Although working from home means you don't have to get up early, still getting up early and starting work then has really helped me

TIP 01.

Don't work from bed!

Use some sort of table/chair combination. Having separate work and play areas is a huge key to combating cabin fever!

Getting yourself on a consistent schedule with time batching will make your work flow easier. Combine tasks of similarity that you can accomplish quickly. Note: Make sure you also add in breaks for lunch & to stand up!!

Time Batching!!

TIP 02.

TIP 03.

Continue your routine!

Yup, get dressed, wash your face, write your daily tasks out. Feeling normal starts with a normal routine in and out of “the office” – Don’t try to add a bunch of new things to your plate. Take it one day at a time and find what works best for you!
