Juice Plus+

April 29, 2020 · 🌐

Less medicine, fewer doctor visits, and fewer school days missed—all things we learned from real families who started taking Juice Plus+. Are you a Healthy Starts family? Let us know what you noticed after your kids started taking chewables or capsules.

Twenty years ago our family was blessed with Juice Plus. My Dad gifted all 8 children with the gummies at a family reunion since he believed so strongly in good nutrition. He was a cancer survivor (colon cancer at 70), got off all his arthritis medication, took care of my Mom with Alzheimer's until he had a stroke at 85 from atrial fibrillation. Until that time he body surfed almost every day in Florida. After coming to live in CA with me, he and my Mom were out every day at our local Stroke center

Twenty years ago our family was blessed with Juice Plus. My Dad gifted all 8 children with the gummies at a family reunion since he believed so strongly in good nutrition. He was a cancer survivor (colon cancer at 70), got off all his arthritis medication, took care of my Mom with Alzheimer's until he had a stroke at 85 from atrial fibrillation. Until that time he body surfed almost every day in Florida. After coming to live in CA with me, he and my Mom were out every day at our local Stroke center where he worked out at the gym. He also did laps at our city's Olympic pool. Juice Plus made my life easier because neither of them suffered from colds or flu while they lived with me, and my Mom who was a fussy and difficult eater was always ready to have "ice cream" made from our Complete Drink!! Juice Plus continues to bless me with great health. At 69 I still work in a busy cardiac Cath Lab as an RN and take no medication. I've discovered food is the fountain of youth - it's that simple!! Be healthy out there
