Many will say I'm being bias because it's our company. Sure that makes sense however I didn't create Elomir and then make a product. I developed the product to then create Elomir.

Just wanted to share my own testimony of Axis Klarity. I have been on and off our product for over a year because we were R&Ding and developing it. When we finally went public on July 5th, I did not get any product for myself because every box mattered at that point to get it out to the field to use and experience. I officially got my supply on July 20th. I have taken Axis Klarity every day since.

6 days ago I stopped taking Axis Klarity to prepare me for the QEEG brain scan I did today.

The last 6 days have been a rollercoaster of emotions. My focus has been horrible. I am usually a person that doesn't get emotional very easily, so I thought. This week I have been an emotional wreck, and lastly my mood has been so off and I'm a happy and even keel person, or so I thought!

You don't know what you don't know. When you don't know what better feels like you think you're normal. Being on Axis Klarity for 6 weeks now and being off for the last 6 days, I was so scattered brain. I struggled the last 6 days staying on task. I felt overwhelmed. I felt so lost in my emotions. 1 minute I would be excited the next I felt the world was falling apart. My patience level was lacking and my ability to process situations was not as sharp.

Today I got to take Axis Klarity again during the brain scan! If you ever question if Axis Klarity works or not, sit in a quiet room for 2 hours isolated and take the strip and you will see how you won't go insane. 😂

What I have noticed that improved since being on Axis Klarity:

Better mood

Better focus

Better skin no breakouts because my gut health is better

Better sleep

Better emotions

Not snappy with people or situations

I feel more present with my kids

I feel overall more human if that makes sense? I am not easily distracted because I'm so focused on what is in front of me. I appreciate the little things in life and the time I spend in the moment without worrying about the next thing to do.

I am so happy to be back on Axis Klarity today and will never be off it again unless it's absolutely necessary! 🤪
