

TrueWealth Opportunities: CHINA

A collection of the simplest and best ways to take advantage of the financial revolution in China.

In *True Wealth Opportunities: China*, editor Dr. Steve Sjoggerud highlights four of the most profitable trends he sees unfolding in China right now. China is committed to building a more stable and institutional market to attract foreign investors. As this happens, trillions of dollars could flow into the country... and you could earn triple-digit gains from the greatest opportunities Steve has ever seen.

You only need to put a small portion of your portfolio into this idea for it to pay off in a big way.

Let Dr. Steve Sjoggerud and his team of experts show you how to make 100%... 200%... or an extraordinary 500% quickly, and with less risk...

I'm ready to begin!

About True Wealth Opportunities: China

The investments Dr. Steve Sjoggerud focuses on in *True Wealth Opportunities: China* are some of the greatest opportunities he has ever seen.

First and foremost, China is in the middle of a technology revolution.

Investing in China right now is like stepping back in time. It's a way to invest in the world's biggest ideas... before they become the biggest ideas.

Imagine if you could invest in Amazon's revolutionary technology 15 years ago... or Facebook's social-networking technology four years ago.

That's the opportunity we have in China's technology sector today.

Steve also covers the biggest "wrong" in the world of finance.

China is the world's second-largest stock market. It's larger than every other stock market in the world, except the U.S. But right now, nobody owns locally traded Chinese stocks. Nobody, that is, except us...

\$1 trillion – or more – will start flowing into Chinese stocks and bonds in 2018 as this wrong is righted. This is another way Steve helps his subscribers profit in *True Wealth Opportunities: China*.

Steve covers other big themes in China as well, like the world's greatest property boom and the upcoming MSCI decision on the Chinese stock market. In short, any Chinese investment that he believes can earn you triple-digit or larger gains will be on the table.

In *True Wealth Opportunities: China*, you'll learn the simplest – and the best – ways to take advantage of all these ideas... and new opportunities as they come up.

The goal, as always, is to make you as much money as possible.

About The Editor

Dr. Steve Sjoggerud is the editor of *True Wealth*, an investment advisory specializing in safe, alternative investments overlooked by Wall Street. It's based on the simple idea that you don't have to take big risks to make big returns.

Since Steve joined Stansberry Research in 2001, he has found super-safe, profitable investment ideas for his subscribers that the average investor simply never hears about... until the big gains have already been made.

Over the years, for example, *True Wealth* readers had the opportunity to make outstanding gains in Icelandic bonds (32%)... timber (54% and 27%)... and housing (103% and 95%), to name a few. Steve also recommended buying gold back in 2002 – when it was trading for around \$320 an ounce – a call that led subscribers who took advantage to gains of 273%, 206%, and 182% in collectible gold coins, and 118% on shares of Seabridge Gold.

Steve is also the editor of *True Wealth Systems*, which uses powerful computer software – similar to the kind found at hedge funds and Wall Street banks – to pinpoint the sectors most likely to return 100% or more. One major newsletter industry insider called *True Wealth Systems* "the most in-depth research service ever developed."

And in 2016, Steve launched *True Wealth Opportunities: China*. In this monthly service, Steve explores the huge opportunity he sees building in Chinese stocks. Many of the best, most innovative companies there – in technology, real estate, banking, and more – will see their share prices rise by triple-digit percentages (or more).

Throughout his career, Steve has addressed hundreds of financial conferences in the U.S. and around the world, including at the New York Stock Exchange. He holds a doctorate in finance and has worked as a stockbroker, vice president of a \$50 million global mutual fund, and a hedge-fund manager.

Portfolio Snapshot

Number of Positions
Approx. 20-25

*Number of positions, safety, and returns may vary. These are estimates based upon our track record and historical data.

Publication Overview

How often is this service published?	Monthly

“

"After making over 100% gains with Steve's China call a couple of years back, of course I am investing in some of Steve's recent China recommendations. 14.8% return overall. Very good results so far, and looking forward to some great long term returns. Keep up the great work, Steve."
