alli_schley_ I LOVE when products and purpose and vision all come together! I watched an intense science 🧬 training last night on some DOPE women's health issues to help all women get hormones balanced without adding in more hormones!! 🤩

🤔 The vision of the creator is centered around women's health and openly talking about these issues and then having access.

🤔 I was at a HS today and a Social Worker gave a young lady some tampons. She suggested that the young lady maybe keep a small bag in her locker with some spare. Great idea- but all I could think of is that

idea- but all I could think of ia that some of these families struggle to get food at home ... do they have funds or access to extra pads and tampons?

💕 Here is my purpose- I decided to help where I can- I will start donating boxes of pads and tampons to shelters or schools. The project will go hand in hand with these new products- if you would like to help in any way (with or without spending a penny), shoot me a message or type HELP below!
