Tired of the symptoms from estrogen decline? We get it.

That's why we've created Equelle with S-equol, which shares a similar molecular structure to estrogen.

This allows it to bind to some estrogen receptors and mimic the effects and actions of estrogen.

The results? Having the most bothersome symptoms associated with estrogen decline being alleviated.

Ready for relief? Link in bio for more.

BACKGROUND

Estrogen levels decline as we age. Our bodies gradually produce less of the hormone estrogen, usually starting in our 40s, which leads to the different stages of menopause.

HOW EQUELLE WORKS

S-equol acts like estrogen, safely and naturally. S-equol shares a similar molecular structure to estrogen, allowing it to bind to some estrogen receptors and mimic the effects and actions of estrogen.

This helps to alleviate some of the most bothersome symptoms associated with estrogen decline.
