**authenticallyjill** Y'all.... I have to share this because Brenton Wagner got his wisdom teeth out yesterday and I went to go get his antibiotic filled and when I got to the window they asked for our address for him.... You know we've moved a lot in the past few years so I rattled off 2 different addresses and the lady said no... so I said another and she said no and then she said have you ever lived on Fir street? I said... yea in 2012 we moved from there though. She said well... Brent hasn't had a script filled since then!!!!!!

Y'all.... That was unheard of for our family but mainly Brent!! He was the reason I got started on Juice Plus 14 years ago because he was born 8 weeks early and was always sick!!

weeks early and was always sick!! We were at the doctor monthly. He had strep throat 7 times in 4 months before we started on Juice Plus. And I was prolonging getting his tonsils out. I never dreamed that flooding our body with fruits and veggies in a capsule could be an answer for him!

I worried about how his little body would grow and if he would be healthy as he aged. I'm thankful to say, that "little boy" is now 6'3 nearly 200 pounds and has been flooding his body with this powdered produce for over 14 years.

He is now totally committed to his own health. Working out and eating more fruits and veggies! He even made himself eat broccoli this week! 🍌

If you're looking for a better way...  
Let's chat. I promise that just  
because sickness is common  
doesn't mean it's normal. There is a  
better way.

If you just want to check it out and  
not chat, here is a link. (Kids also get  
it for free when an adult orders!)

<http://www.jwagner.juiceplus.com>

**\*\*Juice plus is not a cure, just whole  
food in a capsule.\*\***

In my opinion, Our bodies are the  
miracle. They just need the food  
God intended for us to be eating! 🥦
