the United States.



With **RenewGen** from Gold Leaf Nutritionals, you can be sure **you're getting the very best**.

In fact, here's a complete breakdown of the joint-healthy amino acids it contains:



Amino Acids
Typical mg/10g serving*

Alanine	950mg
Arginine	770mg
Aspartate	570mg
Glutamine	990mg
Glycine	2290mg
Histidine	60mg
Hydroxylysine	100mg
Hydroxyproline	1140mg
Isoleucine	130mg
Leucine	290mg
Lysine	360mg
Methionine	50mg
Phenylalanine	200mg
Proline	1320mg
Serine	310mg
Threonine	200mg
Tyrosine	20mg
Valine	240mg

*Amino Acid amounts may vary slightly with each batch of product

I recommend mixing **RenewGen** in water and drinking it right before bed.

Studies have shown one of the amino acids it contains — glycine — reduces daytime fatigue and sleepiness when taken the night before.

Personally, I've found this to be true. Nighttime collagen relaxes my mind and washes away daytime stress.

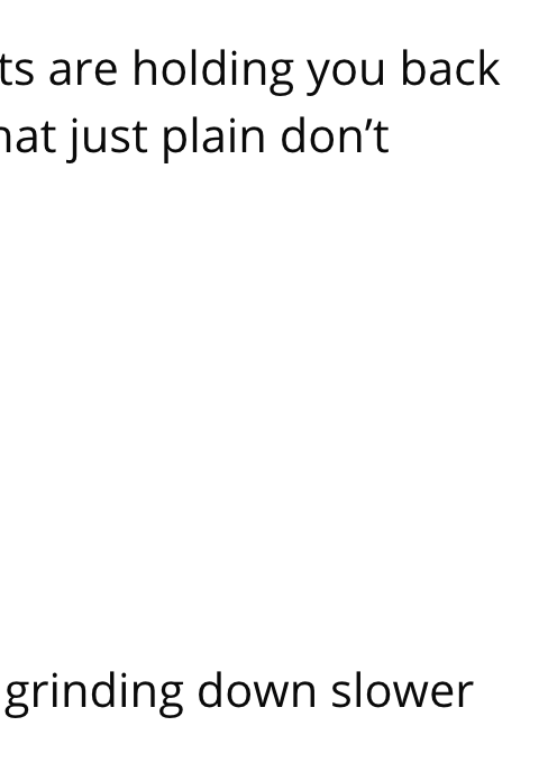
Plus, it just feels good to realize you're…

Rejuvenating your joints and supporting your skin as you sleep!

Now you know the secret. And it's time to take the next step.

In this presentation, I've revealed how the hydrolyzed collagen in **RenewGen** has been shown in a study to help support the body's ability to repair and regrow joint cartilage.

But that's just the beginning. Collagen also helps promote healthy…



- **Hair…**
- **Skin…**
- **Digestion…**
- **And more!**

It's the most important thing you can do for your joints… and your overall health.

And you've learned how average men and women, authors, doctors and even professional athletes are taking advantage of this nutrient.

If you're dragging, aching and frustrated with how your overworked joints are holding you back from doing everything you want, and you're sick and tired of solutions that just plain don't work…

I say to you…

"Join us!"

It starts with the choice you're facing now:

You can continue along the same path, your body's collagen production grinding down slower and slower, with your overworked joints feeling the effects as a result.

Or you can make the decision to try out **RenewGen**.

For less than the cost of a large coffee a day, this powerful breakthrough can start working its magic… **helping support your joints and promote healthy skin from the inside out.**

Your production of collagen starts to plummet around age 40. *But what if you got it back?*

How would it feel to have more flexible, comfortable joints like when you were younger?

With **RenewGen**, you don't have to resign yourself to feeling more aches and pains year after year…

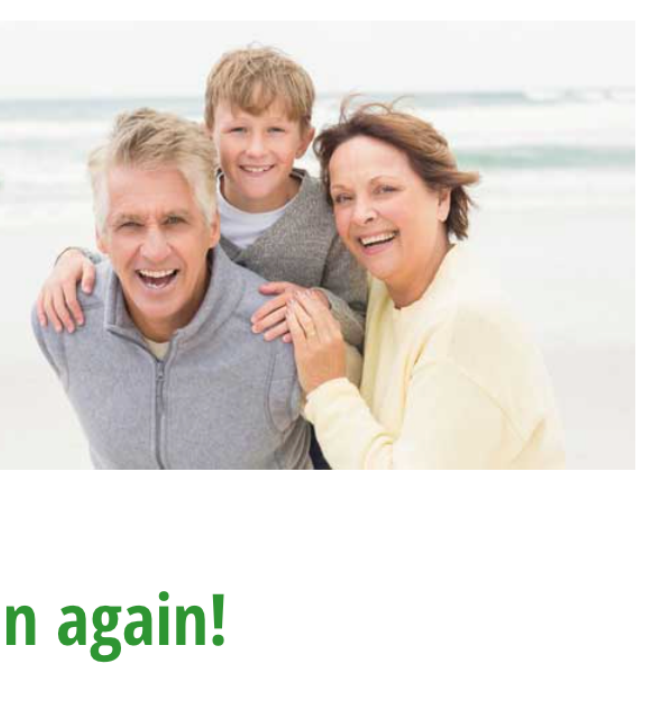
You don't have to put up with feeling more and more tired…

…and you don't have to accept looking and feeling old!

Imagine taking collagen before you go to bed… sleeping better throughout the night… and then, one day very soon…

You could have **your** moment.

It's when you wake up in the morning after a long day of gardening and… instead of seeing a tired-looking face in the mirror, your skin seems smoother and suppler than before!



Then, when you walk down those stairs… you pause at the bottom and realize, "Hey, I didn't feel any aching. That was EASY!"

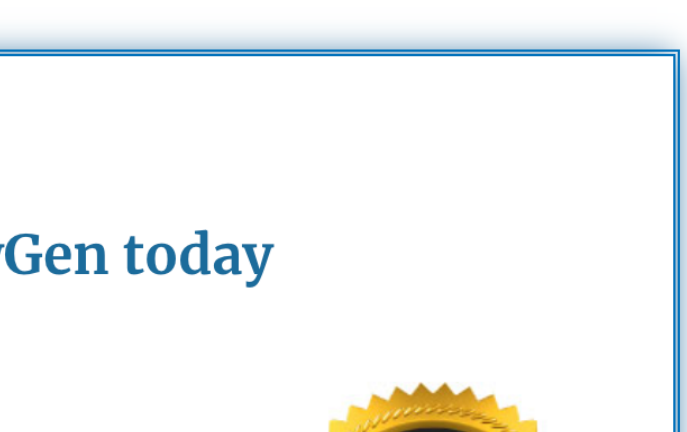
You bound right back up them again and still feel great. Then you start to think…

"What fun, exciting things do I want to do now that my joints feel better?"

Perhaps finally take that next fishing, hunting or hiking trip like you've been meaning to?

Start a new hobby or remodeling project?

Give that garden the TLC it needs?



Impress your friends with how energetic you are… *and how great your skin looks?*

Say "Yes!" to every invitation that comes your way?

Call up your kids and tell them, "Yes! Bring the grandkids over!" Or maybe drive over to surprise them instead?

Whatever your plans, you'll smile and chuckle as you realize…

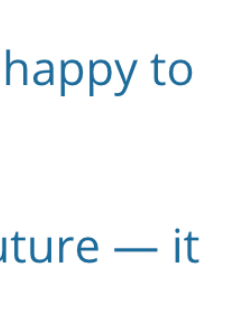
You've gone from hurting to having fun again!

RenewGen is likely different from anything else you've tried. It's better… stronger… and it works in a whole new way.

But you don't have to take my word for it.

I'm so confident this formula is going to work magic on your joints, I want you to try **RenewGen** with ZERO risk.

That's right… you have an unlimited guarantee when you try RenewGen today



Here's how it works:

Place an order for **RenewGen** today. You'll be shocked at how reasonable it is.

Then, when your supply arrives in a week or so, open it immediately.

Follow the instructions and start taking **RenewGen** daily.

Feel how it revitalizes your joints from the inside out.

Marvel at how it helps your joints feel smoother, more cushioned and with less discomfort.

You'll be amazed at how much better you feel. How much younger… *how much happier.*

But if, for any reason, you aren't 100% satisfied with the way you look and feel, simply give us a call and we'll give you back every penny, no questions asked.

Let me repeat that… for any reason at all, simply request a refund and we'll be happy to oblige.

And your guarantee NEVER expires. You can request a refund anytime in the future — it could be six months from now… a year… or even two!

This way, there's no pressure… **and no risk**… when you try **RenewGen** today.

So let's do this: Fill out your shipping information on the next page.

Once you do, we'll begin packing your shipment of **RenewGen** and then we'll rush it your way.

Before long, you'll receive a plain, brown box from USPS.

Carefully packed inside will be your initial supply of **RenewGen**.

I recommend you immediately bring your **RenewGen** supply into your kitchen, open it up…

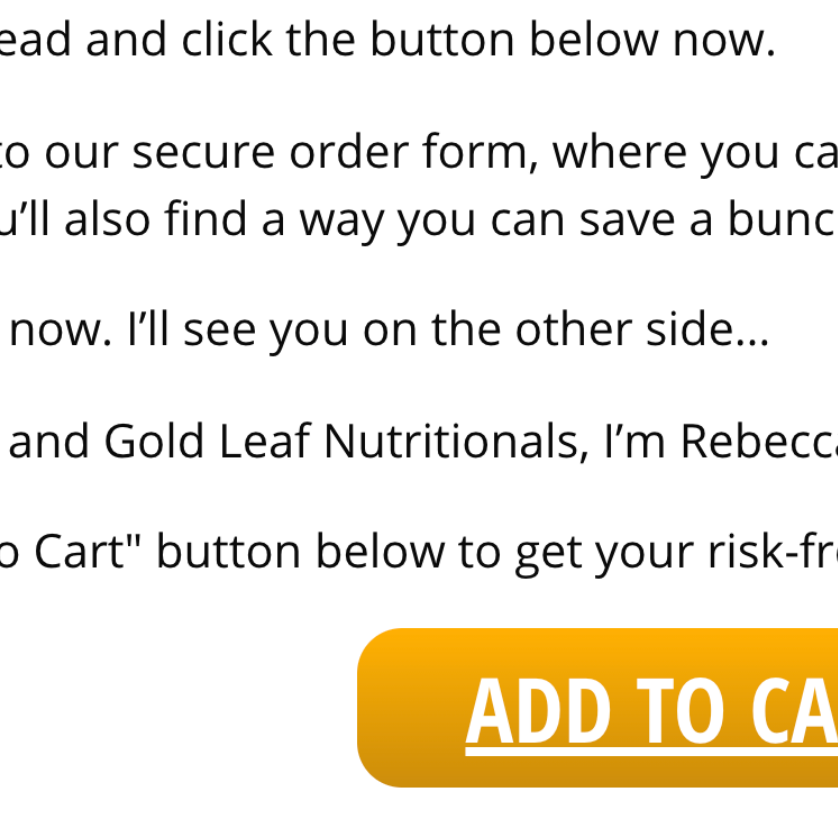
…and use the included scoop to measure your first dose into a glass of water or beverage of your choice.

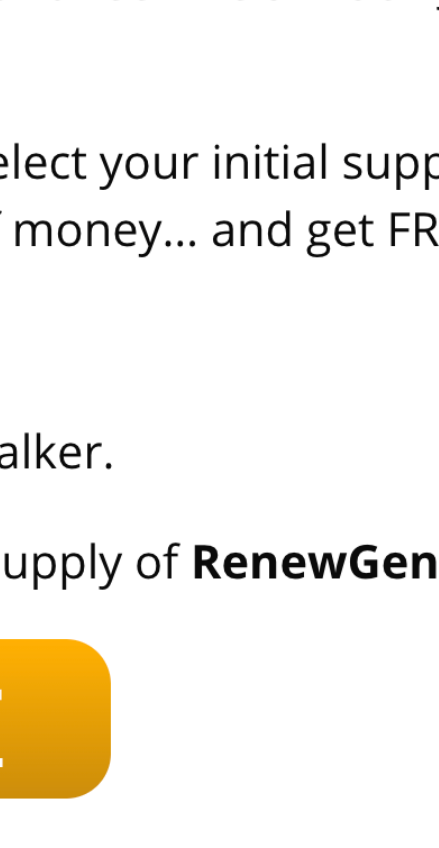
As you drink, you'll quickly realize how it's virtually tasteless, even in plain water.

Within just 60 minutes, the RenewGen will be absorbed…

It will begin to help support your cartilage from the inside out — **and wash your aches and pains away**.

Remember, you take no risk at all. Your satisfaction is ALWAYS guaranteed.





So if you're ready for joints that are smooth, comfortable and feel like a much younger version… go ahead and click the button below now.

It will take you to our secure order form, where you can select your initial supply of **RenewGen**. You'll also find a way you can save a bunch of money… and get FREE shipping.

But do click the now. I'll see you on the other side…

For **RenewGen** and Gold Leaf Nutritionals, I'm Rebecca Walker.

Click the "Add to Cart" button below to get your risk-free supply of **RenewGen** now.
