vectormarketing  "When I first started working in sales, I definitely didn't see it as a long-term thing for myself.

I thought it was just a **simple summer job**, and I only started because my mom sold Cutco after she graduated high school and said I'd be amazing at it.

I didn't fully understand the opportunities available, but I figured I'd give it a shot and see where it went. I quickly realized there were so **many growth opportunities to sell professionally, become a manager, and ways to impact so many people.**

My future career goal is to own my

My future career goal is to own my own business. Vector is giving me a low-risk practice run almost. At the central region year end banquet, I won the silver cup for top branch manager. It was an awesome experience and things went really well.

I know that **success in any business is all about your work ethic and what you put into it is what you'll get out of it!** With how many hours I worked last summer, it rewarded me with so much experience and that's what ultimately allowed me to win the Silver Cup.

How hard you work at the job will **reward you with so much growth**

How hard you work at the job will **reward you with so much growth personally and financially**. The way I grow most is by getting to work with people from all different backgrounds, it’s changed my perspective and outlook on things. **The overall culture here is so focused on personal growth and we all want to see each other win!** - Tyler Strauss, District Manager | \$35K in Cutco sales (Omaha, NE)
