Age has never bothered me but I can feel my body changing in more ways than one!

I am a woman that is ready to age with grace and comfort which means I need something to help me combat those menopause symptoms that can interrupt life's favorite moments!

Meet @EQUELLEofficial...my newest addition to my daily routine. EQUELLE® is a hormone- free[‡], non-prescription supplement that has been clinically proven shown to provide relief for menopause symptoms[†]. Ready to learn about it's active ingredient S-equol?, the menopause symptom crusher? S-equol is a plant-based compound that mimics estrogen to reduce symptoms[†].

I cannot wait to see how EQUELLE® can help me regulate alleviate these symptoms that have decided to show up in the last few months. Being that I am in the early stages means I am just getting acquainted with the sleepless nights and hot flashes. Ugh! Hot flashes while I am trying to sleep are THE WORST!

Imagine what I could do with less fever
