REVEALED: Top Tech Insider Reveals Details of a Private Meeting…

What Elon Musk Revealed in Private Will Change Our Country Forever

Dear Reader,

This is urgent, so I'll be direct…

What I learned during a closed-door meeting in Washington, D.C. — less than a mile from the White House — with billionaire Elon Musk…

Could soon change everything you know about making money in the coming months.

This meeting was never reported on by the press…

In fact, only a small number of insiders — including myself — were able to attend.

And during the meeting, Elon revealed his next trillion-dollar breakthrough…

One I believe could have a far bigger impact on the world than any other technology we've seen before.

And before you start guessing, Elon's latest breakthrough has *nothing* to do with Tesla…

In fact, the breakthrough he's pioneering now has *nothing* to do with electric cars at all…

It's also *not* about solar energy…

And it has nothing to do with his previous banking breakthroughs like PayPal either…

It's far bigger than any of those things.

That's because his latest breakthrough (one that almost nobody knows about yet) could dramatically change our way of living — and even America's future — forever.

Fifty years from now, people may remember it as one of the greatest innovations of the 21st century.

And while most folks are focused on Tesla's meteoric rise in the stock market… already word of Elon's next breakthrough is starting to leak into the mainstream press.

And according to my research, Musk could officially reveal his breakthrough to the public just days from now.

When it's shared with the world, the impact will be immediate.

Iconic American companies you almost certainly do business with could fall into bankruptcy…

Companies like Verizon, Sprint, AT&T, T-Mobile and more…

All could soon go kaput.

At the same time, the technology Elon is pioneering will help millions of Americans, including you, save a fortune…

And most importantly, it could change the way we live our lives — from where we vacation to how we interact with friends and family.

It's comparable to the rise of the internet or the smartphone…

Those two innovations, as you know, created trillions of dollars in wealth and improved our lives.

And what Elon shared is no different.

In a moment, I'll tell you what Elon Musk is working on now…

I'll share pictures of the technology…

I'll prove to you why this breakthrough could change everything about our way of life — from how we shop… to how we travel… to how we conduct business…

Down to a personal level, too… changing how we interact with our friends and family.

And as one of the world's leading technologists… I'll also give you an inside track to investing in this breakthrough tech…

Where a small starting stake could return you a life-changing fortune starting as soon as June 30.

If you've missed out on Elon's previous breakthroughs…

Like PayPal, which went from a tiny off-the-radar startup to a massive $214 billion giant today…

Or Tesla, which is up an incredible 10,621% and counting since its 2010 IPO…

You won't want to miss this. It's your chance to get in on the ground floor — BEFORE everyone else catches on to Elon's next big development.

Let me show you what's going on…

A radical new way of delivering high-speed, unlimited internet to the world…

As Bloomberg reports, this new tech Elon is working on could be nothing short of…

> **"Internet delivered from the heavens"**
>
> *— Bloomberg*

In short, Elon's next big company (one very few people know about yet) may be just days away from revealing an entirely new era of modern internet…

One that will deliver high-speed internet to everyone worldwide…

Without requiring cell towers or anything like that.

Maybe you've been hearing about 5G recently, and how big of an impact it'll have.

CNN says 5G will be "the lifeblood of the new economy."

The Wall Street Journal declares its impact will be "felt around the world."

Even President Trump says 5G "will transform the way our citizens will work, learn, communicate and travel."

The truth is, as I'll show you in a moment, Elon's brand-new technology could be…

Bigger…

Better…

Faster…

Even *safer* than 5G.

When it's first revealed to the world, it'll revolutionize how you, I, and everyone else will use the internet.

It'll completely replace the internet as we know it.

And for fast movers who get in now, the potential rewards are nothing short of life-changing.

I've created this urgent presentation (which could be removed at any moment) to show you how I expect this situation will play out…

What Elon shared in this private meeting…

Why it'll have the biggest impact of any breakthrough in the past decade…

How you can get in on this revolutionary breakthrough alongside top tech insiders…

And much more.

If you missed out on the rise of the internet or the smartphone, you can't afford to miss this…

It could be the last chance in your lifetime to truly become incredibly wealthy.

After all…

History shows that situations like this are when everyday folks have had the rare shot at getting extraordinarily rich

Anytime the stakes are this high…

When trillions of dollars hang in the balance…

When technologies can pioneer a whole new future…

While, at the same time, sending other technologies… even whole companies… into an early grave…

Folks who recognize what's happening, and take action, can get incredibly rich.

See, each time a situation like this happens…

Enormous amounts of money are lost by those who don't see what's happening, as old technologies become obsolete…

And more importantly for you…

Massive amounts of money are made by those who see what's coming ahead of time.

And mark my words: I believe what's coming next is a *radical new internet*, powered directly by Elon Musk

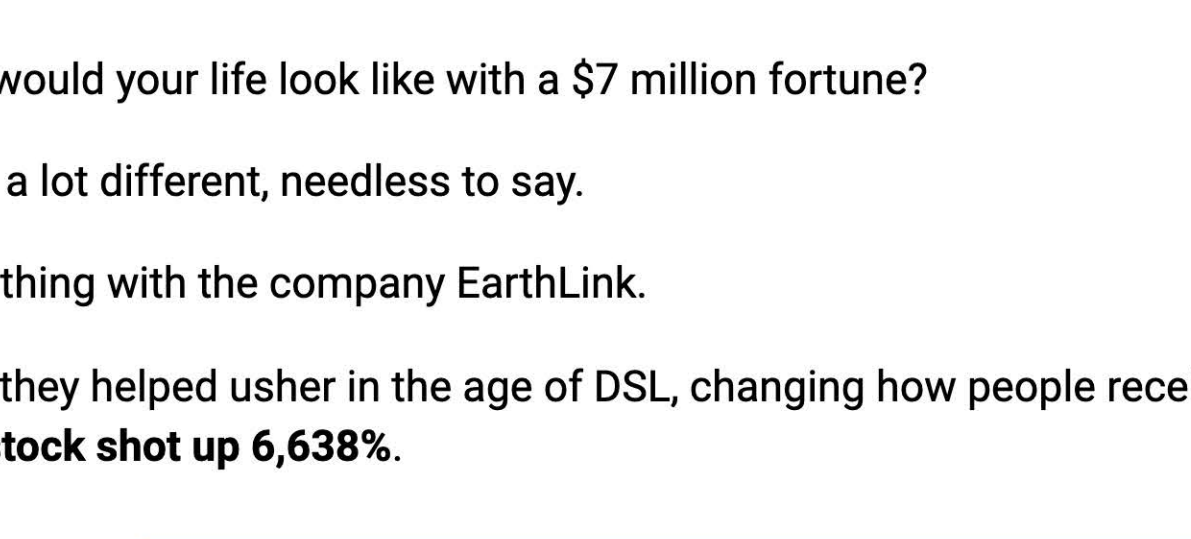
I'll show you exactly why in a moment.

What type of gains can you expect to see this time around?

Well, let's take a look at what the first introduction of the internet did for early investors…

After AOL introduced internet via dial-up connection, for example…

Their stock soared a rare, massive 70,636%.



Just think about that…

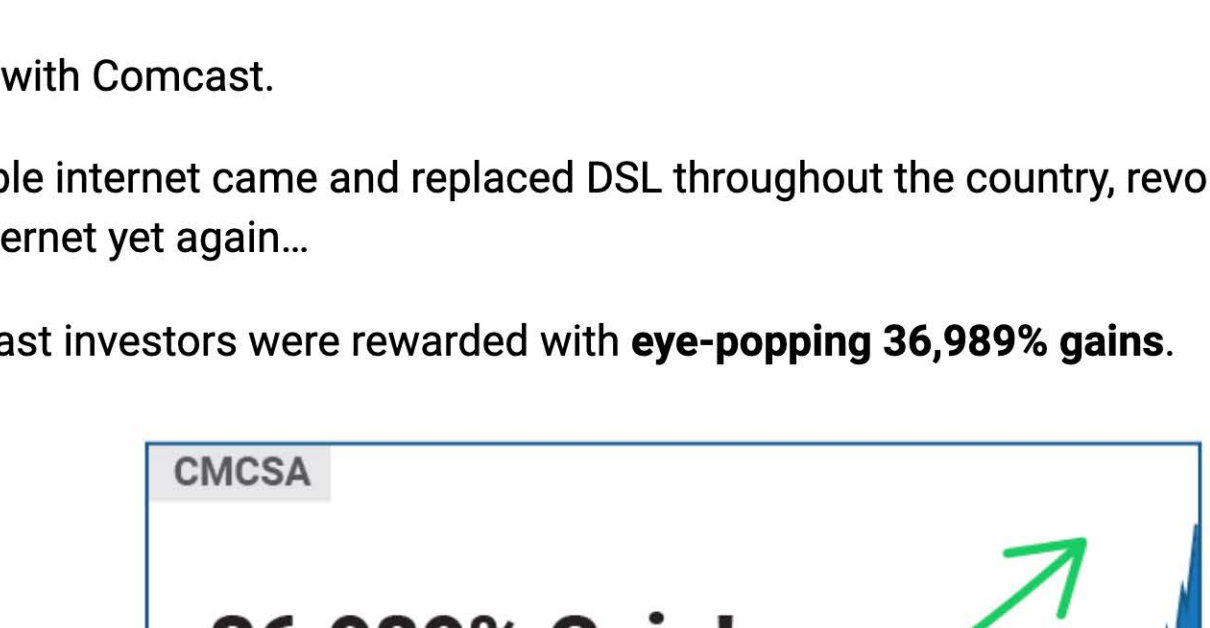
That turns a $1,000 stake into $700,000… or a $10,000 stake into more than $7 million.

What would your life look like with a $7 million fortune?

It'd be a lot different, needless to say.

Same thing with the company EarthLink.

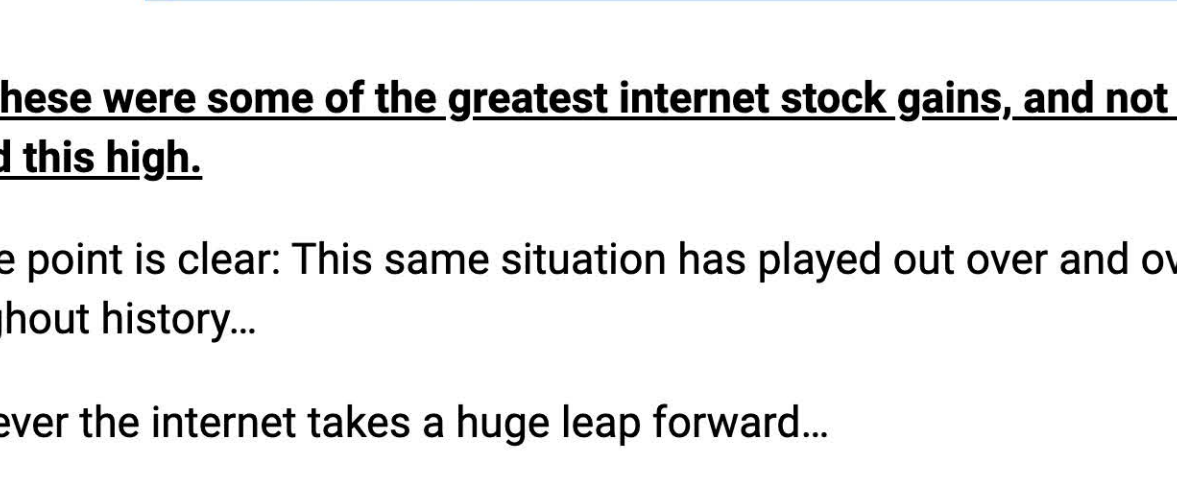
When they helped usher in the age of DSL, changing how people received internet… **their stock shot up 6,638%.**



Again with Comcast.

As cable internet came and replaced DSL throughout the country, revolutionizing the internet yet again…

Comcast investors were rewarded with **eye-popping 36,989% gains.**



Now, these were some of the greatest internet stock gains, and not every stock soared this high.

But the point is clear: This same situation has played out over and over again throughout history…

Whenever the internet takes a huge leap forward…

Over time, untold amounts of wealth are made by folks who see it coming ahead of time.

Which is why I'm sending you this urgent message today.

Just days from now, Elon Musk's latest company could be preparing to go public with the biggest internet breakthrough of our time…

One that could change how you, I and everyone else use the internet for good.

I'll be showing you the undeniable proof in just a moment…

I'll even show you exactly how to get in front of this revolution…

Potentially turning one small investment today into the kind of wealth most people only ever dream of.

If you missed out on AOL's rare 70,636% gain… ELNK's 6,638% gain… or CMCSA's 36,989% gain over the years… you aren't going to want to miss this.

The potential rewards for fast movers who get in now are so large… that you'll have to see this to believe it.

Let me show you what's going on…

Is Elon Musk planning to reinvent the internet as we know it?

You have, of course, heard of Wi-Fi.

It's what connects your devices — your computer or phone — to the internet.

Simply put, Wi-Fi is the backbone of the internet.

Without it, the internet wouldn't be possible.

Well, as I uncovered…

Elon Musk is planning to begin rolling out a radical change to Wi-Fi… and to the internet itself.

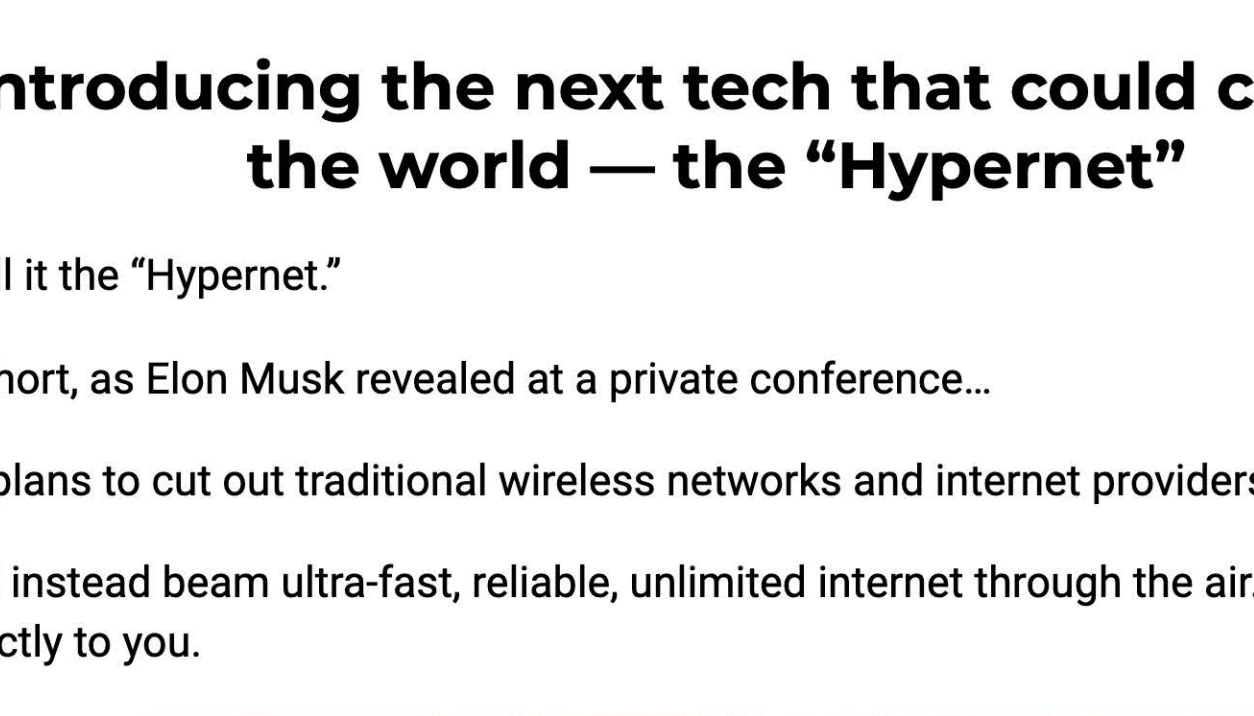
Introducing the next tech that could change the world — the "Hypernet"

I call it the "Hypernet."

In short, as Elon Musk revealed at a private conference…

He plans to cut out traditional wireless networks and internet providers…

And instead beam ultra-fast, reliable, unlimited internet through the air… directly to you.



No more cell towers… or anything like that.

Instead, high-speed internet will simply be beamed straight to you, at all times.

As you'll see here today, for you this means…

- Speeds up to **20x times faster** — wherever you are…
- No more expensive internet bills (in fact, not only could the "Hypernet" be up to 20x faster… it could also cost you far less than what you pay now)…
- And no more spending hours on the phone with someone in another country trying to fix your internet when it goes out… or waiting long hours for a repairman to come to your home.

Let me explain…

Elon's next breakthrough will replace the internet as we know it

As you may know, there are a few big problems with how we receive cell signals and internet coverage now.

First, while a lot of people are excited about 5G as the future, the truth is deploying it is costly and takes years.

Second, because the average 5G tower only works within 1,000 feet or so, to deploy it nationally requires tens of thousands of these towers to be installed.

And that, as you can imagine, costs hundreds of billions of dollars… maybe even more.

Finally, nearly every other cell signal and Wi-Fi signal works the same way — they're all *local* solutions with limited range.

If you move out of range, well…

That's why you lose the internet.

That's why it's nearly impossible to get reliable service in remote areas.

So it doesn't matter how fast things like 5G technologies are…

If they're all *local* signals where you have to be in range to gain access.

FORGET ever having local coverage… because with this new era of internet comes worldwide coverage

Musk's "Hypernet" began with a simple question…

What if they could just eliminate the need for any kind of tower at all…

And instead beam internet straight through the air, directly to your device?

It would be faster and better than the internet you receive now…

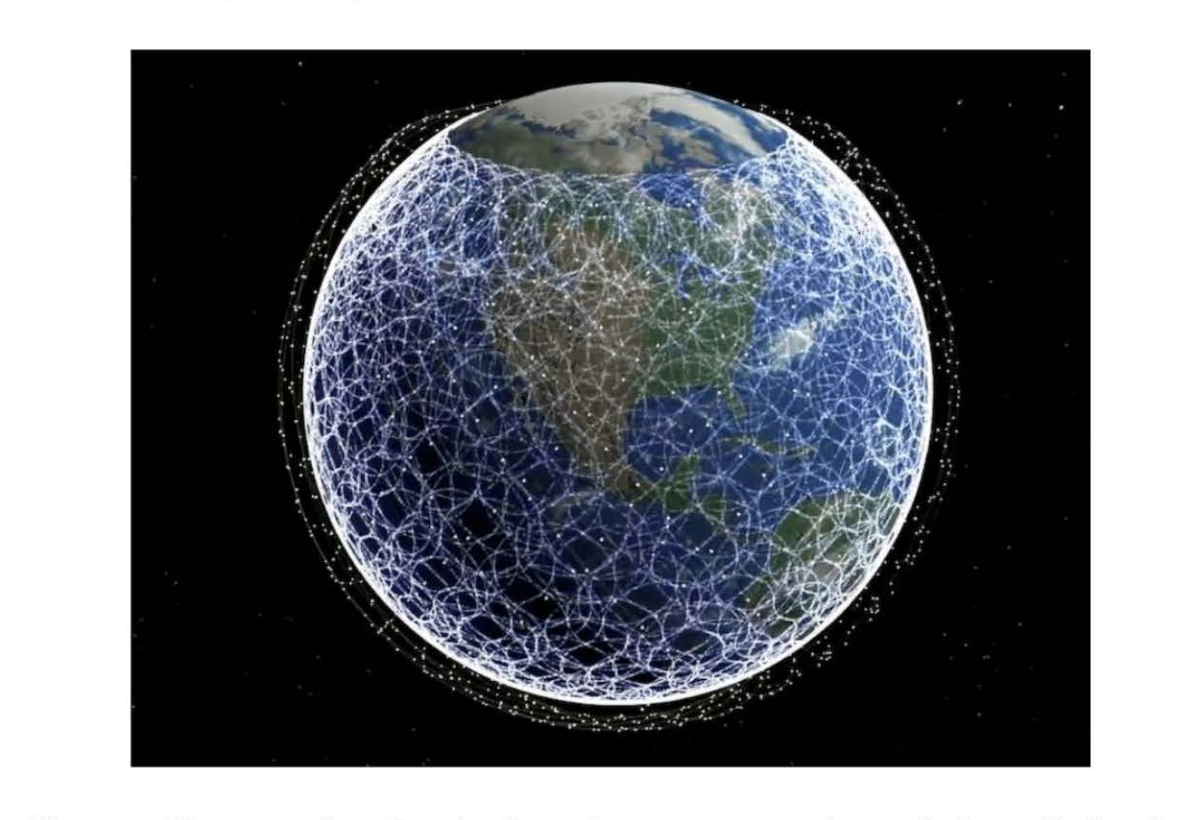
Even 5G wouldn't be able to compete with it.

Incredibly, that's exactly what Elon may be planning to do…

Internet delivered to you from the heavens

As you're about to see, he's quietly pioneered plans for a constellation of highly advanced satellites…

Satellites to beam uninterrupted, high-speed internet from space directly to you — your phone, computer, tablet or any other device.



No need for a cell tower… or anything like that.

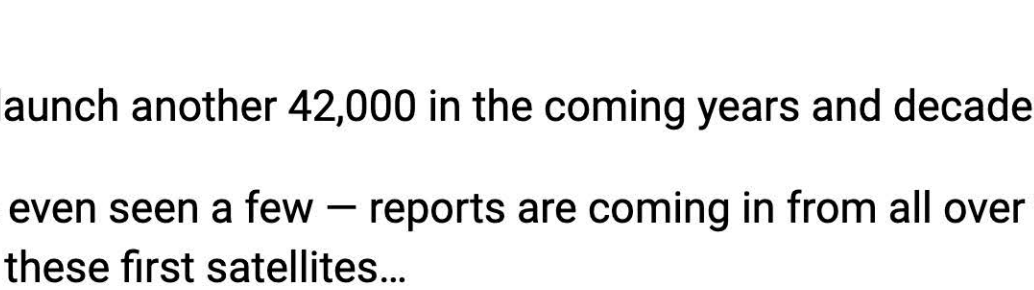
After all, under this plan they simply aren't necessary anymore either.

Instead, high-speed internet will simply be beamed from space, through air, directly to your device.

Your device will simply always be connected to these satellites.

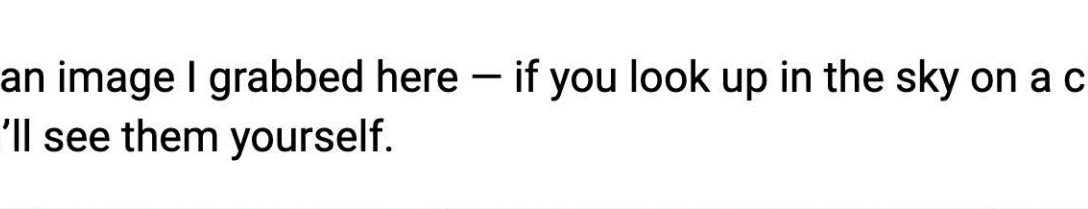
These satellites will wrap the Earth, forming a network to deliver lightning-fast internet to every inch of the planet.

Already, the media are beginning to catch on to what he's up to…

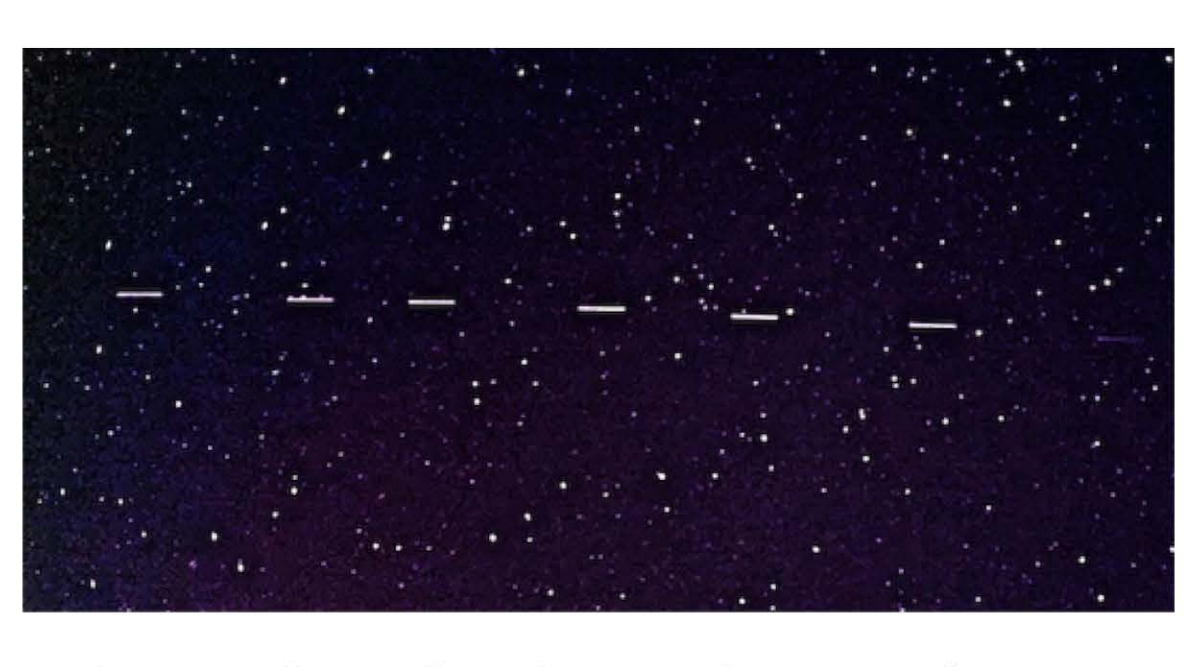


Elon Musk's next big thing: 40,000 satellites beaming broadband

After overturning the economics of the car and the rocket-launch industries, the billionaire is upending space communications.



Elon Musk Says He's About to Deliver the Future of High-Speed Internet Get your investment dollars ready.



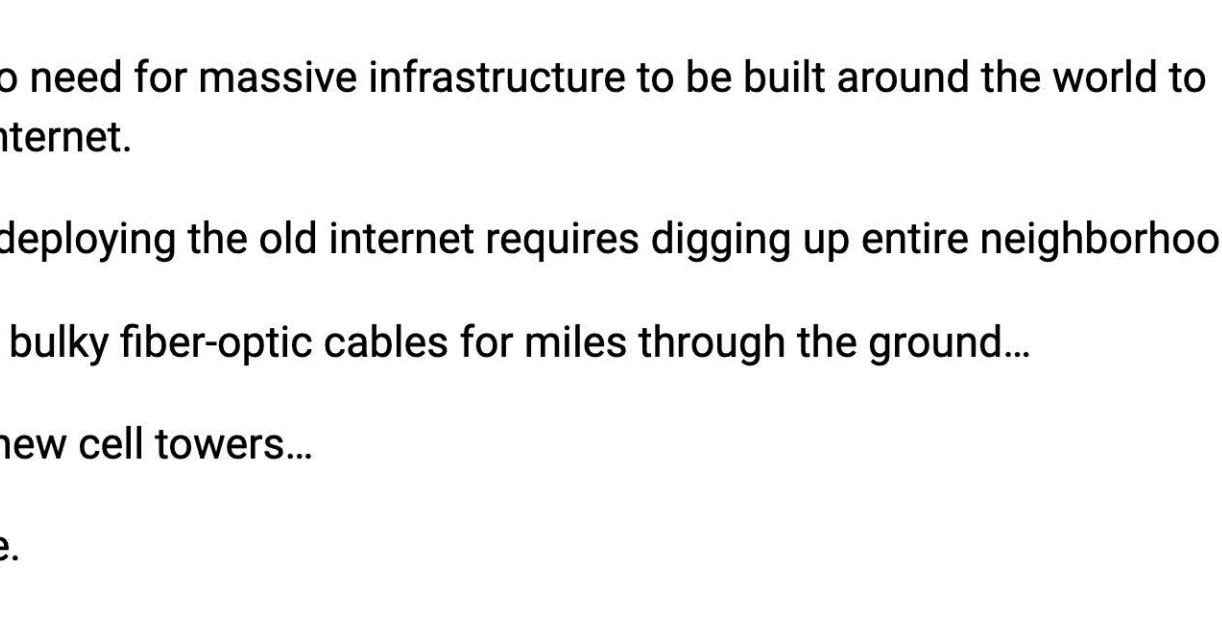
Elon Musk's SpaceX Could Become Aerospace Giant Worth $120 Billion

To date, Musk has quietly launched more than 540 satellites in preparation for his reveal…

With plans to launch another 42,000 in the coming years and decades.

You may have even seen a few — reports are coming in from all over the country of folks spotting these first satellites…

You can see an image I grabbed here — if you look up in the sky on a clear night, odds are you'll see them yourself.



Once in place, these satellites will revolutionize the internet forever…

Musk's "Hypernet" could provide the cheapest, fastest, most reliable internet EVER

Because this brand-new internet is cutting out all traditional cell towers…

There's no need for massive infrastructure to be built around the world to provide internet.

After all, deploying the old internet requires digging up entire neighborhoods…

Installing bulky fiber-optic cables for miles through the ground…

Building new cell towers…

And more.

That, as you can imagine, costs billions and billions of dollars for these telecom companies.

Take 5G, for instance…

Early reports show that building the infrastructure for 5G will cost an estimated $130 billion…

And that's in America alone!

The "Hypernet" doesn't require any of that…

For consumers, this means those massive savings can be passed along to you…

Instead… Elon may deliver lightning-fast internet (up to 20x faster than what

you receive now), everywhere in the world, for dirt-cheap

Once Musk's new "Hypernet" rollout is complete, you'll always be able to receive ultra-fast internet… uninterrupted, unlimited internet… everywhere you go.

Because it's not a local signal, we're talking total coverage around the world…

From Wall Streeters in Manhattan, NYC…

To vacationers in Paris, France…

To workers in the world's most remote farms…

To the poorest African villages.

And all for far cheaper than what you pay now.

It doesn't take a genius to figure out that having cheaper…

Faster…

Total-coverage service…

Will cripple the trillion-dollar telecom industry in the coming decades.

There will be no need for 5G anymore one Musk finishes rolling out this tech — it simply can't compete with the "Hypernet."

No need for unsightly towers and transmitters popping up in your neighborhood, either.

For consumers like you and I, the "Hypernet" will be a godsend…

…for the $1.013 trillion telecom industry, it's a nightmare

Odds are, if you're like me, you do business with companies like AT&T, Verizon, Sprint, T-Mobile or others to receive internet and phone service.

And odds are you've had a negative experience with them…

For instance, did you know that here in America you're paying more than any other country… for internet service that ranks among the slowest in the world?

Now compare that with socialist Venezuela…

Eight out of 10 people in the country don't even have enough money for food, and yet their mobile internet speeds are twice as high as ours.

The average American today pays $132 for their service… service that's among the slowest in the world.

Compare that with South Korea, where folks pay just $20 per month for speeds five times faster than ours.

News came out recently that Comcast is raising costs of their service at 4 TIMES the rate of inflation.

Does that seem fair to you?

Comcast isn't even the worst of these companies…

Take Verizon, for example…

News recently came out that during one of California's worst wildfires, fire departments — who rely on the internet to track fires — experienced significantly slowed service as Verizon cut their speeds to 1/200th of what they were.

Verizon throttled fire department's "unlimited" data during Calif. wildfire

Fire dep't had to pay twice as much to lift throttling during wildfire response.

Verizon then forced these people — who were working hard to save American lives — to pay twice as much to resume normal service.

To me, that's criminal.

Luckily, thanks to Elon's latest innovation, we could be just days away from this finally being a thing of the past.

In fact, beginning as soon as June 30, you may never have to give them a cent of your hard-earned money.

The "Hypernet," once it's rolled out, could cripple these companies in the coming years…

Why would you, I or anyone else pay the average $132 per month…

When Elon could provide far better, faster, unlimited internet service, for much cheaper?

These big telecom companies simply won't be able to compete.

In fact, it's already underway…

Musk is already rolling out this new internet to the world… the early results are incredible

He's already given early beta access of the "Hypernet" to some folks before his expanded beta program rollout planned for early next year…

Bloomberg Businessweek reported the results were incredible…

> "[The 'Hypernet']was already achieving download speeds greater than 100 megabits per second… enough for a user to stream multiple high-definition movies simultaneously."
>
> — ***Bloomberg Businessweek***

ZDNet says…

> "The first performance numbers from SpaceX's ['Hypernet'] satellite internet beta service are coming in and they're looking great."
>
> **— ZDNet**

And *Fortune* reports…

> "[The 'Hypernet' is…] plenty fast enough to stream Netflix in 4K resolution or download an entire movie in less than 10 minutes."
>
> — *Fortune*

An early speed test confirms the speeds Elon delivers from space are better than what most people receive currently…

And very soon, you could have access to the "Hypernet" beta program yourself — for far cheaper than what you pay now.

As will your neighbors, all 330 million people in the U.S., and all 7.8 billion people worldwide…

Once in place, with a single flip of the switch, he'll activate his satellites…

And very soon, you could have access to the "Hypernet" beta program yourself — for far cheaper than what you pay now.

As will your neighbors, all 330 million people in the U.S., and all 7.8 billion people worldwide…

Once in place, with a single flip of the switch, he'll activate his satellites…

…and change how the world uses the internet in a blink of the eye

As mentioned, Musk has quietly launched more than 540 satellites…

With plans to launch another 42,000 over the coming two decades.

Once fully deployed, Musk will be prepared to launch the "Hypernet" to the world…

Revolutionizing the internet…

And delivering the deathblow to today's $1.013 trillion telecom industry.

Within minutes of his opening this new internet, I predict shares of big telecom companies will drop…

It'll be the most covered story of the year.

Every anchor on CNBC will be discussing it… every journalist from *The Wall Street Journal* will be raving about it…

Within a matter of years, millions could be switched over to the new "Hypernet"…

In fact, already people are rushing to sign up for the beta program…

INVESTING IN SPACE

SpaceX says Starlink internet has 'extraordinary demand,' with nearly 700,000 interested in service

And for you, this presents the rare chance to get rich.

If there's one thing I've learned about this business, it's that opportunities like this really do only come around once in a lifetime.

And when they do, I estimate 99% of people do nothing… they sit on the sidelines and get left behind.

But the small 1% of investors who see what's coming have the rare chance at pocketing a windfall fortune…

After all…

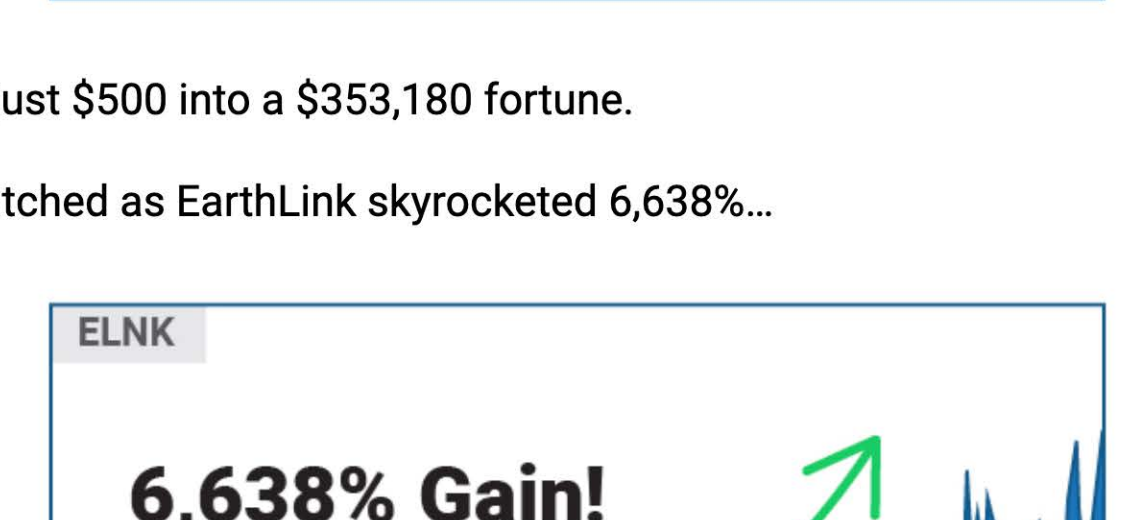
A $500 stake in these stocks — *and you'd be rich*

As you've seen, every time the internet undergoes a radical transformation like this…

Folks who saw it coming had the chance to get filthy rich over time.

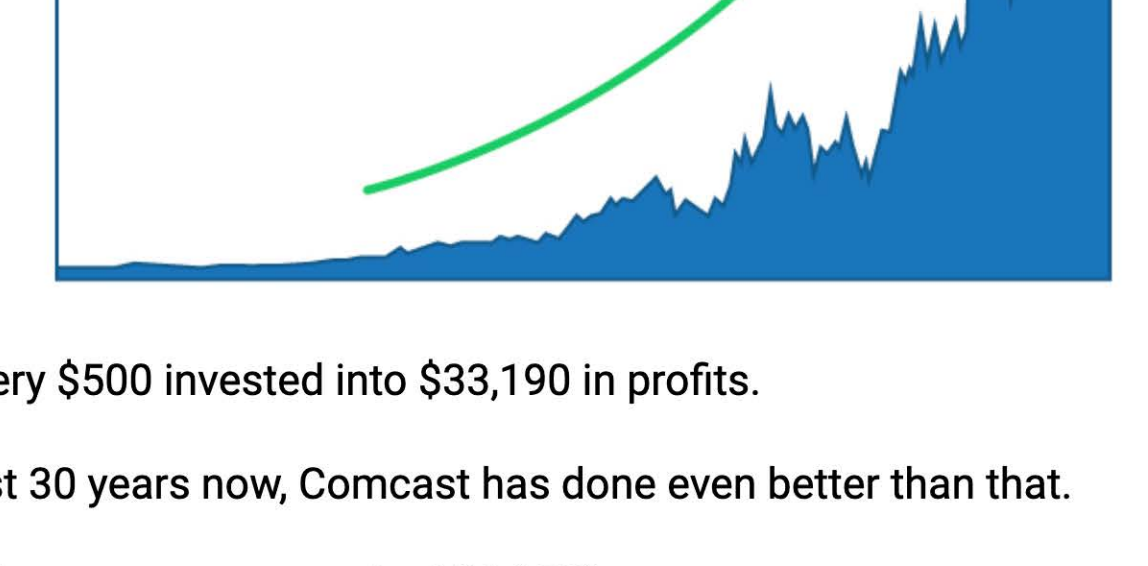
Remember some of the top-performing examples I showed you earlier?

Over the past 20 years, we've seen AOL soar 70,636%…



That turns just $500 into a $353,180 fortune.

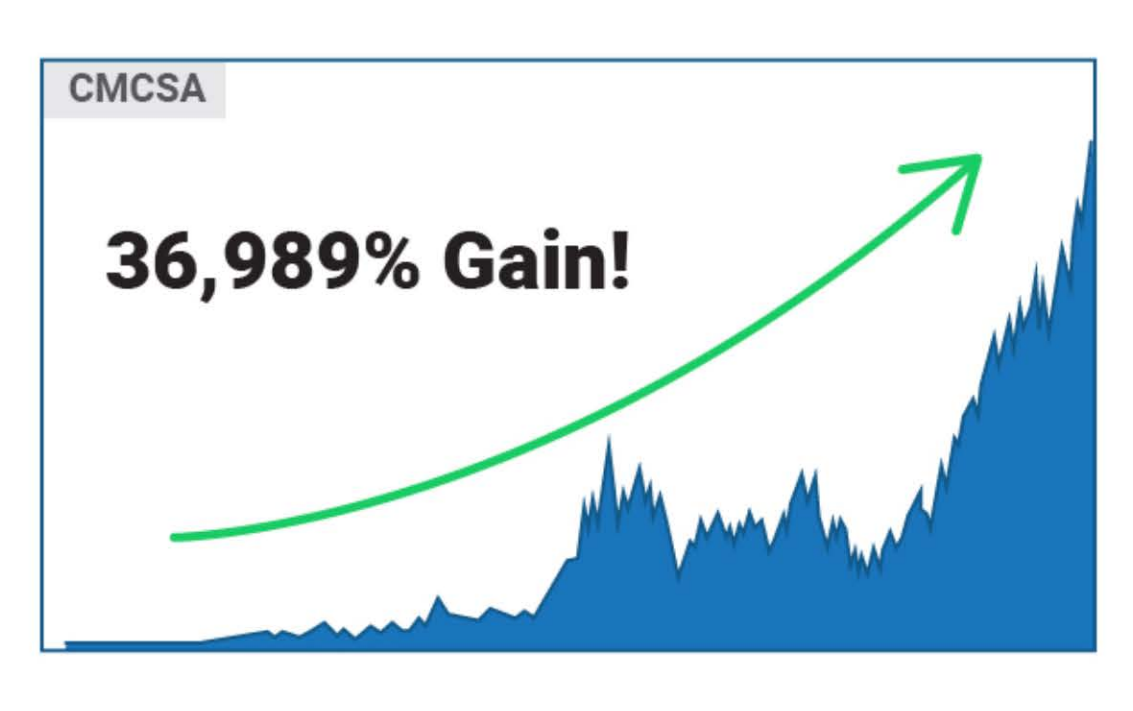
We also watched as EarthLink skyrocketed 6,638%…



Turning every $500 invested into $33,190 in profits.

For the past 30 years now, Comcast has done even better than that.

Shares of the company catapulted 36,989%…



Turning a tiny $500 stake in the company into $184,945.

How would your life change if you made that kind of money?

And here's where things get really exciting…

The "Hypernet" is far bigger than AOL's introduction of internet via dial-up connection…

EarthLink's DSL…

Or Comcast's cable internet.

In fact, it may be bigger than all three combined.

Its rollout will go down as one of the biggest moments in the history of the internet…

Nothing like it has ever been done before.

The amount of money to be made by fast movers is unlike anything we've seen before.

The only question is: Will you be one of the folks who gets rich from it?

If so, pay close attention…

The time to act is now… the "Hypernet" could go live as soon as June 30

According to the technology insider blog Vividcomm, the rollout of a public trial beta mode of the "Hypernet" kicks off on June 30.

As mentioned, for months now Elon has quietly built hundreds of satellites…

And he's launching hundreds every month, with plans to launch tens of thousands over time…

Everything is in place to flip the switch and go live with the expanded "Hypernet" beta program planned for June of 2021…

Delivering the deathblow to the $1.013 trillion telecom industry…

While simultaneously giving the earliest movers the chance to become very, very rich…

That means you only have a small time left to stake your claim… before it's too late to profit with the early movers.

And I've found a little-known way to potentially multiply your profits from Elon's rollout…

I've found a hidden company I believe is working directly alongside Musk to turn his dream into reality…

Widespread rumors show his company has already inked a huge deal to help with the "Hypernet" rollout…

And if I'm right about what this means, this rumored deal could make this off-the-radar company a direct supplier to help Elon deploy the lightning-fast "Hypernet" from space… and connect devices with these satellites.

It's a win-win for both this company and Musk…

This company has the chance to profit big from Elon's trillion-dollar market disruption…

While Musk can save months or even years' worth of work and focus on launching the "Hypernet."

And as Musk launches tens of thousands of satellites in the coming years…

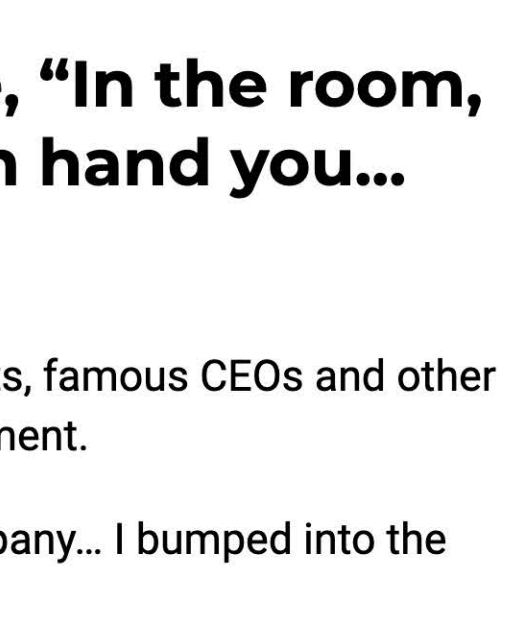
And revolutionizes how the world receives internet for good…

The profit potential for this company is staggering.

Now, in just a moment, I'll show you exactly how to stake your claim in this major "Hypernet" player — where even $500 could grow into huge wealth over time.

But before I get to that, let me quickly back up and introduce myself… and explain why I'm sharing this with you.

My name, by the way, is Ray Blanco



I'm the Chief Technology Analyst at one of the largest independent financial research organizations in America.

More people follow our work, for example, than receive newspapers like *The Washington Post* or the *Los Angeles Times*.

My role here is simple…

I track down the biggest new technology innovations of *tomorrow*…

So you can invest in them TODAY…

Each and every hour of every day I spend looking for companies that have the potential to reward early investors… people like you and I… with staggering tech wealth.

My secret for finding breakthroughs is pretty simple…

See, over the 15-plus years I've been doing this, I've built up one of the most impressive Rolodexes in the business…

If you've ever heard the phrase, "In the room, in the deal," that's what I can hand you…

To lead my readers to the biggest gains in technology…

I routinely meet with billionaires, award-winning scientists, famous CEOs and other tech insiders. I'll introduce you to a few of them in a moment.

For instance, before Nvidia was a household-name company… I bumped into the company's billionaire CEO at a conference.

At the time, very few folks knew about the company (or that it had a bright future)…

But I discovered they quietly had some major developments planned that would send the company exploding…

So I told my readers to get into Nvidia stock NOW!

When I first recommended it all the way back in 2014, shares were trading for just around $10…

Eventually going to more than $150, a 660% gain for my readers in 2018.

This growth hasn't stopped since then, either…

In November, shares hit a massive $580...

A massive gain of nearly 5,000% for anyone lucky enough to buy early and hold on.

The truth is I'm always on the hunt for breaking tech opportunities and have recommended dozens of successful plays to my readers…

Thanks to my connections, I always have the full scoop before anyone else…

At any given moment, I can call up many of the big players in tech…

And get to the bottom of the biggest tech stories happening now…

Long before the mainstream media or anyone else catches on.

Because of that, I've been at the vanguard of some of the most explosive tech breakthroughs in recent history…

Guiding folks to profits of **133%** in under five months… **339%** in under two years… **and 212%** in less than five months…

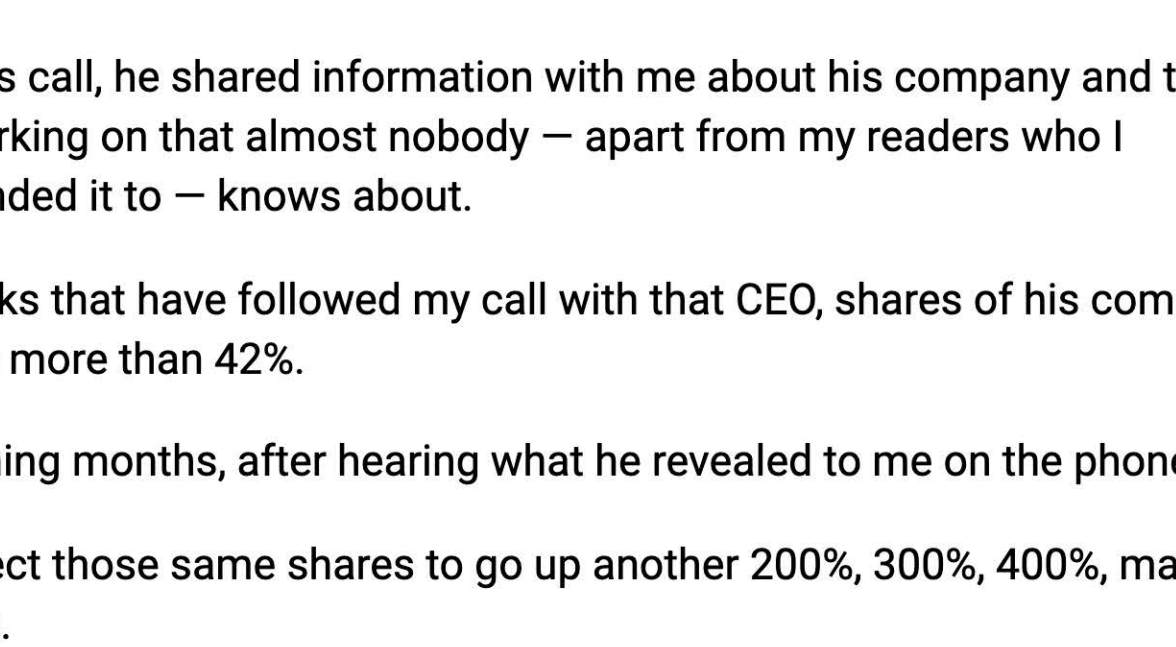
And many, many more.

And while all investing carries risk (particularly with emerging new technologies), I have a very impressive track record. Since we started 10 years ago, we've seen an average weighted gain per position of 35.58% with an average hold time of about 18 months.

Just recently, for example, I was on the phone with one of the top scientists in the fight against coronavirus.

He's the CEO of a prominent biotech company that's working on a promising COVID-19 vaccine.

Only a few days before our call, he met with President Trump to discuss the vaccine. You can see him here on the left.



And on this call, he shared information with me about his company and the vaccine they're working on that almost nobody — apart from my readers who I recommended it to — knows about.

In the weeks that have followed my call with that CEO, shares of his company are already up more than 42%.

In the coming months, after hearing what he revealed to me on the phone…

I fully expect those same shares to go up another 200%, 300%, 400%, maybe even more.

But as great as this is, I believe the "Hypernet" opportunity I'm sharing with you today is far bigger than anything I've uncovered before

What you're seeing today is… hands down… the biggest opportunity of my career.

In all my years of doing this, I've never seen anything this big.

The way I see it, this technology has the potential to be as groundbreaking as Tesla… which has soared a staggering 10,621% since its IPO in 2010…

Or being among the first to invest in PayPal, back when it was a tiny off-the-radar startup… before it exploded into a $214 billion giant.

The fact is, I truly believe Elon's "Hypernet" could be far bigger than either of his previous ventures.

It could disrupt the $1.013 trillion telecom industry for good…

Put all of the big telecom giants out of business…

Completely reinvent the internet for good…

And much, much more.

All told, there could be trillions of dollars at stake here over time…

The best part is getting started couldn't be easier…

As I mentioned, I've identified a hidden company I believe is working directly with Musk to launch the "Hypernet" and change the internet for good.

If I'm right, this company could multiply your gains from this trillion-dollar rollout…

… as it could easily soar by tens, or even hundreds of billions of dollars over time as the trillion-dollar "Hypernet" is fully deployed…

TECHNOLOGY PROFITS CONFI
ELON'S GREATEST BREAKTHROUGH YET:
Retire Rich on the "Hypernet" Revolution
7 SEVEN FIGURE PUBLISHING

And by acting fast, you can still pick up shares before any news breaks and this company rockets higher.

To make it as easy as possible for you to get started, I've put the details on this company into a special report called ***Elon's Greatest Breakthrough Yet: Retire Rich on the "Hypernet" Revolution***.

It shows you everything you need to know to get started — the company name and ticker symbol, how to buy shares today, how much you could make and much, much more.

In just a moment, I'll show you how to have this report sent directly to your email, ready for immediate download.

You need to hurry, though…

If this expanded beta program has begun rolling out by June 30 as I expect, and the rest of the world catches on to the opportunity the "Hypernet" presents, it'll be too late…

All the big money will have already been made.

The clock is ticking — get started now

In the past, people have paid more than $3,000 for access to my research…

And considering the profit potential they receive, that's well worth it.

Because of that, ***Elon's Greatest Breakthrough Yet: Retire Rich on the "Hypernet" Revolution*** is easily worth at least $1,500 or more.

But I want to get it into your hands for FREE today.

To claim it, all I ask is that you take a risk-free trial to my monthly investment research advisory, ***Technology Profits Confidential***.

You see, every month, I track down companies working on cutting-edge scientific breakthroughs (like Musk and the "Hypernet")…

Companies that have the potential to hand early investors huge wealth…

And I share them with more than 88,350 private readers in ***Technology Profits Confidential***.

Quite frankly, there's nothing else like it in the world…

I've spent well over a decade building up one of the most impressive Rolodexes in the business.

As a reader of *Technology Profits Confidential*, you'll always have this inside scoop

Imagine being in the room with the world's smartest scientists, discovering the world-changing breakthroughs they're working on, as they're working on them…

Imagine having access to the world's top tech insiders, being as close to them as possible — discovering how to invest in the biggest new innovations before they change the world…

Imagine knowing about the world's biggest technology breakthroughs long before your friends, family or anyone else you know ever hears about them.

Now imagine how much money you could make if you had access to this kind of information every single month…

As a reader of ***Technology Profits Confidential***, you'll have exactly that.

Just recently, for example, I've crossed paths with the famous billionaire biotech CEO Phillip Frost…

Nvidia's billionaire CEO…

Elon Musk…

A world-famous scientist who's working on adding decades to human life span (I predict his work will win him a Nobel Prize)…

One of the biggest entrepreneurs in pot, who runs one of the largest publicly traded pot companies in America…

And many more… powerful politicians, top investors, you name it.

And I've shared the incredible opportunities I uncovered from these meetings with my ***Technology Profits Confidential*** readers… helping them position themselves for massive profit potential.

How much would a resource like that be worth to you? There's truly nothing else like it in the world.

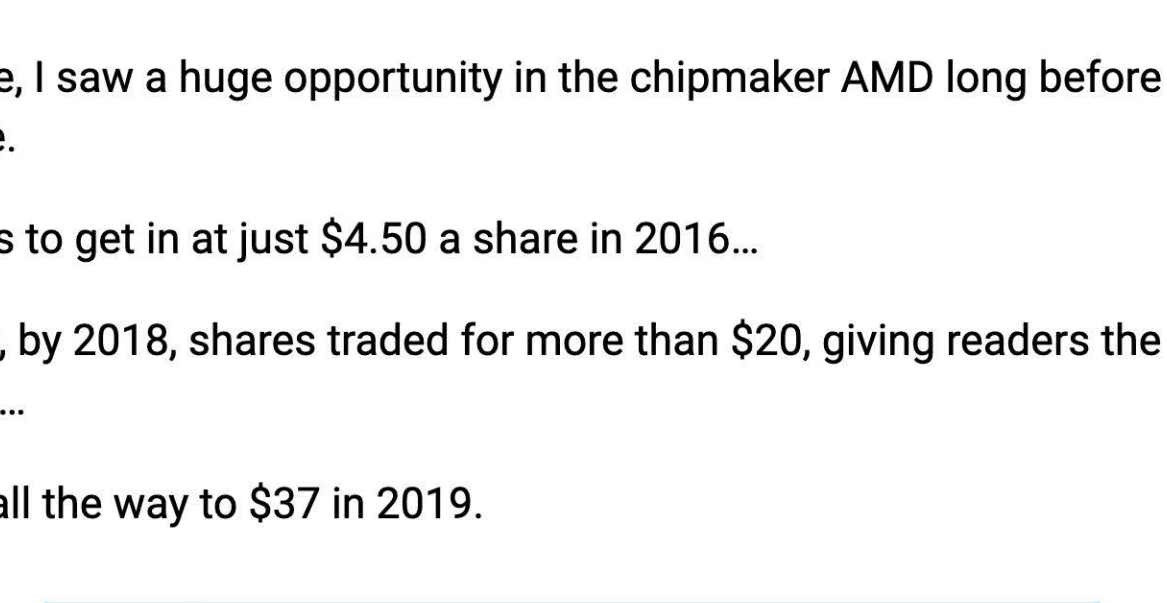
Well, before you answer, consider how much money my readers have had the chance to make on my best past plays…

For example, I saw a huge opportunity in the chipmaker AMD long before anyone else.

I urged folks to get in at just $4.50 a share in 2016…

Before long, by 2018, shares traded for more than $20, giving readers the shot at 346% gains…

AMD went all the way to $37 in 2019.



Then there was the company Isis Pharmaceuticals.

They were developing a breakthrough DNA treatment.

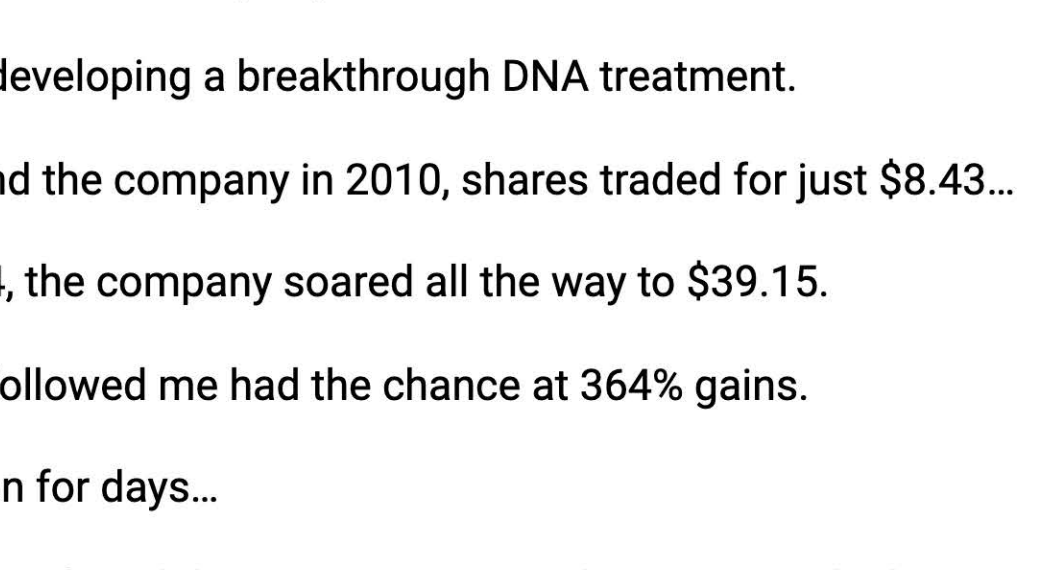
When I found the company in 2010, shares traded for just $8.43…

But by 2014, the company soared all the way to $39.15.

Folks who followed me had the chance at 364% gains.

I could go on for days…

Like the time I found the company NewLink Genetics, which went up 211% in about a year…



Then there was 3D Systems Corp., which exploded 195% in about a year…

And Endocyte, which went up 266% in about two years…

And on and on.

Needless to say, many readers of ***Technology Profits Confidential*** have done very well.

Since we started 10 years ago, we've seen an average weighted gain per position of 35.58%.

Plus, our average hold time per position is just over 18 months…

My point is, while of course not every play is a winning move, I'm able to track down the biggest market stories…

And the "thank you" notes I routinely receive from folks are nothing short of incredible.

Here's a few of them so you can see for yourself…

John R. from Sarasota, FL, says…

> ***"I doubled my investment to $18,000 in a little over three months. My wife and I feel a lot more comfortable with my portfolio increasing than just having to depend on Social Security."***

Ed L. from Erie, PA, says…

> ***"[I have owned] NVDA for four years, with 1,500% gains, the best so far. [I] started with $5,000 with the intent of funding retirement for myself and providing a family legacy."***

Herb M. from Manchester, NH, says…

> ***"I bought [Stock] on 3/20/20, paid $20,340. I sold on 7/29/20 for a total of $67,318. My wife and I are full-time world travelers. We will use the profit for a cruise."***

Albert G. from Pittsburgh, PA, says…

> ***"In the case of NVDA, I purchased it for $35.18 [in 2016] and it's gone up approximately 1,160% since then. I tend to buy stocks and then never sell. In the last 10 years my portfolio has tripled and I am 82 years old."***

And Otto W. from Columbus, OH, says…

> ***"[I had a] 5-bagger in 12 months with [Stock]."***

These are just a few of the hundreds of messages I've received from my readers…

And I'm confident that not long from today, you'll be sending me a message just like this…

Thanking me for the money you're making in the market.

So how much does access to ***Technology Profits Confidential*** cost?

Well, I think you're going to like the answer…

It's only a tiny fraction of what you'd imagine.

More about that in just a moment.

First, there's something else you should know…

The "Hypernet" isn't the only up-and-coming technology I'm excited about…

In fact, there's another possible 81,000% growth story my readers and I are watching closely…

These 2 "hidden" virtual reality companies could deliver you staggering gains

Time magazine, the *Financial Times*, *Fortune*… they've all written and raved about the possibilities once we can interact inside of virtual worlds.

Samsung and **Facebook** have already invested billions.

Google's already made a big move into this technology.

Even **NASA's** lining up to gain an advantage.

What's got me and my readers excited, though, is the 81,000% growth we could see in the market for virtual reality products and technology in the coming years.

This could be a $30 billion-a-year business years from today.

And we don't intend to miss it.

I've helped my ***Technology Profits Confidential*** readers nail down TWO companies that could absolutely soar as the virtual reality boom unfolds, including:

- The company that's responsible for building the powerful visual "guts" of the now-famous and highly sought-after Oculus virtual reality device from Facebook
- A second company with cutting-edge motion-sensor technology, designed to make every virtual world experience as smooth and lifelike as reality.

TECHNOLOGY PROFITS CONFIDENTIAL
BONUS Report
THE TWO HIDDEN COMPANIES DRIVING THE VIRTUAL REALITY REVOLUTION

Either one of these could deliver staggering tech wealth to early investors. Together they could literally change your financial prospects for life.

You can read all about them in this report I'd like to send, called ***The Two Hidden Companies Driving the Virtual Reality Revolution***.

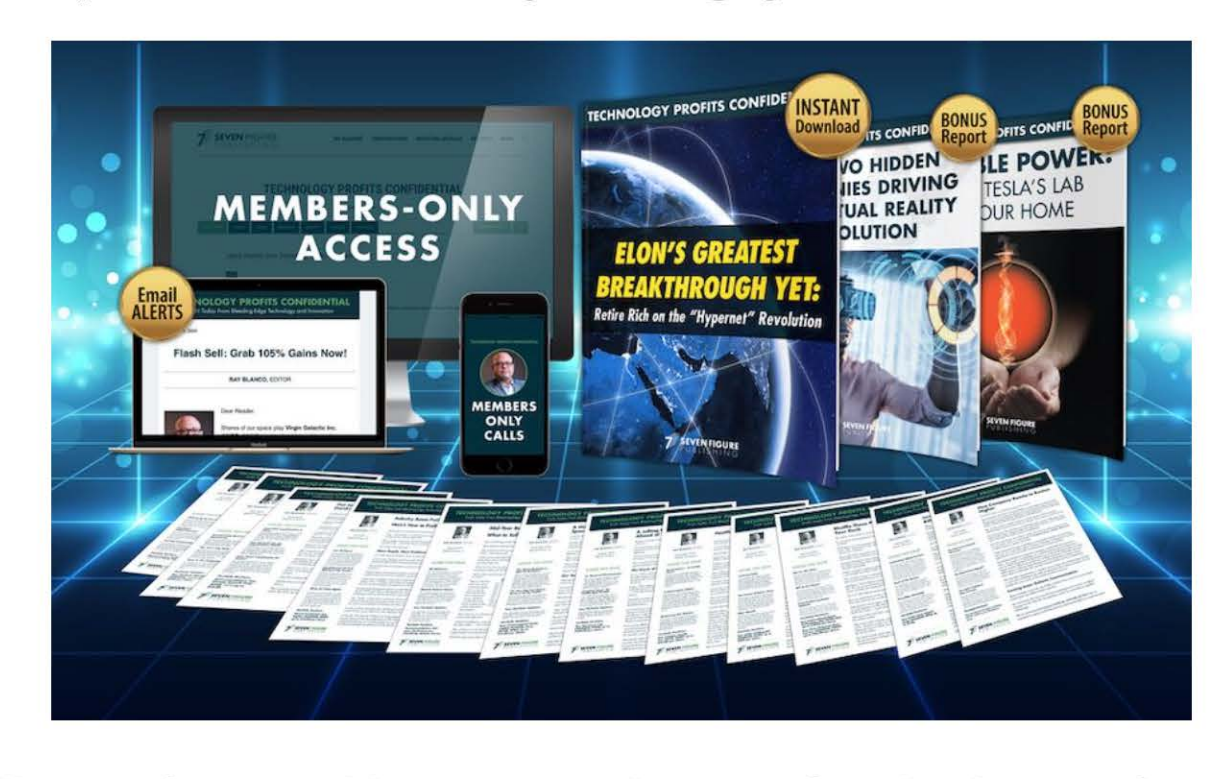
Now, this report is valued at $99.

But by acting today, you'll receive this report immediately in your inbox, free of charge when you subscribe. It's my gift to you.

And that's in addition to the "Hypernet" report we discussed earlier.

Let's quickly recap…

To recap, here's everything you'll receive today



- ✓ **A Full Year of 12 Monthly Issues:** Each issue of ***Technology Profits Confidential*** covers a big, new tech trend… and shows you the best way to invest in it in the markets **($199 Value)**
- ✓ ***Elon's Greatest Breakthrough Yet: Retire Rich on the "Hypernet" Revolution*** **($1,500 Value)**
- ✓ **SPECIAL BONUS REPORT #1: *The Two Hidden Companies Driving the Virtual Reality Revolution*** **($99 Value)**

In addition to that, as a reader of ***Technology Profits Confidential***, you'll also receive…

- ✓ **Weekly Email Alerts:** As stories change over time, or a company we hold releases a new product, I'll show you everything you need to know. That way, there's never any guesswork… you'll always know what's going on **($99 Value)**
- ✓ **Urgent Trading Alerts:** Whenever it's time to make a move in the markets, I'll send you an email showing you what to do and why. If a company we hold is shooting up and it's time to cash our gains, I'll send you an email showing you how to take action. If an urgent opportunity crosses my desk, I'll send you an email showing you how to take action. You're never alone in this venture **($199 Value)**
- ✓ **Access to the Special Members-Only Website:** Immediately after joining, you'll also receive a login to the special ***Technology Profits Confidential*** members-only website. You can read all the back issues and see all the alerts I've sent. You can download and read all the special reports I've issued. You can track our model portfolio in real-time… and much, much more **($398 Value)**
- ✓ **Monthly Members-Only Phone Calls:** Every month, I host a private phone call where I share what I'm researching… where the biggest profit potential is… what I'm excited about… and answer any questions I see being asked (just keep in mind that I'm unable to provide any personalized financial advice). You'll be invited to listen in on these monthly calls immediately after joining today **($399 Value).**

Added up, that's a total value of $2,893.

All of this is designed to put you in front of the biggest tech stories… before anyone else.

You'll always have the inside scoop before anyone else, delivered to you in plain, simple, immediately actionable alerts.

No boring theory or long-winded scientific explanations.

So how much is a subscription to ***Technology Profits Confidential***?

Well, keep in mind… it's a premium service.

It's followed by top experts… as well as more than 88,350 ordinary folks across the country…

All of whom follow my work to get access to the latest tech stories long before anyone else — and you can join them, just minutes from now.

If you were to hire a money manager, you'd pay tens, even hundreds, of thousands of dollars… for poor performance.

In fact, *The Wall Street Journal* reports the average money manager struggles to even beat the market's performance of about 7% per year on average.

Now compare that with the performance of my model portfolio…

Since we started 10 years ago, we've seen an average weighted gain per position of 35.58%.

Plus, our average hold time per position is just over a year and a half.

That's over 10 years of recommendations, and includes the losing plays…

I know of nobody else in the world that can compete with this.

In fact, just recently in our ***Technology Profits Confidential*** portfolio, readers had the chance to walk away with some big winners.

Some of our top performers have been…

- **133%** in four months…
- **206%** in under two years…
- **212%** in four months…
- **339%** in under two years…
- **346%** in just over two years…
- **660%** in around three years…

And this is still just scratching the surface…

In fact, already this year, readers have had the chance at dozens of double- and triple-digit gains…

And while not every play is a winner, you can be certain more big winners are still to come.

For that reason, $3,000 for the chance to multiply your money over and over every year is a steal.

Even if you started with just a small amount of money… you could quickly grow it into a big fortune, just like many of my readers have already had the chance to do.

But it gets better…

When you respond to me today, you won't pay anywhere near $6,000…

You won't pay $1,000, either…

You won't even pay $500.

In fact, ordinarily I price a full year of ***Technology Profits Confidential*** at just $199.

And that's a great deal… that works out to under $4 per week — less than the price of a cup of coffee.

But the profit potential in front of you right now is so life-changing…

It's simply too important to miss out on.

And for those who get in now, life might never be the same again.

That's why, when you respond today, I can do much better than $199 for you…

Through this special offer I've arranged for you, you'll pay just a small fraction of the $199 retail price.

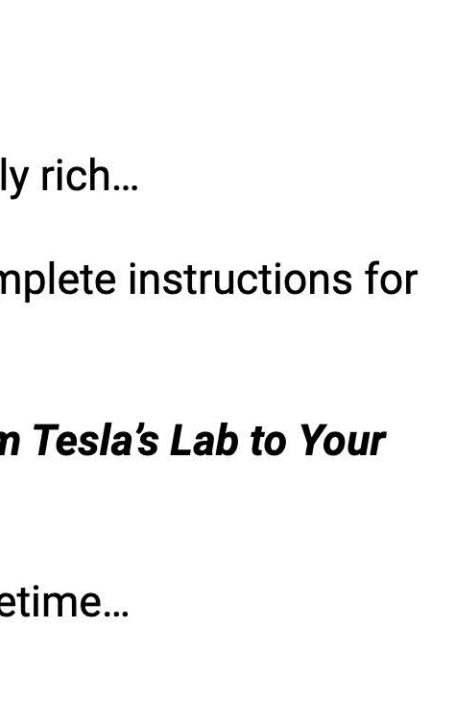
More on that in a moment.

First, there's one last special gift I'll send to you as soon as you get started today…

One last technology you can make a fortune in by investing in early…

Let me tell you more about it now…

Meet the company behind the biggest energy revolution of our lifetime



TECHNOLOGY PROFITS CONFIDENTIAL
BONUS Report
INVISIBLE POWER:
FROM TESLA'S LAB TO YOUR HOME

The second gift is another special report I'm calling ***Invisible Power: From Tesla's Lab to Your Home***.

"Invisible power" isn't sci-fi. It's very real. It's also going to prove super-lucrative if you know the right move to make.

That's why I'd also like you to have (for free, of course, with your new subscription) my report called ***Invisible Power: From Tesla's Lab to Your Home***.

Famous scientist, engineer and inventor Nikola Tesla pioneered the idea of "invisible power"… but it wasn't technologically possible during his lifetime.

Now, however, it's poised to change everything about how we use, transmit and think about power.

The fastest movers on "invisible power" could get seriously rich…

And my report shows you all the details and gives you complete instructions for what to do if you want to jump in.

That's why I want to put your copy of ***Invisible Power: From Tesla's Lab to Your Home*** in your hands today without delay.

This may be the single-biggest energy revolution of our lifetime…

And early investors stand to reap windfall fortunes.

Everything you need to know about this potentially life-changing situation is detailed inside your copy of ***Invisible Power: From Tesla's Lab to Your Home***.

So how much does it cost to join ***Technology Profits Confidential*** — and instantly receive everything we've discussed here today, ready for immediate download?

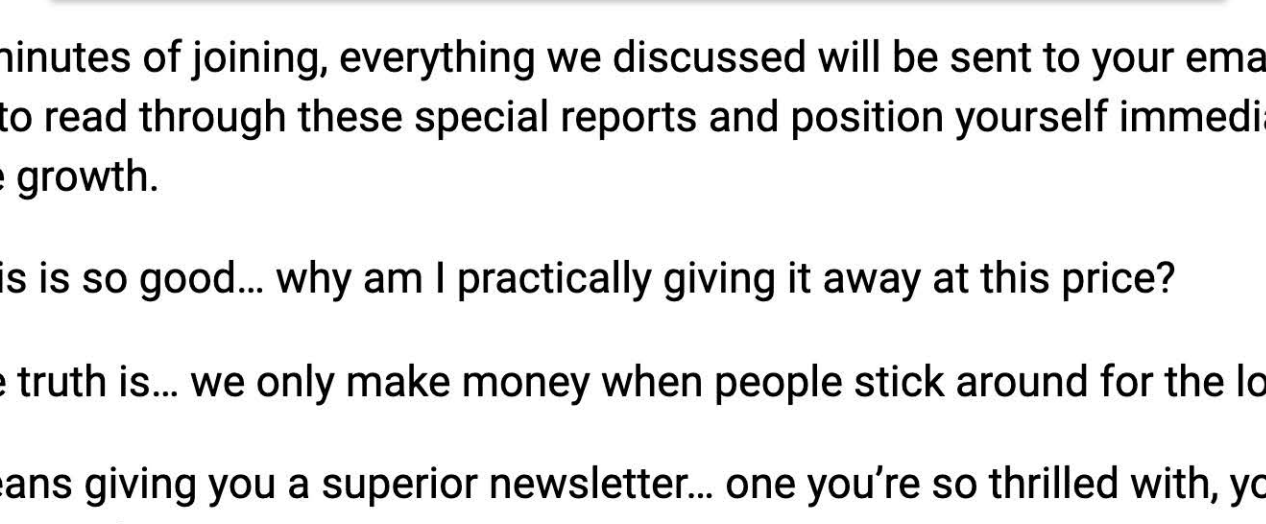
That's the best part…

Your road map to financial freedom — for just $49

Subscribe to ***Technology Profits Confidential*** today for just $49.

That works out to about 14 cents per day…

A tiny price to pay for everything you'll receive.



Within minutes of joining, everything we discussed will be sent to your email. You'll be able to read through these special reports and position yourself immediately for massive growth.

But if this is so good… why am I practically giving it away at this price?

Well, the truth is… we only make money when people stick around for the long term.

That means giving you a superior newsletter… one you're so thrilled with, you'll stay with us year after year.

If you don't, we go broke.

Additionally, I know that once you try ***Technology Profits Confidential*** out — and see for yourself that it delivers unmatched profit potential you won't find elsewhere — you'll want to stick around.

That's why ***Technology Profits Confidential*** is so cheap.

And that's also why I'm adding one last clincher to seal the deal for you…

Try *Technology Profits Confidential* risk-free for a full 90 days

I get it. I know this may be the first time you and I have met…

So odds are you may still be skeptical.

You may have even heard similar promises before… that never worked out.

So it's only fair that you take a look at my work 100% risk-free…

Try it out and decide for yourself whether or not it's right for you.

Here's what I propose…

Try ***Technology Profits Confidential*** risk-free for a full three months…

And if you don't agree that you won't find this kind of profit potential anywhere else, call my U.S.-based team (their number is 844-370-6637) and let them know.

They'll immediately issue a full, no-hassle refund…

And all of your reports and issues will still be yours to keep, no matter what.

I'm sure you can agree that's a fair deal…

If I don't deliver, you don't pay a cent.

With that, are you ready to get started?

Then click the "Subscribe Now" button you see here on the page.

SUBSCRIBE NOW

You Can Review Your Order Before it's Final

Clicking won't obligate you to anything…

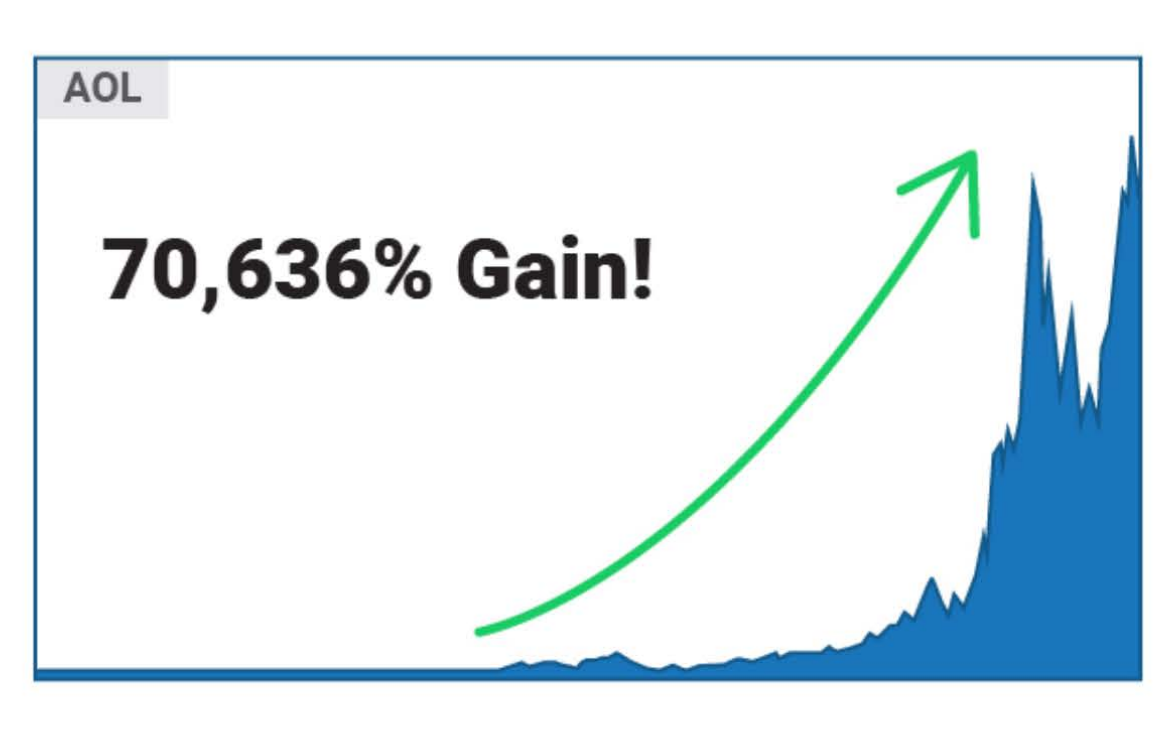
It'll simply take you to another page where you can review this incredible no-risk offer again.

The clock is ticking… the time to act is now.

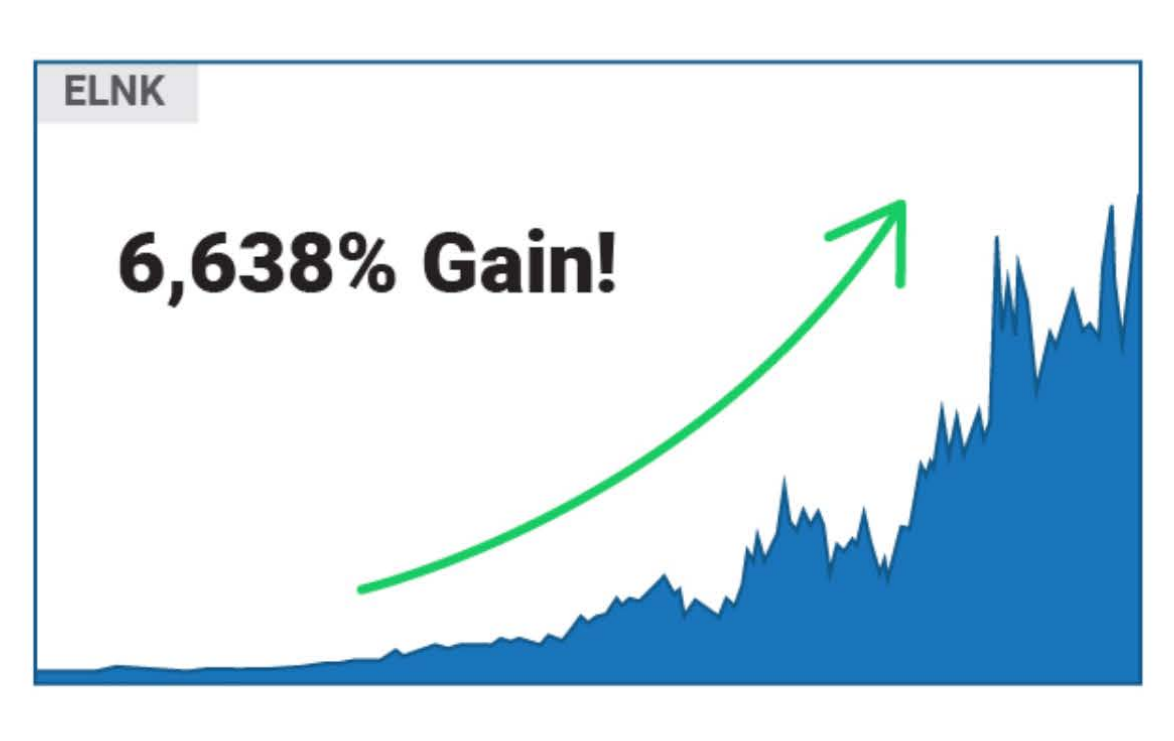
Just days from now, I believe Elon Musk is preparing to introduce the world to the biggest internet breakthrough of our time…

I showed you what happens every time the internet takes a massive step forward…

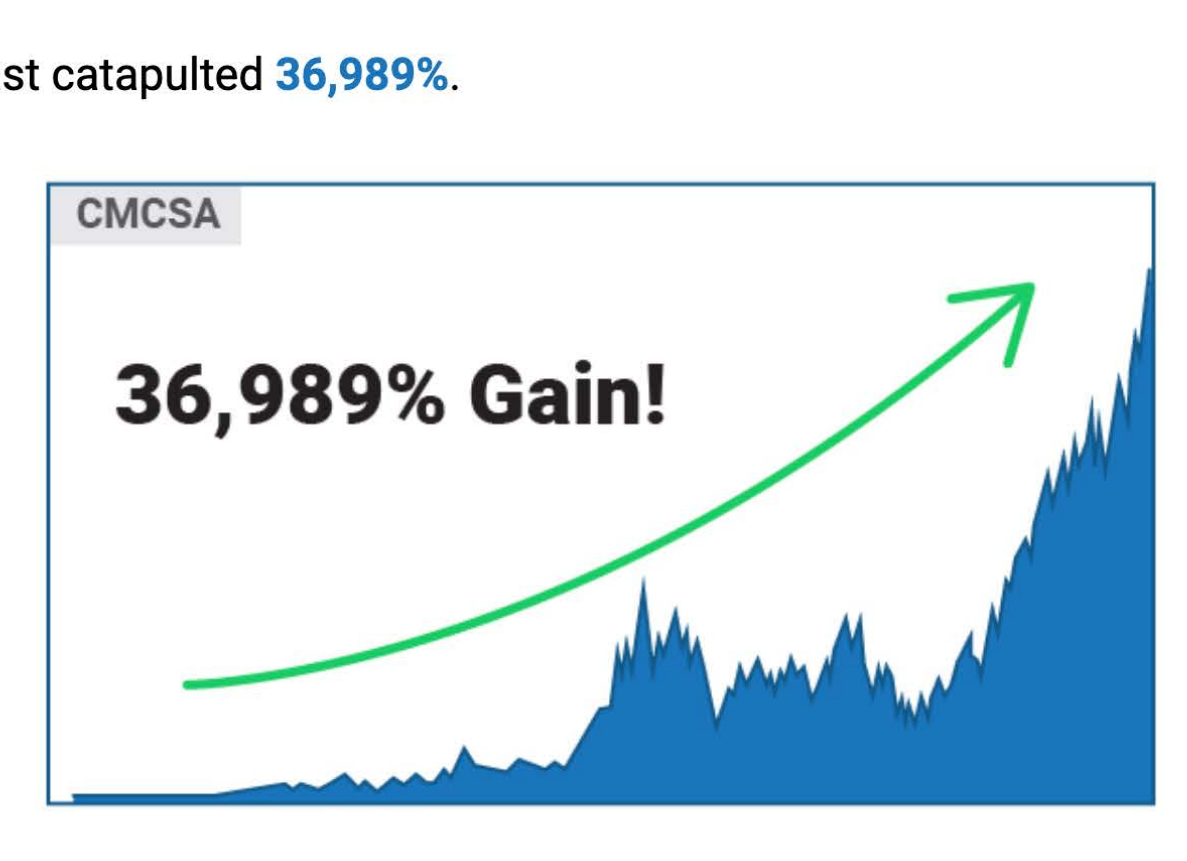
We saw AOL soar 70,636%…



We also watched as EarthLink skyrocketed 6,638%…



And Comcast catapulted 36,989%.



And just days from today, it could begin to happen again.

The important question is this:

Will you get ahead of it this time… and cash in?

Or will you sit on the sidelines again as other folks hit it big as the "Hypernet" changes the internet for good?

The choice is yours, of course.

Just click "Subscribe Now" below to get started.

SUBSCRIBE NOW

You Can Review Your Order Before it's Final

If you've made it this far, you clearly recognize that Musk's "Hypernet" will be one of the biggest market disruptions of our lifetime.

It'll change how the world receives internet… put giants like Verizon, AT&T, Sprint, T-Mobile, you name it, out of business… and ignite one of the greatest innovations of the 21st century.

But odds are even after everything you've seen today, you may still be hesitant about getting started. And I get it.

As I said, this is probably the first time you and I have ever met.

So I'm going to do something very special for you right now…

I told you earlier that you can try ***Technology Profits Confidential*** risk-free for a full 90 days…

And if it's not everything I've said it is (and more), my team will give you a full refund.

I'm sure you can agree that sounds fair.

But because this urgent situation is moving quickly… I'm willing to do something very special for you right now and take it a step further.

Respond now and I'll double your time to try ***Technology Profits Confidential*** 100% risk-free… from 90 days to a full 180 days.

That's more than enough time to go through my work, try out my recommendations and put everything I've said here to the test.

If my research hasn't changed your life 180 days from now, you can call up and request a full, no-hassle refund.

Heck, even if you decide on Day 179 this isn't right for you… you can call up my team and request a refund.

You'll still be able to keep all of the special reports and issues. It's my way of saying thanks, simply for giving it a try.

Sound fair enough?

Not only am I slashing the price to the bone for you…

But I'm also doubling the amount of time you can try this out, 100% risk-free.

This is the best offer I can possibly make it… but it won't be available forever.

Just click below now to get started.

The clock is ticking. This is one of the biggest market stories I've seen in years… you won't want to miss it.

The expanded rollout for the "Hypernet" beta testing could go live as soon as June 30…

That means you only have a small window left to position yourself before this story hits the front pages and everyone knows about it.

When that happens, it'll be too late… all the big money will have already been made.

Trust me, a year from now you'll kick yourself if you put this off.

If you've missed out on Elon's previous breakthroughs…

Like PayPal, which went from a tiny off-the-radar startup to a massive $214 billion giant today…

Or Tesla, which is up an incredible 10,621% and counting…

You won't want to miss this. It's your chance to get in on the ground floor — BEFORE everyone else catches on to Elon's next big development.

Go ahead and click "Subscribe Now" below to get started.

Sincerely,

R. Blanco

Ray Blanco, Editor, ***Technology Profits Confidential***
December 2020

P.S. Still here?

No doubt you might still have a few questions that you want answered before getting started.

Let me quickly address them now…

Q: What is *Technology Profits Confidential*? How does it work?

Leveraging my insider contacts of CEOs, top scientists, tech insiders, powerful politicians, you name it… I track down the biggest, most revolutionary new technologies before anyone else.

Then I find the companies pioneering the new tech… and share it with tens of thousands of private readers in ***Technology Profits Confidential***.

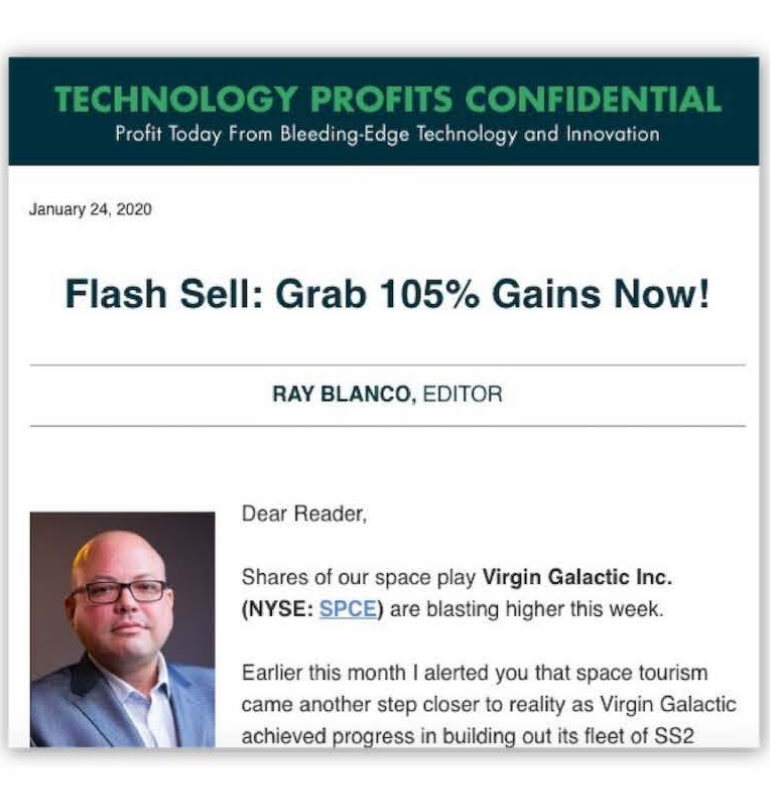
Technology Profits Confidential is the only place in the entire world where I recommend tiny stocks my research indicates have the potential to see stock prices soar over time. Sometimes, big gains can pop up in just months, and other times we hold stocks for a couple of years…

Every month, I'll send you a new issue, written in simple, easy-to-read language detailing the biggest opportunity I'm looking at now… showing you how to get a piece of it.

Whenever it's time to make a move in the markets, I'll guide you through what to do and why.

To show you how easy I make it, here's an example of the sell alerts you'll receive from me.

This is one I sent my readers not long ago, for a 105% gain in under six months:



TECHNOLOGY PROFITS CONFIDENTIAL
Profit Today From Bleeding-Edge Technology and Innovation

January 24, 2020

Flash Sell: Grab 105% Gains Now!

RAY BLANCO, EDITOR

Dear Reader,

Shares of our space play **Virgin Galactic Inc. (NYSE:** SPCE**)** are blasting higher this week.

Earlier this month I alerted you that space tourism came another step closer to reality as Virgin Galactic achieved progress in building out its fleet of SS2

Whenever I recommend buying a new stock, or selling one we currently hold…

You'll receive a simple, straight-to-the-point email from me showing you the action to take.

Plus, I show you how to take the buy or sell action inside your own account.

It's really that easy. Even if you've never invested before, you'll be able to do this.

Your alert emails show you what to do and why.

If you want to take part, you simply need to pull the trigger.

Easy, right?

As I mentioned, doesn't matter if you're a complete beginner or if you've been investing for years… doesn't matter if you have $1,000 to start or $100,000…

I'll show you how to book tech gains from the biggest, world-changing breakthroughs.

I bring you my best new ideas every month — you simply read through my work and decide if you want to invest in the company I'm telling you about.

Q: How do I know this isn't a scam?

My company is the largest fully independent financial research organization in America today.

With millions of readers across the country, more people follow our work, for example, than receive newspapers like *The Washington Post* or the *Los Angeles Times*.

We don't accept money or favors from any companies we recommend, and we don't "front run" any of the investments we recommend.

Our research is fully independent — we serve only one person: you.

Our business only makes money when people stick around for the long term. If we published dishonest material, everyone would unsub and we'd go out of business.

That's also why the price to get started is so low… I know I need to earn your trust first — and once I do, and you see how valuable my research is, you'll stick around for life.

You take absolutely no risk with your decision to get started today. If you decide this isn't right for you, just call up my team and let them know. They'll immediately issue a full, no-questions-asked refund.

Give this a try… I'm betting you'll love it so much you'll want to stick around for good. If not, you don't risk a penny.

Sound fair enough?

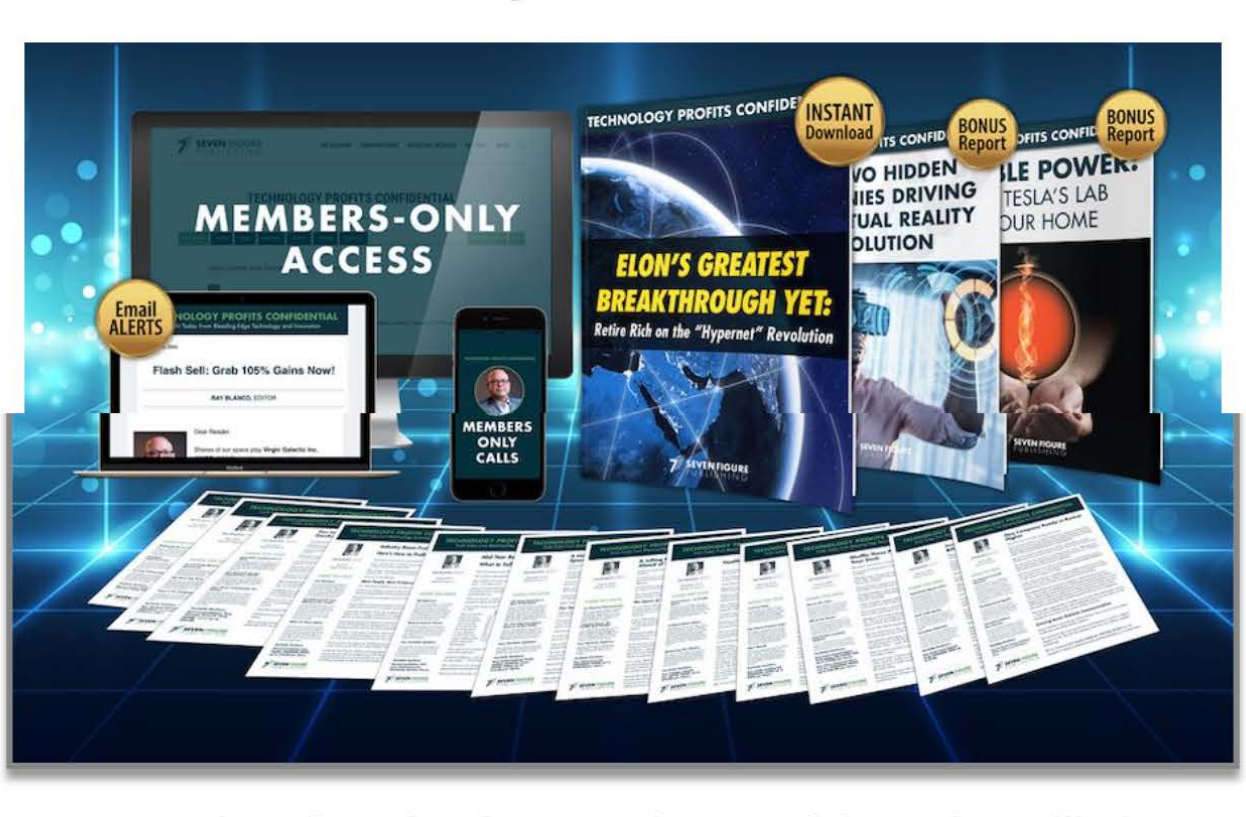
You Can Review Your Order Before it's Final

Q: What will I receive when I join?



For starters, as a reader of ***Technology Profits Confidential,*** you'll also receive a full year of monthly issues, weekly emails, urgent trading alerts, a special website login, "first read" access to my best new ideas, monthly phone calls and more.

Whenever I uncover a breakthrough new technology that has promise to change our world, I'll alert you and show you how to play it in the markets.

And that's just the beginning…

Within minutes of joining today, you'll get the report showing you how to win big from Elon's next (and biggest) innovation, ***Elon's Greatest Breakthrough Yet: Retire Rich on the "Hypernet" Revolution***.

Plus, the special bonuses we discussed:

- ✓ ***The Two Hidden Companies Driving the Virtual Reality Revolution***
- ✓ ***Invisible Power: From Tesla's Lab to Your Home.***

Q: Who are you? Why should I trust you?

Again, I understand you and I have just met, so let me quickly reintroduce myself.

My name's Ray Blanco, and even if you haven't heard of me, insiders have.

Over the years I've built one of the most impressive Rolodexes in the business…

Whenever I uncover a breakthrough new technology, I can call up famous scientists, CEOs, tech insiders, you name it… and get to the bottom of the story long before anyone else.

It's thanks to this inside scoop that I was one of the very first to recommend 5G stocks, pot stocks, virtual reality, artificial intelligence and more…

All of which are now major multibillion-dollar opportunities…

Opportunities that my readers have had the chance to make a fortune from.

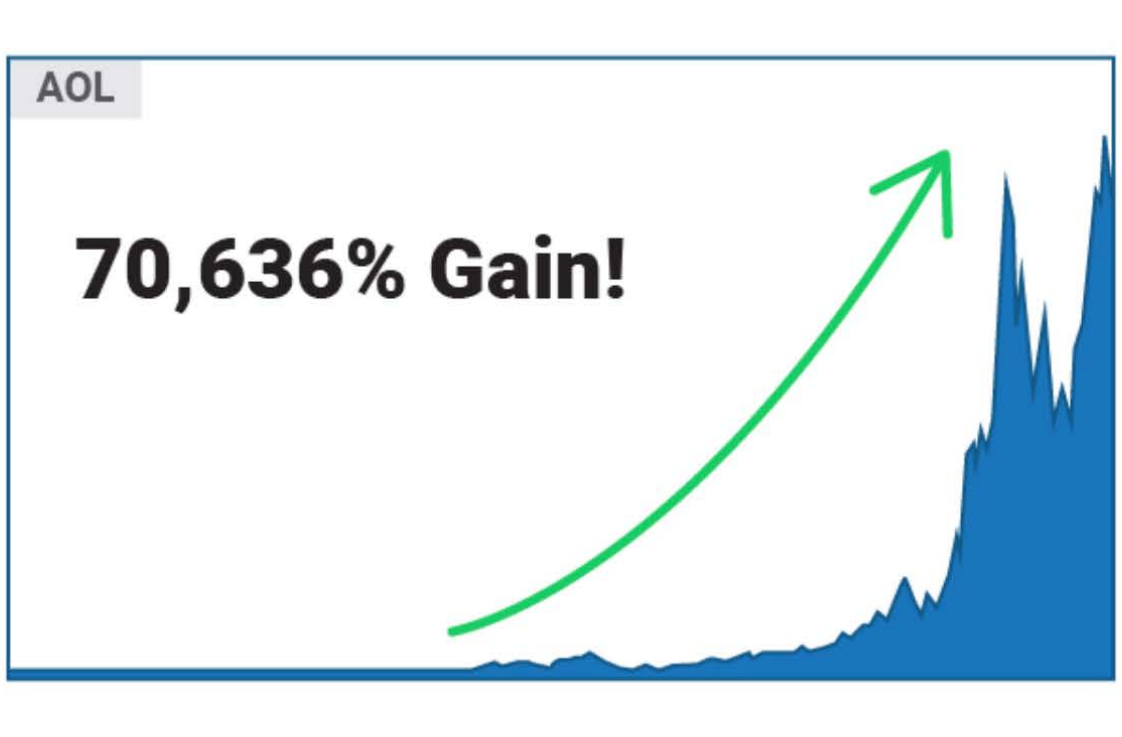
Don't forget — by acting now, you can try my work out for yourself with no risk. If it isn't everything I said it is — and more — you won't pay a cent.

Q: How much money could I make from this?

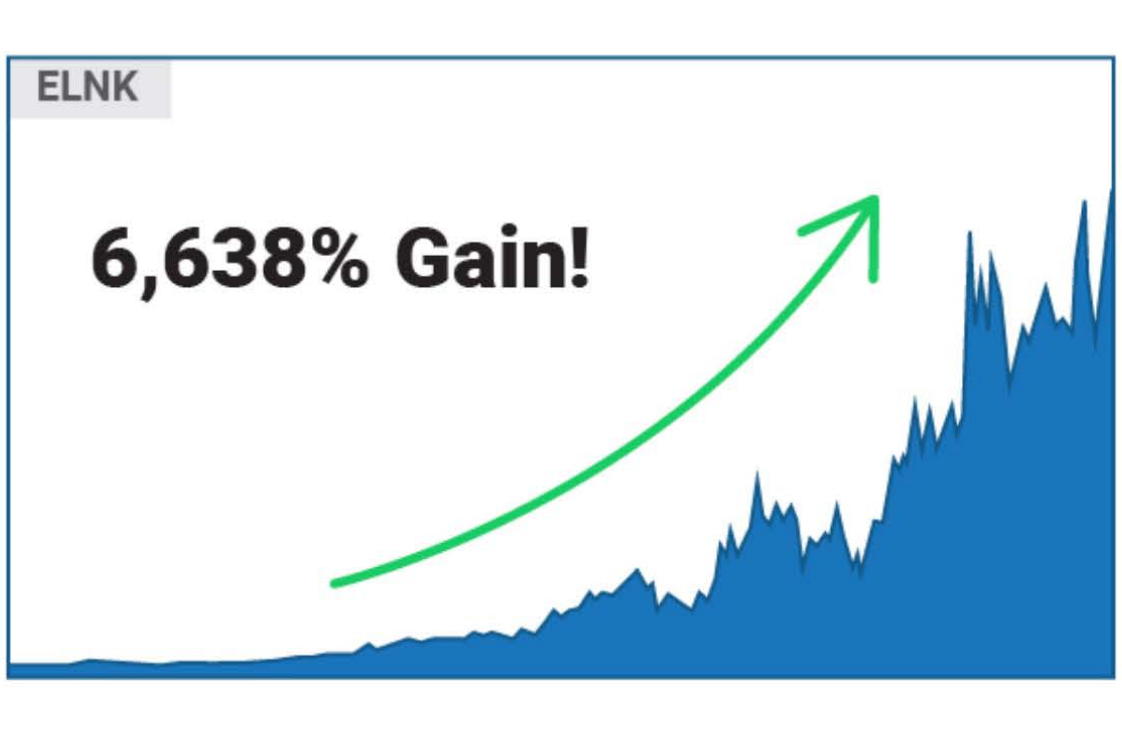
If history is any guide, the amount of money you could make from the situation is nothing short of life-changing.

I showed you what happens every time the internet takes a massive step forward…

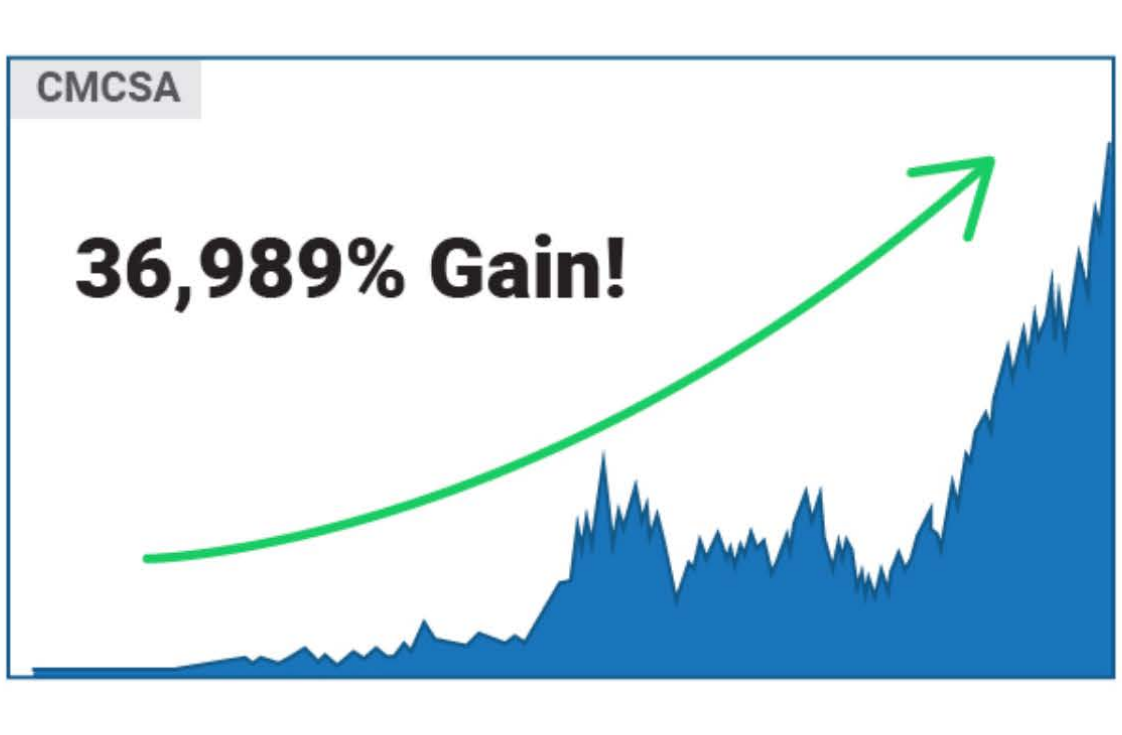
We saw AOL soar 70,636%…



We also watched as EarthLink skyrocketed 6,638%…



And Comcast catapulted 36,989%.



Now it's happening yet again…

And by positioning yourself ahead of time, you could turn just one small stake into incredible tech wealth.

You'll get all of the details on how to get started when you click the "Subscribe Now" button below.

SUBSCRIBE NOW

You Can Review Your Order Before it's Final

Q: Is your ordering process secure?

We use the latest encryption technology available to ensure your data is 100% protected throughout the order process.

The entire process is fast, safe and completely secure. I've made sure of it.

Q: What if I decide this isn't right for me?

No problem! As they say, "Nothing ventured, nothing gained."

If you decide my work isn't right for you, just call up my team and let them know. They'll immediately send you a full refund, and you can even keep everything we've discussed here today, just as my way of saying thanks.

If you've stuck with me this far, then all I can say is give this a try!

Here's what I propose: Go ahead and click "Subscribe Now" below and check my research out for yourself.

You have nothing to lose by doing this, and everything to gain.

Sound fair?

Q: This all sounds too good to be true… what's the "catch"?

The mark of a smart investor is skepticism and asking questions. So I'm not surprised if you were wondering this.

And that's why I'm doubling your time to try this out risk-free to a full six months — that's 180 days, more than enough time to see for yourself how valuable my work is.

If you don't get results, you can call us up and ask for a full, no-hassle refund. There's absolutely no risk to you.

The only catch is that you must position yourself now… before everyone else catches on and it's too late.

Don't wait… go ahead and click the "Subscribe Now" button below to get started.

SUBSCRIBE NOW

You Can Review Your Order Before it's Final

Q: If I have any questions, can I speak to someone?

Absolutely.

If at any point you have any questions about your subscription… you can call up my ***Technology Profits Confidential*** customer care team at 844-370-6637.

Based right here in the U.S., they're standing by 9 a.m.–8 p.m. to answer any questions you may have and help you out.

Q: How long will it take to receive everything we've discussed?

Within minutes of joining ***Technology Profits Confidential*** today, you'll find a new email in your inbox from me. Open it.

Inside you'll find the report we discussed today, ***Elon's Greatest Breakthrough Yet: Retire Rich on the "Hypernet" Revolution***… plus all of your special bonus reports, ready for immediate download. You'll be able to download and read them, then take action, within minutes.

Additionally, you'll also find your login to the special members-only ***Technology Profits Confidential*** website in that email, where you can view all the past issues, go through our portfolio, check out the full research report library and more.

The key is that you get started now… before this "Hypernet" is introduced to the world.

If Musk rolls out his expanded beta program by June 30 as I expect, it will catch most folks by surprise… but not you. You're one of the few people in the world who knows in advance what's set to happen.

For you, June 30 could mark the day you start to become seriously rich… but only if you take action now.

Once June 30 rolls by, if you aren't in… it could be too late to profit. You'll kick yourself forever.

With that said, go ahead and click below now to get started.

Take your time to decide if you need to. You can still click the "Subscribe Now" button as long as you remain on this page.

I thank you for your time, and I look forward to welcoming you inside ***Technology Profits Confidential***.
