Re: Olly's Marketing Practices

Dear Ms. Willenborg:

On behalf of Truth in Advertising, Inc. ("TINA.org"), a nonprofit consumer advocacy organization dedicated to protecting consumers from deceptive advertising, I write to alert you to a deceptive marketing trend that is currently prevalent in the supplement industry, as well as the hair product industry. That is, companies are marketing supplements and topical products as able to grow hair and reduce or prevent hair loss without the required FDA approval¹ or competent and reliable scientific substantiation required by the FTC.²

In addition, some companies are marketing products through the use of social media influencers without ensuring that the influencers properly disclose their material connection to the company or that the promotional posts are ads, as is required by the FTC.³

Such deceptive marketing practices violate the Federal Trade Commission Act and/or the Federal Food, Drug, and Cosmetic Act.

TINA.org urges Olly to review its marketing, which includes, among other things, claims that its supplements can boost hair growth,⁴ and take the necessary steps to ensure compliance with FTC and FDA law.

If you have any questions, please do not hesitate to contact us.

Sincerely,

A handwritten signature in blue ink that reads 'L. Smith'.

Laura Smith, Esq.
Legal Director
Truth in Advertising, Inc.
