America REBORN

One unstoppable trend is set to create 818,236 new millionaires over the next three years...

Those who get left behind could slide into poverty...

A nightmare has swallowed America.

The political system...the financial system...health care...our sense of community — it's *all* fracturing.

Every bedrock pillar of American life has broken down right before our eyes.

If you're wondering, "What on earth is happening?"

You're not alone.

Massive changes are already underway.

And a new system is taking hold.

All thanks to one revolutionary technology.

As you'll see today, the very foundation of finance, politics, and our economy is about to be "reborn" before your eyes.

That's why I've recorded this message.

To make sure you're ready for the next Big Transition.

Most people — including our leaders — have failed to notice.

Or perhaps, they just don't care.

If you're worried for America's future, pay close attention...

In my 30 years working at the highest level of the financial world...

I've never seen anything like this.

Not the devastating dot-com bust... not the 2008 Great Recession...

Today, we're not JUST facing a financial reckoning...

And a health crisis...

And a cultural crisis...

Something much *more important* has collapsed.

Americans have lost faith in:

The government... The news media... Our schools... and big "household name" businesses...

> "Americans' distrust in media at alarming levels"
>
> —Washington Times

Today, fewer than 1-in-5 people say they're proud to be American...

And this crisis of faith is shaking America to its core.

> "How Did Americans Lose Faith in Everything?"
>
> —New York Times

While the virus and riots have drawn most of the attention...

The roots of this problem go much deeper...

Trust in our institutions has been crumbling for decades.

> "How Americans Lost Trust in Our Greatest Institutions"
>
> —The Atlantic

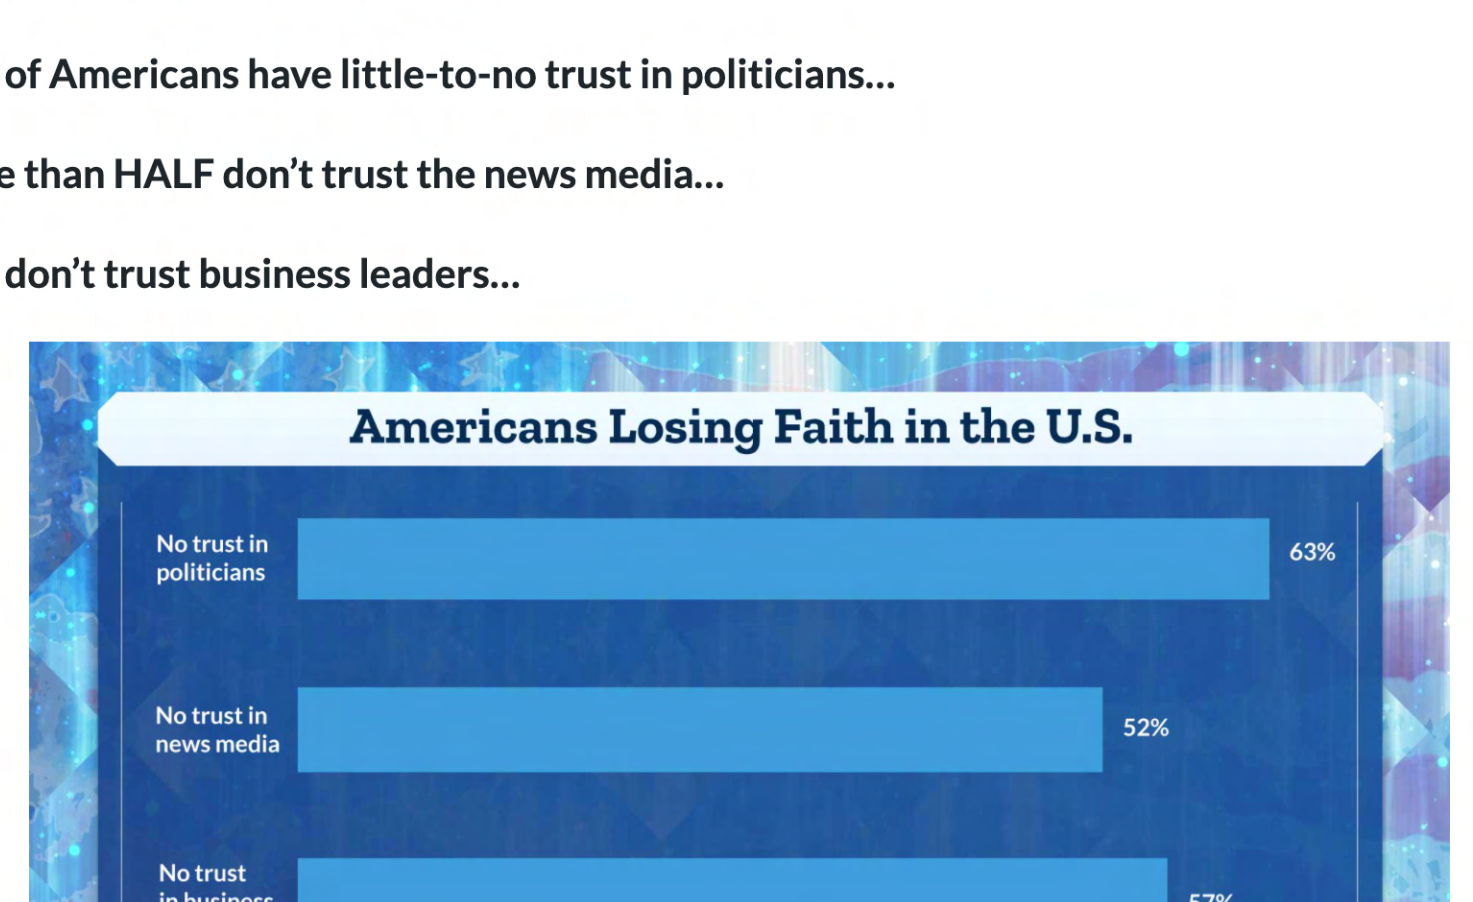
It's no wonder the system looks like it's falling apart.

According to a recent Gallup poll...

63% of Americans have little-to-no trust in politicians...

More than HALF don't trust the news media...

57% don't trust business leaders...



It's the sad truth.

But can you blame them?

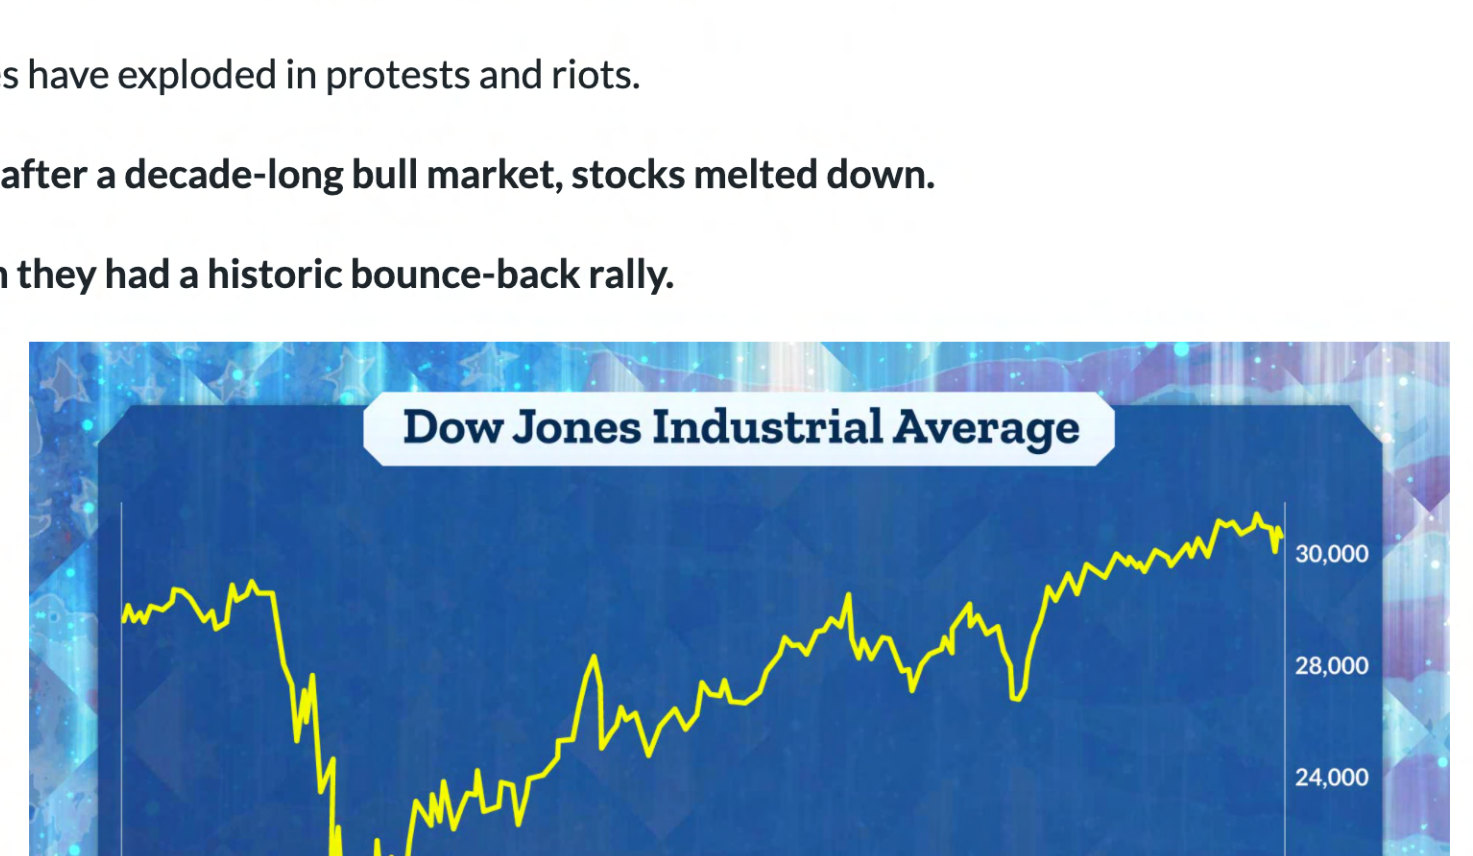
Tens of millions of Americans have lost their jobs.

Unemployment has climbed to Great Depression levels.

Cities have exploded in protests and riots.

And after a decade-long bull market, stocks melted down.

Then they had a historic bounce-back rally.



In order to survive these turbulent times...

America *must* adapt.

YOU and I *must* adapt.

If you are among the few who understand what's happening, you have nothing to fear.

You have everything to gain.

Today, I'll reveal the steps you need to take.

This is the story no one's telling.

The left says capitalism's the problem.

The right is sick of political correctness.

Both groups miss the *real reason* behind these sweeping changes...

The *real reason* is much more terrifying...

A new force is ripping through our economy.

And those who see what's coming will have the chance to jump on the opportunity of a lifetime.

Because if you can embrace this new force...

As I'll show you today, it could transform 800,000 folks into new millionaires...

You could be one of them.

How do I know?

I'm living proof.

My name is Teeka Tiwari...

And I owe my success to America.

As you can hear from my accent, I wasn't born here. I grew up in Britain's foster care system.

I lived in a cramped, unheated room on top of a garage. At night, I watched my breath coil into a frigid mist.

I knew in my heart: 'there has to be more to life than this.'

So when I turned 16, I left for America. With $150 in my pocket, I set off to New York City.

What I found changed my life forever.

Enormous opportunity, obscene luxury and bottomless wealth...

Right beside crippling poverty.

I landed my first job flipping burgers at a Roy Rogers. I got another gig bagging groceries. I worked at a newsstand and a loading dock. And boy, was it brutal — I worked 12-hour days, 7 days a week.

Luckily, one of the guys I worked with knew someone on Wall Street...

I managed to get my foot in the door. And within 2 years of landing in America, I went from the loading dock to an entry-level position at Shearson Lehman.

By age 20, I became the youngest VP in the firm's history.

But the higher I rose through the ranks...the wealthier I got...

The more I noticed the widening gap between the elite and regular folks.

All my hard work had done was help make the super-rich *even richer*.

While almost everyone else got left behind.

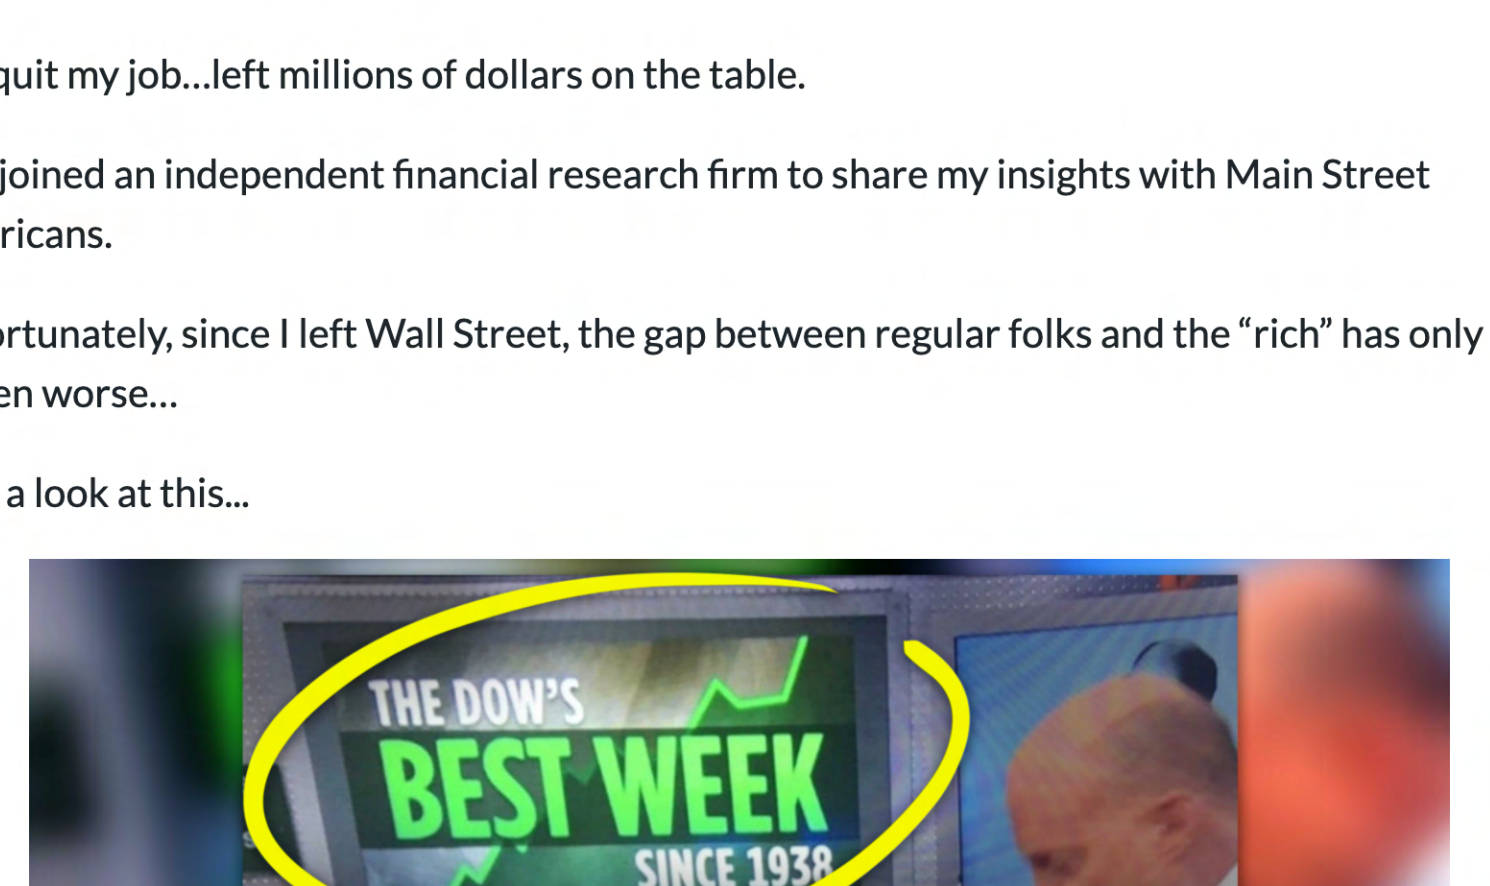
Since I grew up with nothing, this divide hit me HARD.

So I quit my job...left millions of dollars on the table.

And joined an independent financial research firm to share my insights with Main Street Americans.

Unfortunately, since I left Wall Street, the gap between regular folks and the "rich" has only gotten worse...

Take a look at this...

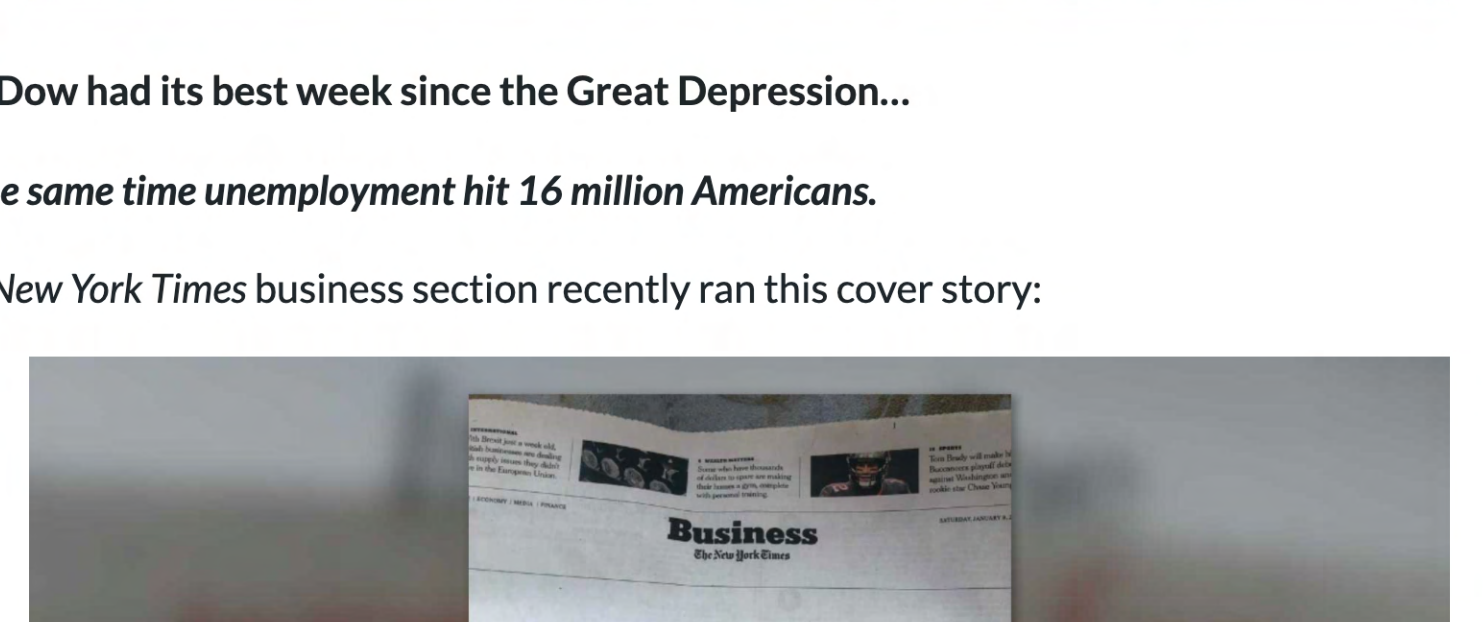


THE DOW'S BEST WEEK SINCE 1938
MORE THAN 16M AMERICANS HAVE LOST JOBS IN 3 WEEKS

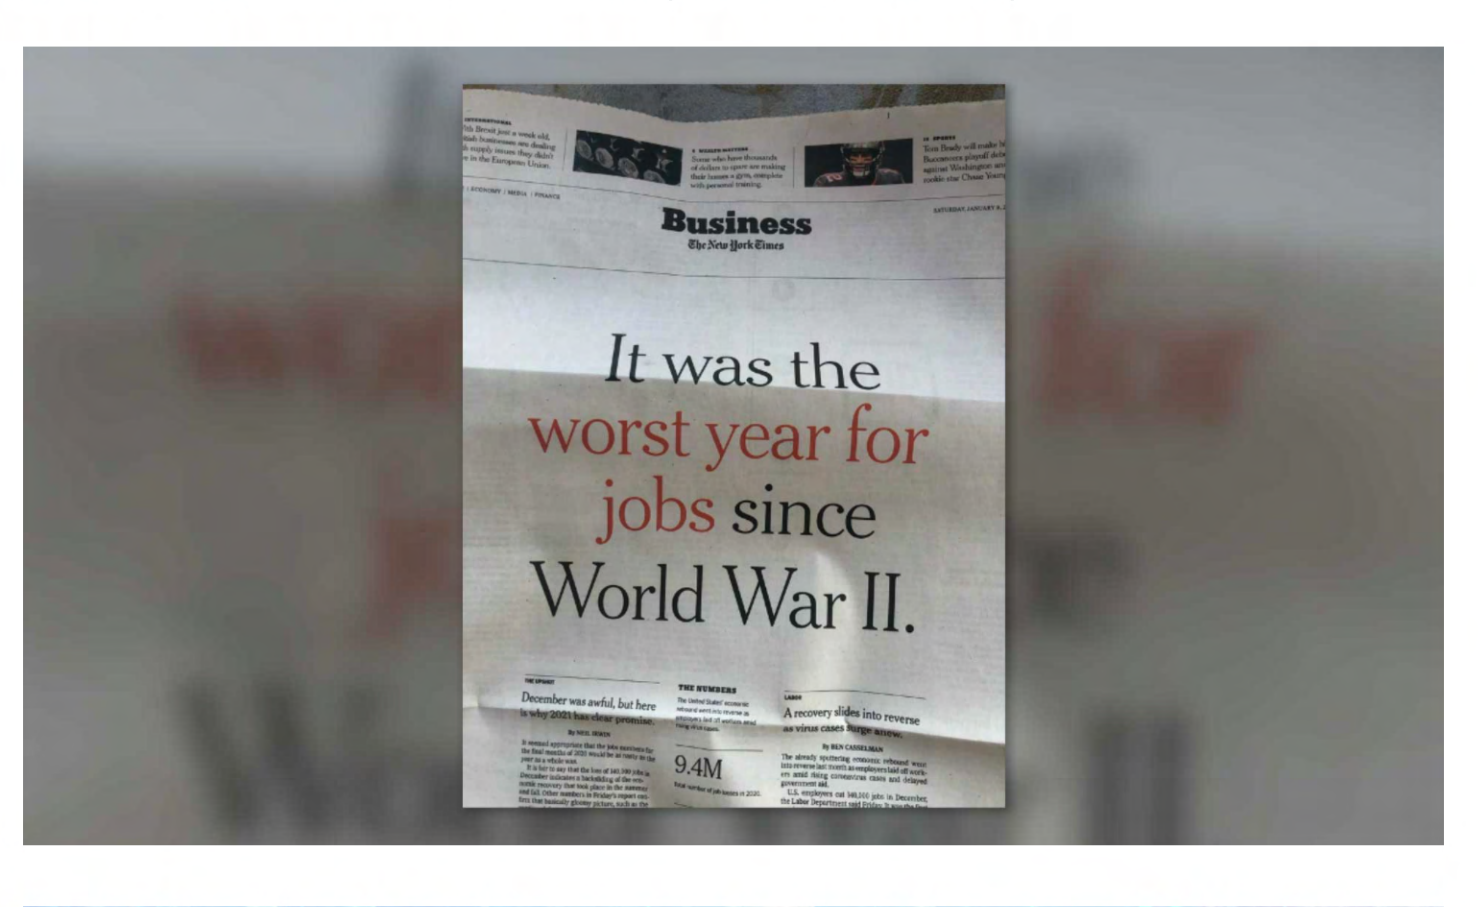
The Dow had its best week since the Great Depression...

At the same time unemployment hit 16 million Americans.

The New York Times business section recently ran this cover story:



Business
It was the worst year for jobs since World War II.

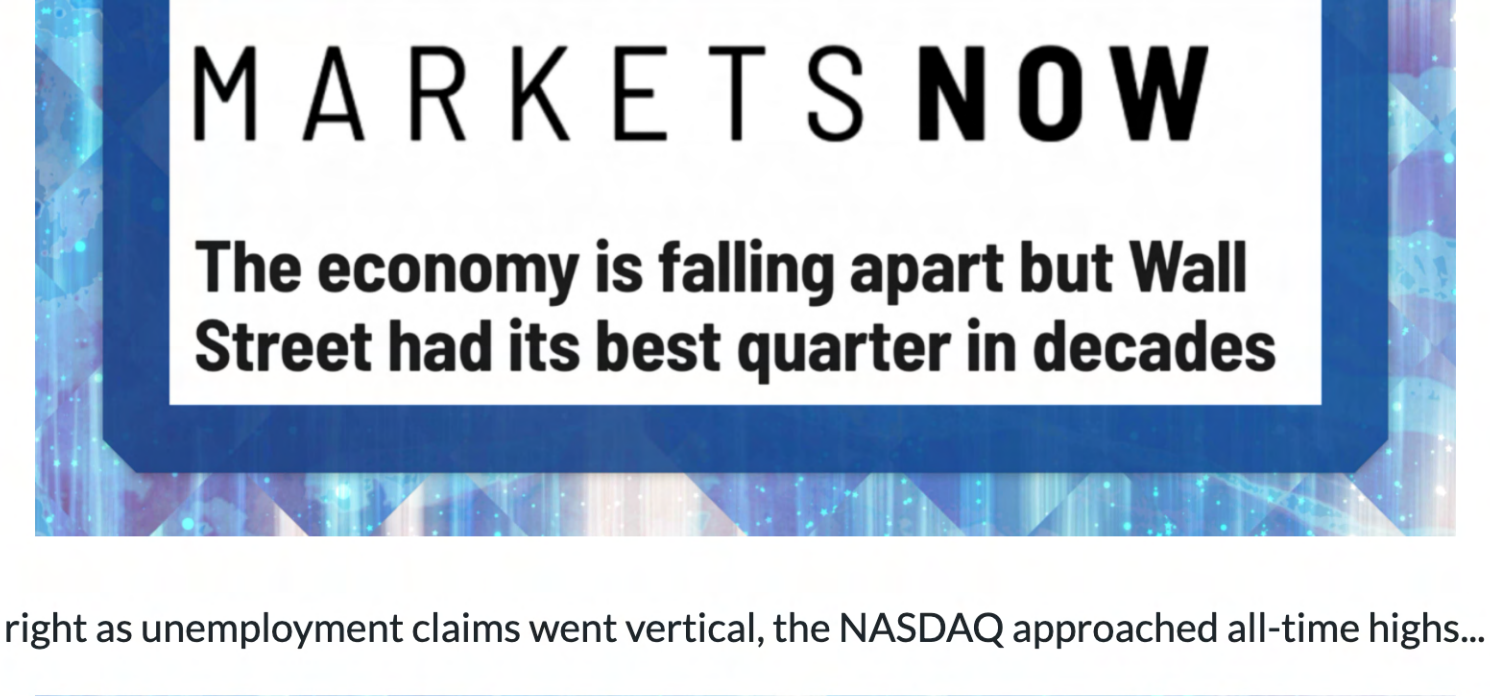


CNN BUSINESS • LIVE TV

MARKETS NOW

The economy is falling apart but Wall Street had its best quarter in decades

And right as unemployment claims went vertical, the NASDAQ approached all-time highs...



It doesn't take a genius to see something is wrong with this.

And no one out there can wave a "magic wand" to fix it.

If anyone tells you they can — run.

Friend, there's only one thing you can do... *Take control of your own actions.*

And, as much as I wish it weren't true...

My research shows the widening wealth gap will get worse.

For instance, did you know the top 0.1% controls as much wealth as the bottom 90%?

> "US Wealth Inequality: Top 0.1% Worth as much as the Bottom 90%"
>
> —National Bureau of Economic Research

And they've TRIPLED their wealth since I started working on Wall Street in the '80s.

Which means you have a simple choice to make...

You can get mad.

Or you can take a few simple steps I will share with you today — to forever bridge the wealth gap for you... your kids and grandchildren.

As you'll see, the very foundations of our economy and politics will be "reborn."

Right before your eyes.

I'm going to show you why I believe 800,000 ordinary Americans — people who've been brushed aside — now have a chance to become new millionaires.

And that includes you.

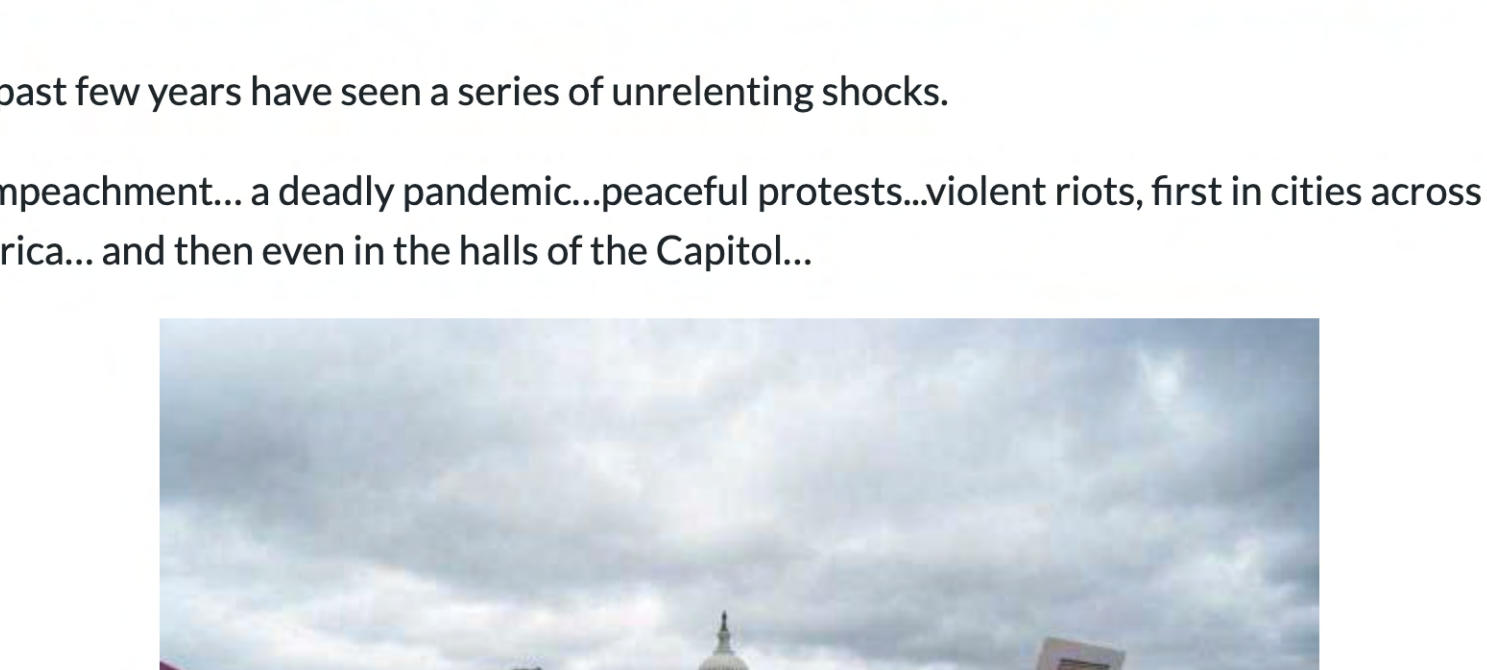
Thanks to my research — which I'm going to share with you today absolutely free — I've already shown a small group of people how to become new millionaires.

People like BJ.

I'll share her story in a moment...

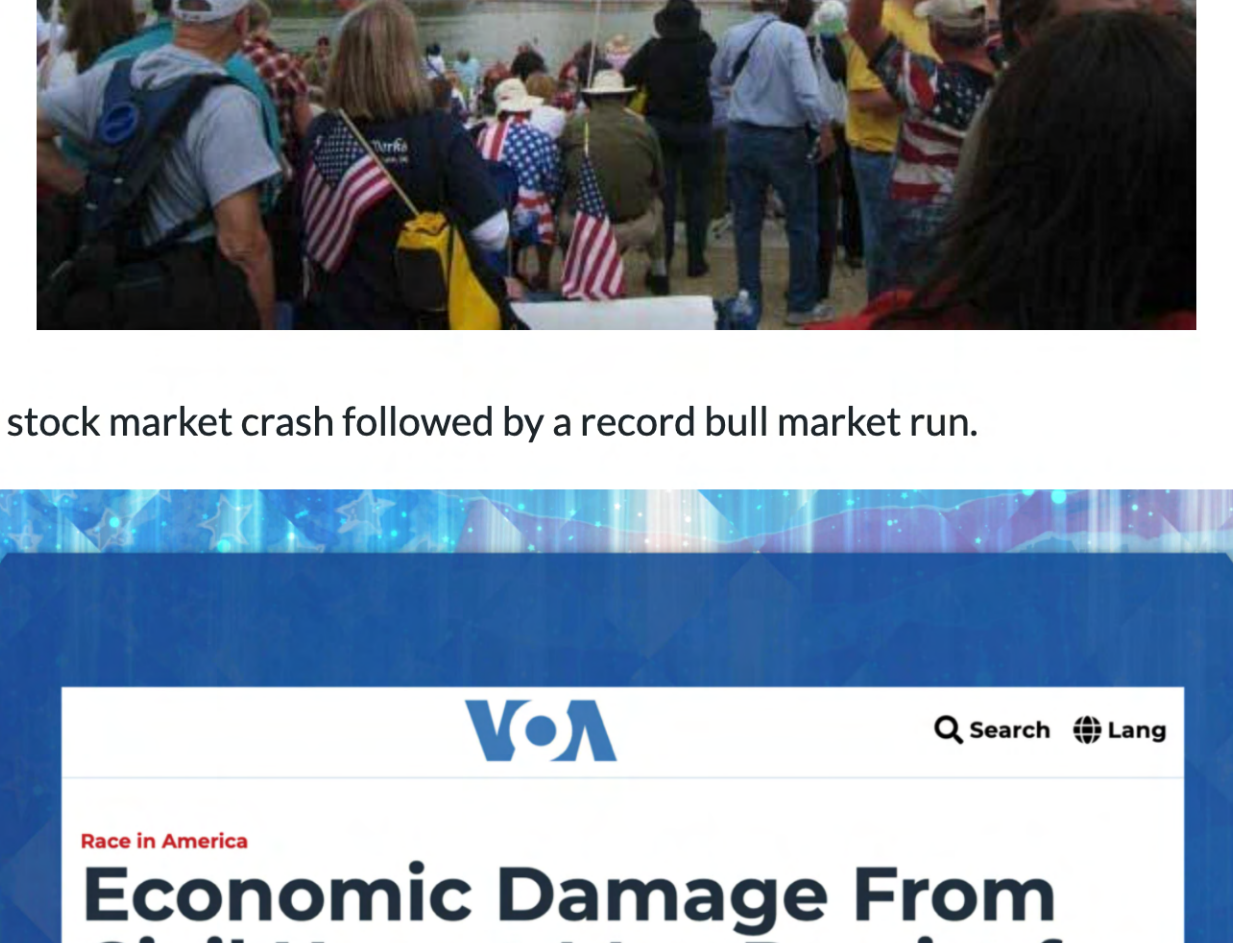
But first, let me show you...

What happens when the wealth gap spirals out of control...

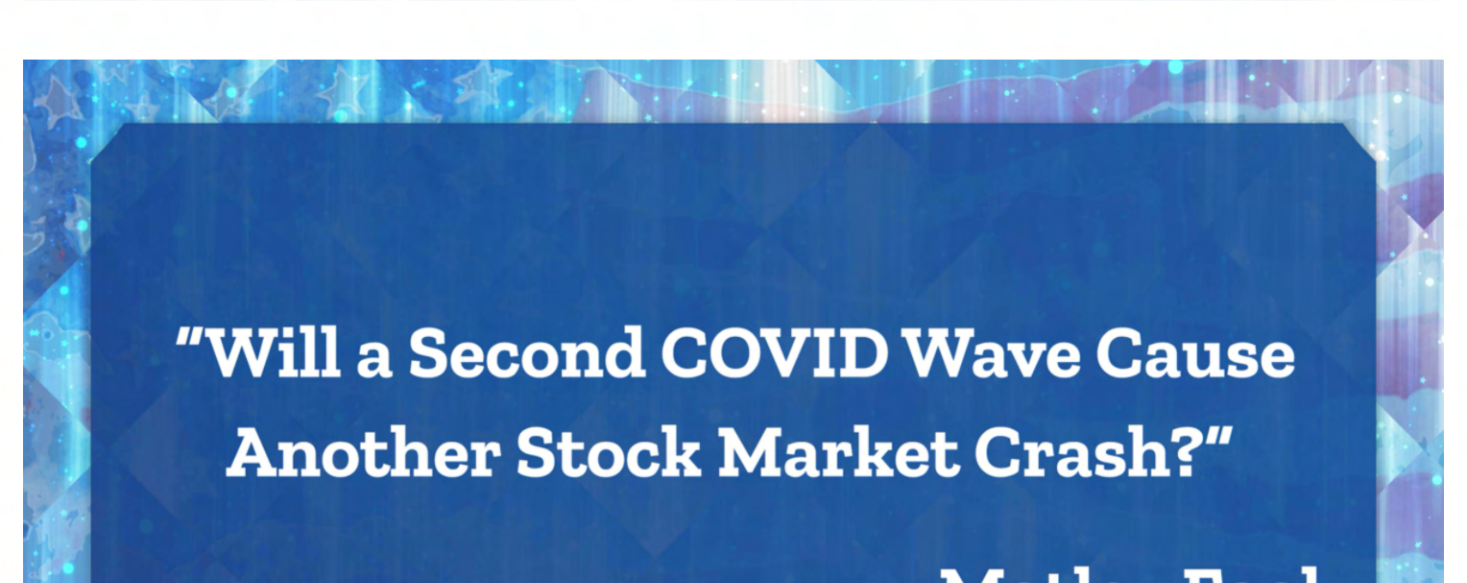


The past few years have seen a series of unrelenting shocks.

An impeachment... a deadly pandemic...peaceful protests...violent riots, first in cities across America... and then even in the halls of the Capitol...



And a steep stock market crash followed by a record bull market run.



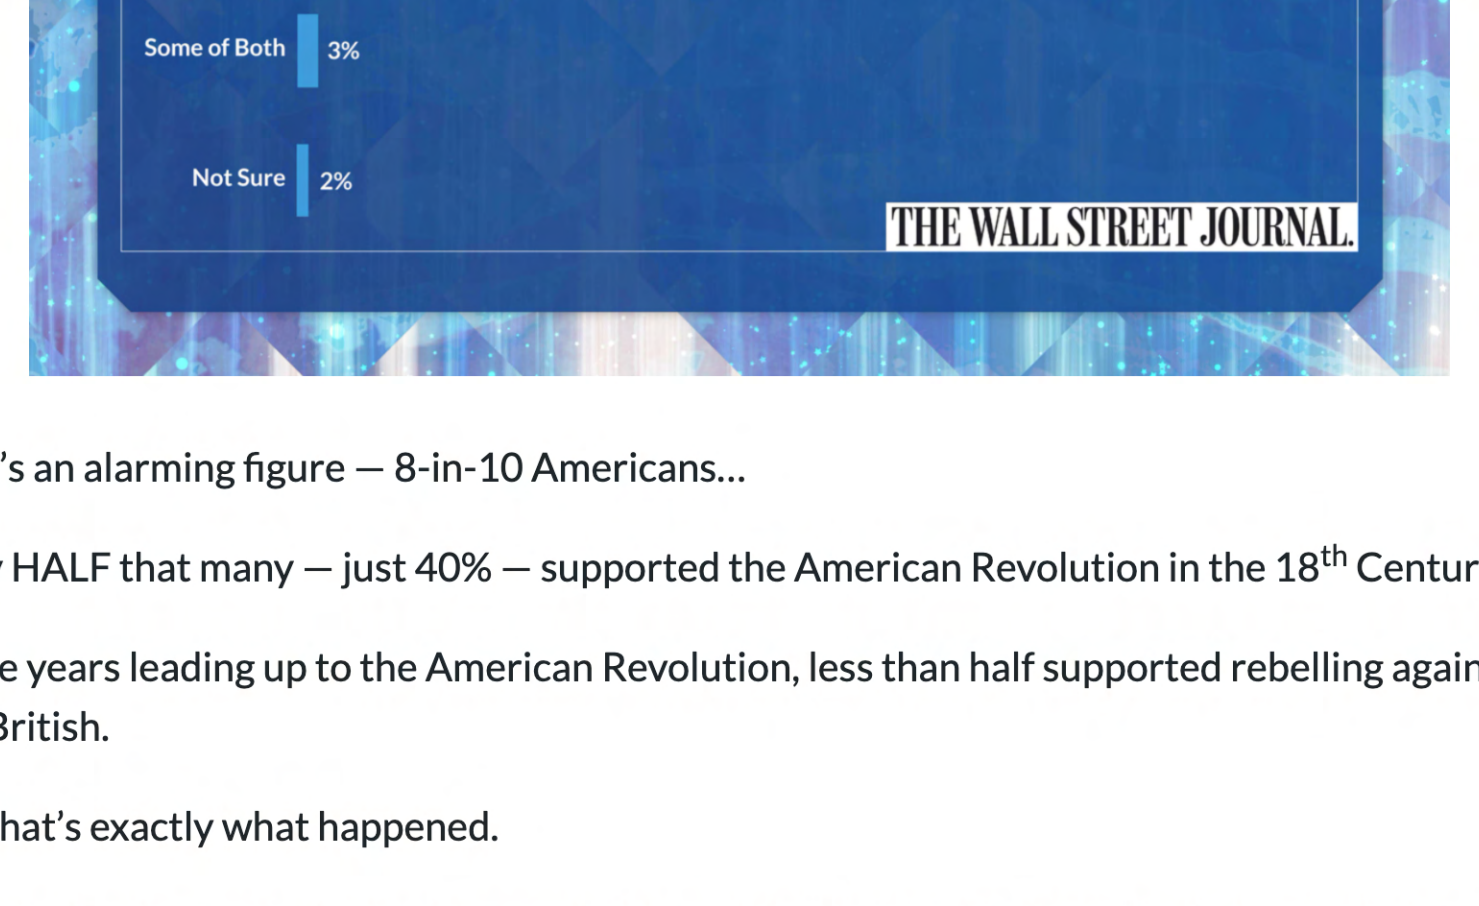
Race in America

Economic Damage From Civil Unrest May Persist for Decades

> "Will a Second COVID Wave Cause Another Stock Market Crash?"
>
> —Motley Fool

When the *Wall Street Journal* recently asked readers: "How do you feel things are going?"

It was no surprise when a stunning 80% majority responded:



That's an alarming figure — 8-in-10 Americans...

Only HALF that many — just 40% — supported the American Revolution in the 18th Century.

In the years leading up to the American Revolution, less than half supported rebelling against the British.

Yet that's exactly what happened.

Seemingly minor acts like Paul Revere's ride and the Boston Tea Party ignited a revolution.

A small group of colonies took on Great Britain, the most powerful empire in the world...

And they won!

America was born.

Today, you may hear people say a revolution like this could never happen again...

And yet the facts are clear...

It's already started.

We're witnessing a tectonic shift...

A move to "opt-out" of the old system and "*opt-in*" to a whole new system.

Most Americans have no idea this monumental shift is happening...even though they can feel it in their bones.

They see the wild headlines...chaos in the streets and in Washington, D.C. — and they hope law and order will return to this country.
They see the breakdown of the economic system, and hope that a better, more honest system will take root.

And I assure you, it will.

The sun will shine again.

The framers of our Constitution will finally stop "spinning in their graves."

And a new system will emerge...

America will be reborn.

Reborn as something stronger...and something better...

A new era of freedom and prosperity will begin.

All thanks to one revolutionary new technology that will deliver power — *and wealth* — back to Main Street.

And whether you're ready to hear it or not...

The Turning Point Has Already Begun

Friend, the uncomfortable truth is...

People who don't see this shift coming will soon wake up and realize just how far they've been left behind.

You're witnessing the birth of a radically different world...

All thanks to a new, technological breakthrough...

Brought about by the third huge Technological Revolution in human history.

Let me show you what I mean.

Throughout history, we've operated under a number of different "systems."

Each one became obsolete with the discovery and invention of new technology.

Let's look back through history, so you can see just how powerful these technological shifts can be…

Before the Middle Ages, our ancestors lived as hunter-gatherers. People moved around constantly, following the herds that kept them alive.

Then, man learned how to farm and how to domesticate animals.

This breakthrough completely reshaped the world.

With modern agriculture — horses, plows, irrigation and sturdy crops — we could finally settle down and focus on more than basic survival.

Towns and cities sprung up. Society and culture came to life.

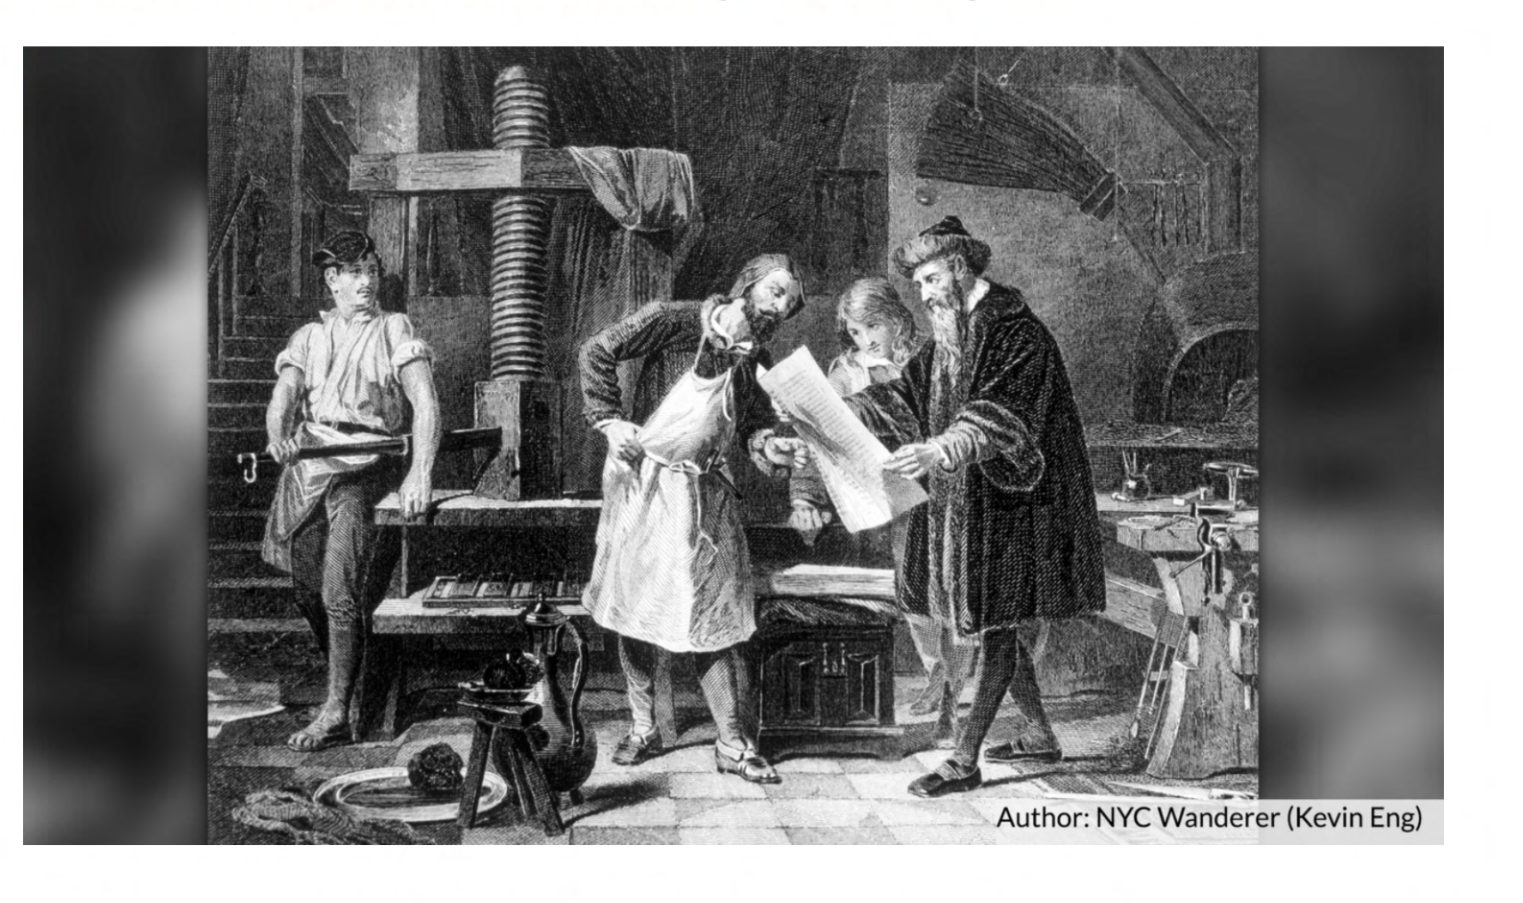
In short, one revolutionary technology — modern agriculture — helped man settle down in one place.

And that step forward made wealth creation possible.

> "The domestication of cattle and horses created the ancient equivalent of today's island-owning, jet-setting billionaires"
>
> —The Observer

Centuries after the agricultural revolution, democracy was born.

All thanks to yet another innovative technology: the printing press.



Author: NYC Wanderer (Kevin Eng)

Before the printing press, the few educated scholars and monks had to copy books by hand.

One book cost as much as a house.

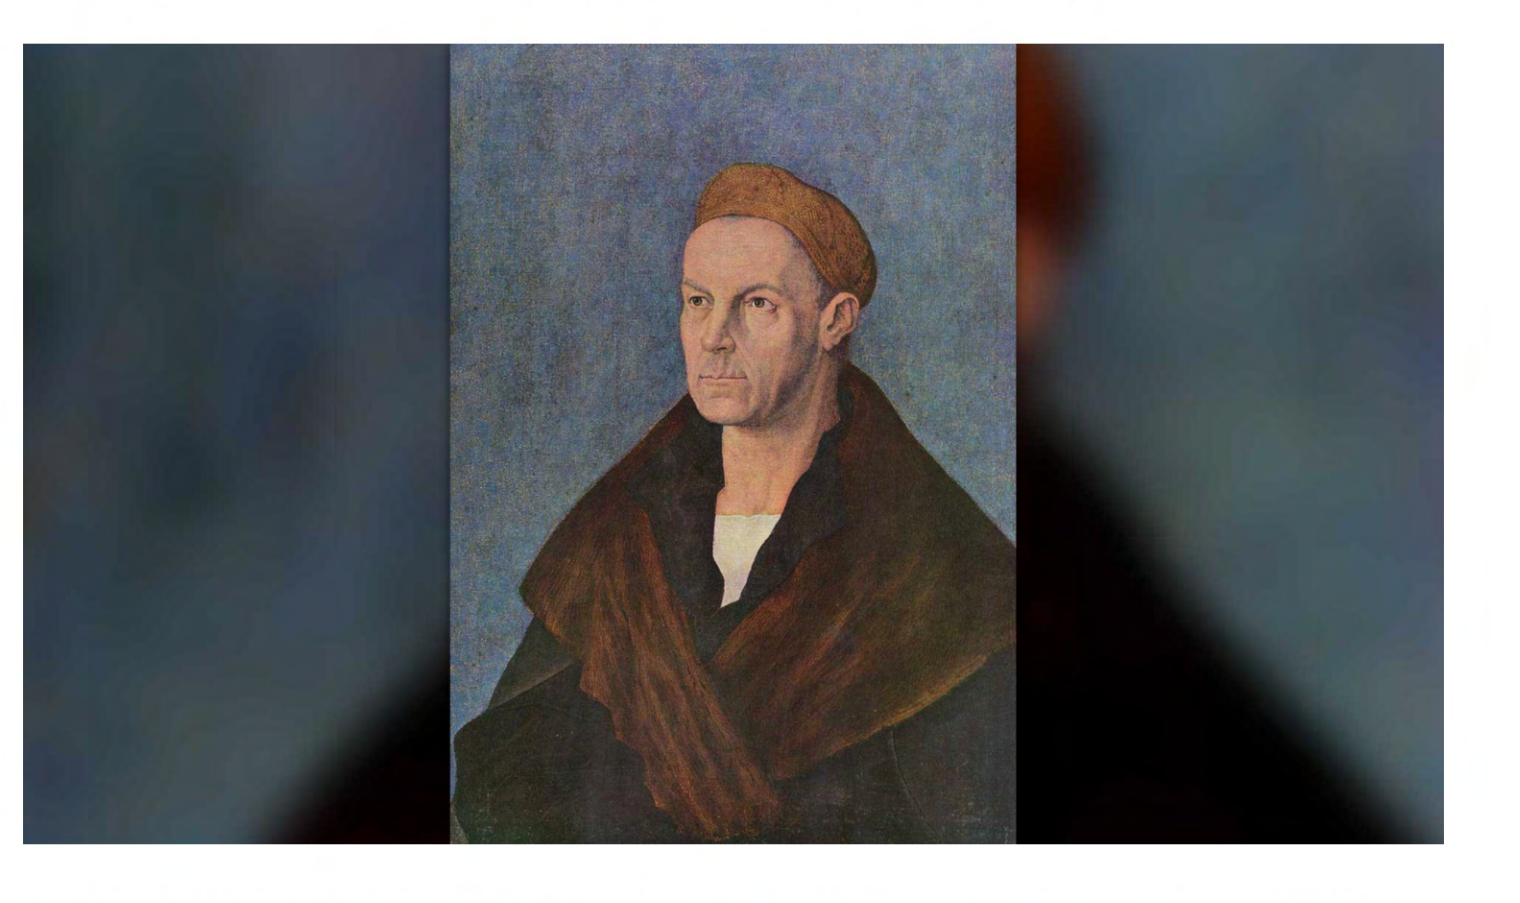
But thanks to the printing press, books and newspapers could be made quickly. And cheaply.

Literacy blossomed and education spread to the masses. Then came the Renaissance.

Without the printing press, we may have never witnessed the Renaissance.

The Renaissance ushered in some of the greatest fortunes in human history. The Medici family accumulated $129 billion in wealth.

And then there's Jakob Fugger, a merchant's son who built up the biggest fortune in world history — $400 billion worth — by financing kings, explorers and popes.



The benefits of the printing press and the Renaissance passed to everyone — not just the wealthy.

Finally, the working class could get an education. The common man gained powerful knowledge previously reserved for kings, nobles and priests.

And with knowledge came independence. Inevitably, power grew from that independence.

Democracy was born.

America was born.

And look at America now…

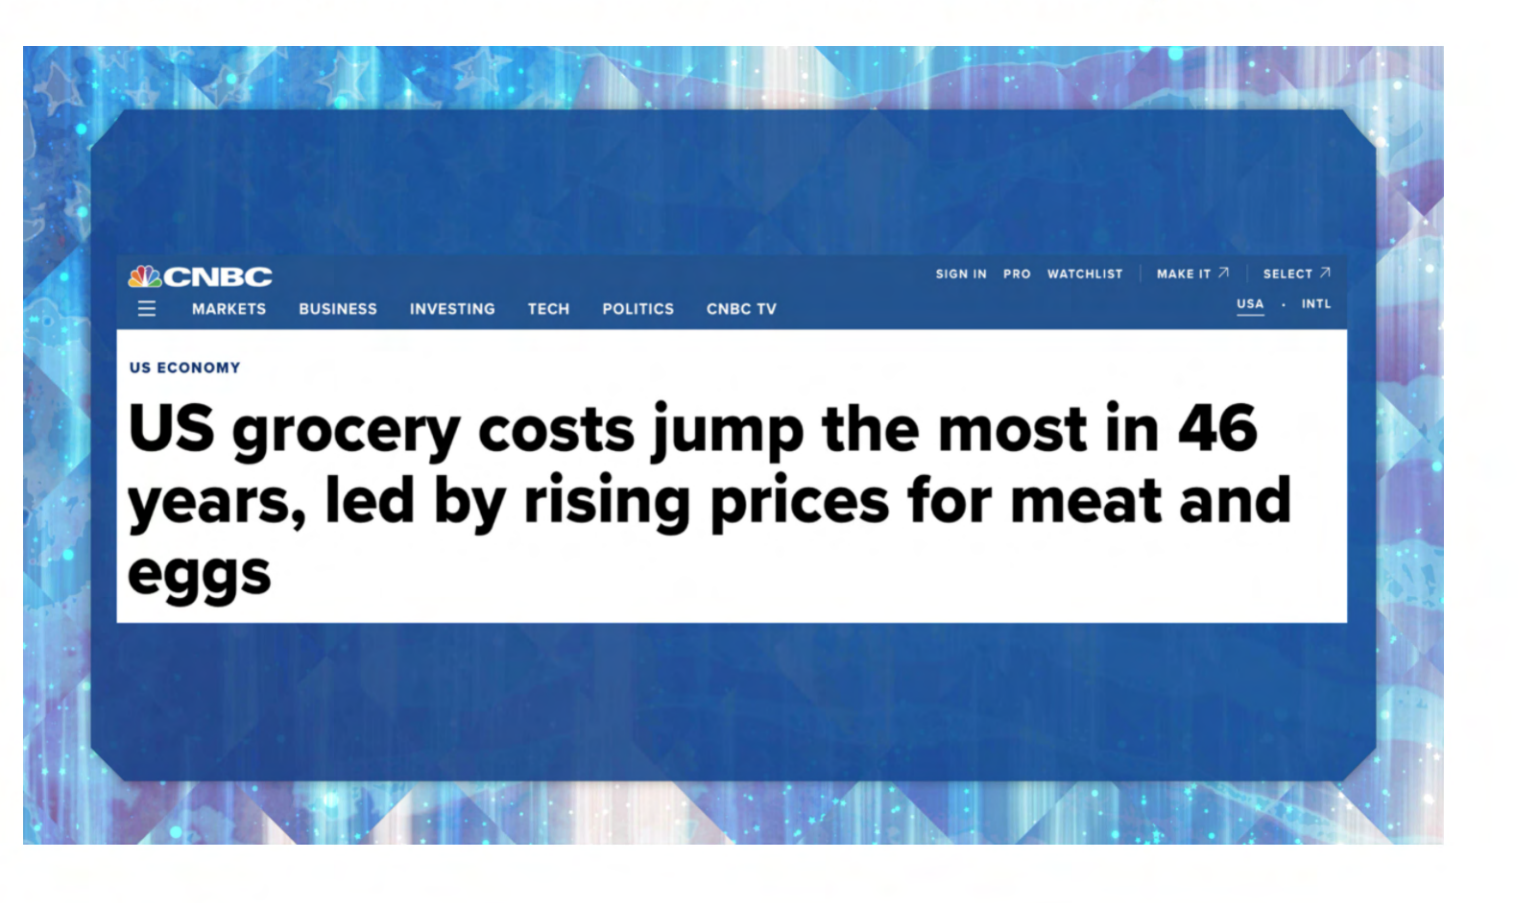
To buy a new car…a home…or to go to college — most Americans must take on a stunning amount of debt.

> "Student loan debt in 2020 is now about $1.56 trillion"
>
> —Forbes

The price of food has skyrocketed…

In the early '70s, $1 bought 3 TV dinners. Today, that costs about $9.

The cost of eggs, meat, cereal and milk recently shot up the most in 46 years.



US ECONOMY

US grocery costs jump the most in 46 years, led by rising prices for meat and eggs

And it's not just food…

Take the Ford F-series, a classic American truck.

It debuted in 1950 for just $1,287.

But today, the same basic model costs $32,737.

1950 Ford F Series: $1,287
2020 Ford F-150: $32,737

Ford's entry-level truck now costs almost 25 times more.

Are you making 25-times more money today?

Unless you're in the top 1%, probably not.

That's why so many people struggle to maintain a middle-class lifestyle.

It's why the vast majority of Americans can't even cover a $400 emergency expense.

That's what I mean when I say the system is broken. It doesn't work for the average American anymore.

And while all that may seem a little scary... there's a silver lining.

You are living through a rare moment in history...

Thanks to one new technology — like the invention of farming and the printing press — humanity is about to take another great leap forward.

> "This technology will be the biggest thing since the internet itself."
>
> — CNBC

Some experts have even described this technology as a "new internet..."

The CEO of $2.5 trillion investment giant Fidelity said:

> "[This technology] will fundamentally change market structures — and maybe even the architecture of the internet itself."
>
> — CEO, Fidelity

I'm NOT talking about 5G, artificial intelligence, the Internet of Things, or cryptocurrencies.

I'm talking about the blockchain.

You've probably heard about it before.

Most Americans have.

Unfortunately, 99% of them have no idea how the blockchain will fundamentally change the world...

Or how it will help create 800,000 new millionaires in the coming years.

Including you.

I'll explain how in just a moment.

Look, the blockchain may sound complicated, but it's actually super simple.

Imagine an exceptionally secure Excel spreadsheet the entire world can view...

Anyone can enter data into the spreadsheet. But before the spreadsheet can store the data, a majority of other people have to agree it's true. When it's confirmed, the data is locked. No one can change, manipulate, copy, or erase it. So it leaves a perfect audit trail.

All of this is done digitally and automatically using computer code. And it's secured using state-of-the-art cryptography. That means, you don't need a trustworthy middleman to confirm any transactions. The code handles everything.

That's the power of blockchain.

Said another way, it's a digital ledger available to everybody. And it has a built-in electronic recordkeeping system for all transactions. So it doesn't require any third-party verification.

Blockchains can be used to issue money, stock certificates, and even legally binding contracts.

So the blockchain combines the power of money, banks, lawyers, and Wall Street...

The opportunity will touch so many industries it's hard for people to understand how much the blockchain will grow in the coming months and years.

All you need to know is that unlike other revolutionary wealth-building technologies — like the printing press and the internet — the blockchain isn't owned by any one person or business.

That means anyone can own a stake in this technology and ride its coattails to a fortune — for as little as $10.

In a moment I'll show you exactly how you can set yourself up to potentially join the ranks of 800,000 new millionaires.

> "The number of millionaires has boomed"
>
> —Forbes

The world's changing, FAST.

Whether you choose to invest in the blockchain revolution or not...

Your life will change...

If you want it to change for the better then this is what I want you to do.

I want you to place a small, calculated bet right now, nothing huge. I've had readers say they have become millionaires by investing just a small grubstake.

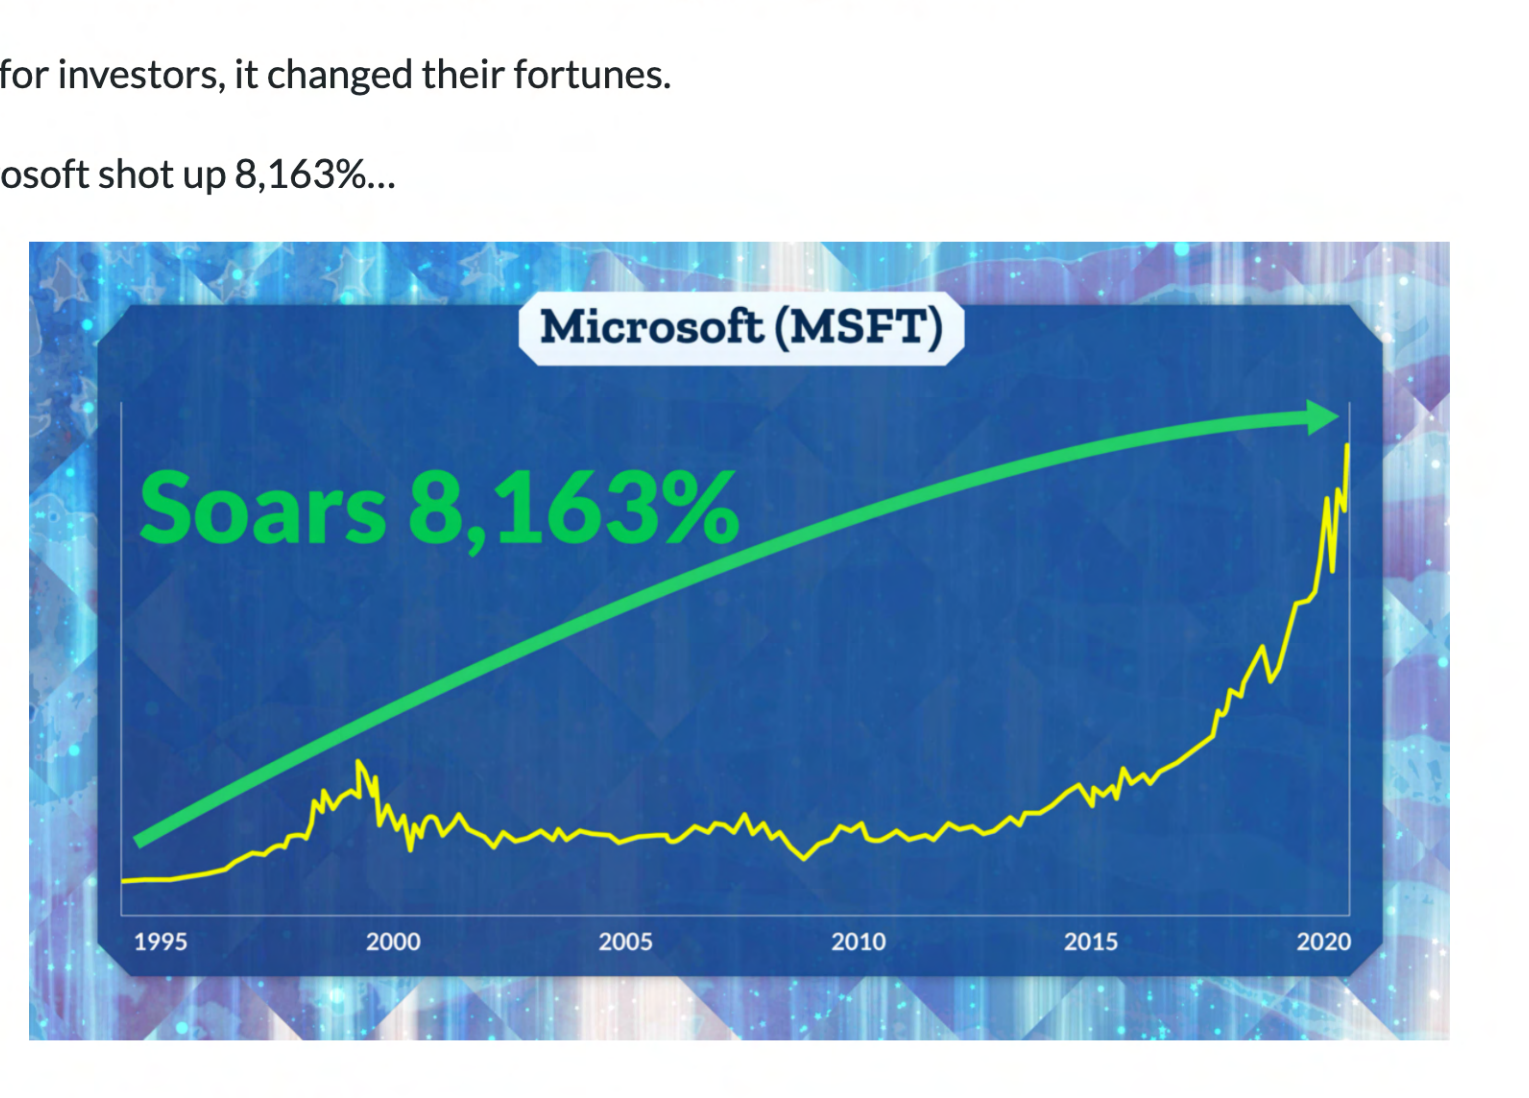
Taking action now could be the difference between making a fortune...or a lifetime of regret for missing out while everyone else gets rich.

I'm sure you remember the rise of the Internet.

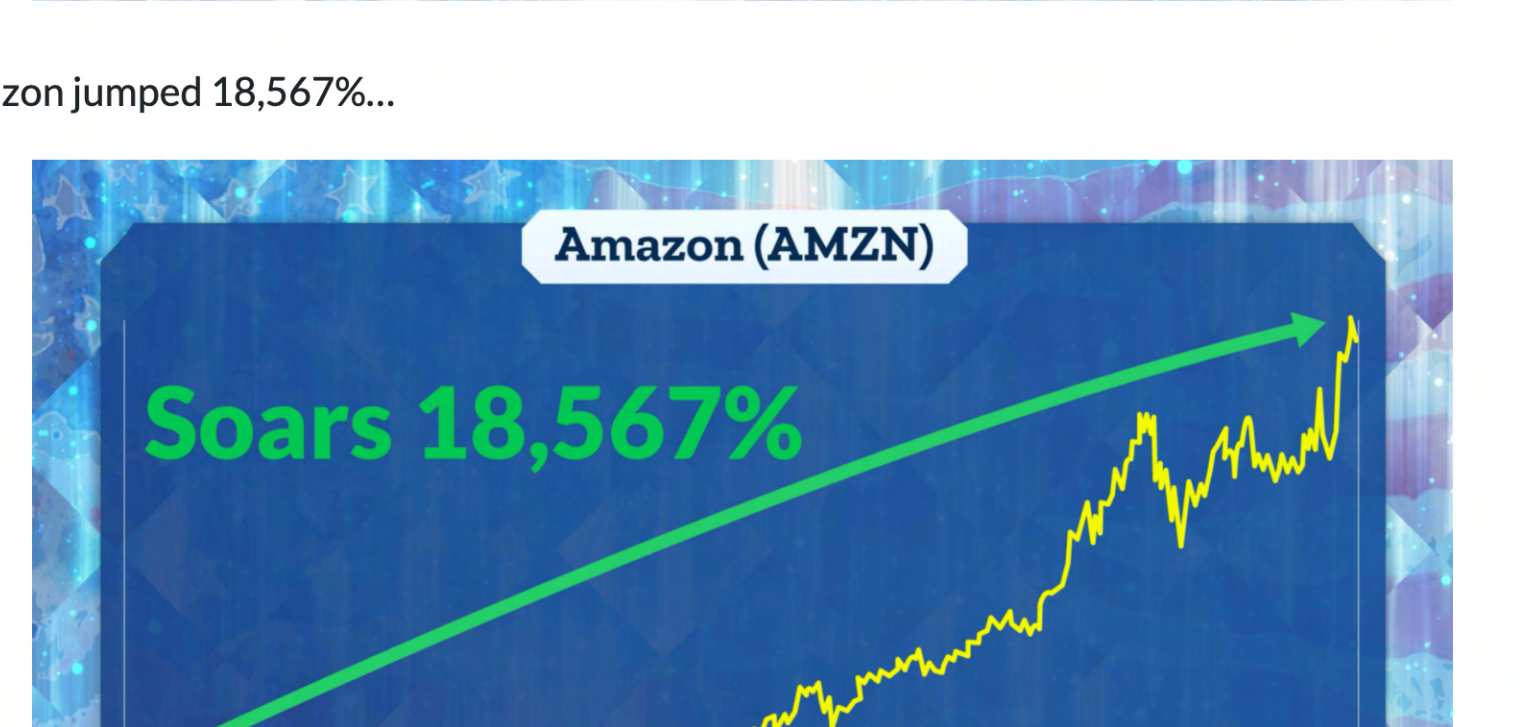
In a similar way, this breakthrough technology changed our lives.

And for investors, it changed their fortunes.

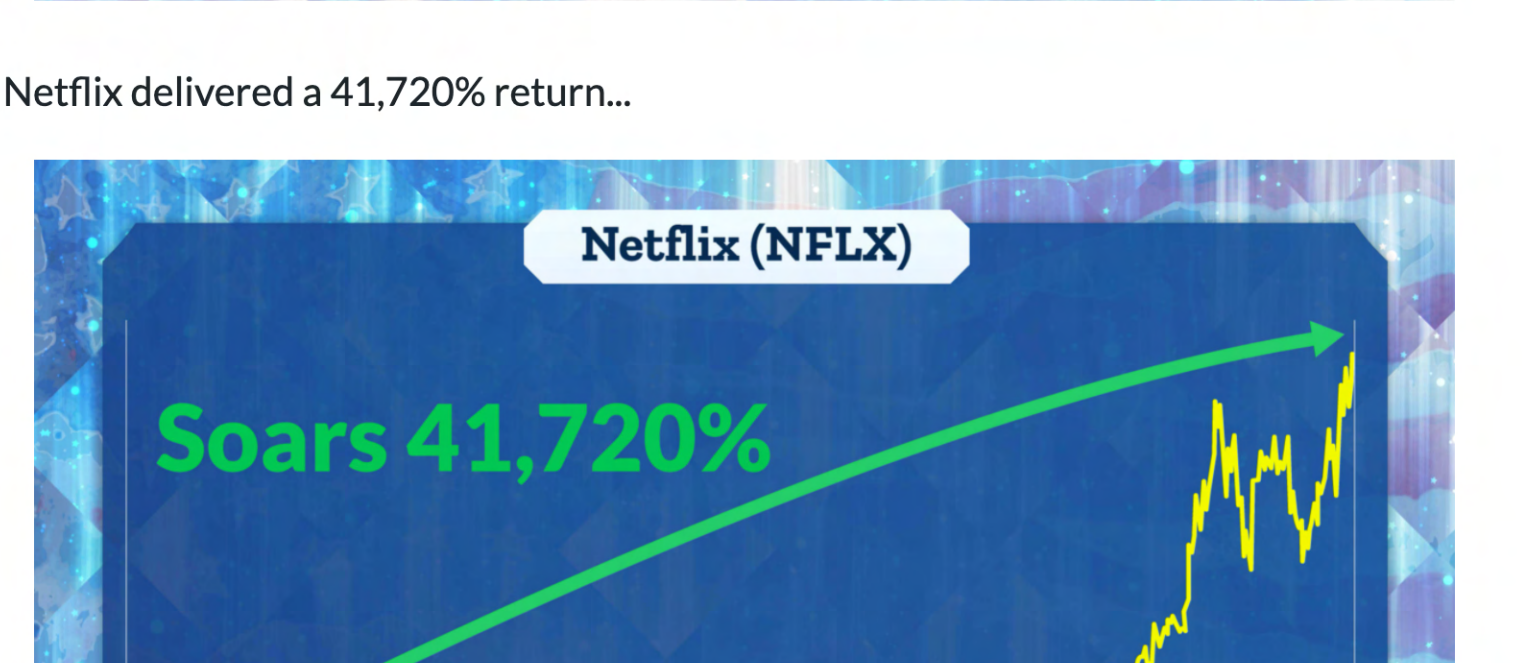
Microsoft shot up 8,163%...



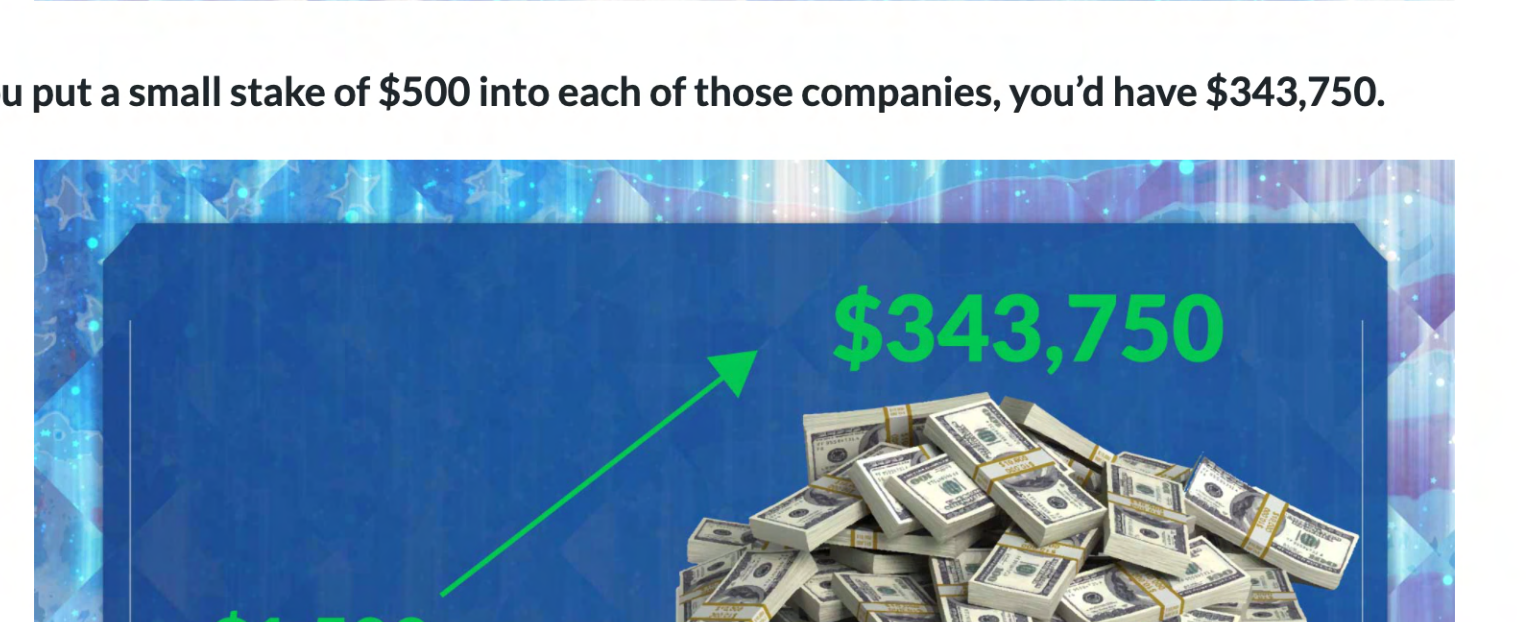
Amazon jumped 18,567%...



And Netflix delivered a 41,720% return...



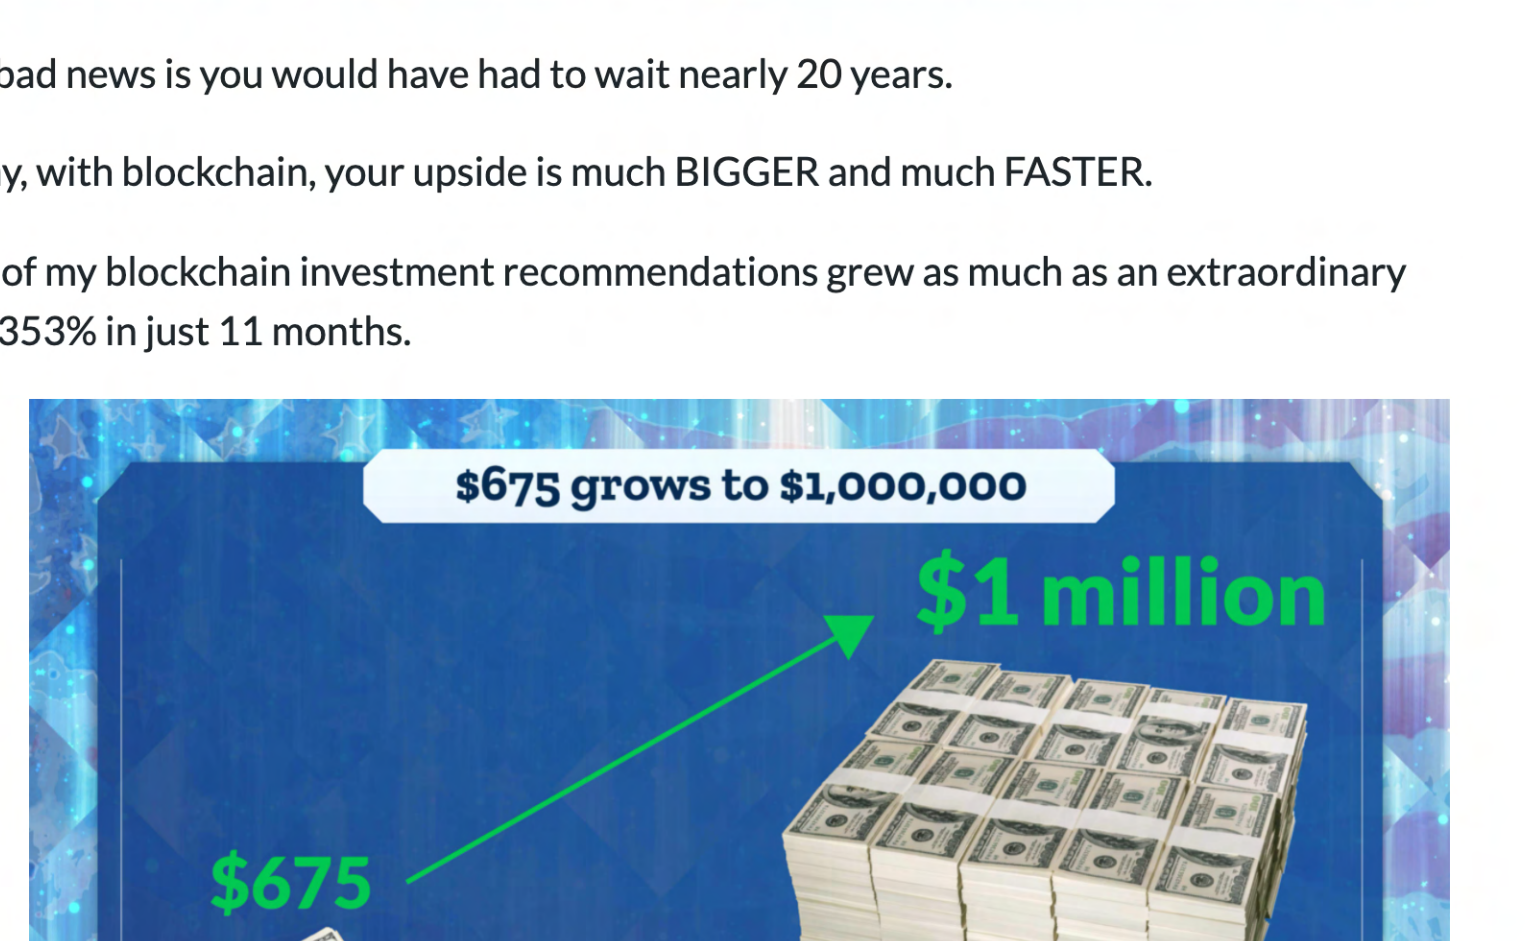
If you put a small stake of $500 into each of those companies, you'd have $343,750.



The bad news is you would have had to wait nearly 20 years.

Today, with blockchain, your upside is much BIGGER and much FASTER.

One of my blockchain investment recommendations grew as much as an extraordinary 151,353% in just 11 months.



That gain turns a $675 into a million. That's a lifetime of gains in just one year.

And I believe, over the next 18 months, you could see life-changing gains.

This is the power of blockchain.

I'll go out on a limb and say blockchain technology is the #1 investment of the century.

Yes, I realize that's a BIG prediction...

It might seem crazy.

And yet, as you probably know, Bitcoin recently shot through its all time high.

As amazing as that performance is, Bitcoin is just ONE application of the blockchain.

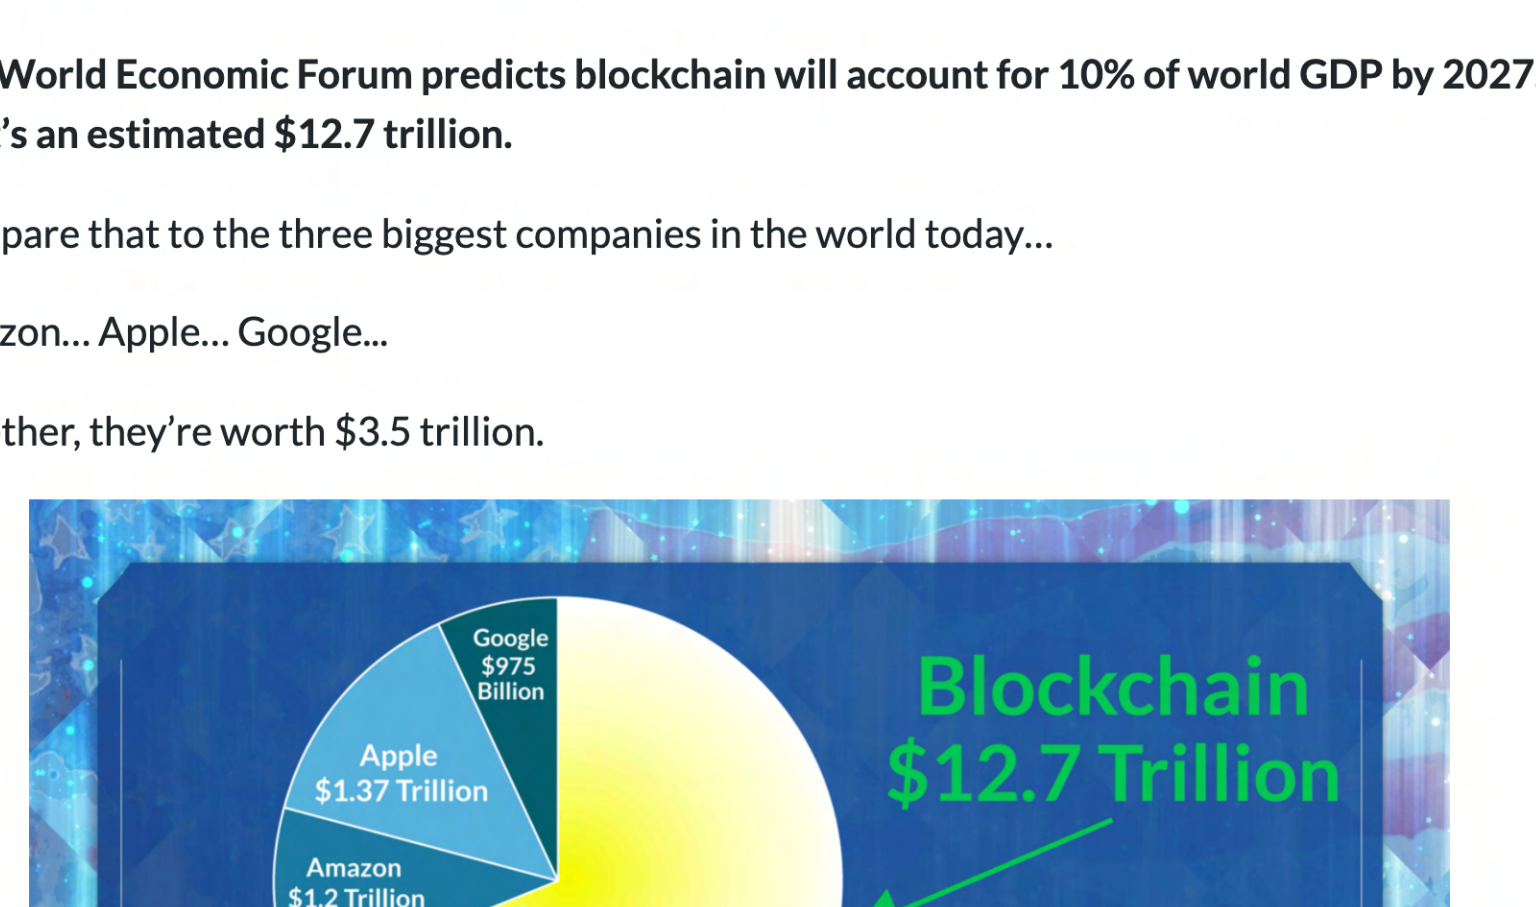
And I'm not the only one who sees the growth potential here...

The World Economic Forum predicts blockchain will account for 10% of world GDP by 2027. That's an estimated $12.7 trillion.

Compare that to the three biggest companies in the world today...

Amazon... Apple... Google...

Together, they're worth $3.5 trillion.



As you can see, blockchain is BIG.

And the growth forecast is even BIGGER... and much FASTER.

Because the World Economic Forum expects the blockchain to grow 279,000% in the next 7 years!

Friend, I want you to think about it...

Blockchain was invented in 2009...

No one can forget that year. The entire financial system fell apart.

A crisis in subprime mortgage bonds tore like a tornado through the entire economy, destroying huge companies like Washington Mutual and Wachovia.

The Great Financial Crisis made one thing clear: We needed a new system.

Enter the blockchain.

Once again, it's expected to grow 279,000% in the next few years.

That's an unbelievable growth rate — almost 3,000 fold in a very short time.

And with each passing day, it's becoming clearer:

Those who embrace blockchain will survive and thrive in the years ahead.

While those who ignore it will get left behind. They could end up on the wrong side of the wealth gap.

That's why the U.S. government is scrambling to harness this revolutionary technology...

A few years ago, former President Trump signed Executive Order 13772.

The Treasury Department immediately followed with a formal report on blockchain.

And Congress has *already* introduced 32 different bills to push blockchain use...

The Supreme Court even issued a ruling that benefits blockchain.

That means all 3 branches of the U.S. government are scrambling to get in front of this revolution...

The military's all-in on blockchain, too.

The Army, Navy, Marine Corps, Air Force, and the Pentagon are all pursuing blockchain projects.

And the Federal Reserve took notice. They saw how Bitcoin revolutionized money and were caught flatfooted.

Now they're racing to launch their own "digital dollar."

40 other central banks across the globe have followed suit.

These ultra-powerful institutions know if they do nothing, they will cease to exist.

This explains their mad dash into blockchain.

The titans of banking and finance — and the tech world — *appear* to be in firm control.

But this is a dangerous illusion.

Behind closed doors, they're silently scrambling... as they race to adapt — or risk getting left behind.

We're on the verge of a HUGE transition.

America is about to be reborn — thanks to this revolutionary new technology.

The biggest wealth and power shift in modern history is already underway.

Soon, we'll see the birth of an entirely new system.

When it's through, we'll no longer live in a democracy...

America will be reborn into what I call a "Cryptocracy."

The people who see this shift coming — and take the right steps — will grow fantastically wealthy...

Those who don't will be left even further behind.

Remember, each time the world has shifted from one system to the next...

There's been chaos... Massive winners and losers.

And each time, a new class of ultra-wealthy people have emerged.

All thanks to one revolutionary technology.

That's why I'm sharing this message with you now.

To make sure you're ready for the next BIG transition...

To make sure you're positioned to make life-changing wealth...

Just like B.J., a Tennessee nurse, who tells me I've already helped her make $1.2 million.

Today I want to show you how to do the same.

I've been predicting world-changing trends for decades...

It all started in the early 2000s when I was still on Wall Street.

I uncovered a company that would change the world...and become the #1 investment of the decade...

Apple.

Back then, Apple looked like just another tech company. They made expensive computers that few people used.

And they struggled to regroup after the dot-com bust.

Then Apple launched a breakthrough technology: the iPod.

At the time, Wall Street completely ignored the stock.

They didn't think the iPod music player that only 3% of computer buyers could use was interesting. I say only 3% because the iPod only worked on Apple computers.

But I discovered Apple was preparing to launch the iPod for PC users. All of a sudden, 97% of the market would open up for Apple. It was a no brainer decision for me to recommend the stock to my clients.

Of course everyone knows they followed up the iPod with the iPhone.

And the iPhone would go on to change everything — from the way we bank and invest... to the way we capture our most precious memories... to the way we order food... find our way around town... and entertain ourselves.

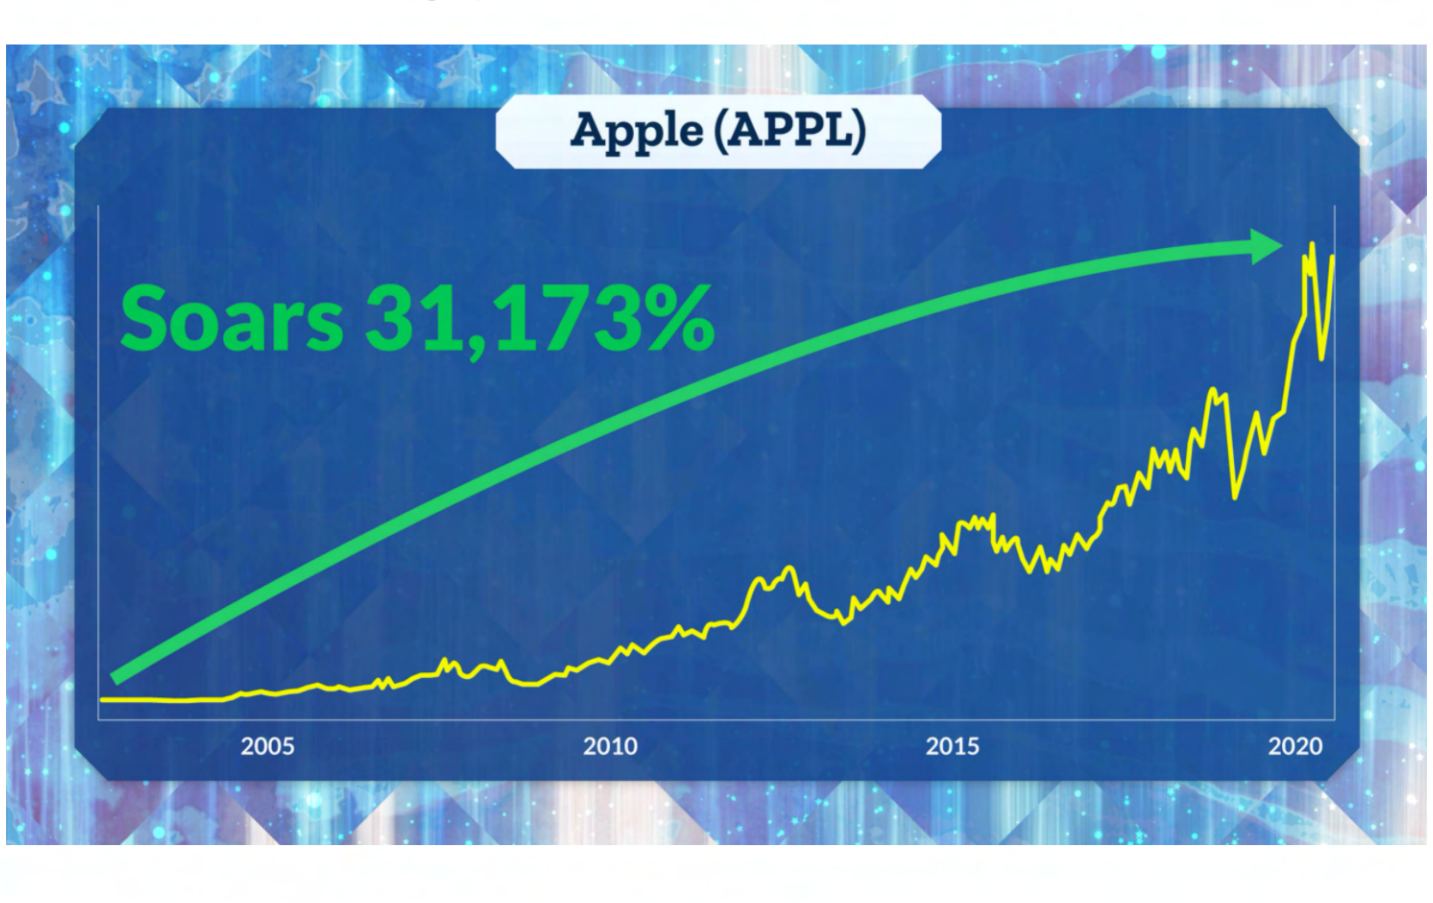
Apple has since sold 2.2 billion iPhones.

Back in 2003, when I first recommended Apple, its shares traded for around a buck apiece.

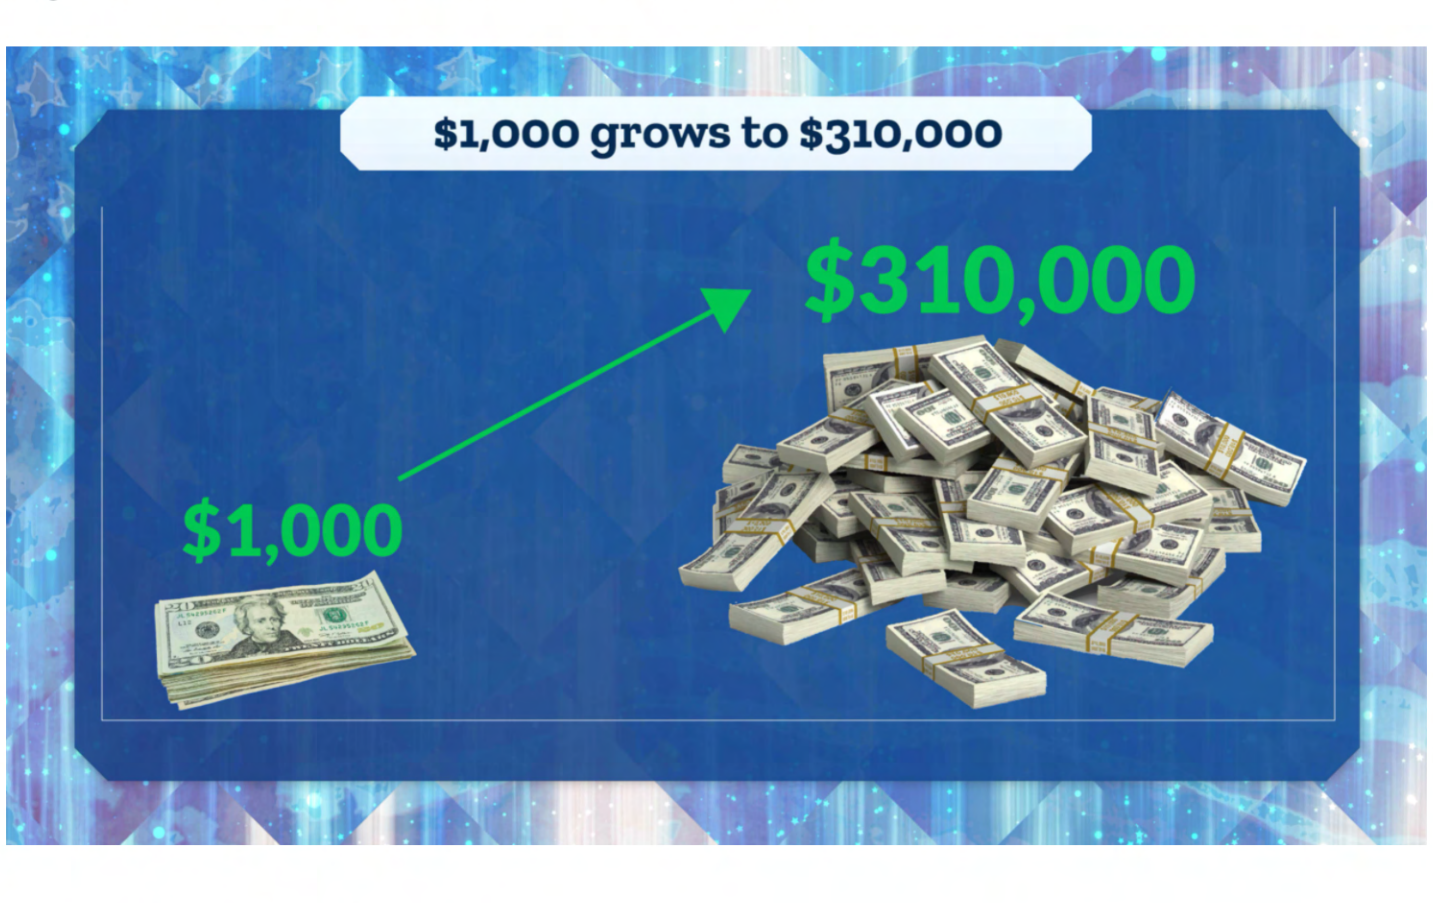
In other words...

If you got into Apple back when I recommended it... and held on, you'd have an astronomical 31,173% gain.

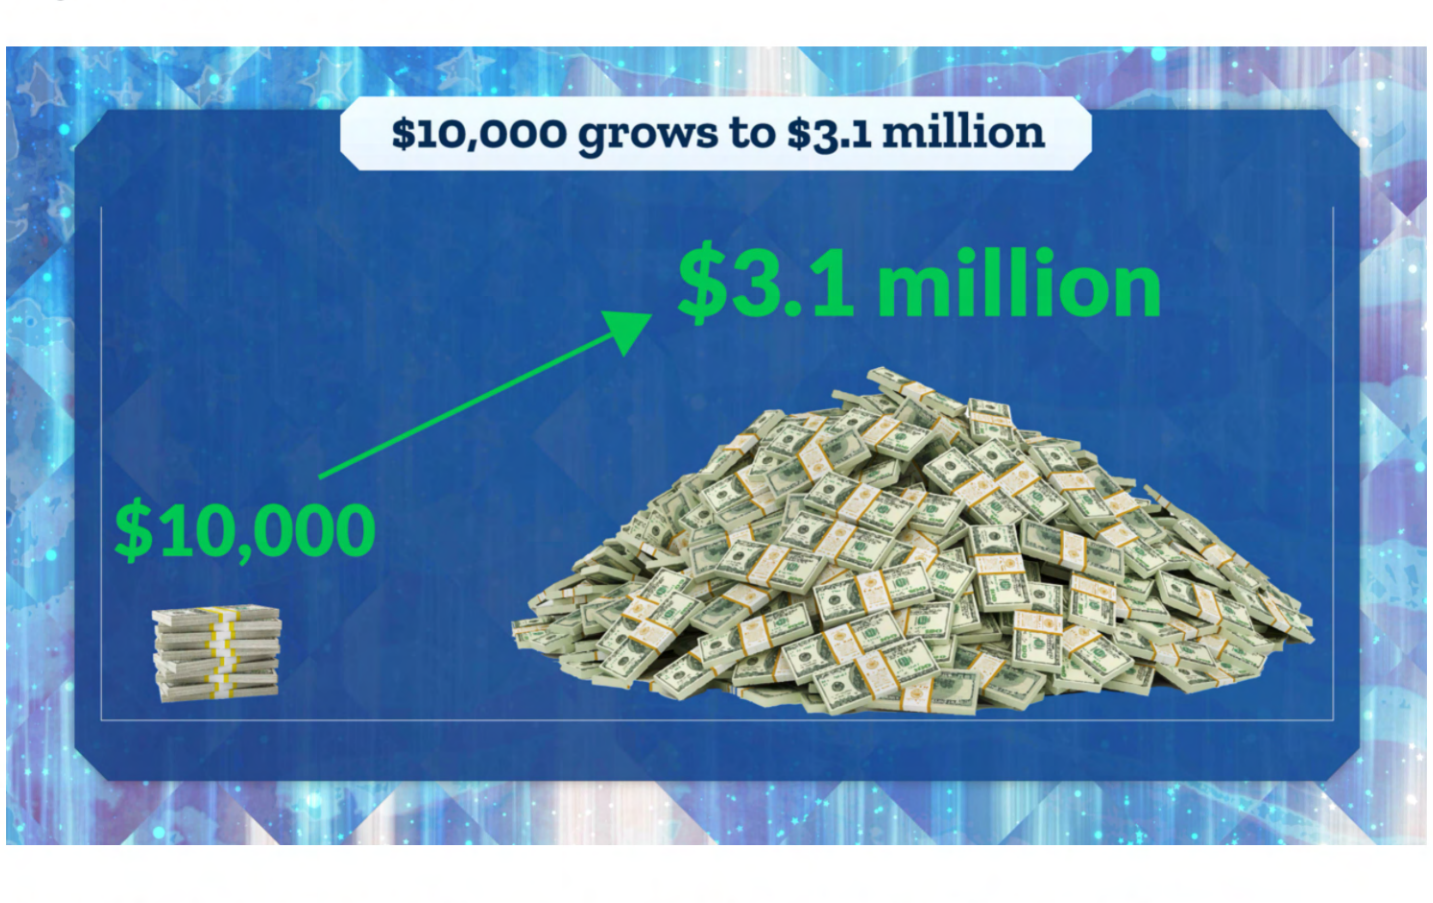
A 31,000% winner would change your life.



It's enough to turn a $1,000 stake into over $310,000.



$10,000 grows into $3.1 million.



To be clear, this kind of exponential wealth creation doesn't happen often.

Once per decade. If that.

The only way to capture these kinds of gains is to get in early. Before the world-changing trend takes off.

It's the difference between a respectable 200% gain and a life-changing, millionaire-making 31,173% gain.

My next big prediction came in the 2010s when I discovered Bitcoin and the world of cryptocurrencies.

Bitcoin is a revolutionary breakthrough because it's a form of new money with NO connection to any central bank.

And like the smartphone, Bitcoin has shaken the world.

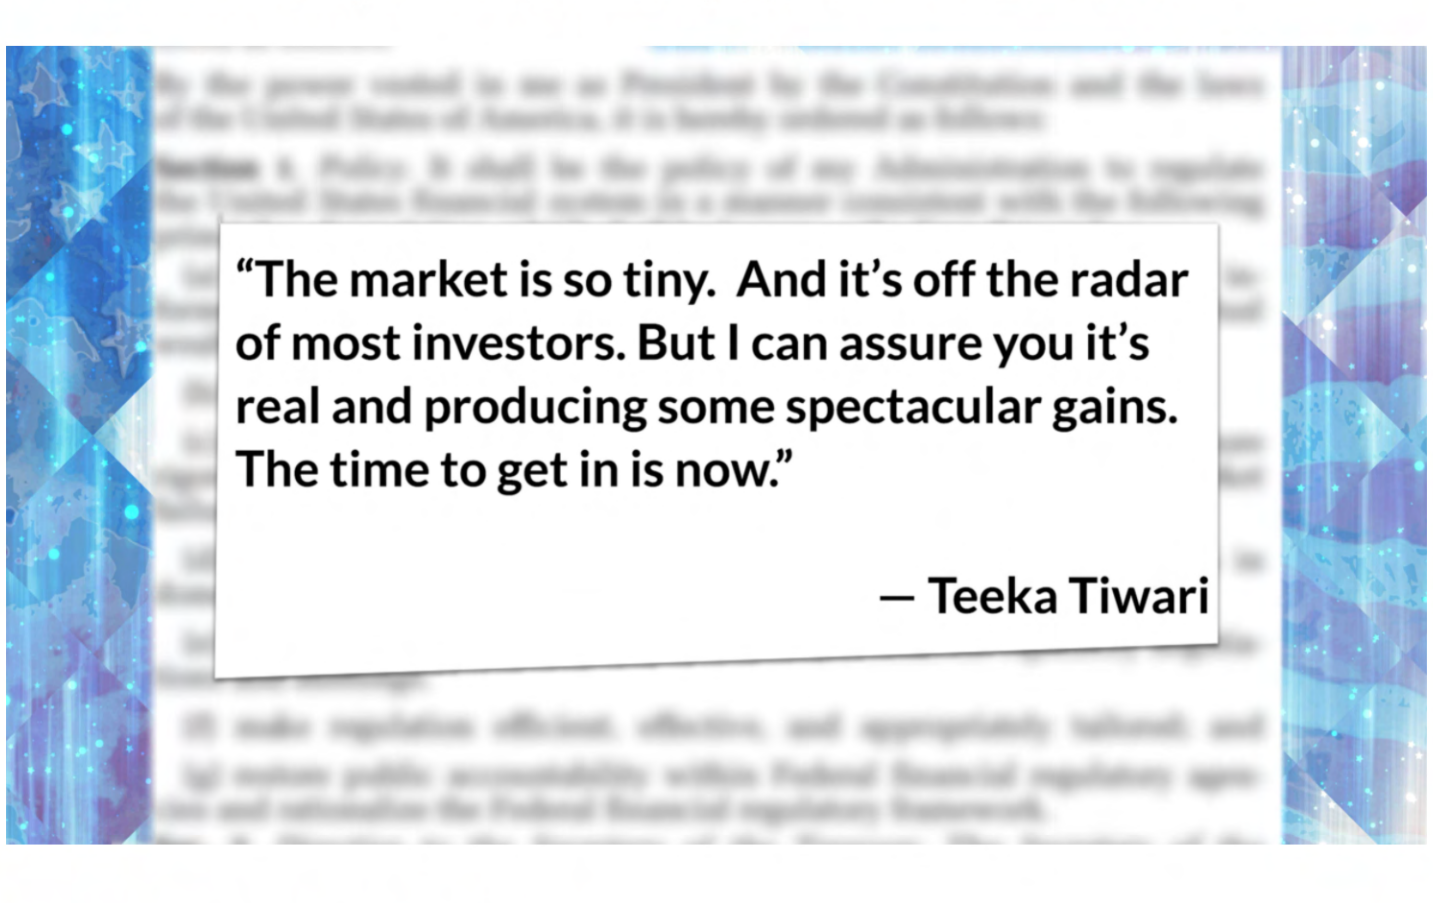
Because this new form of money exists independently of every government.

Anyone can buy, sell or invest with it.

In one stroke, this new technology threatened to overturn the centuries-old power of governments to control money.

While most experts wrote off the cryptos as "fads" and "frauds," I sensed a new world taking shape.

Here's what I wrote in early 2017 before the big crypto bull market took off:



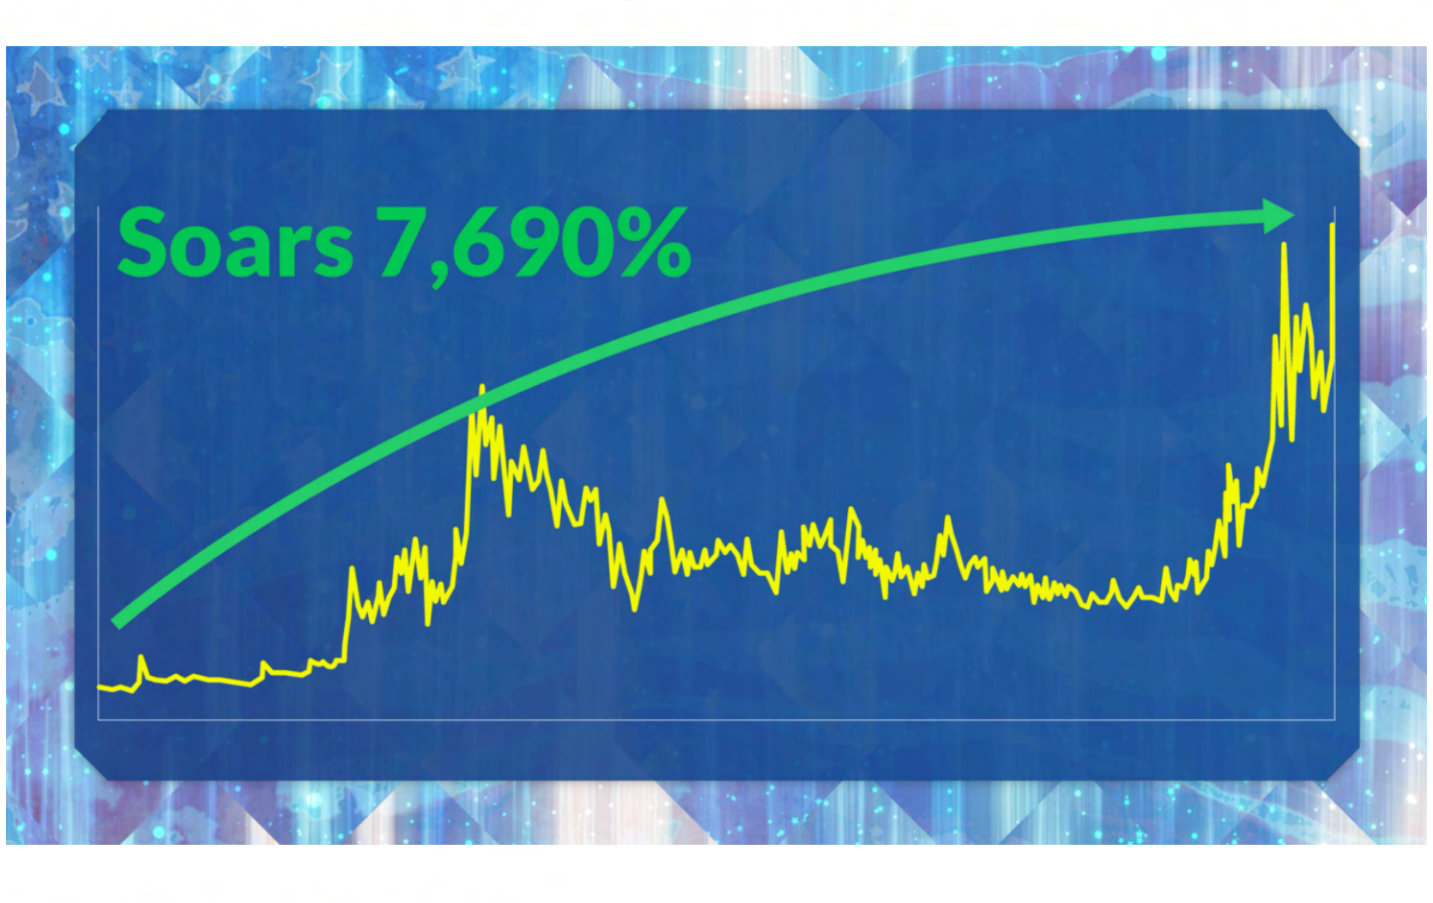
"The market is so tiny. And it's off the radar of most investors. But I can assure you it's real and producing some spectacular gains. The time to get in is now."

— Teeka Tiwari

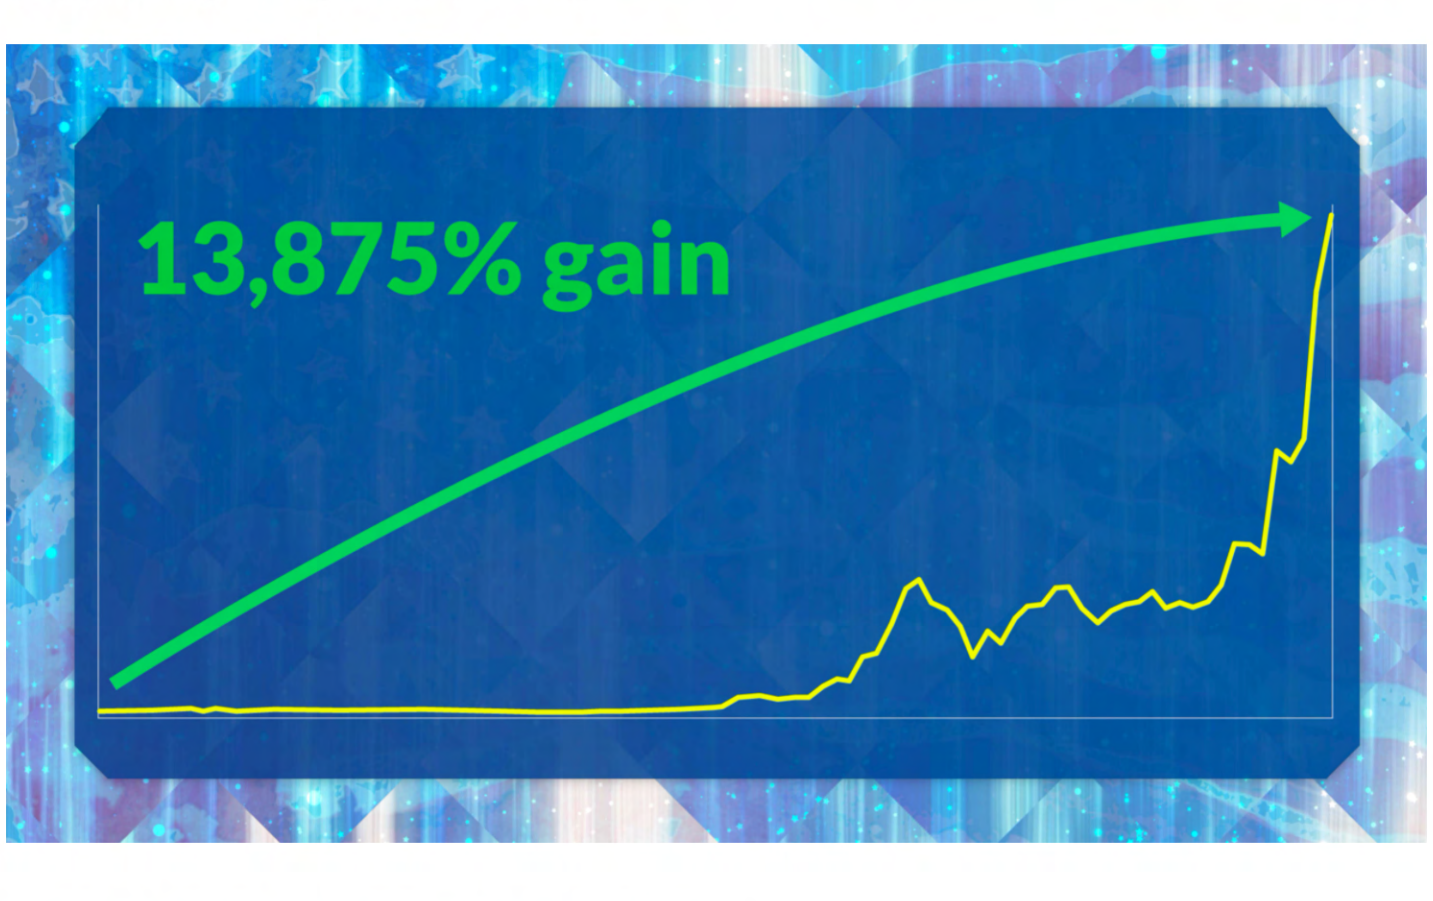
I shared that with a small group of people.

Those who took action and bet on the "new" world surpassing the "old" world would've made a fortune!

One of my recommendations shot up as high as 7,690%...



Another blasted up as high as 13,875%...

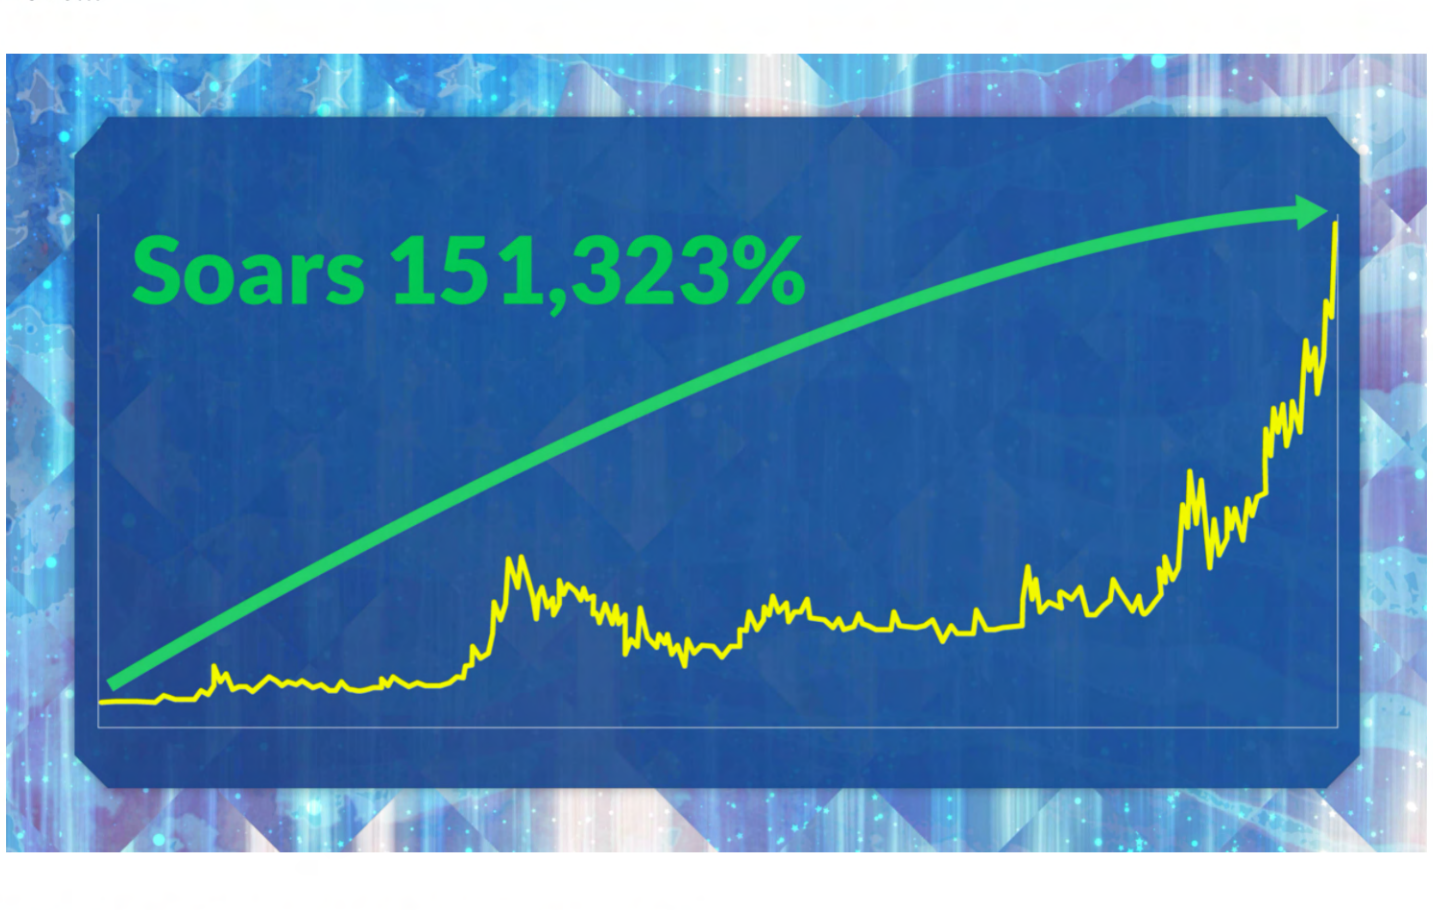


And I know this may be impossible to imagine.

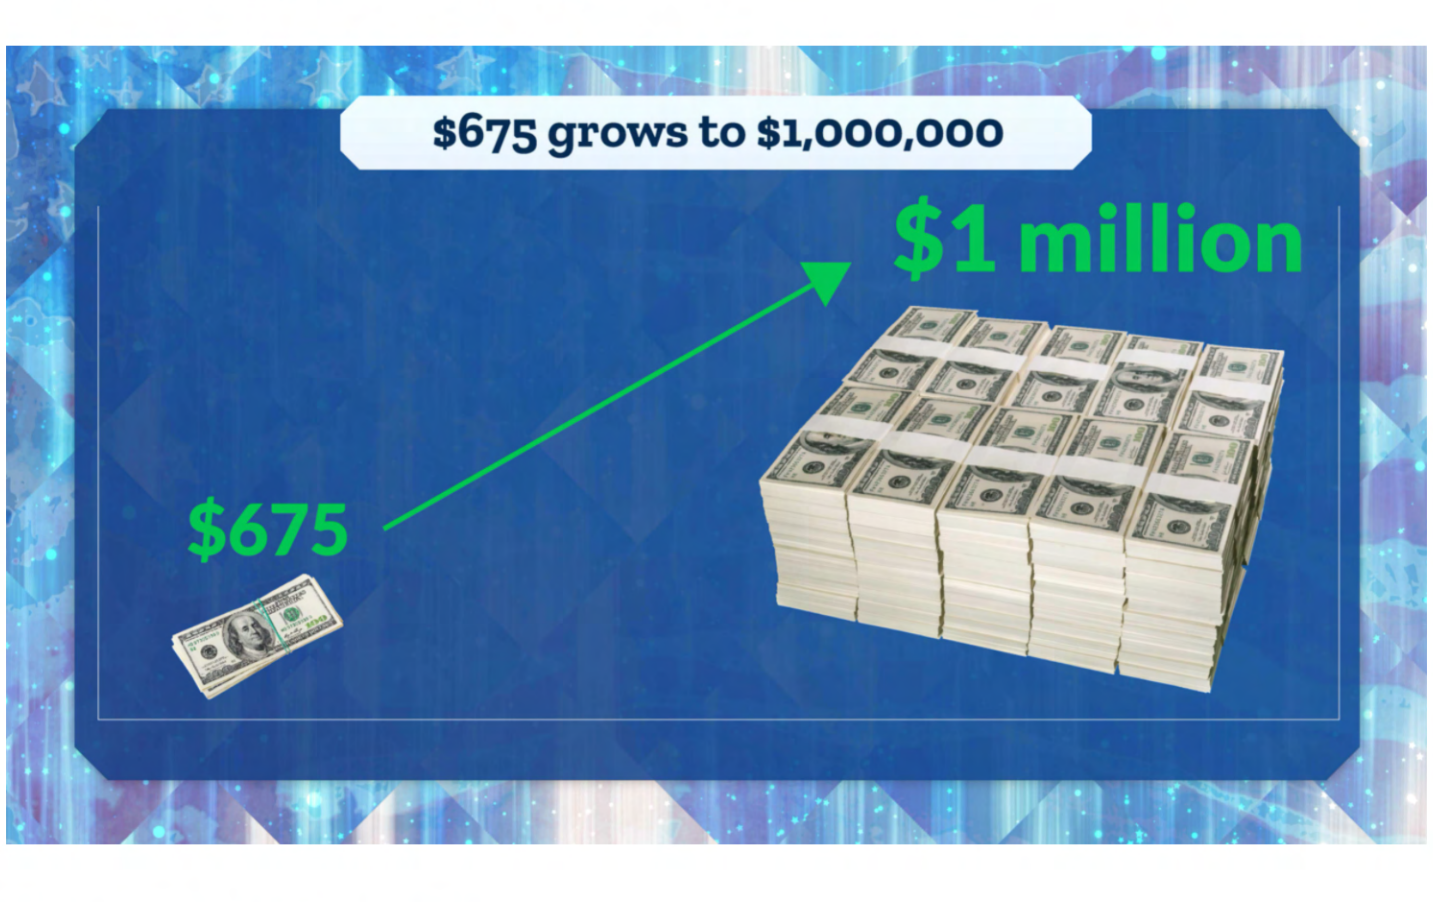
One of my recommendations exploded up to a life-changing...

INSANE...

151,323%...



That's enough to turn $675 into over $1 million.



Even better, it only took 11 months!

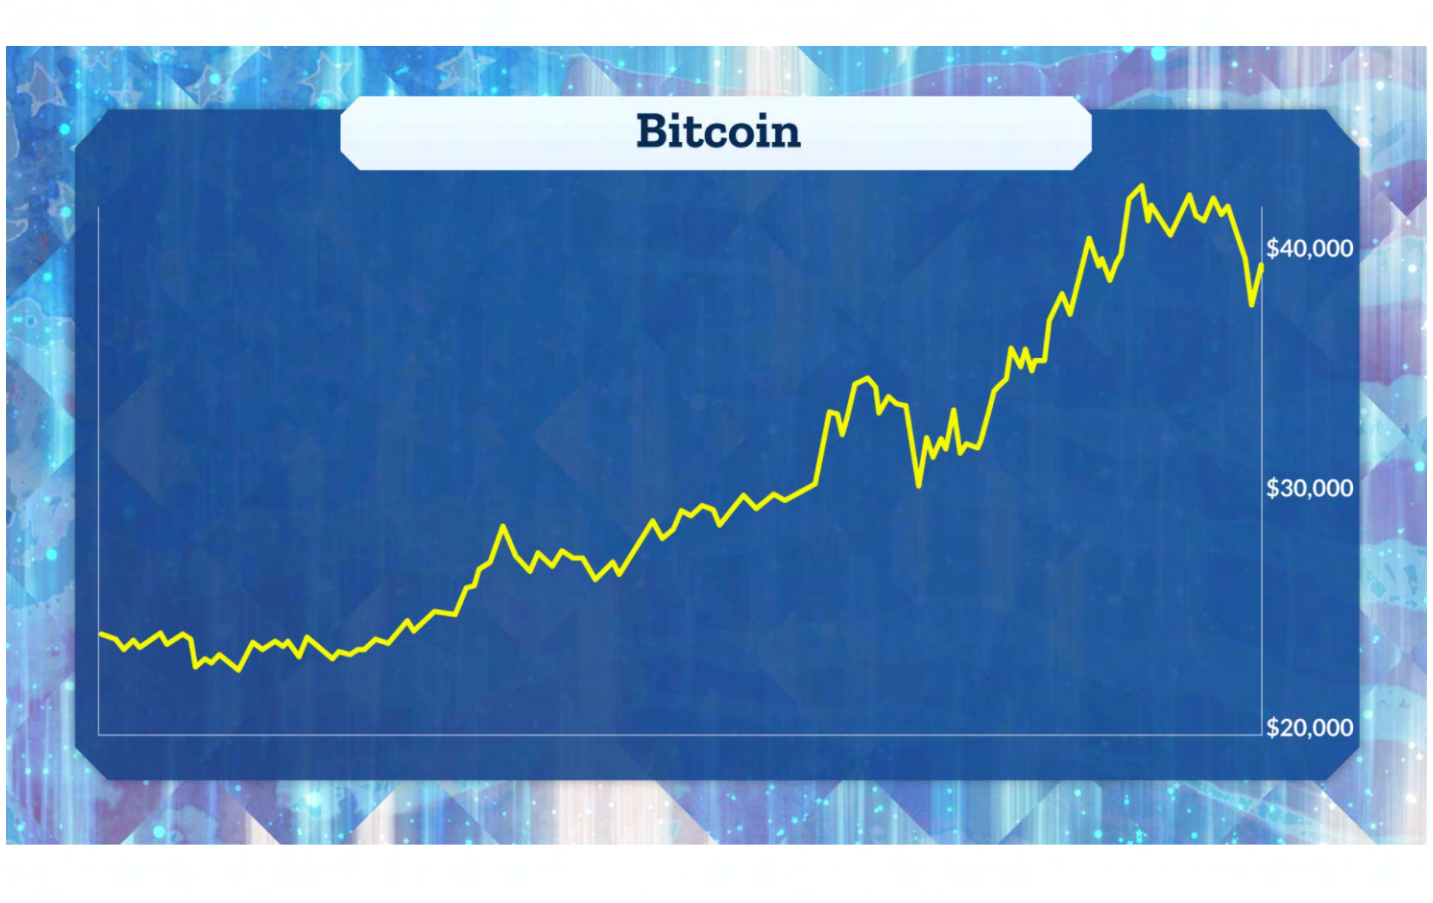
Which seems unthinkable.

THAT'S the power of getting in early on a trend that changes the world.

That's the reward of taking decisive action.

And the Bitcoin bull has come alive again. In December 2020, it broke through its previous high.

And it just kept taking off...the chart looks like a hockey stick!



I'm sure ALL revolutionary changes seem intense at the start...

This opportunity is the biggest trend of your lifetime. Blockchain will be the #1 investment of this century.

And it has sharply accelerated in today's turbulent world.

If you take action NOW, you have the chance to boost your wealth substantially in the coming Cryptocracy.

All you need to do is make the all-important choice to get involved *RIGHT NOW*.

Do nothing and you'll get left behind.

Remember, my last blockchain prediction would've let you turn a small stake of $675 into over $1 million.

Please understand when I tell you: Blockchain is the mother of all opportunities.

In my opinion, it will dwarf ANYTHING you can do in the stock market.

It dwarfs my Apple play, which could have delivered 31,000%.

It could even make my 151,000% winner seem like small potatoes.

Normally when you hear someone tell you could become a millionaire by making a small investment, you should run the other way.

In the old word — this sort of thing would be difficult, if not impossible.

Or like Apple, you'd have to wait nearly 20 years.

But in these rare moments, when an entirely new world bursts to life, it's possible to see life-changing gains in months.

Of course, I can't promise you'll see gains this high.

But anything is possible... if you grasp what's coming, before it becomes obvious to the masses.

Remember, the blockchain is set to create 800,000 new millionaires in the years ahead...

Remember, one of my early blockchain predictions could've turned $675 into a fortune.

That's why I'm sharing this critical call to action today.

Because at this moment, an historic opportunity stares you in the face.

When your grandchildren look back, decades from now...

They will note that this moment, right here, changed EVERYTHING.

Or they will look back and wonder why you didn't act.

Right now, you stand at a fork in the road.

There are only two possible outcomes:

- ✓ **Either you'll come out on the right side of this shift, growing wealthier than you've ever dreamed.**
- ✓ **Or get caught on the wrong side and get left behind with millions of others.**

It's ENTIRELY up to you.

Blockchain technology will help give birth to a brand-new America.

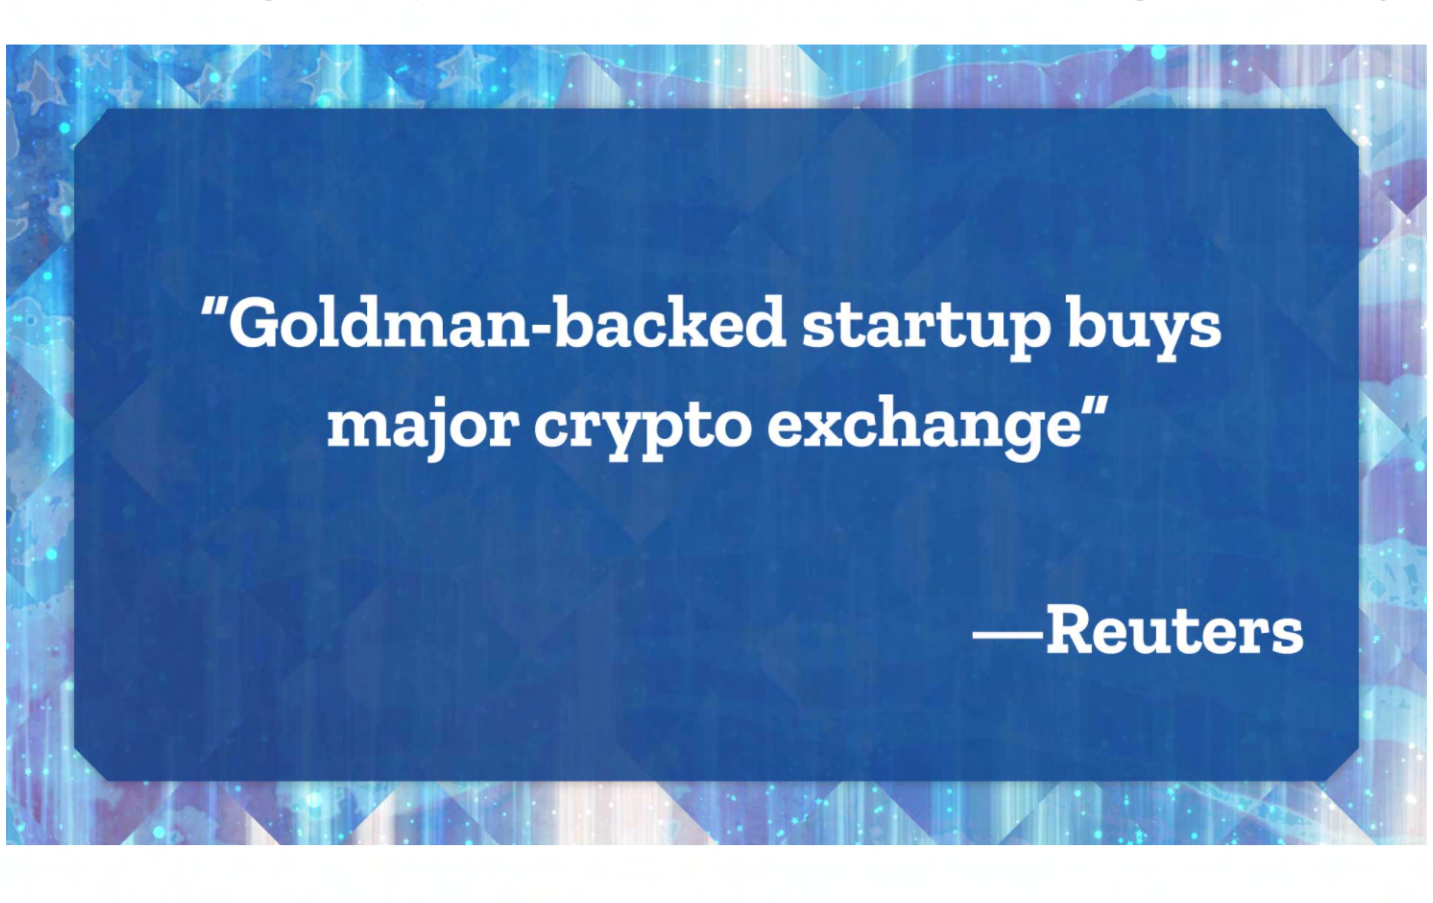
Big business sees the potential.
It's why they're spending BIG money on blockchain.

Right now, more than 80 corporations are working on blockchain projects.

The big banks SMELL the money.

Goldman Sachs, Bank of America, JP Morgan Chase and Santander are all scrambling to get into blockchain...

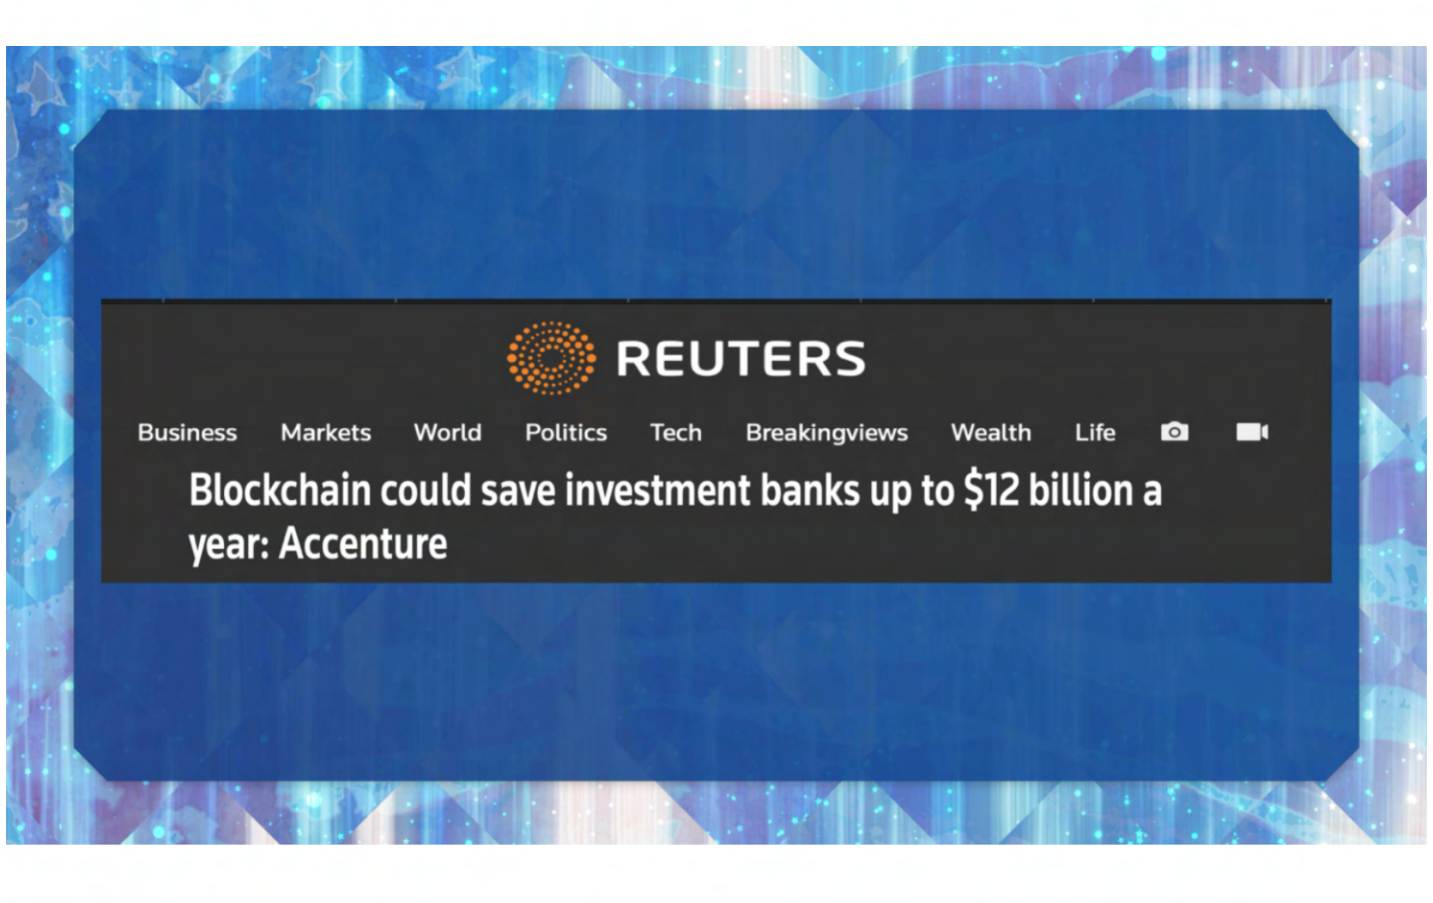
Goldman's even hiring for a top secret blockchain initiative called the Digital Asset Project.



"Goldman-backed startup buys major crypto exchange"

—Reuters

Accenture recently reported that blockchain could save investment banks as much as $12 billion each year. That goes right to the bottom line.

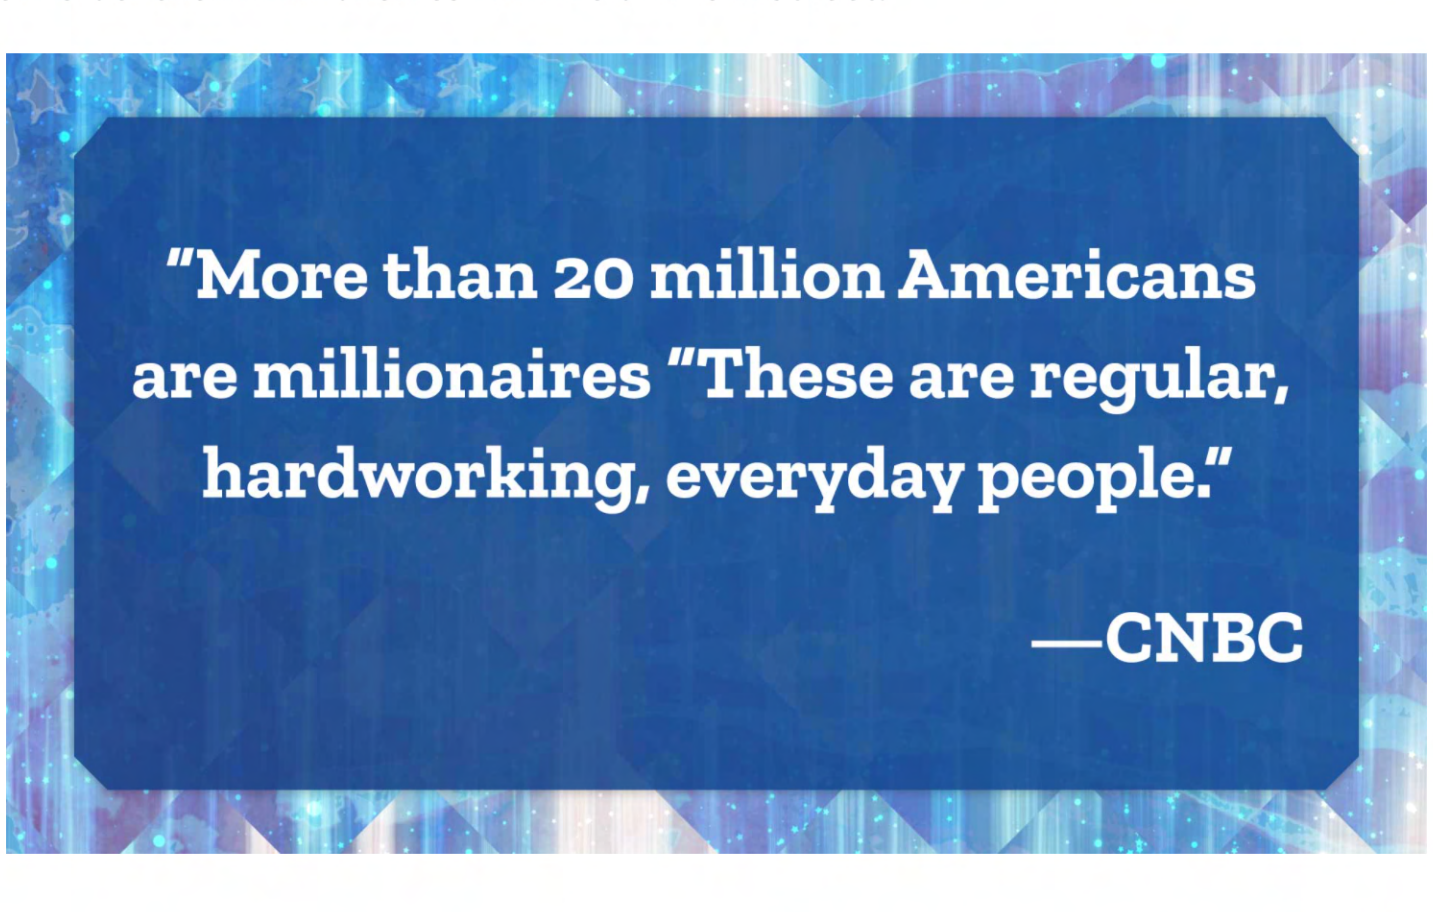


Blockchain could save investment banks up to $12 billion a year: Accenture

So you can see why these world dominating investment banks have gone ALL-IN.

Except the most transformative blockchain fortunes WON'T go to these big investment banks...

The new blockchain millionaires will live on Main Street.



"More than 20 million Americans are millionaires "These are regular, hardworking, everyday people."

—CNBC

Because there's something unique about this opportunity that makes it completely available to you and me.

It's unlike anything we've seen in the past.

Because you can own a stake in it.

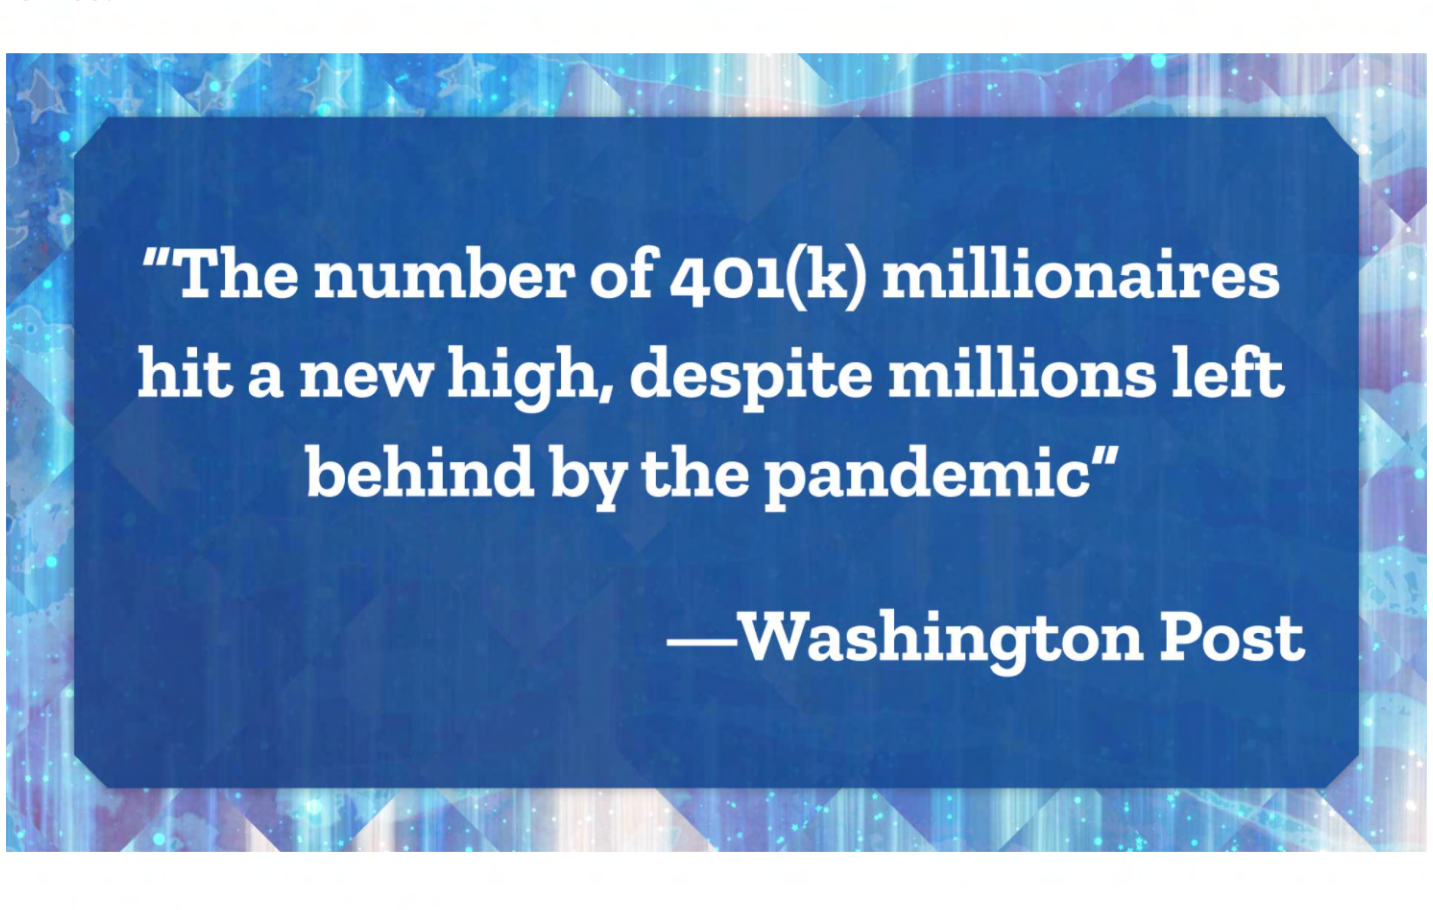
Any time there's a transformational technology, it's often controlled by the wealthy.

But not this time.

Even if you only have $10...You CAN own a stake in blockchain technology.

You couldn't do that with the printing press, railroads or the airline industry...

Blockchain is the great equalizer, and why it could create 800,000 new Main Street millionaires.

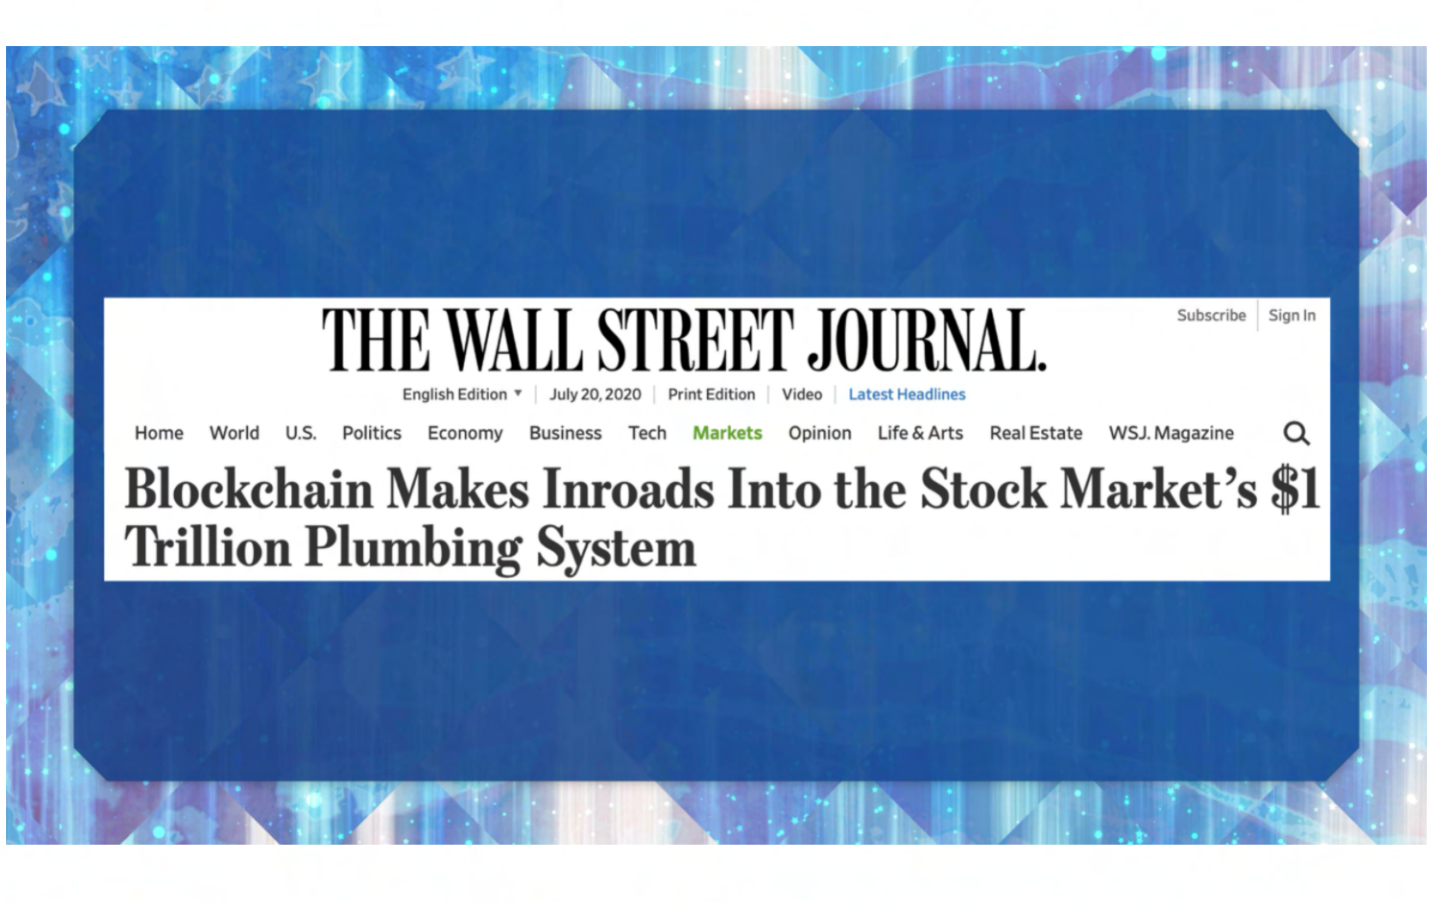


"The number of 401(k) millionaires hit a new high, despite millions left behind by the pandemic"

—Washington Post

And transform the stock market...

The SEC recently greenlit a project that will use blockchain to settle stock trades.



Blockchain Makes Inroads Into the Stock Market's $1 Trillion Plumbing System

This new system will make buying stocks faster and cheaper. It will benefit every investor, big and small.

And even though today's slow, expensive settlement system came about in the '70s...

It clears a whopping $1.3 trillion in stock trades each and every day.

Have you started to SMELL the money?
It's even bigger than stocks, though...

Because Mastercard is developing blockchain to improve cross-border payments, a colossal $689 billion industry.

That's bigger than the entire economy of Saudi Arabia.

And you can own a stake in it.

Can you SMELL the profits yet?
Because huge tech companies certainly do...

Google has become the world's second-most active investor in blockchain. They've invested in at least 5 different blockchain startups.

Facebook is creating a global blockchain currency, called Libra.

With Libra, everyone who uses a cellphone can pay and get paid through blockchain.

That could literally put blockchain in the hands of 3.5 billion people, or 45% of the world's population.

And that's not all...

- ✓ IBM has 1,500 employees working on blockchain...
- ✓ Amazon has a plan to get its more than 1 million business customers on blockchain...
- ✓ Docusign's blockchain app will let you buy a new car in a few minutes...
- ✓ *Microsoft even patented a way to connect blockchain to the human brain...*

Right now, blockchain is pouring into *every* sector of the economy.

It will soon become the lifeblood of the money, banking and investment systems.

It will revolutionize the internet and the tech sector.

So you can see why blockchain is expected to grow an astonishing 279,000% in 7 years.

Thanks to this revolutionary technology, America will be reborn. From the ground up.

And thanks to the explosive wealth-building potential of blockchain, a whole new class of millionaires will arise.

> "America has added 675,000 new millionaires over the past year..."
>
> —CNBC

Like the emergence of agriculture and the printing press...railroads, cars and airplanes...even the internet...

The blockchain revolution will completely recast the world.

Power will shift away from the politicians and lobbyists in DC...

Wealth will shift away from Wall Street and all the cronies who scratched their way to the top of the old, broken system.

Even though — as you just saw — DC and Wall Street are in a mad dash to tap into the blockchain...

In reality, that wealth and power will shift back to you...

And to everyone who takes action now on the *right* blockchain investments.

As wealth finally returns to Main Street, America will be reborn.

The possibility — the profit potential — is LIMITLESS.

Now you see why I'm pounding the table.

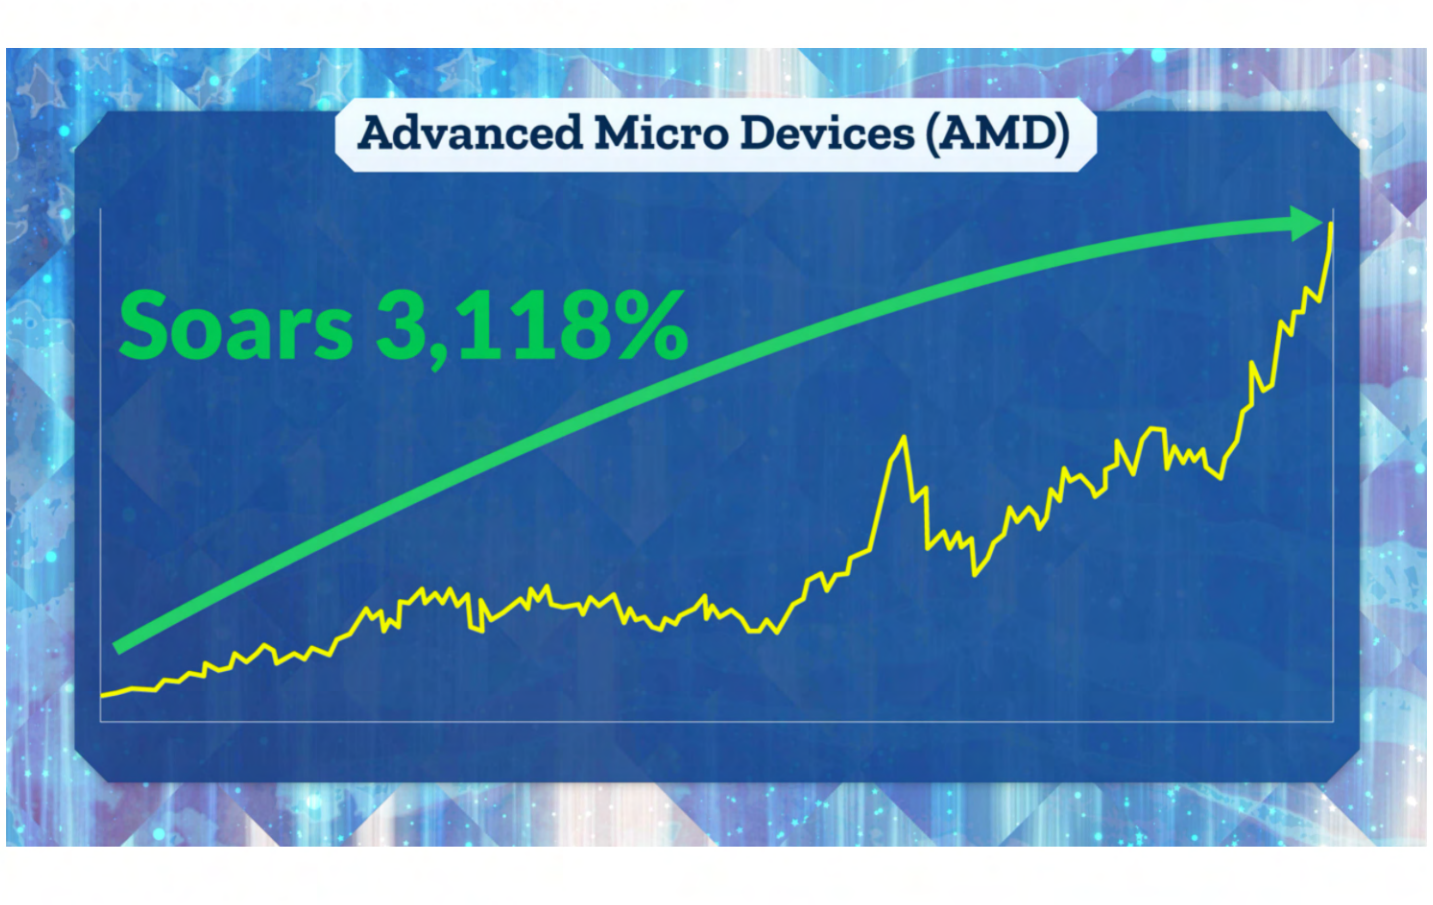
Let me repeat... You CAN'T afford to wait.

If you want to profit from this unstoppable 279,000% trend, there's NO time to waste.

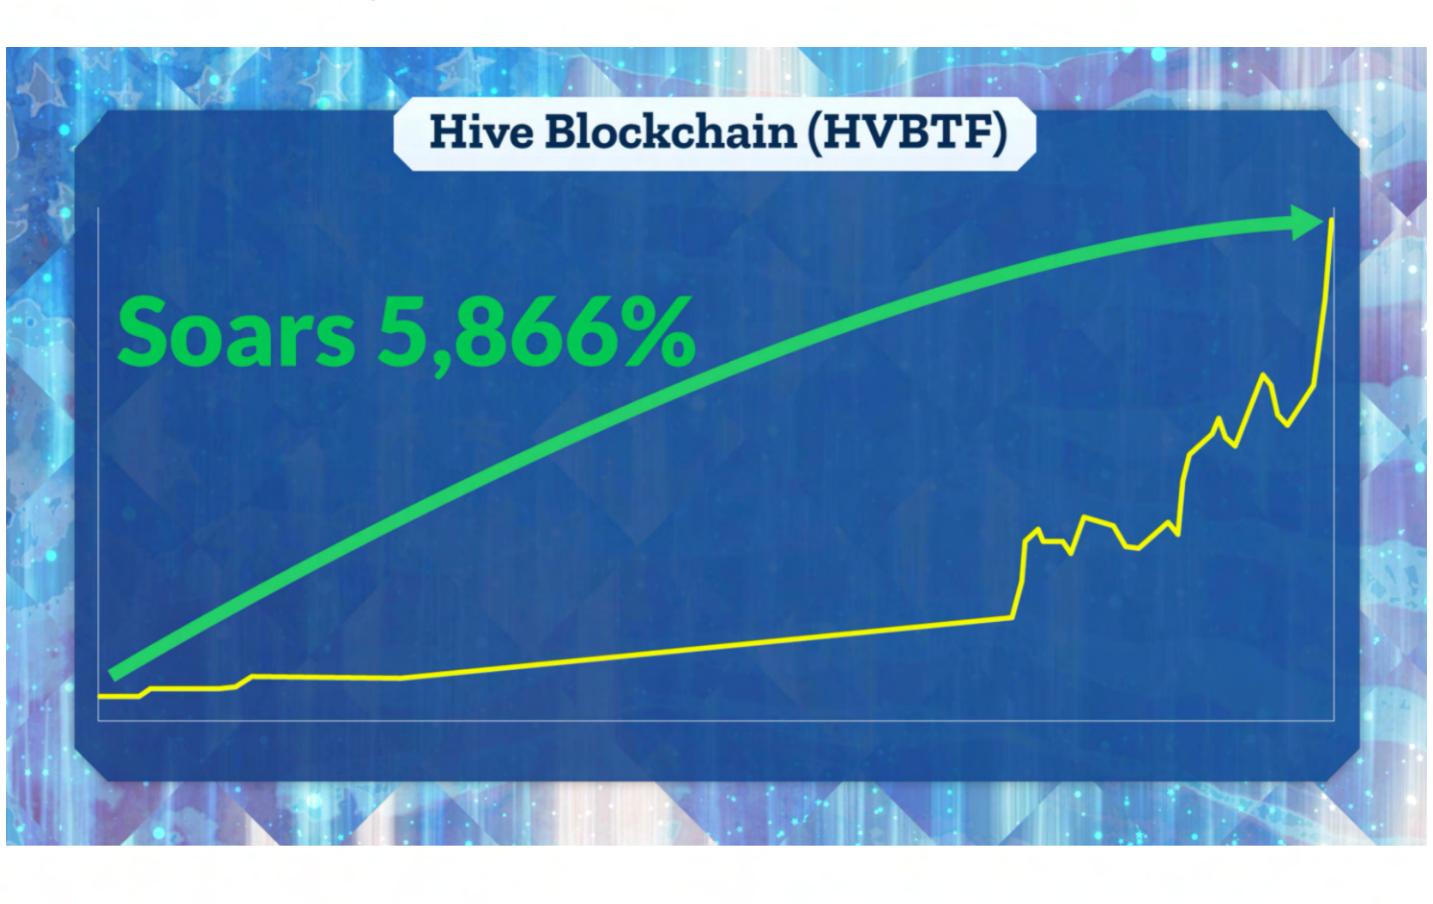
So here are three ultra-critical steps you *need* to take RIGHT now...

Blockchain companies are *already* shooting up in value...

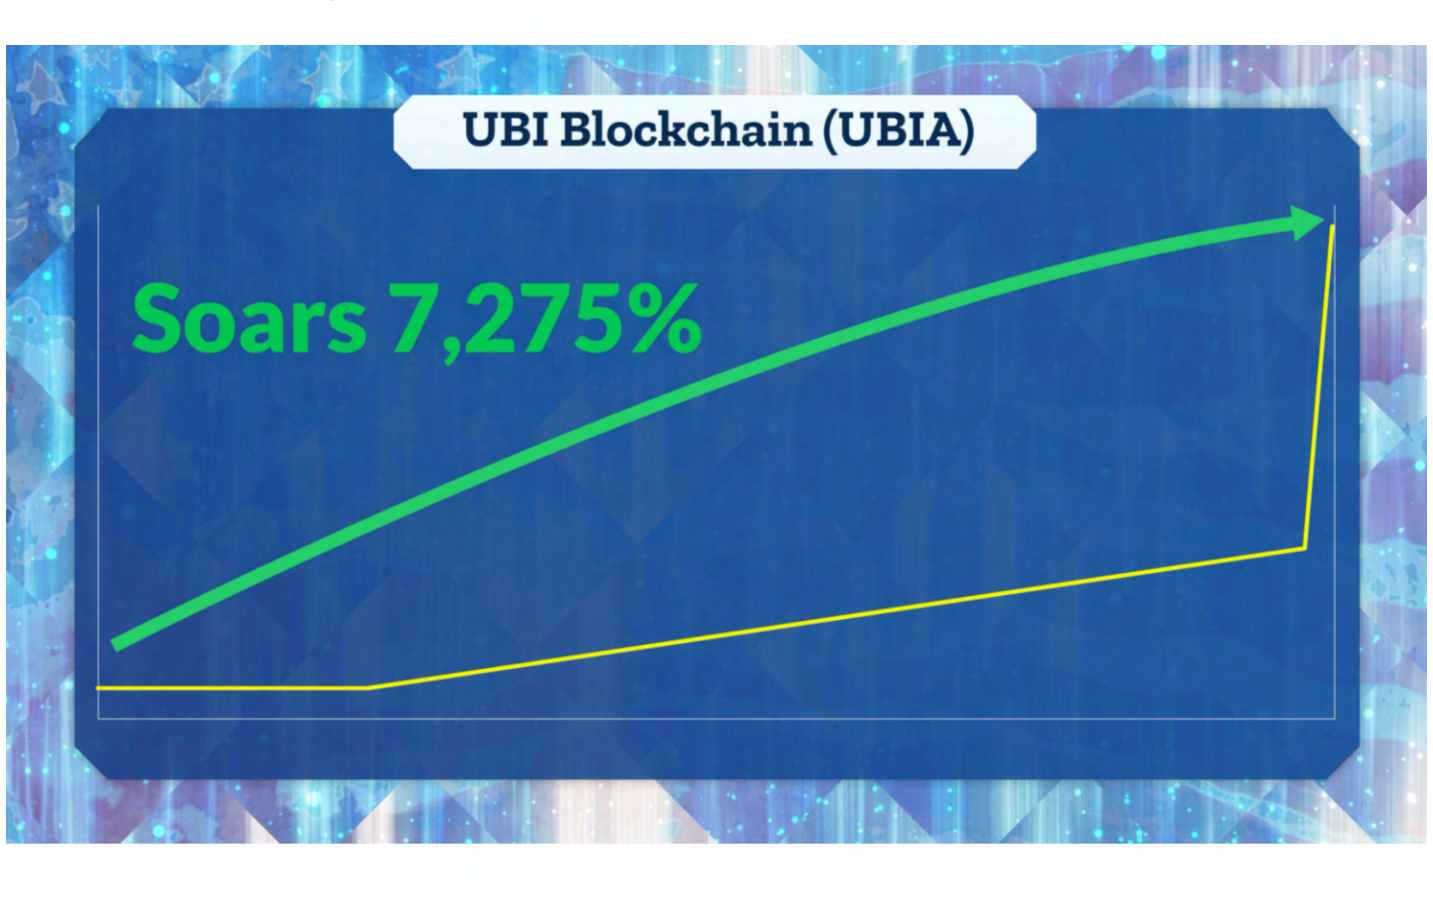
Advanced Micro Devices has soared 3,118%...



And Hive Blockchain shot up 5,866%...



UBI Blockchain blasted up 7,275%...



This is just the beginning...

With blockchain's potential to disrupt just about every major industry...and a 279,000% growth rate...

It's not an exaggeration to say that blockchain technology will make many people very rich.

800,000 new millionaires are set to be born. I want you to join them.

You're lucky to see this trend at this early stage!

Step 1: Buy These 2 Blockchain Stocks, Immediately

First, I want you to know, there are dozens of so-called blockchain stocks out there.

And most of them, to be frank, have little or nothing to do with this new technology.

One beverage company, Long Island Iced Tea, changed their name to "Long Island Blockchain" to attract interest from investors. Except they just make drinks, they have nothing to do with blockchain!

It sucked in a lot of unsuspecting people.

So please, don't just run out and buy any blockchain stock.

Through my research, I've discovered the two best blockchain investments to buy right now.

The first one is a company that has positioned itself as the *only* exchange for blockchain assets.

The Securities and Exchange Commission even granted them approval on the most profitable form of blockchain trading.

That means they get a cut every time someone buys, sells, or trades through their platform.

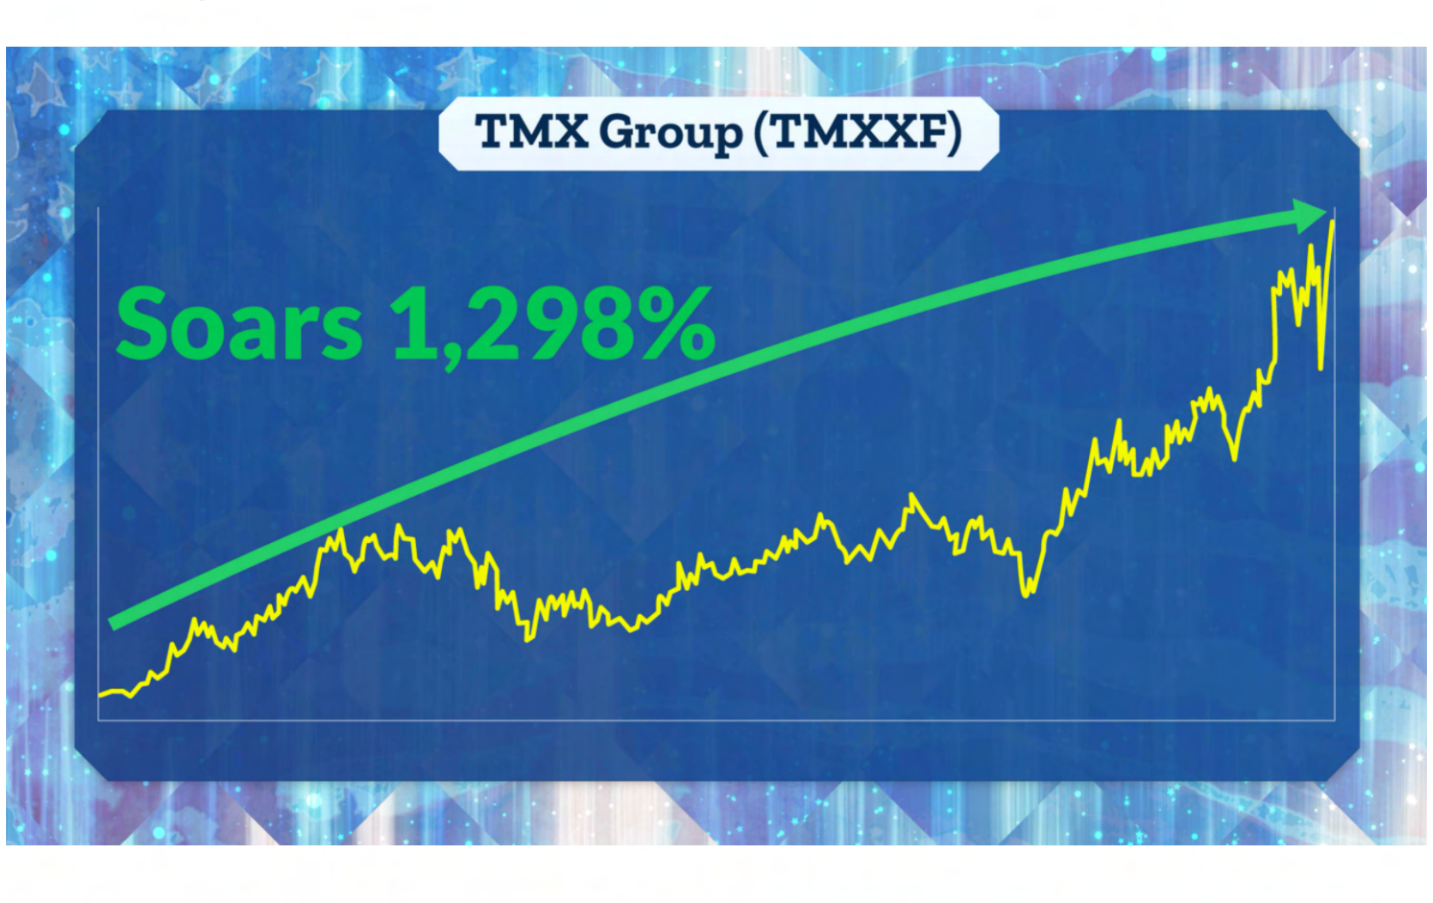
And the more blockchain assets trade, the more money this company makes. No matter if these assets go up or down.

Take a look at how similar stocks have performed...

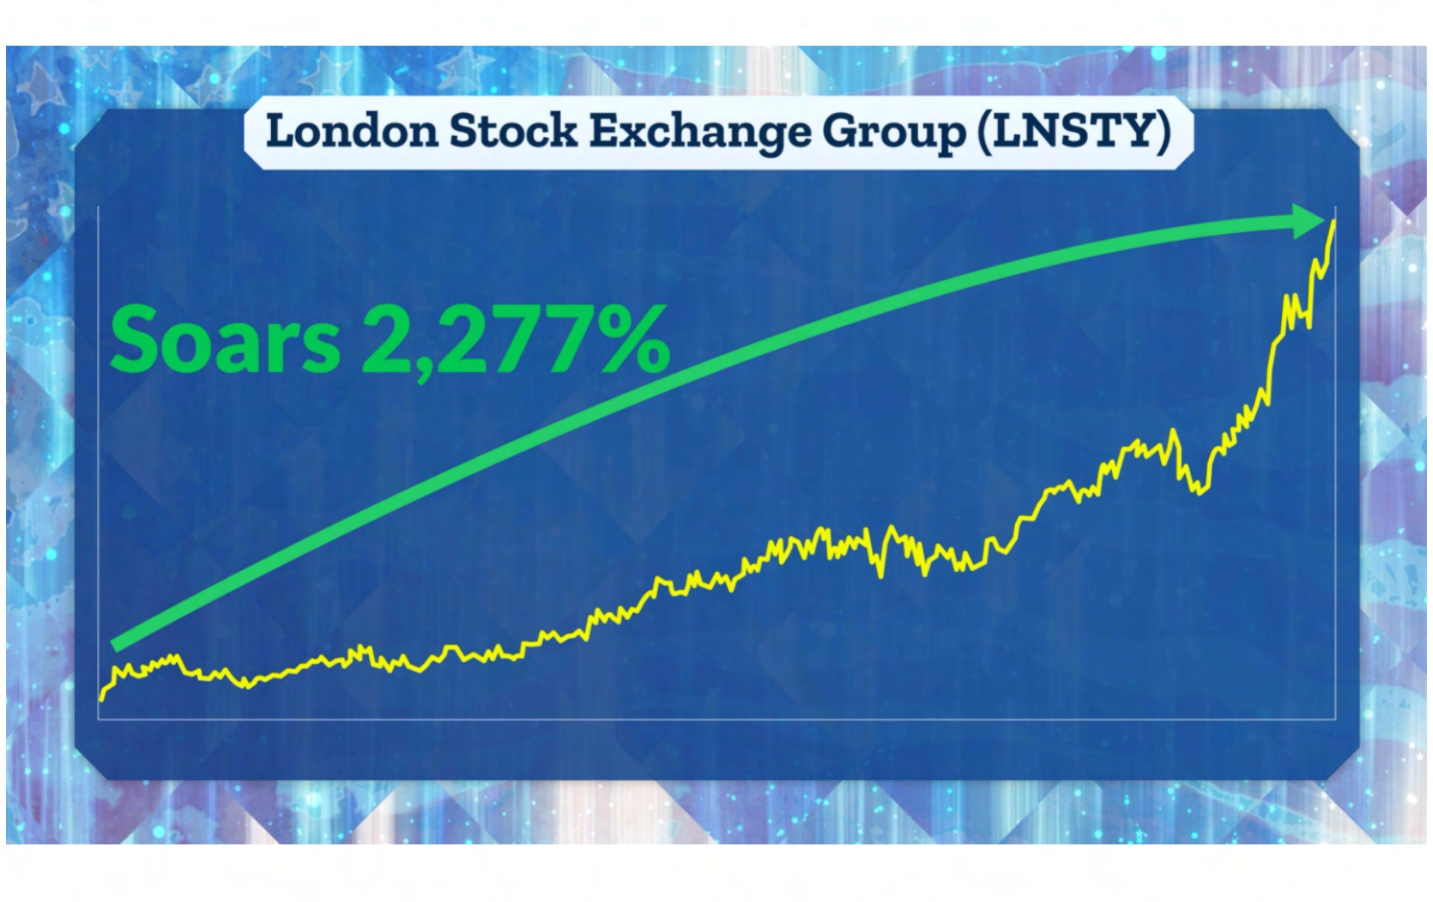
The TMX Group runs the Toronto Stock Exchange and the Venture Exchange.

These exchanges house explosive penny stocks in the marijuana and gold sectors...

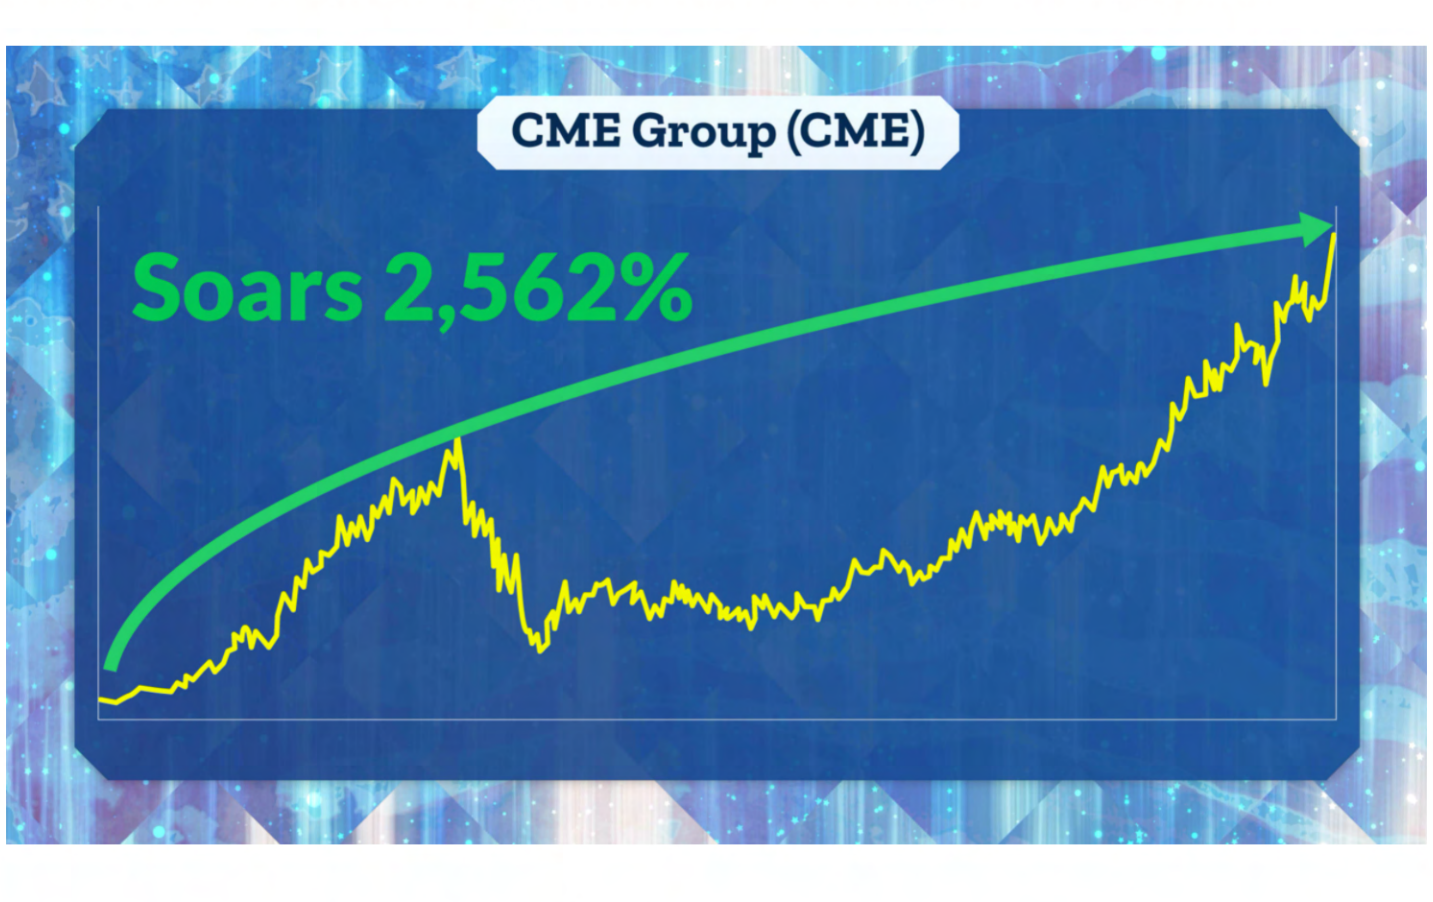
TMX stock shot up 1,298%...



While the London Exchange Group rose 2,277%...



CME Group — one of the world's biggest derivatives exchanges — rose 2,562%...



You can see the profit power of innovative exchange stocks.

Over the next three years, shares of this blockchain exchange could easily triple.

That seems conservative. Because the less revolutionary exchanges you just saw went up thousands of percent.

My second blockchain investment might be an even bigger winner...

Because it's a "one stop shop" for all the ways that the blockchain can revolutionize financial transactions. And money itself.

With this one investment, you can grab a stake in blockchain banking...crypto investing... payment processing...real estate...cloud computing...and Amazon-type e-commerce.

This investment is set to soar as blockchain and cryptocurrencies go more and more mainstream.

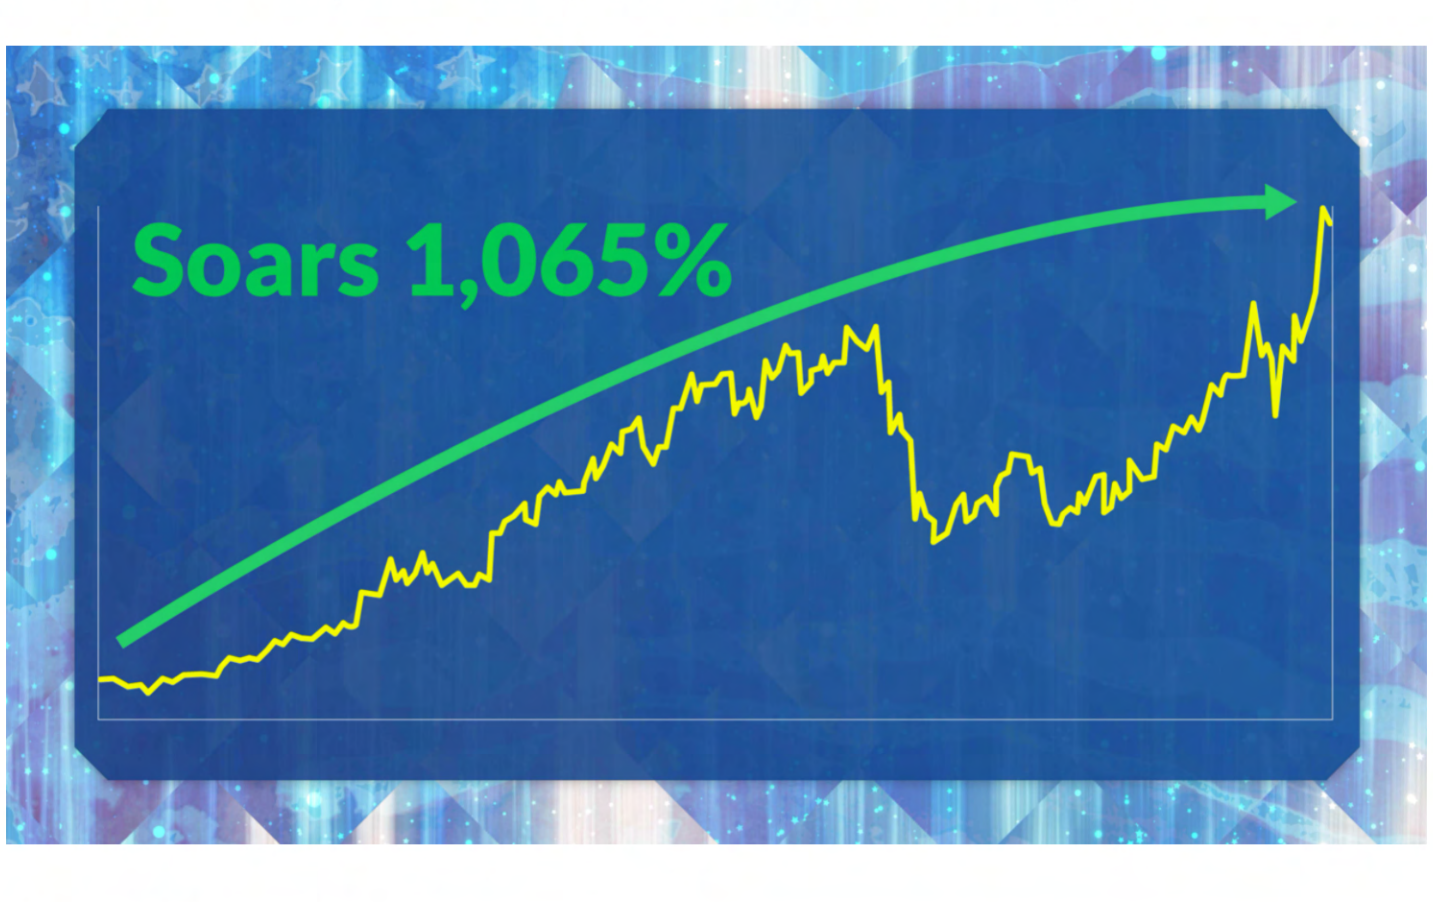
For now, this investment is still fairly small. It's worth around $2 billion, so it still has massive room to grow.

And big institutions are buying shares. Over the past two quarters , institutional purchases of this company almost doubled.

So the big dogs are not only interested, they're ramping up fast.

When I recommended a stock similar to this a few years back, it went on to become the #1 S&P Stock of the Year in 2017.

It crushed 499 other companies, soaring 1,065% had you held through 2020.



Now, it's happening again...

And this second blockchain investment has started a big move, shooting up 46% in recent months.

But it's just warming up. Remember, the blockchain is expected to grow 279,000% from here. So the sky's the limit.

This innovative investment has attracted heavy hitters like Morgan Stanley, Raymond James, and The Royal Bank of Canada.

If it captures just a sliver of blockchain's expected growth...

Well, it's off to the races. 1,000% gains are not out of the question over the next few years.

That's why you need to get positioned in these two blockchain opportunities immediately.

That's why I've recently put together a special report called, ***America Reborn: How Blockchain Will Transform Our Country and Generate Life-Changing Wealth***.

This urgent report reveals everything you need to get started today.

Here's the next huge opportunity...

Step Two: Make smart blockchain speculations

If you truly want to make life-changing wealth, pay close attention to this...

I uncovered a handful of tiny, speculative assets — with deep ties to the blockchain revolution...

They're so small — they're not publicly traded...

But I've found a way you can take a direct stake in them today.

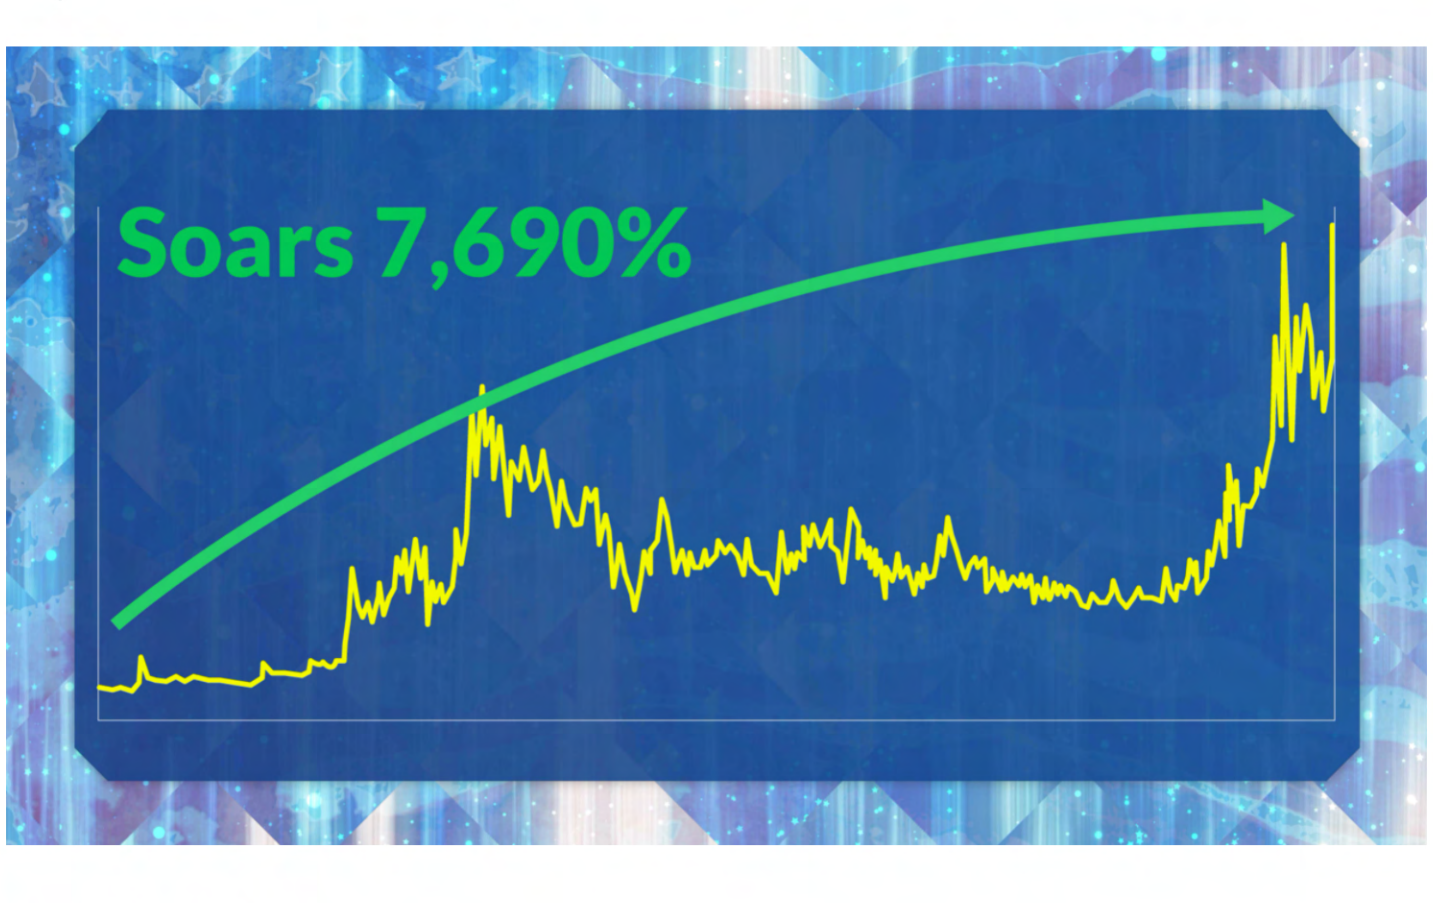
Keep in mind, these are high-risk, high-reward bets. Bets that can turn a few hundred bucks into a massive nest-egg...

You can't just log-in to a brokerage account or pick up the phone and call your broker to take a stake in these companies. It involves a few extra steps.

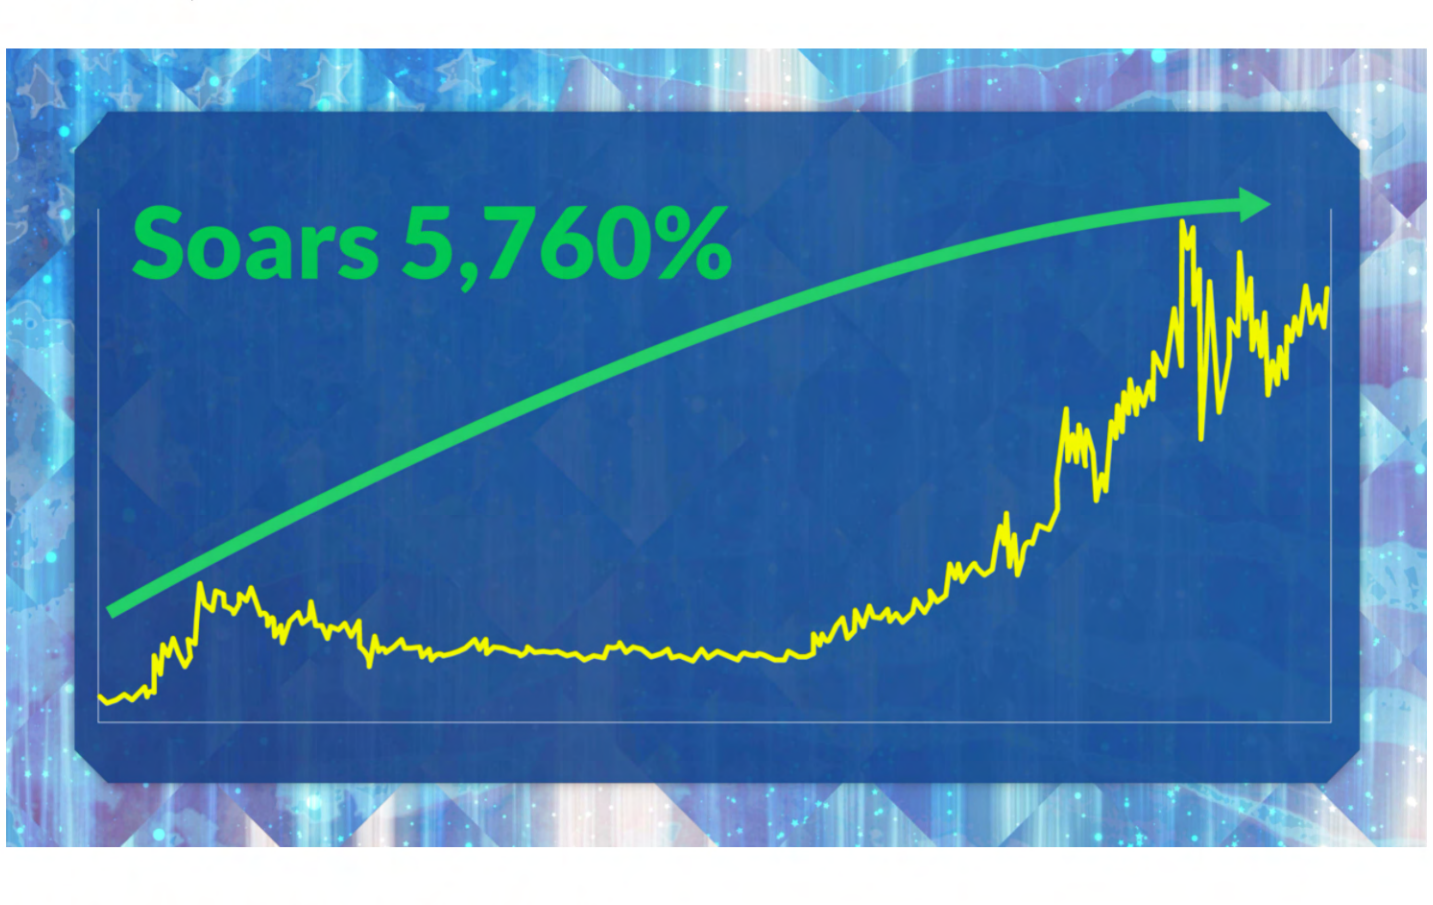
So I've gone out of my way to show you exactly how to get in — with minimal effort.

And when you see the huge upside, I think you'll agree it's worth it.

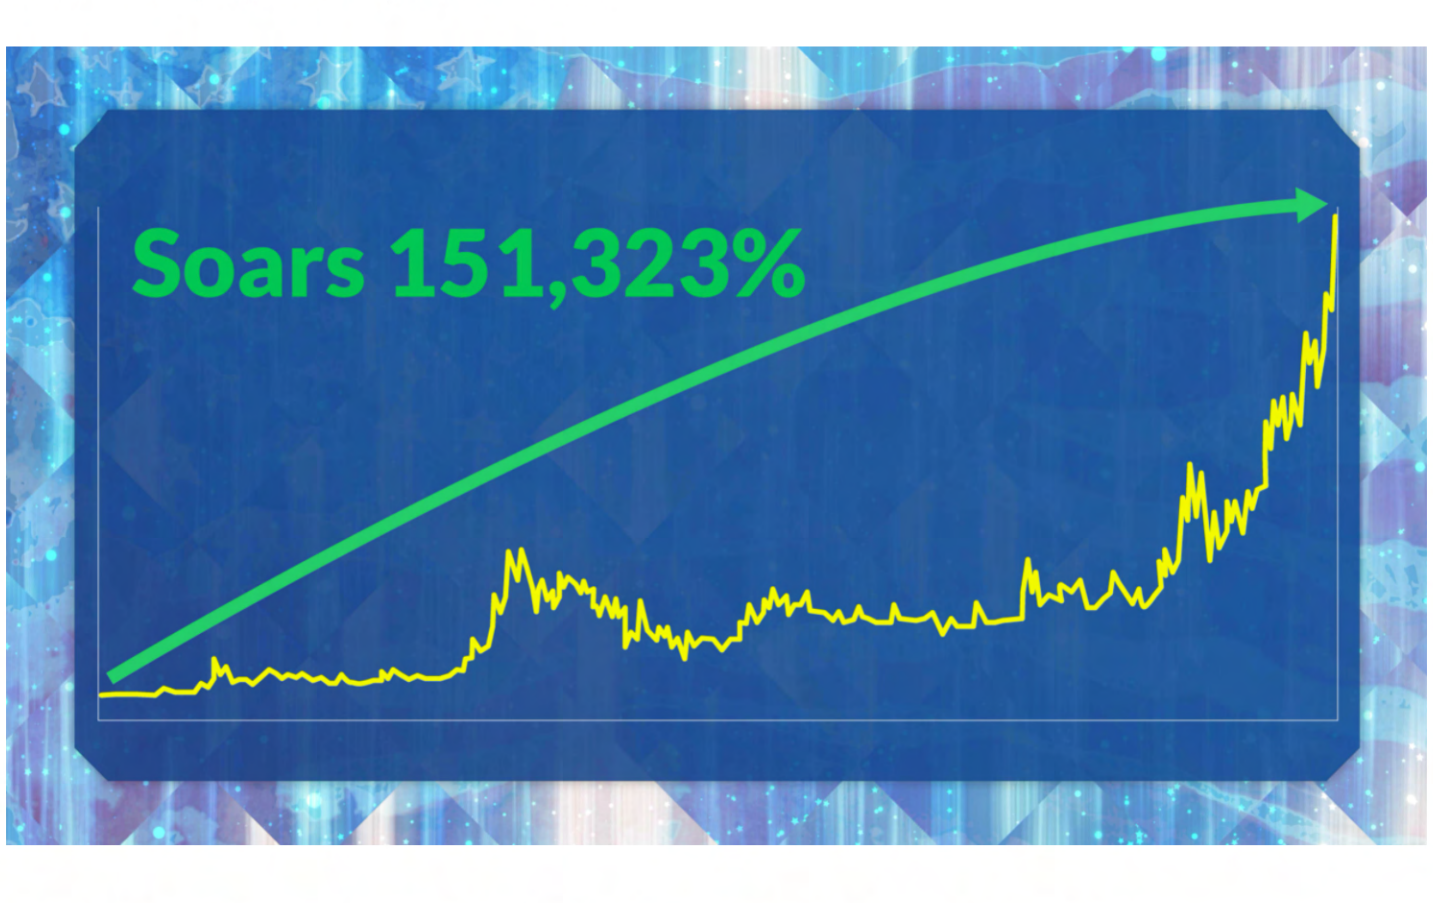
One of my recommendations rose 7,690% in 10 months...



Another rallied 5,760%...



The most insane play shot up 151,323%...



That's a mind-boggling return. Enough to turn $675 into over $1 million.

Better yet, those life-changing gains came lightning fast.

It took just 11 months.

With gains like that, you might think that this run is over.

Friends, I want you to hear me when I tell you: This is just the beginning.

As we've seen in the past few months, cryptos have gone on another insane bull run.

Today, you have a shot at turning a small stake into a million-dollar fortune.

This opportunity is not going to last forever.

It's absolutely urgent that you get positioned today.

That's why I've put together a comprehensive report called, ***Blockchain Millionaire: How to Turn $675 into $1 Million***.

This report contains everything you need to get started.

I want to send it to you today along with ***America Reborn: How Blockchain Will Transform Our Country and Generate Life-Changing Wealth***.

If you decide to become a member of my group, you can get this urgent research at no extra charge.

As I mentioned earlier, after I left Wall Street behind, I joined the #1 independent research service, *The Palm Beach Letter*.

I've made it my mission to help show readers the chance to get rich.

And I'm happy to say we've enjoyed tremendous success.

Over the last few years, the *Palm Beach Letter* portfolio has performed EIGHT TIMES better than the S&P 500...

And we've shown readers — on average — 180% returns per recommendation each year...

That's why, today, I want to invite you to join what I'm calling "The Millionaire's Club."

> "An unprecedented 11 million American millionaires..."
>
> —Bloomberg

You're Invited to Join "The Millionaire's Club"

Look, I got lucky when I busted into Wall Street in the '80s...

I didn't have any money...no college degree...not even a nice suit!

But I had one thing: a connection. An insider who could open the door to the "Millionaire's Club."

This friend introduced me to a hiring manager at Shearson Lehman.

Without this simple connection, my life would be a lot different today.

It's time for me to return the favor.

So now I'm opening the door for YOU. To enter the "Millionaire's Club," if you choose.

I'm inviting you to try *The Palm Beach Letter*.

Your membership is 100% risk-free.

The way I see it, the greater risk you face is skipping this opportunity and missing out on your chance to become a millionaire with blockchain.

As a *Palm Beach Letter* member, you'll have my 30 years of experience in financial markets working for you.

I'll show you the hottest, early stage opportunities on the market. Including the two best ways to play the 279,000% blockchain revolution.

You won't read about these ideas in the *Wall Street Journal*, *Barron's* or *Forbes*... You'll never see them on *CNBC* or *Fox Business*.

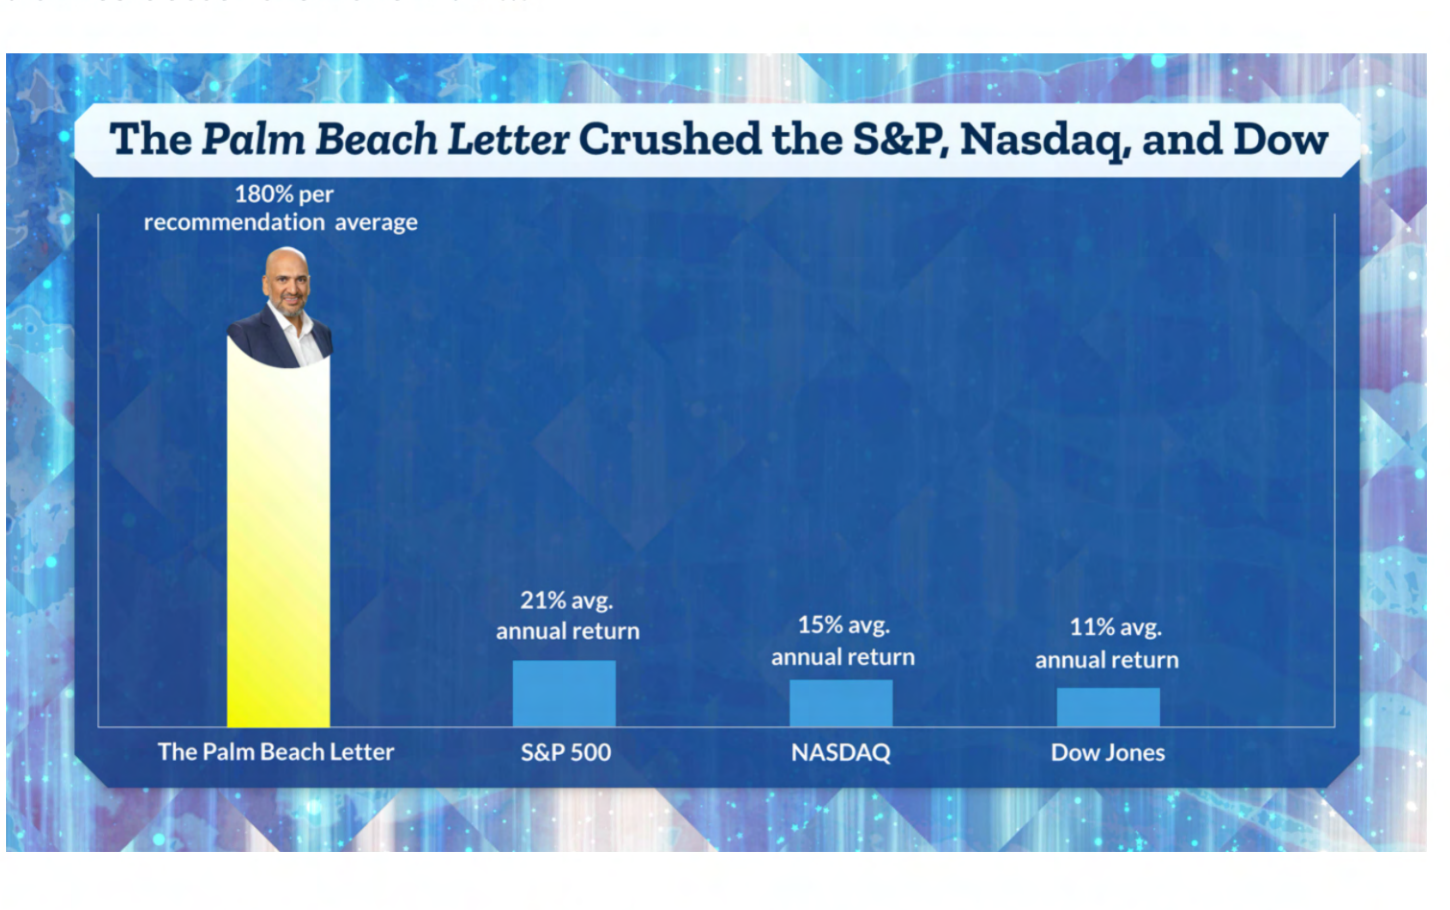
As I mentioned, *The Palm Beach Letter* plays have averaged 180%.

That's ALL of them. Winners, warts, and all.

My readers could have done 8 times better than the S&P...

11 times better than the NASDAQ...

And 16 times better than the Dow...



My performance looked so unbelievable that my publisher called an outside expert.

We had everything independently verified by Alpha Performance Verification — an independent company that evaluates hedge fund performance.

And my readers didn't just have the chance to crush the markets...

As a *Palm Beach Letter* reader, you could've crushed the world's best hedge funds.

Take Bridgewater, for example.

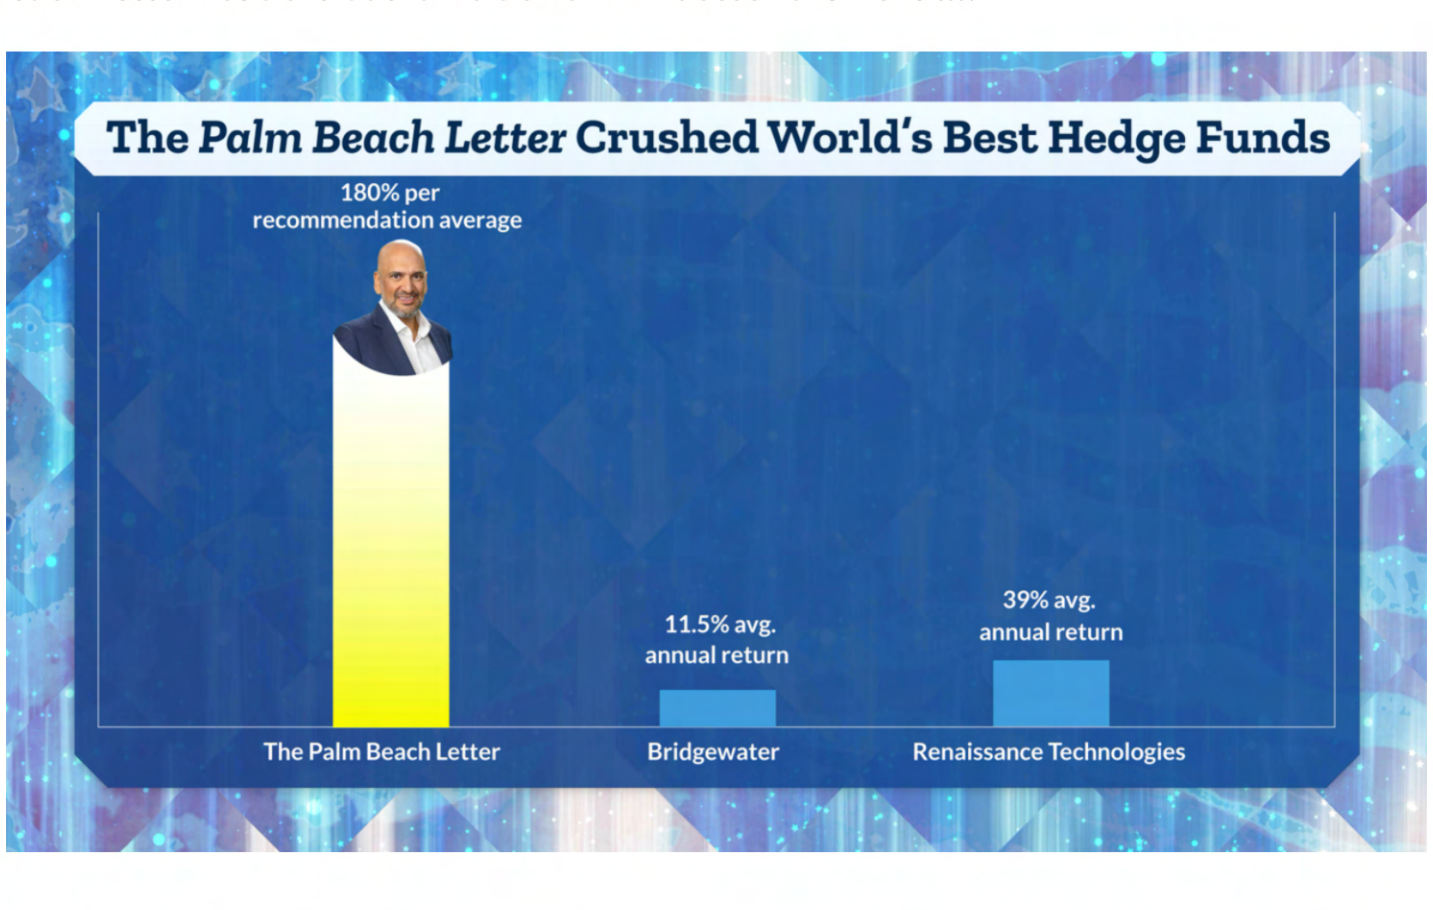
Bridgewater's the world's biggest hedge fund, with over $150 billion under management.

And they've delivered a strong annual return of 11.5% in their flagship Pure Alpha fund.

Then there's secretive quant wizards at Renaissance Technologies. They've got $68 billion to work with.

Renaissance did a lot better than Bridgewater, pulling in an average of 39% each year.

Palm Beach Letter readers could've done FAR better than that...



I used to run a hedge fund myself, so I can tell you those returns DON'T come cheap.

Generally, you have to pay the manager 2% of your assets just to walk in the door. And then you'll shell out 20% of your profits.

With *The Palm Beach Letter*, you pay no management fees or commissions for our research and recommendations.

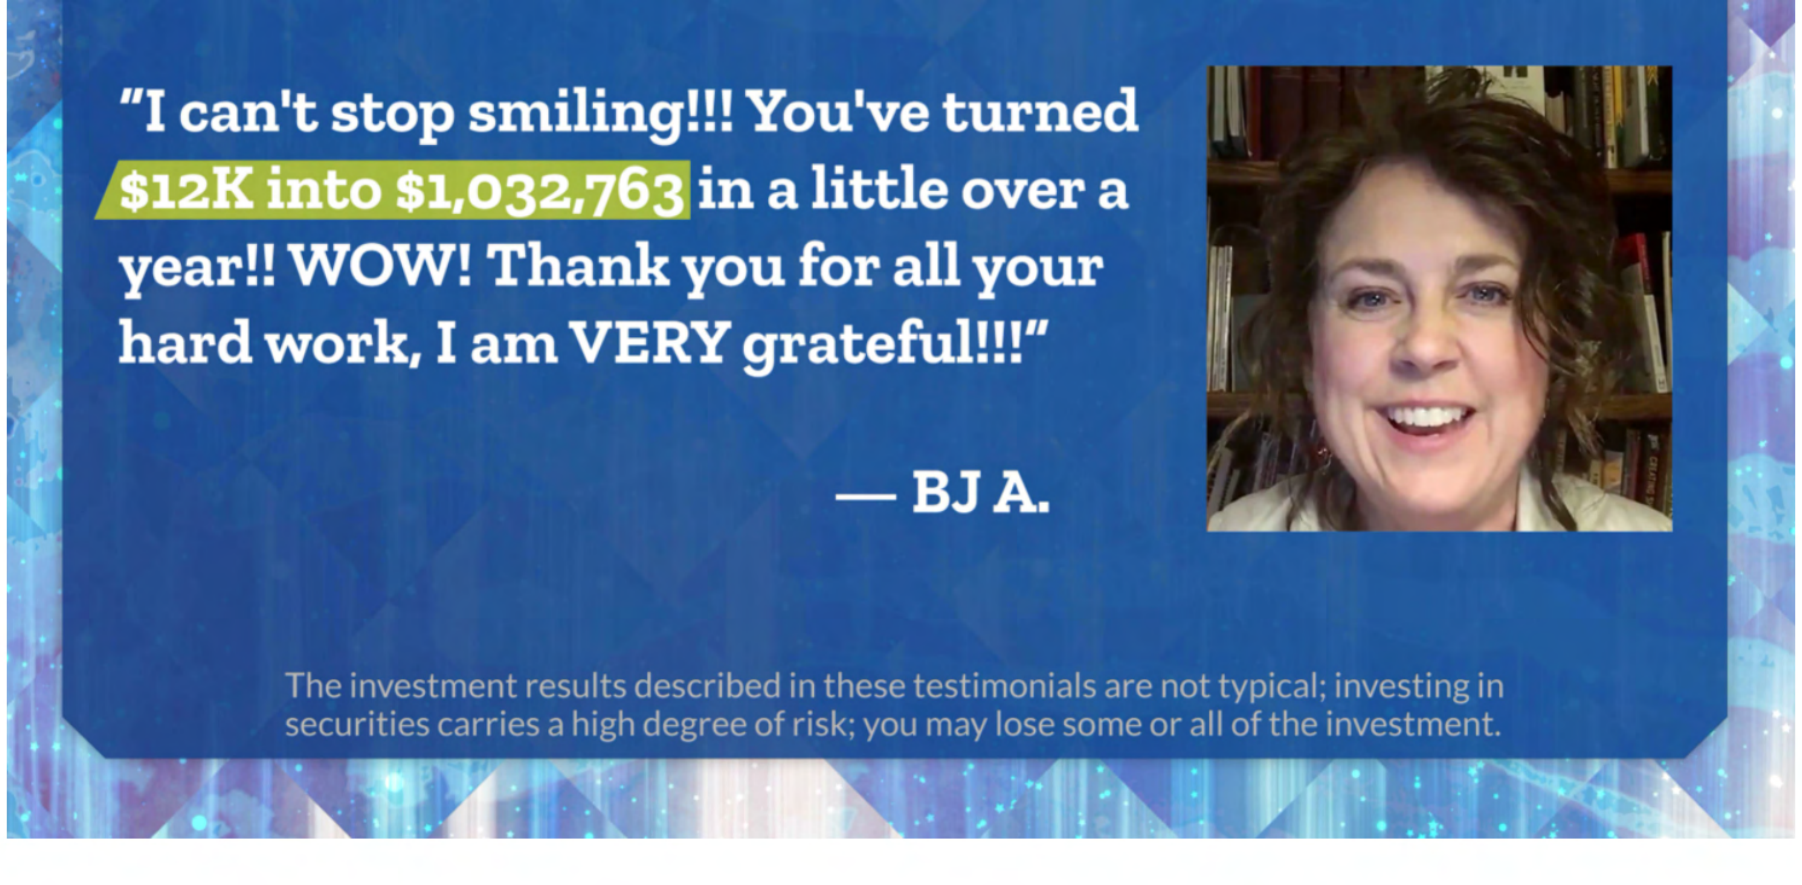
If you act on our recommendations and make a profit, you keep every cent.

Today you can join *ThePalm Beach Letter* for pennies compared to what you'd pay an underperforming hedge fund.

Already, my readers have reported life-changing results...

Tennessee nurse, B.J., lost her family business and her husband came down with a chronic illness that forced him to retire.

With my research, B.J. tells me she turned $12,000 into over a million dollars:



"I can't stop smiling!!! You've turned $12K into $1,032,763 in a little over a year!! WOW! Thank you for all your hard work, I am VERY grateful!!!"

— BJ A.

The investment results described in these testimonials are not typical; investing in securities carries a high degree of risk; you may lose some or all of the investment.

It's amazing.

Which is why I'm inviting you to try *The Palm Beach Letter.*

If you accept my offer to join the *Palm Beach Letter* today, I'll send you my latest research right away.

- ✓ ***America Reborn: How Blockchain Will Transform Our Country and Generate Life-Changing Wealth***
- ✓ ***Blockchain Millionaire: How to Turn $675 into $1 Million***

But that's not all…

Before you accept my invitation, there is one more important step you need to take…

Step Three: Protect Your Wealth

As I mentioned, America is undergoing a massive transformation.

That's why you should make sure you own only the highest-quality stocks…

My team dug deep into every market crash in recent history and what we found something astonishing.

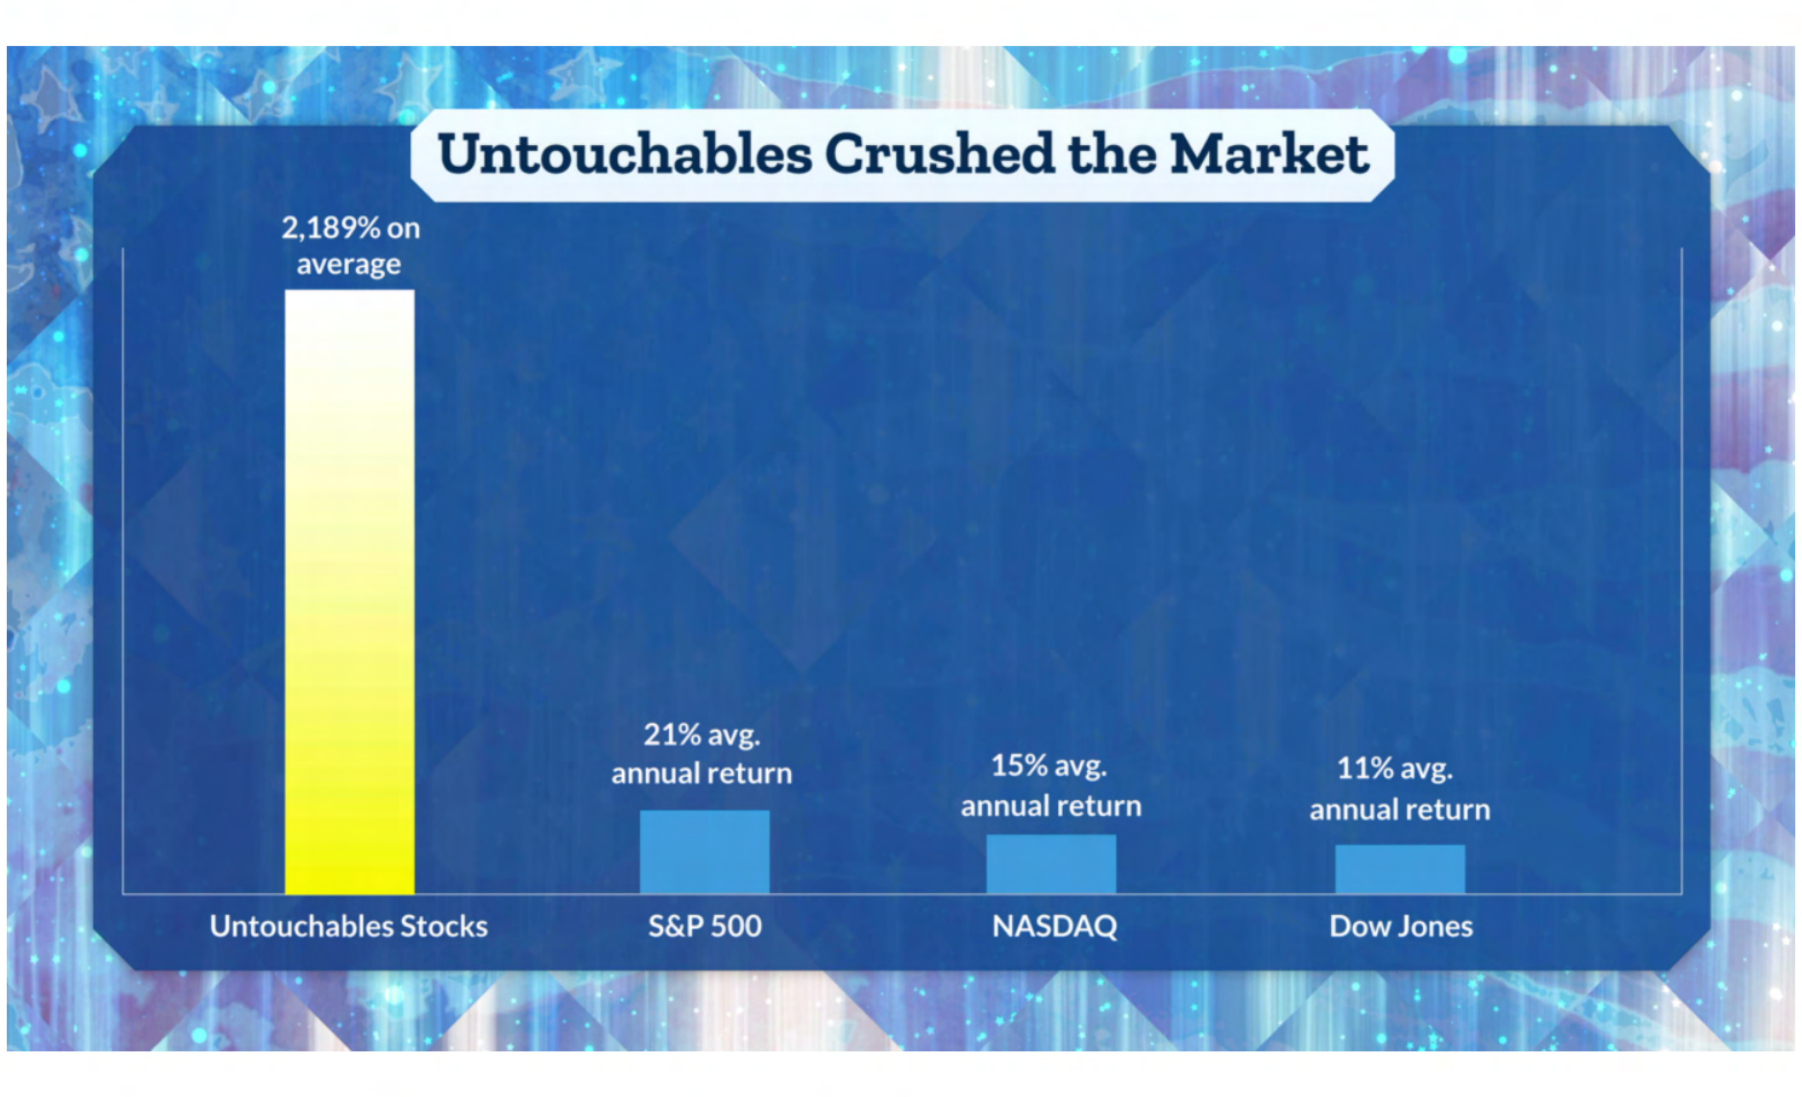
We discovered a single class of companies that not only withstood the most brutal markets in history…but soared through the turmoil, minting investors a fortune.

This ignored class of stocks will stand tall as dozens of other major companies — retailers, airlines, and hotels — struggle.

I call these companies "Untouchables."

Over the past 20 years, Untouchable Stocks returned 2,189%.

They absolutely crushed the market:



The Untouchables would've paid you more than 14X more money.

With much less risk. Even in the worst of years, the Untouchables ended the year down less than 10% — even when stocks around them were cratering 25%... 50% or more.

In short, the Untouchables were safer AND could deliver 14-times greater gains.

That's why I'd like to rush you a copy of a third special report today.

When you become a member of *ThePalm Beach Letter*, you'll get immediate access to my new report: ***America's Untouchables: The Ultimate Portfolio Protection.***

If you take one thing away from this video, let it be this:

Huge, transformative changes are coming to our economy and our country.

And you have a clear choice to make:

You can prepare for these changes now… and watch as they drive the value of your portfolio much, much higher — potentially making you a millionaire in the months ahead.

Or you can hang on to the old economy — and the old way of investing, and watch as that world is destroyed…

I want you to make the right decision.

There are plenty of old-school analysts and brokers who will cling to the old world and urge you to do the same.

Like the Luddites who destroyed machines to try to stop the Industrial Revolution...some folks just fear progress.

My hope is you won't listen and be dragged down with them.

The stakes have never been higher…not in your lifetime.

Remember, had you bought Apple back when I recommended it, you would've pulled in 31,100%. A huge gain.

But that gain took 17 years to play out... Who wants to wait 17 years?

This is why I am so excited about blockchain because the gains happen much faster.

With blockchain, you can capture 20 years of gains in 25 weeks…

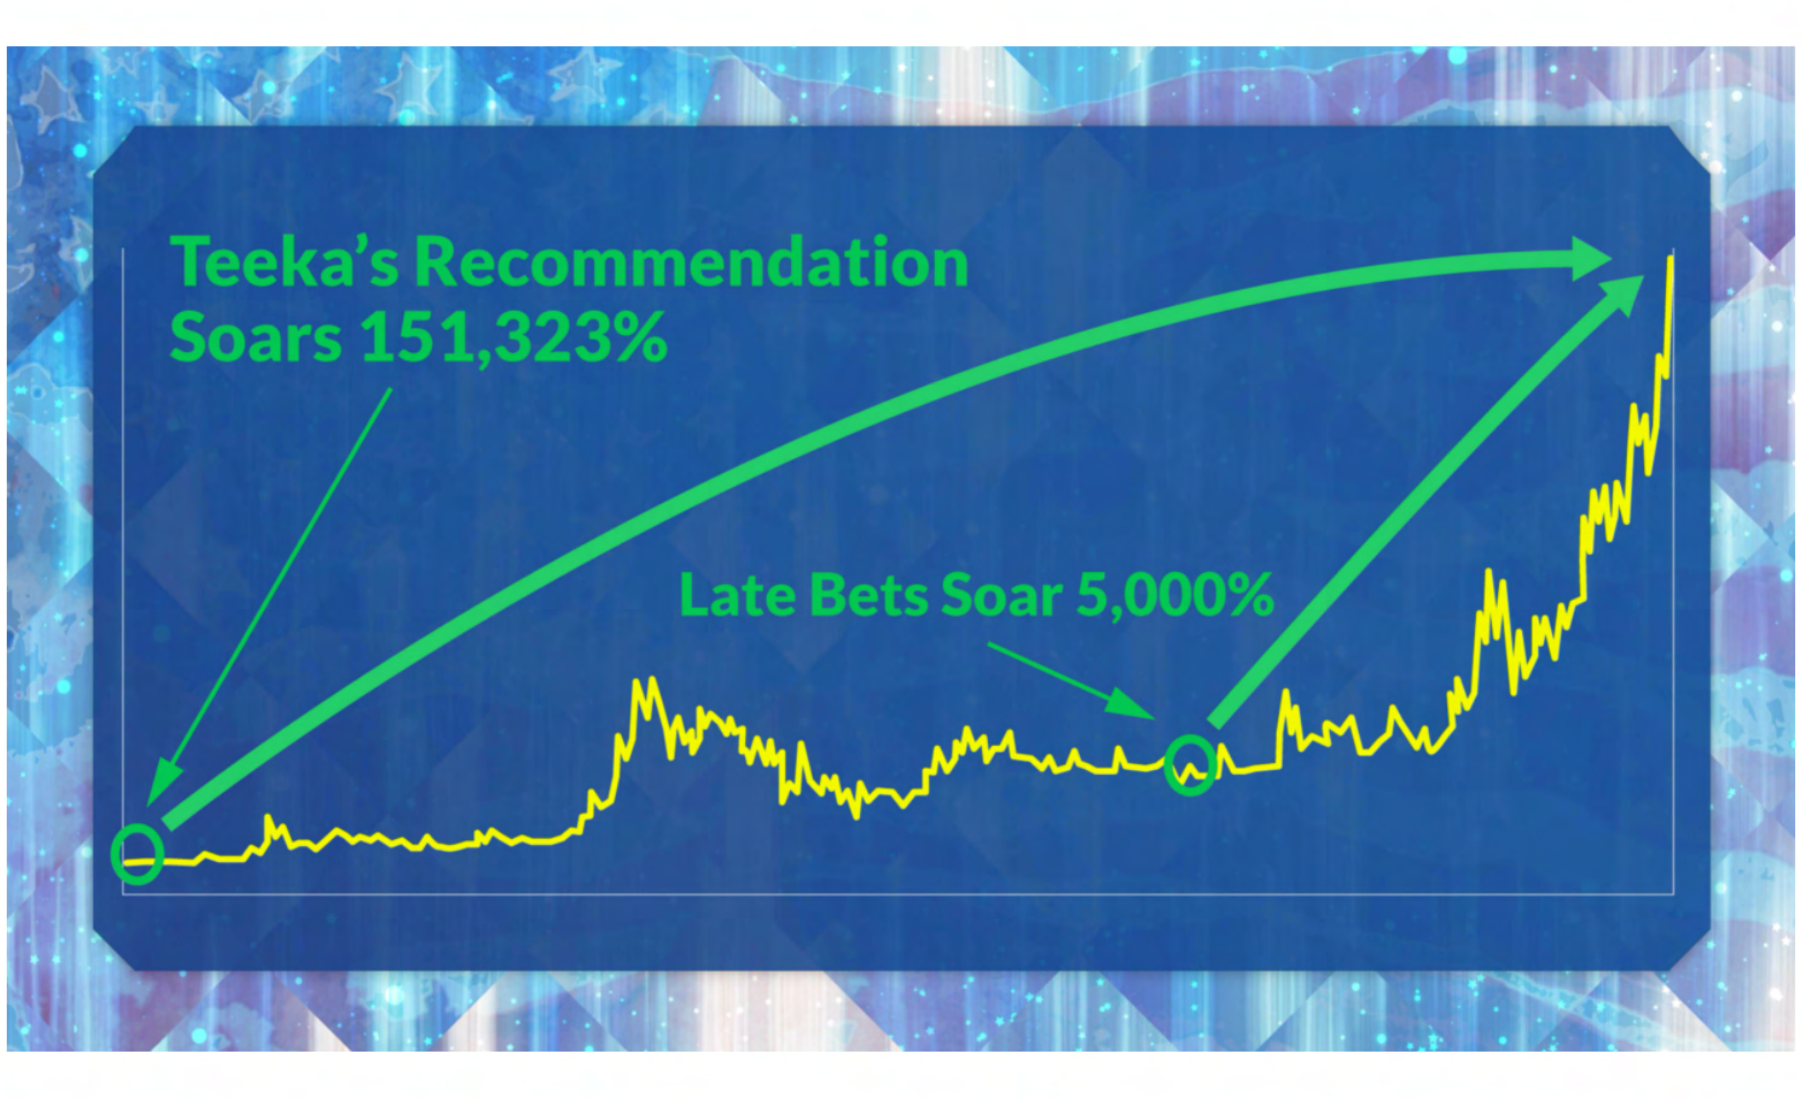
This exact same dynamic played out in one blockchain asset I recommended.

It shot up 151,323% in less than a year.

That's enough to turn a modest $675 investment into over $1 million.

However, most "experts" picked up on this trend far too late.

Of course, anyone who jumped into late STILL could've made a ton of money.



Over 5,000%...

A 5,000% gain turns $675 into more than $34,000… which is nothing to sneeze at…

But it isn't $1 million.

Late Investors Miss $968,000 in Profit
$1 million
$34,000

The same choice stares you in the face right now.

Because getting into blockchain NOW could be the difference between $34,000 and $1 million.

Are you ready to get started?

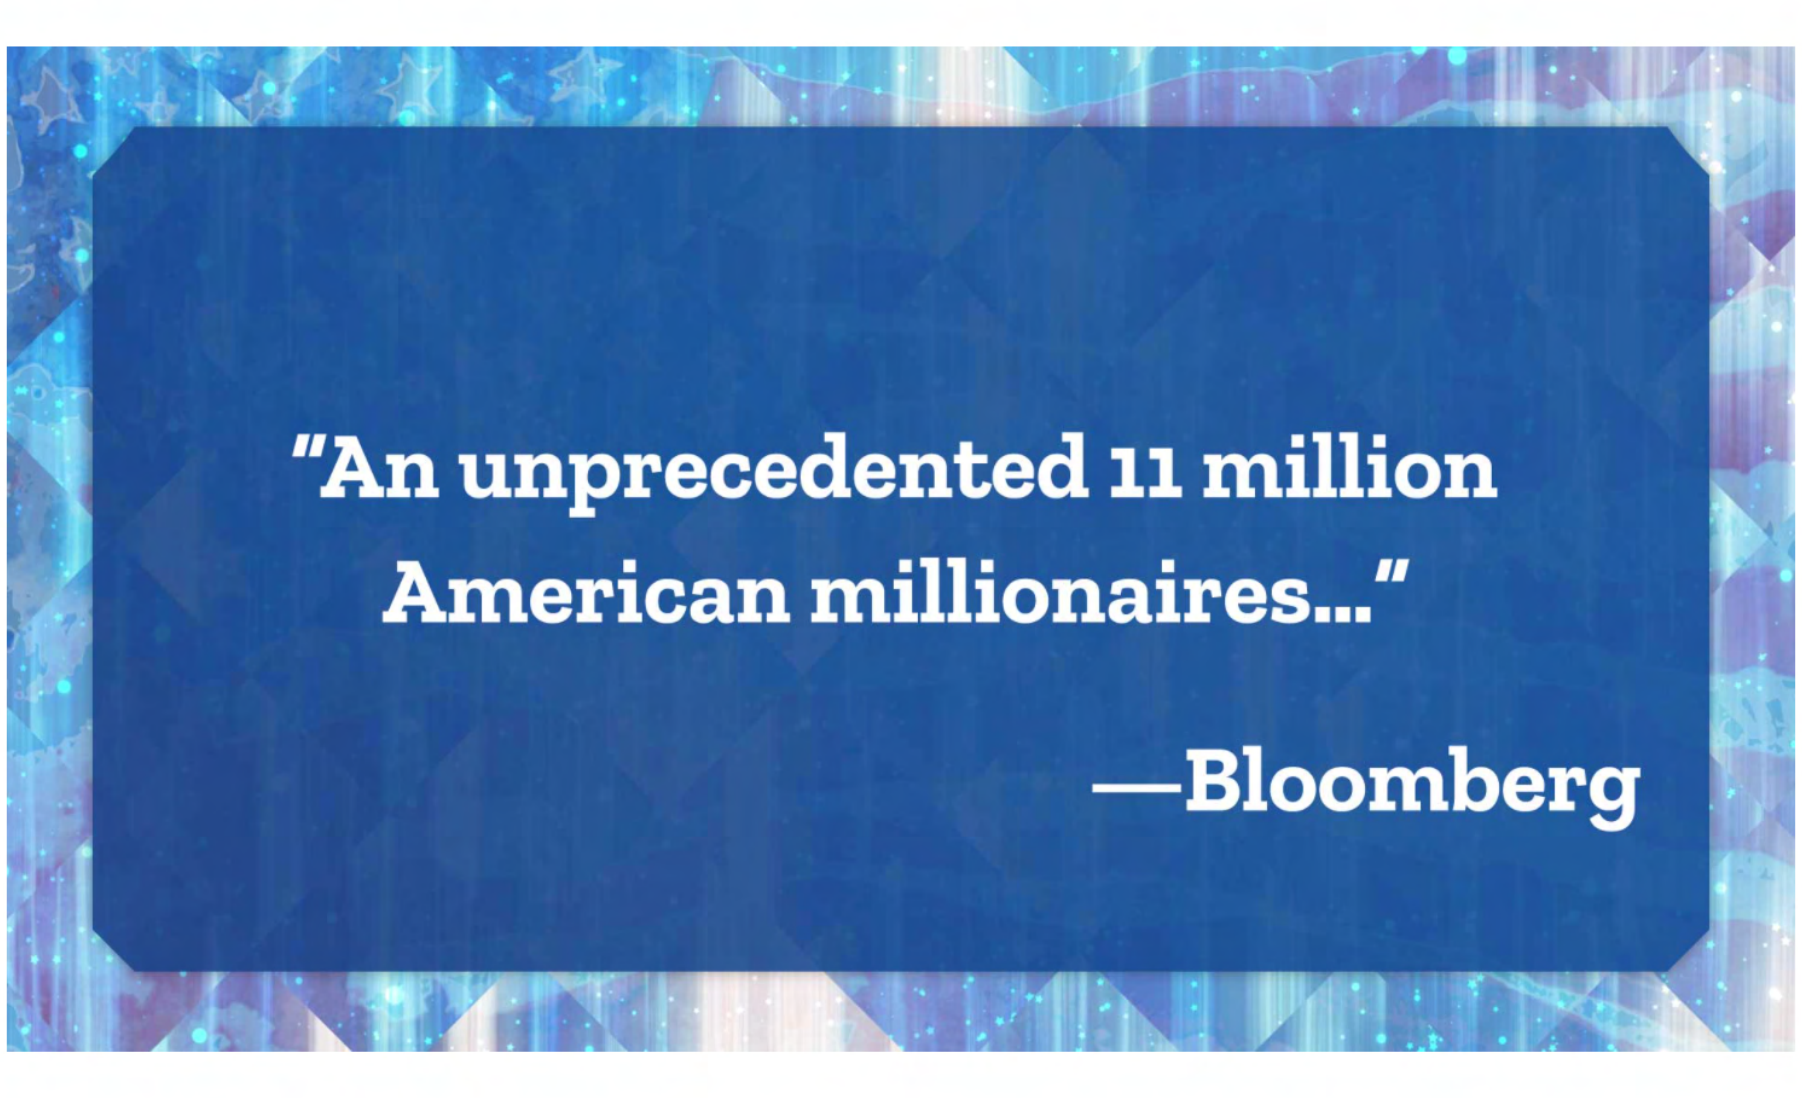
Great — let's talk details…

It's so urgent you act today that I'm going to slash your membership fee by 75%.

Because today's 279,000% growth opportunity with blockchain requires immediate action...

I want to remove *any* obstacle that can get in the way of you taking action today.

And that is why, if you accept my invitation to join ***The Palm Beach Letter*** today… and become a member of "The Millionaire's Club."



"An unprecedented 11 million American millionaires..."

—Bloomberg

You can claim a year's membership for $49 rather than pay the retail price of $199.

I have a simple question: Would you invest $49 for the chance to make a fortune?

Would you give up a month's worth of Starbucks cappuccinos for the chance to substantially improve your retirement?

Because that's the opportunity in front of you today.

When you accept your membership offer, all of these benefits are yours immediately:

- ✓ 12 monthly issues of ***The Palm Beach Letter.*** You'll get at least one actionable play each month.
- ✓ You'll have immediate access to my most urgent research report, called ***America Reborn: How Blockchain Will Transform our Country and Generate Life-Changing Wealth***
- ✓ You'll also get my second report: ***Blockchain Millionaire: How to Turn $675 into $1 Million***
- ✓ And you can instantly download ***America's Untouchables: The Ultimate Portfolio Protection***
- ✓ **You'll have full access to my 14-part Crypto Corner video series**. This comprehensive series shows you how to get started with the most powerful blockchain speculations today. To my knowledge, this is the only video series of its kind, and it will help get you up and running in minutes.
- ✓ **You'll also have unlimited access to my full financial research archive**. This private website includes an exhaustive library of profit secrets you won't find anywhere else…
- ✓ **Plus, members-only email and text alerts**. These any-time flash alerts will alert you to the best moment to exit a position and lock in your potential gains…

Remember, *ThePalm Beach Letter* performed EIGHT TIMES better than the S&P 500…

Returning, on average, 180% per year since 2011.

On top of that, *Palm Beach Letter* readers could have crushed the best hedge funds in the world. We left Warren Buffett in the dust.

Now, of course, all investments carry risk. Understand, I can't guarantee what happened in the past will happen again. Which is why I'd never recommend you invest more than you are willing to lose.

But this is your invitation to see what's inside *The Palm Beach Letter* — absolutely risk-free.

Accept my invitation today. Walk through the doors of the "Millionaire's Club."

Take advantage of the 60-day risk-free offer and then decide for yourself.

I want you to be absolutely thrilled with what you see.

And if you're not, I'll send you 100% of your money back for your subscription. No questions.

To review the terms of this historic offer, just click the "YES TEEKA" button that just appeared.

YES, TEEKA

Let me in *The Palm Beach Letter!*

It breaks my heart when I hear it over and over again…

"Teeka, I wish I had bought Apple when you recommended it at a dollar per share…"

"Teeka, I wish I had jumped into blockchain early… when you called that extraordinary 151,000% play…"

I feel for the people that missed out. Regret is an awful feeling.

And that's why I'm so EXCITED for you right now.

Because this huge trend is just getting started…

Friend, hear me when I tell you: Blockchain will be the #1 investment of the century.

And you can own a stake in it.

Or you can sit from the sidelines and watch it happen.

The best part is: It won't take long to blast off. You won't have to wait for anything close to a century.

America's being reborn right now.

And you can, too!

Because blockchain is expected to grow another 279,000% in the next few years.

If you wait, I PROMISE YOU, you will regret it for the rest of your life because the biggest gains could pass you by.

So I'm asking you, with everything I have: Please, take action today.

Because the last time I put out a series of blockchain calls like this, one play shot up as high as 151,000%.

I helped everyday Americans see the chance to turn as little as $675 into $1 million.

Had those people hesitated… and not taken action, those gains could've shrunk to $34,000… Maybe.

$34,000 or $1 million?

You can do the math — it doesn't take a rocket scientist to figure it out...

That's why I'm inviting you to join my research advisory, *The Palm Beach Letter.* I'm throwing open the doors to "The Millionaire's Club."

This opportunity is so incredible that I'm slashing the regular membership fee by 75%.

I IMPLORE you: Make the $1 million choice…

Make this choice, right now, to prosper in the new America.

Make the choice, right now, to not get left behind.

This is a unique turning point in human history.

Because this blockchain opportunity ISN'T reserved for the Wall Street elite.

It's open to everyone.

It's open to YOU.

Stop waiting.

Click the "Yes, Teeka" button to visit our secure order form and become a member of *The Palm Beach Letter* right now.

Before it's too late.

I want to show you how to become a millionaire.

Right now, before it's too late.

If you want to get started immediately, click that button that says "YES, TEEKA — Let me in *The Palm Beach Letter*" now.

YES, TEEKA

Let me in *The Palm Beach Letter!*
