### About Stansberry's Big Trade

Stansberry's *Big Trade* isn't like our other products. It isn't about investing at all. This new service is all about speculating. That means that we attempt to profit from market extremes.

Manias like the real estate bubble pop up when the government meddles in the markets. And another one is happening under the radar NOW... this time in car loans, student lending, and corporate debt.

We can't know exactly when this bubble will burst. But we believe the end of the current debt mania will cause a crash in the stock market. Lots of investors will be devastated by the fallout... *But you don't have to be one of them.*

We use an options-trading strategy that we've called the "Big Trade." We buy long-term, out-of-the-money put options on stocks that we expect to fall significantly. Our positions rise as these companies fall, and we sell our puts back into the market for a profit.

Traders require approval from their brokers to trade options. Most brokerages have prerequisites to make trades like this. We know this service isn't for everyone.

We have built this service for subscribers who are comfortable with risk. You must be willing to make speculative bets. If you're prepared, triple-digit gains are possible.

#### About The Editor

Bill McGilton is the editor for *Stansberry's Big Trade* – our speculative options trading service aimed at profiting from the worst corporate credit and companies with broken business models in America. Bill joined Stansberry Research in 2014. He's been a lawyer for the past 16 years. Most of his experience is in corporate litigation doing research. His background includes securities, contracts, anti-trust, options backdating, foreign exchange fixing, trademark and patent infringement. Typically, he worked on behalf of large commercial banks and large publicly traded companies. He also served as legal advisor on various US government reform programs in developing countries. Bill is an expert at analyzing legal documents and goes through the bond documents for *Stansberry Credit Check* and *Stansberry's Big Trade*. On the flip side, he works on distressed debt opportunities in *Stansberry's Big Trade*. Bill holds a bachelor's and juris doctor degree. He is also a senior analyst and contributes to our flagship research service *Stansberry's Investment Advisory*.

#### Portfolio Snapshot

#### Publication Overview

How much capital should I have to get started?	\$50,000 minimum
What will we be buying?	Put options
Do you put on short trades?	No
What's a typical holding period?	18 – 24 months

**"I'm up more than \$6,700 in less than one month. I can't wait for future recommendations."**

Harold L. Subscriber of Stansberry's Big Trade

“

"All of the stocks I've purchased are in the 'green' so far and I'm even up 90% on one recommendation."

— Kim B.

Subscriber of Stansberry Big Trade

”

## Profit From the National Credit Collapse – Here's How To Get Started

Stansberry's *Big Trade* isn't your typical investment newsletter.

It isn't about investing at all. It's about speculating – attempting to profit from temporary market extremes.

In every mania, speculators have identified how government actions have distorted the markets... and then positioned themselves to earn massive profits when market forces overwhelm the government's intervention.

Today, we're on the cusp of a debt collapse that will put the crisis of 2008 to shame.

Never before in human history has so much money been lent to so many risky borrowers, at such low interest rates.

And while a crash would devastate millions of investors, you don't have to be one of them.

To protect yourself and take advantage of an inevitable crash... you need to act now. You need to start placing small speculations to hedge your portfolio, before the credit bubble pops.

That's why we developed this service.

We've started making bets against America's worst corporate deadbeats and other troubled companies...

We put together a list of the thirty worst debt-ridden and problematic losers, called the "Dirty Thirty."

And we're placing special, asymmetrical bets to profit from their collapse.

Of course we know all investments carry risk, but here's the great thing about these bets.

When you trade these companies the way we recommend you do in *Stansberry's Big Trade*, your downside is capped – and it can be capped at a few hundred bucks, if you choose.

Meanwhile, the potential upside on these trades is nearly infinite. Our research shows you could pocket gains like 110%... 1,379%... 2,650%... 4,980%... 6,760%... and more.

**Stansberry's Big Trade costs \$5,000 a year.**

That's a bargain, considering just one or two of these trades could make you 10-20 times your money over the next few years.

**Here's what you'll receive:**

**The Dirty Thirty.** The first thing you'll get is a list of the 30 companies we've identified as the worst credit risks in the market – what we call the "Dirty Thirty." We'll send you a comprehensive report featuring the full "Dirty Thirty" roster – including the name and ticker symbols of each of the companies we're planning to target.

As the credit profiles of these companies change, so will the "Dirty Thirty" list.

So every month, we'll review the credit profile of every company on the list and notify you if we make any changes.

**12 Monthly Issues of Stansberry's Big Trade.** We will send you a full report every month with a complete list of the companies on our watch list, as well as any updates to their credit status or risk.

Monthly recommendations will vary – some months may have several recommendations while others may not have any.

Diversifying over time and across different companies allows you to take on the least amount of risk and to capture the biggest potential gains.

If our recommendations hit one or two of these exactly right, you could make up to 5, 10 or 20 times your money over the next 3-5 years.

As an added benefit, you'll have the chance to secure expensive "disaster insurance" to protect your portfolio in the event of a sudden correction or market crash.

**The Stansberry Digest.** Every weekday, the Stansberry Research editorial team writes up notes on interesting situations taking shape in the markets. This daily e-letter will keep you up-to-date on what's going on with the Stansberry Research family: what we got right... what we got wrong... what we've got planned... and more.
