Dear Readers, Are you interested in providing you and your loves ones with better healthpcare?. Are you interested in becoming financially free.

I understand how you feel about network marketing. I used to stay away from it too because I heard a lot of bad things. I thought it's hard to make money. Very few people succeeded, and people say they lose their friends on the way. But after experiencing Nefful products, my family 's health's condition improved so much that I began sharing the good news very naturally to my good friends. That's how money began coming in.

Even better, Chen Shan Mei Success Team offers a series of training programs that improved my social and communication skills. Ever since I joined Nefful, many areas of my life have become better. Not just my income, but also my relationship with family and friends are getting better as well. I hope to share with you the great benefit of myself, that's why I want take this great opportunity to request you to send me WhatsApp 65-97441577 for meeting and discuss, we also welcome your goodselves to visit Nefful company and logistics.

### What are the unique features of NEORON® 妮美龍有哪些特性?

#### Excellent Heat Insulation 卓越的保溫力

NEORON® is a fiber with high heat conductivity. It has excellent heat insulation capabilities to prevent loss of body heat, keeping your body temperature consistent.

妮美龍是一種導熱性能低的纖維。它具有卓越的保溫功能，可防止體內熱能流失，讓您在任何場合，都能舒適。

After a long and hard day at work, your bed is probably the most inviting place to be. Make your environment even more relaxing and surround yourself with negative static electricity, negative ions with NEFFUL's range of comfortable sheets and blankets made from NEORON® fibers. So lay your weary head down and let us take care of the rest.

#### 寢具

忙碌一天回到家，床大概是您最想依偎的地方。妮美龍的床單、毛毯和披蓋採用妮美龍纖維，柔軟舒適，將您輕輕擁入負靜電、負離子的擁抱中，安心享受頂級的睡眠時光。選擇妮美龍寢具，一覺到天亮！

### 清爽的觸感 Superior Moisture Permeability

When fabric get wet, it will prevent some of the heat from leaving the material. Therefore, you will feel sticky and uncomfortable. NEORON® fiber has a special structure that allows moisture to pass through easily, so you will feel cool and comfortable.

#### 清涼的觸感

當布料沾濕時，它會阻擋部分熱氣散出，因此您會感到黏膩、不舒服。妮美龍纖維具有特殊的結構，讓水氣容易穿過，所以您會感到清涼舒適。

#### 超強的負靜電·負離子

妮美龍透過其纖維結構產生負靜電·負離子，能驅逐塵埃、毛絮、花粉、煙霧、細菌等，有效預防過敏反應，保護您的呼吸系統。

#### 極佳的阻燃性

妮美龍是一種阻燒材料，能有效阻燒火的蔓延。妮美龍床單和毛毯得到日本防火協會指定為防火產品。

#### Outstanding Flame Retardancy

NEORON® is resistant against heat liable to minimize the spread of flames. The NEORON® bedsheet and blankets are recognized as a fire-prevention product by Japan Fire Retardant Association.

#### Ultra Strong Negative Static Electricity · Negative Ions

NEORON® fiber will generate negative static electricity, repulsive dust through friction, by rubbing against the skin or other fibers.

Nefful's unique Neoron negative ions clothing is the only product in the market that is multi-functional, high -tech ahead of industry trends. Excellent Heat insulation, Superior Moisture Permeability. Medical research shows that constant body temperature is needed to improve blood circulation, promote cell metabolism and enhance our immune system. So choosing to wearing insulating clothing is critical for our health.

In an experiment on insulation capability, thermal detectors are attached to test subjects arms. Supporters made of different fibers are tested on one side; the fibres include Neoron, Acrylic, Wool, Nylon, Cotton.

On the graph, the horizontal axis Shows the room temperature, while the vertical axis. We can see that in a cold environment, whether at 5 degree Celsius, Neoron is the best at preventing heat loss amongst the tested fibres. Some of may wonder, if Neoron is a good at retaining body heat, how can we wear them in hot weather?. The experiment also show that at 25 degrees Celsius, the temperature difference between these 5 fibres is merely 0.2 to 0.5 degrees Celsius. Hence, Neoron effectively maintains a constant body temperature , enabling us to feel warm in cold winter and cool in hot summer. **See less**

The second features is Superior Moisture Permeability : Two special materials have been prepared for an experiment : One made of cotton fibre and the other made of Neoron fibre, and the experiment begins when they are both placed into jars of the liquid.

After just 10mins, the cotton fibre abosorded a lot of moisture, whereas the Neoron fibre remain completely dry.

Cotton clothing makes our body clammy and uncomfortable because it absorbs our sweat when we perspire. This will lower our body temperature and increase the likelihood of falling I'll or catching cold.

Wearing clothing made of Neoron fibre is a wise choice, because Neoron quickly returns to its dry state even when we maybe perspiring a lot.

The third feature6 is Outstanding Flame Retardancy :Fibres are considered fire retardant if their LOI - Limiting Oxygen Index - is higher than 25.

Neoron has a high LOI of 30.5, which is why Neoron fibre is recognized as a reliable and effective fire retardant materials by the Japan Fire Retardant Association.

We can't predict when fire disaster might happen but none of us can bear the consequences of such disasters. It is of utmost importance that every household is equipped with Nefful's Neoron bedding for protection

Bedding Collection : Why is it so great?.  
Because Neoron blanket and bed sheets offer the highest density of negative ions among Nefful's products.

-And let's consider :Does cellular repair and detox happen mostly during the day or night?.  
Yes! It's easy to know this by seeing how beauty experts emphasise the importance of quality sleep for youthful skin.

Many of our partners experience wonderful results from using the Neoron blankets and bed sheets. The powerful negative ions from the Bedding Collection create a recharges our bodies! **See less**

"UNDERGARMENT":  
Many newcomers are curious : how come negative ions from Neoron fibre don't get washed away?  
It's because Neoron 's negative ions are neither dyed on nor painted on, instead, the negative ions are generated when the clothing comes in continuous negative static charge and negative ions.

Nefful's undergarments is designed to act as a protective second layer of skin reducing the harmful effects of electromagnetic field on our body. So be sure to wear them day and night!.

# 高科技負離子纖維

## High Technology Negative Ion Fibers

日本高科技纖維製造商於1938年起著手研發對人體有益的健康纖維，由多位專家聯手研發歷時逾二十年，於1955年成功以獨家技術，製成以摩擦原理釋放高濃度負離子的負離子纖維。當中運用的獨家技術，至今未被破解複製，六十多年來仍是全球唯一「永久有效」的負離子纖維。

In 1938, a Japanese high technology fiber manufacturing company started to research on fibers that are beneficial for health. In 1955, after more than 20 years of research by numerous experts, the company successfully and exclusively manufactured negative ion fibers, which are capable of releasing a high concentration of negative ions through friction. For over 80 years, with the use of proprietary technology that others have never been able to duplicate, this is the only negative ion fiber that can continuously release negative ions.
