Definitely not impressed

Definitely not impressed. For what I spent, I expected better. First, come to find out that you have to buy your own battery charger in addition to the hefty base price. It also has 3 different locks...one is relatively easy to set with a personal code...the other two come with instructions that make no sense. Customer service has been less than helpful. This is definitely a one and done situation.

Just received my D6B-Bright white 20'.

Just received my D6B-Bright white 20'.

How do I use the travel port? Do I need to purchase a charger? Why don't you include any information about the usefulness of the luggage?
