URGENT WARNING: Brain Fog, Memory Loss and "Senior Moments"

Caused by Chemicals in These 3 VERY COMMON Foods

Discover why a leading M.D. says "Protect against the effects of these 3 'memory loss' chemicals **IMMEDIATELY**"

Plus… How to help boost brain power and improve your memory!

If you've ever been embarrassed because you couldn't remember the name of an old acquaintance…

Or dumbstruck when you completely forgot what you were saying in the middle of a conversation, when your mind just goes totally *blank*...

If you've ever felt *frustrated, confused, and ANGRY* because you lost track of your car keys, or forgot an appointment, directions, or a phone number...

If you're thinking about your future…

And if you've ever been told you "just have to deal with it"...

Then please, STOP whatever you're doing and LISTEN CLOSELY… because you're being LIED TO.

Our profit-driven medical system wants you to think age-related memory loss is something you have no control over…

The truth is... a stunning breakthrough in brain science is changing *everything*…

And in this presentation, I'll show you how it could make those humiliating "senior moments" virtually a thing of the past...

You'll discover…

- What *really* could be causing your brain fog, age-related memory loss, and senior moments… you'll be SHOCKED by the new research linking these symptoms to chemicals found in 3 VERY common foods...
- How to help improve your memory and keep your mind razor-sharp at any age…
- And most importantly, how a revolutionary solution has been shown in a study to help boost memory 28%…
- And another study on 17 participants found an exciting memory breakthrough that increased mental performance starting in just 1 hour…

Imagine feeling completely confident in any conversation, no matter how fast-paced or complicated…

Imagine not worrying about feeling the face-reddening humiliation of forgetting someone's name that you just met, or the reason you walked into the garage…

Imagine how impressed your family members will be when they see how sharp-witted you are…

And how secure you'll feel when you're not thinking about memory loss as you get older…

It all starts by discovering the uncensored TRUTH about brain fog and age-related memory loss…

How 3 specific chemicals found in foods – which many of us eat every single day – *could be slowing down your memory*

Yes, according to some of the top neuroscientists in the world…

It could be these 3 foods – NOT simply aging or genetics – that could be making your precious memories foggy.

Impossible? Rest assured... you'll see ***all the evidence*** from some of the world's top experts… in the form of clinical studies that leave ZERO doubt.

Because if you're anything like me, the Internet has forced you to become a hard-nosed skeptic.

There's a lot of conflicting, confusing information out there -- especially when it comes to health.

And the idea that occasional memory loss as you get older could actually be caused by 3 specific chemicals in common foods… might be hard to believe.

It's the kind of thing that makes you think, "why haven't I heard about these 3 foods already?"

Or, "why hasn't my doctor talked about them?"

Those are good questions – and I'll give you the un-biased answers in this presentation.

R. Gerhauser, M.D.

First, please, allow me to introduce myself…

I'm Dr. Richard Gerhauser, MD.

I've been a board-certified medical doctor for almost 3 decades now, with 2 Master's degrees in addition to my MD…

…and a stint as a clinical assistant professor at the University of Arizona College of Medicine.

And while I don't like to toot my own horn, I'll admit I've earned a reputation as one of the most innovative and pioneering minds in medicine.

That's not because I'm some extraordinary medical genius.

It's because, unlike most doctors, I aim to get to the root cause of your health concerns, instead of just treating symptoms.

That's what has made my practice a world-famous destination for celebrities and star athletes looking to maintain peak health and performance…

But my real passion is helping folks just like you live the healthy, youthful life you deserve.

And that doesn't just mean physical health… but **mental sharpness and memory** too.

That's why the news I have to share with you today is so urgent…

Because I believe...

Learning the TRUTH about these 3 foods is the single most important thing you can do for your memory…

In fact, these 3 'memory loss' chemicals are linked to the brain fog and senior moments that can sometimes muck up simple everyday memories… like where you left the keys or your friend's cell phone number.

And I'm not the only one sounding the alarm.

Harvard University MD and medical editor Dr. Eva Selhub was recently quoted as saying…

> "**Like an expensive car, your brain functions best when it gets only premium fuel… Multiple studies have found a correlation between a diet high in [this chemical] and impaired brain function.**"

Dr. Suzanne de la Monte, medical professor at Brown University, says just one of these chemicals could be behind the huge increase in older people with memory decline…

> "**We believe the dramatic increase is due to exposure [to this] rather than genetics…**"

And leading neurologist Dr. David Perlmutter says protecting against the effects of one of these memory-affecting chemicals…

> **"Paves the way for better brain health AND resistance to age-related mental decline"...**

In the next few minutes, I'll show you what these three foods are, and exactly HOW they impact your mind and memory.

Then comes the exciting part –

You'll discover how to help protect yourself against the effects of these memory-fading chemicals and a way to improve your memory in the process!

Yes, you heard that right – in fact, a study shows this breakthrough increased participants' memory by an impressive 28%!

Imagine how that could change your life…

How confident you'll be in conversations…

How you could call up every word, phrase, or thought right when you need it, without getting tripped up…

Imagine never suffering the humiliation of hearing your grandkids say, "*You already told that story – twice!*"

That's how powerful this breakthrough is.

Details in a few minutes...

First, let's look at each of these 3 chemicals… how they affect our memory… and why the mainstream is ignoring this massive health threat.

Memory-Loss Chemical #1 is… Refined Carbohydrates

These are found in foods like white bread, pasta, donuts, and sweets.

As much as we all love these foods, the research is clear – *they're clouding up your memories!*

Now, let me assure you right up front, I'm **not** going to suggest you give them up completely.

No, I've discovered a better way – *more on that in a moment…*

But let me first show you why these refined carbohydrates – like those found in white bread, rice, and sweets – *are so bad for your memory*.

That's because, in an aging brain, the glucose from these "bad carbs" can cause something called oxidative stress…

…which is like a **fire** in your brain cells!

Symptoms like brain fog… forgetfulness… confusion… and trouble concentrating have ALL been linked to refined carbs.

In a study published in the journal *Behavioral Neuroscience*, even otherwise-healthy, young people who ate lots of refined carbs had poor memory.

And in another study where they studied folks over 65, it was obvious – the more refined carbs they ate, the worse off their memory was.

Now, if you're health-conscious, you're probably *already* trying to eat less of these "bad carbs".

Because in addition to affecting your memory they also can affect your health in a host of other ways.

Thing is… refined carbs are **EVERYWHERE**!

Pasta… White rice… Crackers… Cakes… Cookies… Bagels… Donuts… Muffins… White Bread… Baked desserts…

Pizza Dough… Hamburger and hot dog buns… Pancakes… Waffles…

The list goes on and on (and on)…

It's almost impossible to eliminate them from your diet.

Besides, how much fun would your life be if you could *NEVER* eat the foods you enjoy?

But protecting your memory from the oxidative stress caused by refined carbs is SO important for a healthy brain…

Luckily, I've uncovered **a little-known nutraceutical extract** that does just that.

Animal research shows it may act as a *brain-targeted antioxidant* to help protect brain cells from oxidative stress… AND has been shown in a small human study to boost brainpower in as little as 1 hour… Details in just a minute…

But the effects of the second memory-loss chemical are even more scary.

Memory Loss Chemical #2 is… Microwave Popcorn!

Yes, you heard that right!

To be clear, it's not the popcorn itself that's the problem. It's the chemical used to give it buttery flavor.

It's called *diacetyl*.

In vitro research has linked diacetyl to the formation of amyloid proteins in the brain.

Yes, you heard that right!

And turns out popcorn isn't the only place we're exposed to diacetyl.

It's found in **THOUSANDS** of foods like margarine, candy, baked goods, and more.

It gives these foods a rich, buttery flavor and it's a lot cheaper than using real butter.

As a result, the Big Food companies **LOVE** this chemical even though **it CLEARLY may be bad for memory**.

Can you believe a chemical that's shown may trigger amyloid protein formation in brain cells…

…is found in *thousands of foods all across America!?*

It makes my blood boil…

But it pales in comparison to memory-loss chemical #3…

Memory Loss Chemical #3 is… Monosodium Glutamate, or MSG

Yes, MSG… the "flavor enhancer" used in Chinese food.

Turns out this chemical works by exciting the nerve cells in the brain that respond to taste.

Problem is, animal research suggests it very often OVER-excites other brain cells – which could spell trouble for memory and brainpower.

Now if MSG were **only** found in Chinese food, it might not be that big a deal.

Unfortunately, that's not the case.

This chemical is used in *countless foods* – including many you'd never suspect, like Doritos, Pringles, fast food sandwiches, even Campbell's soup!

And thanks to shady labeling regulations from the FDA, it almost never shows up in the ingredients label.

Instead it's disguised as any one of these innocent-sounding nicknames…

- Hydrolyzed Vegetable Protein
- Hydrolyzed Protein
- Hydrolyzed Plant Protein
- Plant Protein Extract
- Sodium Caseinate
- Calcium Caseinate
- Yeast Extract
- Textured Protein
- Autolyzed Yeast
- Hydrolyzed Oat Flour

Now you tell me – if MSG is perfectly safe, *why hide it from us?*

Luckily, a tiny dose of a certain type of vitamin can help support and protect the health of brain cells

Which is absolutely *crucial* for your memory and brain health.

Especially when you look at the big picture of all 3 "memory loss chemicals"...

When you realize just how common they are in our food supply...

When you understand how they're impacting our memory and ability to think clearly every single day…

And when you see how virtually impossible it is to eliminate them from your diet…

It would be easy to throw up your hands and give up… and just *accept* age-related memory loss.

But don't lose hope!

As I mentioned, there's a simple, easy way to help PROTECT your brain from age-related memory decline…

And as a bonus, it can actually help boost your memory – with a study showing folks got *as much as 28%* improvement in memory!

Imagine… recalling names of old friends, addresses, and phone numbers in a snap…

Always being able to find the word you're looking for in a conversation, without hesitating even for a second.

Imagine… having your friends and family members tell you how sharp and quick-witted you seem…

Imagine feeling confident about your future… knowing your brain could stay sharp and powerful…

SOLAIRE NUTRACEUTICALS
MIND DEFENSE™
Cognitive Support†
Dietary Supplement
30 Capsules

My friend, that's exactly why I created **Mind Defense™**.

Mind Defense is a cutting-edge formula from my team and me here at Solaire Nutraceuticals…

We created this formula with one goal in mind – to help give you a clear, noticeable boost in brainpower and memory…

That part is *really* important… I wanted to make sure you could actually **feel** a difference…

…and that your friends and relatives would notice the change too… so you'll have no question that it's working.

See, I use a lot of nutritional supplements and nutraceuticals in my clinical practice.

But I've noticed a very common problem with many supplements: They take a while to really work – sometimes a few weeks, sometimes as long as a few months.

And who has time to wait that long for results?

So what happens is people stop taking the supplement – *just before they would've gotten a real benefit!*

So with **Mind Defense**, I made sure to include ingredients with research showing they worked for folks fast… and when I say fast, I mean it… **as quickly as 1 hour after the first dose!**

It wasn't easy by any stretch – my team and I had to *scour the globe* to find the perfect blend of natural ingredients…

But today I'm thrilled to announce that…

Mind Defense is ready to help protect YOU from age-related memory decline

AND improve memory fast, just like the study participants who had results in just one hour!

It begins with a revolutionary nutrient *unlike anything you've ever seen…*

If you'll remember, the first issue is the oxidative stress caused by refined carbohydrates.

Now, if you follow the health news, you know that **antioxidants** are the key to quenching the "fire" of oxidative stress…

…which is why antioxidant-rich fruits and veggies are so good for you.

Problem is, only a select few antioxidants can cross the blood-brain barrier, the wall surrounding your brain.

And after an exhaustive search, we've found one that does that – *and a lot more.*

It's called **Bacopa Monnieri**, and it's an exotic plant from Asia.

It's been a traditional Asian remedy for centuries, and modern science is finally catching up.

Animal research suggests that Bacopa indeed crosses the blood brain barrier, and has *powerful antioxidant effects*.

So what does this mean for your memory, concentration, and thinking?

Well in another study – this time on 17 men and women – patients saw an increase in their ability to focus and multitask…

Just **60 minutes** after taking *a single dose of Bacopa!*

The researchers measured again after 2 hours…

And the study participants' brains were functioning just as good, if not better, than at the 1-hour mark!

I spend a lot of my time reading studies like this, and I can tell you --

There is NOTHING else out there that delivered a measurable boost in brainpower after just 1 hour like bacopa…

And the longer you take it, the better the results could get.

In fact, in another study of 40 men and women with age-related memory complaints, after 3 months, patients saw an undeniable **increase in their memory scores!**

And results got better the longer they took it! That's why I included a full dose of bacopa extract, in every dose of **Mind Defense**.

So you can be sure the bacopa in **Mind Defense** can **KEEP** working for you long term.

Picture yourself taking your first dose of **Mind Defense**…

And actually feeling your mind "rev up" to full speed!

Plus, you can look forward to how your memory could get better the longer you take it!

And just wait until you see what happens when you protect against amyloid protein, which has been linked to "memory loss" chemical #2…

Because my team and I found a cutting-edge nutraceutical that does that and MUCH more...

It's called **Cera-Q®** – and it's a special type of naturally-derived protein peptide.

Like Bacopa, it's been used for brain health in Traditional Asian Medicine for centuries.

And now that researchers have been able to test this remarkable nutrient under controlled laboratory settings, we know why.

The memory-enhancing results are almost *unbelievable*…

Researchers in Korea split a group of 98 patients into two groups.

They gave one group a placebo, and the other group a daily dose of **Cera-Q**.

And after just 3 weeks, the difference was *night and day*.

In fact, the Cera-Q group showed **28% better recall** when they were asked to memorize a list of words…

AND an impressive 26% better overall memory… in 3 weeks!

Think that would make a noticeable difference in your day-to-day life?

Absolutely!

That's the kind of undeniable improvement that even your family members could notice!

But that's not all. See, a few of the patients in that study were younger, which could have skewed the results slightly.

So to be completely sure, scientists did another study. And this time they only took patients over the age of 65.

And the results were even **MORE** stunning.

Every single parameter the scientists measured – memory, attention, concentration, mathematical calculations, organizational skills and "linguistic ability"...

They ALL improved significantly.

And that was after just 3 weeks of taking 400 mg of Cera-Q daily.

And the really amazing thing is that the patients with more age-related memory loss… saw the **BIGGEST** improvements.

The more the study participants needed it, *the better it worked!*

The more the study participants needed it, *the better it worked!*

Of course, the scientists wondered **how** Cera-Q delivers such a powerful boost in brainpower.

And by looking at brain cells treated with Cera-Q under a microscope, we know the answer – **it may actually help protect brain cells from amyloid proteins!**

Yes, amyloid protein – the same stuff that can contribute to a foggy memory and age-related memory loss…

Cera-Q was shown in vitro to help keep brain cells protected from amyloid protein!

Leaving your brain ready for all the crosswords, Jeopardy clues, and fast-paced conversations you can throw at it!

So not only does this remarkable nutrient help **improve memory**…

Cera-Q was also shown to help protect brain cells from amyloid protein

200 MG
OF
PREMIUM
CERA-Q®
SOLAIRE | NUTRACEUTICALS
MIND DEFENSE™
Cognitive Support†
Dietary Supplement

That's why I included 200 mg of premium Cera-Q in each dose of **Mind Defense**.

And that's only the *beginning* of what this cutting-edge formula does for your brain health!

Now rest assured, with these 2 ingredients alone, **Mind Defense** is already **the most advanced brain health formula I've ever created**.

With just these 2 ingredients, you could notice an uptick in **mental sharpness** in conversations…

…your ability to **concentrate** on things like books, puzzles, and documentaries…

…your **memory** of details like phone numbers, bank account numbers, addresses, and lots more…

But if you'll recall, there's one more "memory loss chemical" we MUST protect against the effects of – **#3: MSG**.

Because despite the mainstream claims that it's safe, research suggests *MSG can affect your brain cells!*

It tends to "overexcite" brain cells and neurons, and has been linked to a fuzzy memory and occasional brain fog.

So while it's important to reduce your exposure to MSG as much as possible…

There's another little-known vitamin deficiency that can mimic some of the same symptoms…

Including brain fog, memory loss, and difficulty concentrating.

And this time, it's not an exotic plant extract or nutraceutical.

It's actually **vitamin B-12**!

Seniors especially are at risk for a vitamin B-12 deficiency…

So it's important to get enough B-12…

There is one catch, though.

Remember the blood-brain barrier, the wall that surrounds your brain tissue?

Well, of the more than a dozen forms of vitamin B-12, only **ONE** crosses that barrier.

It's a special form of B-12 called **methylcobalamin**.

Its chemical structure allows it to go right to your brain cells.

That's why **Mind Defense** includes a healthy amount of methylcobalamin in every dose.

And as an added bonus, B vitamins are well-known for supporting your energy levels, so you might just notice a little extra pep in your step, too!

Are you starting to see how this formula can help IMPROVE your memory and brainpower?

Can you see how the protection **Mind Defense helps** provide from the effects of bad foods and additives can help keep you sharp as a tack?

Are you imagining how great it could feel to finish that book of puzzles in one sitting?

Can you imagine how much better your relationship with your family will be, when you can share better conversations, advice, and laughs with them again?

Can you imagine the *confidence* knowing your brain can stay sharp into your golden years?

That's exactly what **Mind Defense** gives you – the *peace of mind* and security of knowing your brain has what it needs to help keep it running on all cylinders…

And like all my Solaire Nutraceutical health solutions, ***Mind Defense*** is absolutely top-quality in every respect.

It's created in a certified facility right here in the United States.

It's made with 100% non-GMO ingredients.

And it features clinically-tested ingredients at the perfect levels to ensure you see powerful results…

And you know what?

Right now is absolutely the BEST time to try Mind Defense, *ever…*

I mean that.

Just listen to what people who have already started enjoying the results of **Mind Defense** are saying:

> My memory, focus, and cognitive function have all improved since I started taking **Mind Defense**! I've been taking it at least two years now, and the longer I take it the better the areas improve. I really enjoy the product and have mentioned it to my friends.
>
> - Martin H., Frederick, MD*

> I've been taking **Mind Defense** for over a month now. First, I noticed that my mood was better. I have been playing a lot of word games and feel sharper when doing so, and also find it easier to recall information.
>
> - Colleen C., Boston, MA*

> **Mind Defense** has been a godsend as I am now much more alert! I noticed results from day 1. After 3 days, I've had remarkable improvement. Everyone notices when I miss taking them! I'm grateful for **Mind Defense**.
>
> - Susan E., Rochester, NY*

> **Mind Defense** is unbelievable!! I've been taking it about two months, in addition to other natural breakthroughs. This stuff works!
>
> - Anna V., Sacramento, CA*

> **Mind Defense** has worked real good for me. It kind of changed my life for the better after taking it for two months and I am 84. Thank you!
>
> - Jack M., Omaha, NE*

> I have faster recall of recent events and less brain fog since I started taking **Mind Defense**. I've been taking it for a year and a half now!
>
> - Lee N., Boise, ID*

*Results may vary.

Could you imagine having these kinds of improvements to YOUR memory?

And it's not available in any store and never will be.

However... our supply is limited.

So if you want to take advantage of this brain-supporting breakthrough, you'll need to act quickly…

And of course, you can try **Mind Defense** today with **ZERO** risk.

Because every bottle is covered by a 100%, no-questions-asked money-back guarantee…

See, we know that **Mind Defense** is unlike anything you've tried before.

My team and I KNOW this formula **has the power to change your life**, because we live and breathe the science behind it.

But we completely understand if you're not quite as convinced as we are. It's only natural.

And you should feel completely secure when you place your order today.

That's why **Mind Defense** comes with Solaire Nutraceuticals' unique **Unlimited Guarantee.**

SOLAIRE | NUTRACEUTICALS
MIND DEFENSE™
Cognitive Support†
Dietary Supplement
SATISFACTION
100%
GUARANTEED

It's our unconditional **100% satisfaction promise** to you.

It means that if at any time, for any reason whatsoever, you don't feel like **Mind Defense** has exceeded your expectations… if you don't feel the difference right away…

…if you're anything less than *amazed* by how sharp you are…

You get back every penny of the purchase price.

No questions asked, no hassles, just let us know by phone or email, and you'll get a prompt refund.

And there's no time limit on this Guarantee – whether it's 3 months from now, or 3 *years* down the road, you can *always* get a refund if you're unhappy for any reason.

Some of our colleagues think we're *nuts* to offer such a free and open money-back promise. They think we'll lose money, or even get ripped off.

But we *know* that once you feel the change **Mind Defense** makes in your life…

…once you're feeling *noticeably* quicker and sharper… remembering names, faces, dates, and appointments like someone younger…

…blazing through crosswords, news articles, books, and emails… a refund will be the furthest thing from your mind.

And remember…

In each dose of Mind Defense, you're getting everything you need to help keep a sharp, strong memory

Including:

- **Potent Bacopa Monnieri extract**– shown in a study to help give folks a measurable increase in brainpower starting in *one, short hour after the first dose*...
- **Revolutionary Cera-Q peptide** – Shown to improve memory by 28% in just 21 days… and shown in vitro to protect brain cells against amyloid protein...
- **Methylcobalamin** – the only form of vitamin B-12 shown to cross the blood brain barrier…

And even better – right now you can lock in today's low price, AND get your shipping paid for too!

Just place you order through this introductory offer, and you'll get free access to our automatic refill program.

It works like this...

After your initial order is about to run out, our system will automatically alert us…

…and we'll rush your next shipment of **Mind Defense** to your door and bill the same credit card you use today.

You'll lock in today's low price *forever*… and you'll **NEVER** pay for shipping.

And of course, this is a no-strings-attached offer.

You can pause or cancel this automatic delivery service at any time. No questions asked.

My friend, now is the time.

You've tried standard "brain vitamins" – and you haven't gotten real results you need…

It's time to try something different.

It's time to know the truth about the "**memory loss chemicals"** in our food supply…

It's time to help boost your brainpower…

…and help improve your memory...

It's time to try **Mind Defense**.

So let's do this: **Click the button at the bottom of this screen**. Then fill out your shipping information on the next page.

Once you do, we'll begin packing your shipment of **Mind Defense** and we'll rush it your way.

Just a few short days from now, you'll receive a plain package from USPS.

Carefully packed inside will be your initial supply of **Mind Defense**.

I recommend you immediately open up your first bottle of **Mind Defense**… and take your first dose with a glass of water.

Imagine… being one of the folks in the studies I told you about earlier…

Within 1 hour, you could notice the first signs of your improved brainpower

You may notice that your thinking seems clearer… that it's easier to pay attention and focus on detailed tasks…

And each day, the results could get more and more powerful.

In a few short weeks, you (and everyone you know) could be amazed at the **increase in your memory**…

…not to mention better concentration, quicker thinking, a brighter mood, and more...

And if you're ever less than thrilled, just let us know to receive a full refund.

But please don't delay. We've sold out of our other formulas in the past.

And we've **NEVER** released anything as revolutionary as **Mind Defense**.

So I understand if you want to think it over, but since you're entitled to a full refund of what you pay today – *at ANY TIME…*

Why not think it over *WHILE* you try it, since you're not risking a penny?

Doesn't it make sense to **FEEL the memory-boosting results** as a part of your decision-making process?

That way you won't miss out on the one chance to help support your mind and your precious memories.

For Solaire Nutraceuticals and **Mind Defense**, I'm Dr. Richard Gerhauser.

Thanks for reading, and be sure to **click the button below** to claim your personal supply of **Mind Defense** while it's still available!
