**CLASS ACTION COMPLAINT FOR
VIOLATION OF THE CALIFORNIA
CONSUMERS LEGAL REMEDIES ACT;
FALSE ADVERTISING; FRAUD, DECEIT,
AND/OR MISREPRESENTATION;
UNFAIR BUSINESS PRACTICES; AND
UNJUST ENRICHMENT**

JURY TRIAL DEMANDED

INTRODUCTION

1. Plaintiff Molly Brown, by and through her counsel, brings this class action against Defendant Baker's Breakfast Cookies, Inc. d/b/a Erin Baker's Wholesale Baked Goods ("Defendant" or "Erin Baker's") to seek redress for its unlawful and deceptive practices in labeling and marketing of consumer food products, including granola, granola clusters, and breakfast cookies, under the brand names Erin Baker's and Blue Bike, which make protein claims on the front of the product packages but fail to include the percent of daily value for protein in the Nutrition Facts Panel ("NFP").

2. Consumers are increasingly health conscious and, as a result, many consumers seek foods high in protein. To capitalize on this trend, Defendant prominently claims on the front of its food product packages that the product provides a specified amount of protein, such as "7g PROTEIN" on the Blue Bike Peanut Butter Granola Clusters. Consumers, in turn, reasonably

1 expect that each product will actually provide the amount of protein claimed on the front of the
2 product package in a form the body can use.

3 3. The Food and Drug Administration (“FDA”) prohibits such front label claims
4 about the amount of protein unless manufacturers also provide additional information in the
5 nutrition fact panel about how much of the recommended daily value for protein that the product
6 will actually provide. 21 C.F.R. §§ 101.9(c)(7)(i), 101.13(b), (n). That is because the FDA
7 recognizes that (1) when manufacturers tout an amount of protein on the front label, that amount
8 is likely to be material to purchasing decisions, even though reasonable consumers may not know
9 the total amount of protein they need to ingest on a daily basis, and (2) not all proteins are the
10 same in their ability to meet human nutritional requirements, so a simple statement about the
11 number of grams does not actually inform consumers about how much usable protein they are
12 receiving. Some proteins are deficient in one or more of the nine amino acids essential to human
13 protein synthesis and/or are not fully digestible within the human gut. When a human body uses
14 up the least prevalent essential amino acid from a food product, protein synthesis shuts down
15 and all of the remaining amino acids from that protein source degrade mostly into waste.
16 Likewise, whatever portion of a protein source is not digestible is similarly unavailable for
17 protein synthesis. A protein’s ability to support human nutritional requirements is known as its
18 “quality.”

19 4. The FDA required method for measuring protein quality is called the “Protein
20 Digestibility Corrected Amino Acid Score”—known by its acronym PDCAAS (pronounced Pee-
21 Dee-Kass). It combines a protein source’s amino acid profile and its percent digestibility into a
22 discount factor ranging from 0.0 to 1.0 that, when multiplied by the total protein quantity, shows
23 how much protein in a product is actually available to support human nutritional requirements.
24 The regulations term this the “corrected amount of protein per serving.” 21 C.F.R.
25 § 101.9(c)(7)(ii). For example, a PDCAAS of .5 means that only half of the protein in that
26 product is actually available to support human protein needs. If the product contained 10 grams
27 total protein per serving, the corrected amount of protein would be only 5 grams per serving. As
28

1 a result, protein products can vary widely in their ability to support human protein needs—even
2 between two comparator products with the same total protein quantity.

3 5. Because consumers are generally unaware about the usability of various proteins,
4 and may even be unaware of the total amount of usable protein they should ingest each day, the
5 FDA prohibits manufacturers from advertising or promoting their products with a protein claim
6 unless they have satisfied two requirements. First, the manufacturer must calculate the “corrected
7 amount of protein per serving” based on the quality of the product’s protein using the PDCAAS
8 method. Second, the manufacturer must use the PDCAAS computation to provide “a statement
9 of the corrected amount of protein per serving” in the NFP “expressed as” a percent daily value
10 (“%DV”) and placed immediately adjacent to the statement of protein quantity. 21 C.F.R. §
11 101.9(c)(7)(i)-(iii). The %DV is the corrected amount of protein per serving divided by the daily
12 reference value for protein of 50 grams. *Id.* Using the same example of a product containing 10
13 grams total protein per serving with a PDCAAS of .5, the %DV is 10% (5g/50g). Had all of the
14 protein in the product been useful in human nutrition, the %DV would be 50% (25g/50g). The
15 FDA regulations that govern nutrient content claims are also clear that the manufacturer may not
16 make any front label claims about the amount of protein in the product unless it complies with
17 these two requirements. *See* 21 C.F.R. § 101.13(b) (“A nutrient content claim[] may not be made
18 on the label...unless the claim is made in accordance with this regulation [i.e., § 101.13]...” and
19 (n) (“[n]utrition labeling in accordance with § 101.8...shall be provided for any food for which
20 a nutrient content claim is made”); *accord* 58 Fed. Reg. 2302, 23310 (manufacturer can only
21 make a “nutrient content claim...on the label or in labeling of a food, provided that the food
22 bears nutrition labeling that complies with the requirements in proposed § 101.9.”).

23 6. The primary protein source in Defendant’s products is oats. Oat are a low quality
24 protein and the PDCAAS score for oats is between .45 and 0.5, which means Defendant’s
25 products will provide nutritionally as little as approximately 45% of the protein quantity claimed.
26 Nevertheless, Defendant failed to provide in the NFP a statement of the corrected amount of
27 protein per serving calculated according to the PDCAAS methodology and expressed as a %DV.
28 Accordingly, the protein claims on the front of the Product packages, such as “7g PROTEIN,”

are unlawful in violation of parallel state and federal laws because Defendant did not comply with the regulatory requirements for making a protein claim. 21 C.F.R. § 101.9(c)(7)(i), 101.13(b), (n). The failure to include a statement of the corrected amount of protein inside the NFP also rendered the NFP itself unlawful. *Id.* § 101.9(c)(7)(i).

7. Where a product makes a protein claim, the NFP is required to contain a statement of the corrected amount of protein per serving calculated according to the PDCAAS methodology and expressed as a %DV. Accordingly, the protein claims on the front of the product packages, such as “7g PROTEIN,” are unlawful in violation of parallel state and federal laws because Defendant did not comply with the regulatory requirements for making a protein claim.

8. In addition to being unlawful under 21 CFR §§ 101.9 and 101.13, Defendant’s prominent protein claims on the front of the package while omitting the statement of the corrected amount of protein per serving expressed as a %DV in the NFP, also is likely to mislead reasonable consumers. Consumers reasonably expect that Defendant’s products will actually provide nutritionally the full amount of protein per serving claimed on the front of the package. But Defendant’s products do not do so and instead contain low protein quality proteins. Had Defendant included a statement of the corrected amount of protein per serving in the NFP, as they were required to do under the law, it would have revealed that the product contains low quality proteins and provides nutritionally as little as 50% of their total protein quantity. That information was material to reasonable consumers.

9. Defendant’s unlawful and misleading protein claims caused Plaintiff and members of the class to pay a price premium for Defendant’s products.

PARTIES

10. Plaintiff Molly Brown is, and at all times alleged in this Class Action Complaint was, an individual and a resident of Novato, California. Plaintiff makes her permanent home in California and intends to remain in California.

11. Defendant Baker's Breakfast Cookies, Inc. d/b/a Erin Baker's Wholesale Baked Goods is incorporated in Washington with its principal place of business in Bellingham, Washington.

JURISDICTION AND VENUE

12. This Court has subject matter jurisdiction over this action pursuant to the Class Action Fairness Act, 28 U.S.C. § 1332(d)(2)(A) because: (i) there are 100 or more class members; (ii) there is an aggregate amount in controversy exceeding \$5,000,000, exclusive of interest and costs; and (iii) at least one Class member and Defendant are citizens of different states.

13. The injuries, damages and/or harm upon which this action is based, occurred or arose out of activities engaged in by Defendant within, affecting, and emanating from, the State of California. Defendant regularly conducts and/or solicits business in, engages in other persistent courses of conduct in, and/or derives substantial revenue from products provided to persons in the State of California. Defendant has engaged, and continues to engage, in substantial and continuous business practices in the State of California.

14. Venue is proper in this District pursuant to 28 U.S.C. § 1391(b)(2) because a substantial part of the events or omissions giving rise to the claims occurred in the State of California, including within this District.

15. In accordance with California Civil Code Section 1780(d), Plaintiff Myles concurrently files herewith a declaration establishing that she purchased Blue Bike Peanut Butter Granola Clusters on one or more occasions during the last four years in grocery stores in or around Novato, California. (Plaintiff Brown's declaration is attached hereto as Exhibit A.)

16. Plaintiff accordingly alleges that jurisdiction and venue are proper in this Court.

SUBSTANTIVE ALLEGATIONS

17. Defendant manufactures, distributes, markets, advertises, and sells food products, including granola, granola clusters, and breakfast cookies under the brand names "Erin Baker's" and "Blue Bike." Defendant's products have packaging that predominately, uniformly, and consistently states on the principal display panel of the product labels that they contain and

provide a specified number of grams of protein. Plaintiff has attached, as Exhibit B, a non-exhaustive list of Defendant's products that currently or during the Class Period have made protein claims on the front of the product packages but failed to include a statement of the corrected amount of protein inside the NFP. The products listed in Exhibit B, and any other Erin Baker's or Blue Bike product that claims (or claimed during the Class Period) a specific amount of protein on the front of its label but failed to include a statement of the corrected amount of protein inside the NFP, will hereinafter be referred to as the "Products."

18. The representations that the Products contain and provide a specific amount of protein were uniformly communicated to Plaintiff and every other person who purchased any of the Products in California. The same or substantially similar product label has appeared on each Product during the entirety of the Class Period in the general form of the following example (from the Homestyle Granola Fruit & Nut flavor):

19. The nutrition facts panel on the back of the Products uniformly and consistently failed to provide any statement of the corrected amount of protein per serving, expressed as a %DV, throughout the Class Period. The nutrition facts panels of the Products have appeared

consistently throughout the Class Period in the general form of the following example (from the Homestyle Granola Fruit & Nut flavor):

<

INGREDIENTS: Whole grain oats, brown rice syrup, expeller pressed canola oil, raisins (raisins, canola oil), dried cranberries (cranberries, sugar, sunflower oil), oat bran, molasses (sugar, sugarcane molasses), unsweetened coconut, flax seed, walnuts, almonds.

Contains: Almonds, coconut, walnuts.

PRODUCED IN A FACILITY THAT PROCESSES WHEAT, PEANUTS, TREE NUTS, EGGS, SOY, AND DAIRY.

NOTHING
ARTIFICIAL

20. As described in detail below, Defendant's advertising and labeling of the Products as containing and providing specific amounts of protein per serving is unlawful, misleading, and intended to induce consumers to purchase the Products at a premium price, while ultimately failing to meet consumer expectations. The Products' front label protein claims are unlawful because Defendant did not: (1) calculate the "corrected amount of protein per serving" based on the quality of the product's protein using the PDCAAS method; and (2) provide a statement of that corrected amount of protein per serving in the NFP, expressed as %DV. 21 C.F.R. § 101.9(c)(7)(i) & (iii). The unlawful front label protein claims induced consumers to purchase the Products at a premium price. Had Defendant complied with FDA regulations and not included a protein claim on the front label of its Products, reasonable consumers would not have purchased them or would have paid less for the Products.

21. Defendant's failure to provide the required statement of the corrected amount of protein per serving, as well as Defendant's prominent front label protein claims made in the absence of any statement of the corrected amount of protein in the NFP, also deceived and misled

reasonable consumers into believing that a serving of the Products will provide the grams of protein represented on the label, when that is not true. Had Defendant complied with the law, the statement of the corrected amount of protein in the Nutrition Facts Panel would have revealed that the Products provide significantly less protein than claimed because Defendant uses low quality proteins in the Products such as oats. The absence of this information also allowed Defendant to charge a price premium. Had reasonable consumers been informed of the true amount of protein that the products provided through a statement of the corrected amount of protein per serving, as required by FDA regulations, they would not have purchased or would have paid less for the Products.

Consumer Demand for Protein

22. Many American consumers are health conscious and seek wholesome, natural foods to keep a healthy diet, so they routinely rely upon nutrition information when selecting and purchasing food items. As noted by FDA Commissioner Margaret Hamburg during an October 2009 media briefing, “[s]tudies show that consumers trust and believe the nutrition facts information and that many consumers use it to help them build a healthy diet.” Indeed, the FDA recommends relying on Nutrition Facts Labels as the primary tool to monitor the consumption of protein.¹

23. Protein is found throughout the body—in muscle, bone, skin, hair, and virtually every other body part or tissue. The health benefits of protein are well studied and wide ranging. Scientific studies have confirmed that protein can assist in weight loss, reduce blood pressure, reduce cholesterol, and control risk factors for cardiovascular diseases. The National Academy of Medicine recommends that adults get a minimum of .8 grams of protein for every kilogram of body weight per day, or just over 7 grams for every 20 pounds of body weight.² For a 140-pound person, that means about 50 grams of protein each day. For a 200-pound person, that means about 70 grams of protein each day.

¹ FDA Protein Fact Sheet, <https://www.accessdata.fda.gov/scripts/InteractiveNutritionFactsLabel/factsheets/Protein.pdf>

² National Academies of Medicine. *Dietary Reference Intakes for Energy, Carbohydrate, Fiber, Fat, Fatty Acids, Cholesterol, Protein, and Amino Acids (Macronutrients)*.

24. The health benefits of protein are just as important, if not more important, for children. Children are in a relative state of constant growth and rely on protein as the building block of muscle, bone, skin, hair, and virtually every other body part or tissue. The National Academies of Science recommends the following amounts of daily intake of protein based on age group: 1-3 years old: 13 g of protein per day; 4-8 years old: 19 g of protein per day; 9-13 years old: 34 g of protein per day.³

25. Protein *quantity* by itself does not tell the full story of protein from a human nutritional standpoint. A protein's *quality* is also critical because humans cannot fully digest or utilize some proteins. Proteins are not monolithic. They are simply chains of amino acids, and different types of amino acids chained together in different ways will make different types of proteins. Further, the makeup of the protein changes the function of that protein in the body, and certain types of proteins are more easily digested and used by humans than others.

26. All of a human's proteins are formed through the process of protein synthesis within their own bodies. That is, although humans consume dietary proteins, they digest those proteins, break them down into their constituent amino acids, and then use those amino acids as building blocks to synthesize the human proteins necessary for life, tissue repair, and other functions. Of the twenty total amino acids, humans can produce only eleven of them on their own. Humans cannot produce, under any circumstances, nine of the amino acids required for protein synthesis. These nine amino acids are called the "essential amino acids" and they must be supplied through the diet.

27. All nine essential amino acids are necessary for protein synthesis to take place. Lacking even one essential amino acid will prevent protein synthesis from occurring, and the rest of the proteins will degrade into waste. Accordingly, once the body uses up the limiting essential amino acid from a protein source, the remainder of that protein becomes useless to human protein synthesis and has little nutritional value. As the FDA has explicitly recognized, "[b]ecause excess amino acids are not stored in the body, humans need a constant supply of good

³ *Id.*

quality dietary proteins to support growth and development.” 58 Fed. Reg. 2079 at 2101. High-quality proteins, therefore, are those that contain all nine essential amino acids because they have a greater effect on protein synthesis and are fully digestible.

28. A protein source’s digestibility also affects the amount of usable protein a person receives from consuming it. Plant-based proteins like oats are not 100% digestible, meaning a portion of the protein from those sources will simply pass through the body without ever being absorbed at all. PDCAAS is a combination of digestibility and the least prevalent amino acid, and when those factors combine, it means only about 45% of the oat protein is absorbed by the human body, i.e., the PDCAAS for oats is between 0.45 and 0.5.

29. As the FDA has stated in official guidance, “Accurate methods for determining protein quality are necessary because different food protein sources are not equivalent in their ability to support growth and body protein maintenance.” 56 Fed. Reg. 60366, § B. The Protein Digestibility Corrected Amino Acid Score (“PDCAAS”), is the FDA mandated measure of protein quality, and it accounts for both the amino acid profile and the digestibility of the protein. 21 C.F.R. § 101.9(c)(7)(ii).

30. The PDCAAS method requires the manufacturer to determine the amount of essential amino acids that the food contains and then combine that with the proteins’ digestibility into an overall discount factor (i.e., a “score” from 0.0-1.0) that represents the actual amount of protein the food provides nutritionally when multiplied by raw protein quantity. The regulations term this the “corrected amount of protein per serving.” 21 C.F.R. § 101.9(c)(7)(i).

31. Defendant uses low-quality protein in their products such as oats. Because of the differences in benefits depending on the amino acid composition of a protein, the source of protein is important. Although some plants can be high quality protein sources, most plant-based proteins typically do not contain the same amount of all nine essential amino acids and are low quality to humans. Oats specifically have a PDCAAS score between .45 and .5, meaning only approximately 45-50% of the protein from those sources will be useable by humans as protein.

32. Accordingly, Defendant’s use of lower-quality proteins in the Products means that they actually provide far less protein to humans than the Product labels claim.

Federal and State Regulations Governing Food Labeling

33. Identical federal and California laws regulate the content of labels on packaged food. The requirements of the Act, and its labeling regulations, including those set forth in 21 C.F.R. §§ 101, 102, were adopted by the California legislature in the Sherman Food Drug & Cosmetic Law (the “Sherman Law”). California Health & Safety Code § 110100 (“All food labeling regulations and any amendments to those regulations adopted pursuant to the federal act, in effect on January 1, 1993, or adopted on or after that date shall be the food labeling regulations of this state.”) The federal laws and regulations discussed below are applicable nationwide to all sales of packaged food products. Additionally, none of the California laws sought to be enforced here imposes different requirements on the labeling of packaged food for sale in the United States.

34. The Act, 21 U.S.C. § 343(a), and the Sherman Law, provides that a food is misbranded if “its labeling is false or misleading in any particular.”

The Products’ Labeling Violates Federal and State Regulations

35. According to FDA regulations, “[a] statement of the corrected amount of protein per serving, as determined in paragraph (c)(7)(ii) of this section, calculated as a percentage of the RDI or DRV for protein, as appropriate, and expressed as a Percent of Daily Value . . . *shall* be given if a protein claim is made for the product . . .” 21 C.F.R. 101.9(c)(7)(i) (emphasis added). If a manufacturer does not want to perform PDCAAS and provide a statement of the corrected amount of protein per serving in the NFP, then it shall not make any protein claims.

36. The regulation governing nutrient content claims, section 101.13, also makes this plain. Section 101.13(n) provides that “[n]utrition labeling in accordance with § 101.9 . . . shall be provided for any food for which a nutrient content claim is made” and § 101.13(b) states “a nutrient content claim[] may not be made on the label . . . unless the claim is made in accordance with this regulation [i.e., § 101.13]” In other words, a manufacturer may not make any protein nutrient content claims on the front labels of their products unless they have complied with the requirements for protein labeling in the nutrition facts panel pursuant to section 101.9(c)(7). Indeed, the FDA made clear when promulgating § 101.13(n) that it means that a

1 manufacturer can only make “a nutrient content claim . . . on the label or in labeling of a food,
 2 provided that the food bears nutrition labeling that complies with the requirements in proposed
 3 § 01.9.” 58 Fed. Reg. 2302, 23310.

4 37. Further, FDA regulations require the %DV for protein to be calculated using
 5 PDCAAS, a method that accounts for both protein quantity and protein quality. 21 C.F.R. §
 6 101.9(c)(7)(i)-(iii); FDA Food Labeling Guide, p. 29, Question N.22.⁴ The first step is to
 7 calculate the “corrected amount of protein per serving” by multiplying protein quantity by the
 8 PDCAAS quality value, and then dividing that “corrected amount” by 50 grams (the
 9 “recommended daily value” for protein) to come up with the %DV. *Id.*

10 38. The Products all make protein claims on the front label, but fail, uniformly to
 11 provide a statement of the corrected amount of protein per serving in the NFP calculated
 12 according to the PDCAAS method. The protein claims on the front are, therefore, unlawful, and
 13 were never permitted to be on the labels in the first instance under §§ 101.9(c)(7)(i), 101.13(n),
 14 and 101.13(b).

15 39. Defendant’s failure to include a statement of the corrected amount of protein per
 16 serving expressed as a %DV in the NFP also renders the NFP itself unlawful under §§
 17 101.9(c)(7)(i)-(iii).

18 40. Defendant’s use of a front-label protein claim, while failing to include the
 19 required statement of the corrected amount of protein per serving in the NFP calculated using
 20 the PDCAAS method and expressed as a %DV, is also misleading. Reasonable consumers are
 21 unaware of the nutritional value of various protein sources and upon seeing a front-label
 22 quantitative protein claim reasonably believe that all of the advertised protein will be
 23 nutritionally available—i.e., that the product contains high quality proteins. Had Defendant
 24 complied with the law, the statement of the corrected amount of protein expressed as a %DV
 25 would have revealed that the Products provide significantly less of the daily value of protein than
 26

27 ⁴ Guidance for Industry: A Food Labeling Guide (“FDA Food Labeling Guide”) p. 29,
 28 Question N22, U.S. Food & Drug Administration, <https://www.fda.gov/media/81606/download>
 (last accessed February 18, 2020).

high quality protein products with comparable protein quantities. Defendant's use of a front-label protein claim, while failing to include the required statement of the corrected amount of protein per serving in the NFP calculated using the PDCAAS method and expressed as a %DV, also enabled Defendant to conceal the fact that the Products consist of low quality proteins, that simply do not provide all of the protein that quantity alone represents. Indeed, when promulgating 21 C.F.R. § 101.9(c)(7), the FDA explained in published guidance that "Information on protein quantity alone can be misleading on foods that are of low protein quality." It also explained that it was prohibiting manufacturers from making any protein claims at all *unless* the manufacturer provides a statement of the corrected amount of protein per serving in the NFP based on PDCAAS because "nutrition labeling must allow consumers to readily identify foods with particularly low quality protein to prevent them from being misled by information on only the amount of protein present." 58 Fed. Reg. 2079 at 2101-2.

41. Similarly, 21 C.F.R. § 101.13(i)(3) prohibits manufacturers from making a claim on the front of a product's package about the "amount or percentage of a nutrient," such as protein, if the statement is "false or misleading in any respect." If it is, then "it may not be made on the label." 21 C.F.R. § 101.13(b). This is true even if the same amount appears in the nutrition facts panel. 21 C.F.R. § 101.13(c). Since the omission of the %DV from the nutrition facts panel rendered the front label protein claim misleading, the protein claim was not permitted to be on the front label.

42. Under the Act, the term false has its usual meaning of "untruthful," while the term misleading is a term of art that covers labels that are technically true, but are likely to deceive consumers.

43. The FDA explained in promulgating section 101.13(i) that the regulation was necessary "since many consumers have a limited knowledge and understanding of the amounts of nutrients that are recommended for daily consumption," which means that "a statement declaring that the product contained a specified amount of a nutrient could be misleading. By its very presence, such a statement could give consumers who were unfamiliar with the dietary recommendations the false impression that the product would assist them in maintaining healthy

1 dietary practices relative to the amount of the nutrient consumed when it, in fact, would not.” 56
2 Fed. Reg. 60421. The rules are different for amounts in the NFP and nutrient content claims
3 because a voluntary nutrient declaration on the front panel “is viewed by the agency as an effort
4 to market the food as a significant source of nutrients.” 56 Fed. Reg. 60366.

5 44. In addition to regulating the NFP, the FDA has promulgated a separate set of
6 regulations that govern nutrient content claims on the front of a package. 21 C.F.R. § 101.13. A
7 nutrient content claim is a claim that “expressly or implicitly characterizes the level of a nutrient.”
8 21 C.F.R. § 101.13(b). “Express” nutrient content claims include any statement outside the
9 Nutrition Facts Panel, about the level of a nutrient. 21 C.F.R. 101.13(b)(1); 21 C.F.R. § 101.13(c).
10 Stating information from the nutrition facts panel (such as grams protein per serving) elsewhere
11 on the package necessarily constitutes a nutrient content claim. 21 C.F.R. § 101.13(c). A
12 manufacturer cannot make a nutrient content claim in the form of a “statement about the amount
13 or percentage of a nutrient” if the statement is “false or misleading in any respect.” 21 C.F.R.
14 101.13(i)(3).

15 45. While a required statement *inside* of the NFP escapes regulations reserved for
16 nutrient content claims (21 C.F.R. § 101.13(c)), the identical statement *outside* of the NFP is still
17 considered a nutrient content claim and is therefore subject to 21 C.F.R. § 101.13(i)(3). 21 C.F.R.
18 § 101.13(c). Indeed, the Ninth Circuit has specifically held that “a requirement to state certain
19 facts in the nutrition label is not a license to make that statement elsewhere on the
20 product.” *Reid v. Johnson & Johnson*, 780 F.3d 952, 960 (9th Cir. 2015). Thus, Defendant’s
21 quantitative protein claims on the front label are subject to analysis as a nutrient content claim
22 and cannot be false or misleading in any manner.

23 46. Defendant’s Products are unlawful, misbranded, and violate the Sherman Law,
24 California Health & Safety Code § 110660, *et seq.* Defendant makes protein content claims on
25 the front of the Product packages even though they uniformly fail to provide a statement of the
26 corrected amount of protein per serving in the NFP calculated according to the PDCAAS method
27 and expressed as a %DV as required by 21 C.F.R. § 101.9(c)(7)(i). Defendant’s failure to comply
28 with this requirement renders its front label protein claim unlawful per se and the product

misbranded pursuant to § 101.13(n) and (b), as well as under § 101.9(c)(7)(i) itself. Defendant's omission of the %DV from the NFP despite the fact that it makes front label protein claims is also unlawful and in violation of § 101.9(c)(7)(i)-(iii).

47. Defendant's standalone, front label protein quantity claim is also misleading, and therefore prohibited by sections 101.13(i)(3), (b), and (n) due to Defendant's failure to include a statement of the corrected amount of protein per serving in the NFP calculated using the PDCAAS method and expressed as a %DV. Consumers have a "limited knowledge and understanding of the amount of [protein] that [is] recommended for daily consumption," let alone an understanding of the science behind protein quality and how different types of proteins are used and absorbed in the body. 56 Fed. Reg. 60421. The FDA requires a statement of the corrected amount of protein per serving in the NFP precisely to ensure that "consumers are not misled by information on only the amount of protein present" in a product with low quality protein. 58 Fed. Reg. 2079 at 2101-2. Defendant's failure to provide it rendered the label misleading.

48. Defendant's marketing, advertising, and sale of the Products violates the misbranding provisions of the Sherman Law (California Health & Safety Code § 110660, *et. Seq.*), including but not limited to:

a. Section 110665 (a food is misbranded if its labeling does not conform with the requirements for nutrition labeling as set forth in 21 U.S.C. Sec. 343(q));

b. Section 110705 (a food is misbranded if words, statements and other information required by the Sherman Law to appear food labeling is either missing or not sufficiently conspicuous);

c. Section 110760, which makes it unlawful for any person to manufacture, sell, deliver, hold, or offer for sale any food that is misbranded;

d. Section 110765, which makes it unlawful for any person to misbrand any food; and

e. Section 110770, which makes it unlawful for any person to receive in commerce any food that is misbranded or to deliver or proffer for delivery any such food.

49. Defendant's marketing, advertising, and sale of the Products also violates the false advertising provisions of the Sherman Law (California Health & Safety Code § 110390, *et. Seq.*), including, but not limited to:

a. Section 110390, which makes it unlawful to disseminate false or misleading food advertisements that include statements on products and product packaging or labeling or any other medium used to directly or indirectly induce the purchase of a food product;

b. Section 110395, which makes it unlawful to manufacture, sell, deliver, hold or offer to sell any falsely or misleadingly advertised food; and

c. Sections 110398 and 110400, which make it unlawful to advertise misbranded food or to deliver or proffer for delivery any food that has been falsely or misleadingly advertised.

50. Defendant has violated the Act, and the standards set by FDA regulations, including but not limited to 21 C.F.R. § 101.9 (c)(7), 21 C.F.R. § 101.13(i)(3), (b), (n), 21 C.F.R. § 101.9(h)(d), and 21 C.F.R. 101.9(e)(3) which have been incorporated by reference in the Sherman Law, by failing to include on the Product labels the nutritional information required by law.

51. A reasonable consumer would expect that the Products provide what Defendant identifies them to provide on the product labels and that the labels would not be contrary to the policies or regulations of the State of California and/or the FDA. For example, a reasonable consumer would expect that when Defendant labels the Products as containing, for example, "7g PROTEIN," as Defendant claims on the Blue Bike Peanut Butter Granola Clusters, it would provide 7 grams of protein per serving in a form their bodies could use. Because Defendant did not conduct PDCAAS and provide a statement of the corrected amount of protein per serving, expressed as a %DV, consumers have no idea that the Products provide significantly less protein.

52. Consumers lack the meaningful ability to test or independently ascertain the truthfulness of Defendant's food labeling claims, especially at the point of sale. Reasonable consumers, when they look at the front label of the Products, believe that the Products provide the amount of protein represented on the front label. Because Defendant do not include legally

1 required information as to the quality of the protein in the Nutrition Facts Panel via the statement
2 of corrected amount of protein expressed as a %DV, consumers do not have any reason to think
3 otherwise. Reasonable consumers do not walk around with the PDCAAS values for various
4 protein sources in their heads. They would not know the true amount of protein the Products
5 provide nutritionally merely by looking elsewhere on the product package. Its discovery requires
6 investigation well beyond the grocery store aisle and knowledge of food chemistry beyond that
7 of the average consumer. An average consumer does not have the specialized knowledge
8 necessary to ascertain that a serving of a Product does not provide the number of grams of protein
9 that is represented on the label. An average consumer also lacks the specialized knowledge
10 necessary to determine the PDCAAS for the Products. The average reasonable consumer had no
11 reason to suspect that Defendant's representations on the packages were misleading. Therefore,
12 consumers had no reason to investigate whether the Products actually do provide the amount of
13 protein per serving that the labels claim they do and reasonably relied on Defendant's
14 representations regarding the nature of the Products.

15 53. Defendant intends and knows that consumers will and do rely upon food labeling
16 statements in making their purchasing decisions. Label claims and other forms of advertising
17 and marketing drive product sales, particularly if placed prominently on the front of product
18 packaging, as Defendant has done with the claims on the Products that they contain and provide
19 specific amounts of protein per serving.

20 **Defendant Misleadingly Markets the Products to Increase Profits and Gain a Competitive**
21 **Edge**

22 54. In making unlawful, false, misleading, and deceptive representations, Defendant
23 distinguishes the Products from its competitors' products. Defendant knew and intended that
24 consumers would purchase, and pay a premium for, products labeled with protein claims. By
25 using this branding and marketing strategy, Defendant is stating that the Products are superior
26 to, better than, and more nutritious and healthful than other products that do not make protein
27 claims, or that properly provide the required statement of the corrected amount of protein in the
28

product as determined by the PDCAAS method and expressed as a %DV and otherwise do not mislead consumers about the amount of protein its products actually provide.

Defendant Intends to Continue to Market the Products as Containing More Protein than the Products Actually Contain

55. Because consumers pay a price premium for products that make protein claims, and also pay a premium for products that provide more protein, by labeling its Products with protein claims and omitting the required statement of the corrected amount of protein per serving, Defendant is able to both increase its sales and retain more profits.

56. Defendant engaged in the practices complained of herein to further their private interests of: (i) increasing sales of the Products while decreasing the sales of competitors that do not mislead consumers about the quality of the protein in its products, and/or (ii) commanding a higher price for its Products because consumers will pay more for the Products due to consumers' demand for products with protein claims.

57. The market for protein products is continuing to grow and expand, and because Defendant knew consumers rely on representations about the number of grams of protein in food products, Defendant has an incentive to continue to make such unlawful and misleading representations. In addition, other trends suggest that Defendant has no incentive to change their labeling practices.

58. For example, one market analysis revealed that between 2013-2017, product launches with a protein claim grew 31%.⁵

59. To capitalize on the growing market, Defendant continues to launch new product lines and flavors to diversify their portfolio to maintain their competitive edge. Moreover, Defendant has continued to replicate its misrepresentations on new products. It is therefore likely that Defendant will continue to unlawfully and/or misleadingly advertise the Products and perpetuate the misrepresentations regarding the protein in the Products.

PLAINTIFF'S EXPERIENCES

60. Plaintiff purchased Blue Bike Peanut Butter Granola Clusters on one or more occasions during the last four years in California.

61. Plaintiff made each of her purchases after reading and relying on the truthfulness of Defendant's front labels that promised the Products provided 7 grams of protein per serving for the Blue Bike Peanut Butter Granola Clusters. She believed the truth of each representation, i.e., that the Product would actually provide the specific amount of protein claimed on the front labels in a form human bodies could utilize. Plaintiff relied on the Products to meet her protein dietary needs. Had Defendant complied with the law and not made the protein claims on the front of their packages, she would not have been drawn to the Products and would not have purchased them. At a minimum, Plaintiff would have paid less for each Product.

62. Moreover, had Defendant adequately disclosed the corrected amount of protein per serving for each Product expressed as a %DV, as FDA regulations require, Plaintiff would not have purchased the Products or would have, at minimum, paid less for them. Plaintiff regularly checks the NFP before purchasing any product for the first time, including the %DV column for protein when manufacturers provide it, and he uses that information as a basis of comparison between similar products. She looked at and read the NFP on the Blue Bike Peanut Butter Granola Clusters before purchasing it for the first time. Manufacturers do not always disclose a %DV for protein, but when they do, he selects the product that provides more of the recommend daily amount of protein (i.e., the one with a higher %DV). When a manufacturer does not provide a %DV for protein, she can only go off of the stated grams of protein, and she assumes that all of those disclosed grams are in a form her body can use as protein.

63. For example, with the Blue Bike Peanut Butter Granola Clusters, Plaintiff was looking for a product that would provide 7 grams of useable protein per serving. Had she seen that the product provided only approximately 45-50% of the daily value for protein, i.e., only approximately 3.5 grams or less corrected amount of protein per serving, she would not have purchased the Products or, at a minimum, she would have paid less for them. Plaintiff would also have used the information as a basis to compare similar products and would have chosen

1 instead to purchase one with a higher %DV. Without the statement of the corrected amount of
2 protein per serving in the form of a %DV, the only information Plaintiff had about the Products
3 was the 7 gram protein quantity on the front label and 7 grams of protein per serving as stated in
4 the NFP, and Plaintiff believed she was receiving the full amount of that quantity in a form
5 human bodies could use. Because the Products did not provide any statement of the corrected
6 amount of protein per serving, Plaintiff did not have any reason to believe that the Products
7 provided less protein than represented on the front of the label. Plaintiff did in fact believe she
8 was receiving 7 grams of high-quality protein when she purchased the Products.

9 64. Plaintiff continues to desire to purchase protein products, including those
10 marketed and sold by Defendant, and would like to purchase granola snacks that provide 7 grams
11 of protein per serving. If the Products were reformulated to provide, in a usable form, the grams
12 of protein that are represented on the labels, or the labels were reformulated to provide non-
13 misleading information, Plaintiff would likely purchase them again in the future. Plaintiff
14 regularly visits stores where the Products and other protein products are sold. Because Plaintiff
15 does not know the formula for Defendant's products, which can change over time, and cannot
16 test whether the Products provide the amount of digestible protein that is represented on the label
17 without first purchasing the Product, Plaintiff will be unable to rely on Defendant's labels when
18 shopping for protein products in the future absent an injunction that prohibits Defendant from
19 mislabeling the Products. Plaintiff would also be forced to retest and/or reanalyze each Product
20 at each time of purchase because a Product's ingredient list and labeling would not reveal any
21 changes in the amount of digestible protein, even if such changes took place. In addition, at
22 present Plaintiff cannot rely on the accuracy of Defendant's labels for the entire line of Products,
23 which Plaintiff is also interested in purchasing with labeling that comports with regulations.
24 Should Defendant begin to market and sell a new line of products, Plaintiff could also be at risk
25 for buying another one of Defendant's products in reliance on the same or similar
26 misrepresentation and omissions. And because of Defendant's unlawful and misleading labels
27 on its Products, Plaintiff cannot make informed choices between protein products offered by
28

Defendant and protein products offered by other manufacturers, such as choices based on price and relative nutritional content.

65. Plaintiff and members of the Class have been economically damaged by their purchase of the Products because the advertising for the Products was and is untrue and/or misleading under state law and the products are misbranded; therefore, the Products are worth less than what Plaintiff and members of the Class paid for them and/or Plaintiff and members of the Class did not receive what they reasonably intended to receive.

CLASS ALLEGATIONS

66. Plaintiff brings this class action lawsuit on behalf of herself and a proposed class of similarly situated persons, pursuant to Rule 23(b)(2) and (b)(3) of the Federal Rules of Civil Procedure. Plaintiff seeks to represent the following group of similarly situated persons, defined as follows:

The Class: All persons in the United States who purchased the Products between August [], 2020 and the present.

The California Subclass: All Class members who purchased the Products in the State of California.

67. This action has been brought and may properly be maintained as a class action against Defendant because there is a well-defined community of interest in the litigation and the proposed classes are easily ascertainable.

68. Numerosity: Plaintiff does not know the exact size the Classes, but she estimates that they are composed of more than 100 persons. The persons in the Classes are so numerous that the joinder of all such persons is impracticable and the disposition of their claims in a class action rather than in individual actions will benefit the parties and the courts.

69. Common Questions Predominate: This action involves common questions of law and fact to the potential Classes because each class member's claim derives from the deceptive, unlawful and/or unfair statements and omissions that led consumers to believe that the Products contained the amount of protein as represented on the Product labels. The common questions of law and fact predominate over individual questions, as proof of a common or single set of facts

will establish the right of each member of the Classes to recover. The questions of law and fact common to the Classes are:

a. Whether the marketing, advertising, packaging, labeling, and other promotional materials for the Products are unlawful and/or misleading;

b. Whether Defendant's actions violate Federal and California laws invoked herein;

c. Whether labeling the Products with a protein claim causes the Products to command a price premium in the market;

d. Whether Defendant's failure to provide a statement of the corrected amount of protein per serving in the Products sold to the Class members was likely to deceive reasonable consumers;

e. Whether representations regarding the number of grams of protein in the Products are material to a reasonable consumer;

f. Whether Defendant's engaged in the behavior knowingly, recklessly, or negligently;

g. The amount of profits and revenues Defendant earned as a result of the conduct;

h. Whether Class members are entitled to restitution, injunctive and other equitable relief and, if so, what is the nature (and amount) of such relief; and

i. Whether Class members are entitled to payment of actual, incidental, consequential, exemplary and/or statutory damages plus interest thereon, and if so, what is the nature of such relief.

70. Typicality: Plaintiff's claims are typical of the claims of the other members of the Classes because, among other things, all such claims arise out of the same wrongful course of conduct engaged in by Defendant in violation of law as complained of herein. Further, the damages of each member of the Classes was caused directly by Defendant's wrongful conduct in violation of the law as alleged herein.

1 71. Adequacy of Representation: Plaintiff will fairly and adequately protect the
2 interests of all Class members because it is in her best interest to prosecute the claims alleged
3 herein to obtain full compensation due to her for the unfair and illegal conduct of which she
4 complains. Plaintiff also has no interests that are in conflict with, or antagonistic to, the interests
5 of Class members. Plaintiff has retained highly competent and experienced class action attorneys
6 to represent their interests and that of the Classes. By prevailing on her own claims, Plaintiff will
7 establish Defendant's liability to all Class members. Plaintiff and her counsel have the necessary
8 financial resources to adequately and vigorously litigate this class action, and Plaintiff and
9 counsel are aware of their fiduciary responsibilities to the Class members and are determined to
10 diligently discharge those duties by vigorously seeking the maximum possible recovery for Class
11 members.

12 72. Superiority: There is no plain, speedy, or adequate remedy other than by
13 maintenance of this class action. The prosecution of individual remedies by members of the
14 classes will tend to establish inconsistent standards of conduct for Defendant and result in the
15 impairment of Class members' rights and the disposition of their interests through actions to
16 which they were not parties. Class action treatment will permit a large number of similarly
17 situated persons to prosecute their common claims in a single forum simultaneously, efficiently,
18 and without the unnecessary duplication of effort and expense that numerous individual actions
19 would engender. Furthermore, as the damages suffered by each individual member of the classes
20 may be relatively small, the expenses and burden of individual litigation would make it difficult
21 or impossible for individual members of the class to redress the wrongs done to them, while an
22 important public interest will be served by addressing the matter as a class action.

23 73. Plaintiff is unaware of any difficulties that are likely to be encountered in the
24 management of this action that would preclude its maintenance as a class action.

25 **CAUSES OF ACTION**

26 Plaintiff does not plead, and hereby disclaims, causes of action under the FDCA and
27 regulations promulgated thereunder by the FDA. Plaintiff relies on the FDCA and FDA
28 regulations only to the extent such laws and regulations have been separately enacted as state

1 law or regulation or provide a predicate basis of liability under the state and common laws cited
2 in the following causes of action.

3 **PLAINTIFF'S FIRST CAUSE OF ACTION**
4 **(Violation of the Consumers Legal Remedies Act (the "CLRA"), California Civil Code §**
5 **1750, *et seq.*)**
6 **On Behalf of Plaintiff and the Subclass**

7 74. Plaintiff realleges and incorporates the paragraphs of this Class Action Complaint
8 as if set forth herein.

9 75. Defendant's actions, representations and conduct have violated, and continue to
10 violate the CLRA, because they extend to transactions that are intended to result, or which have
11 resulted, in the sale or lease of goods or services to consumers.

12 76. Plaintiff and other Subclass members are "consumers" as that term is defined by
13 the CLRA in California Civil Code § 1761(d).

14 77. The Products that Plaintiff (and other similarly situated Subclass members)
15 purchased from Defendant were "goods" within the meaning of California Civil Code § 1761(a).

16 78. Defendant's acts, practices and omissions, set forth in this Class Action
17 Complaint, led customers to falsely believe that the Products contained high quality proteins that
18 provided nutritionally the full amount of protein advertised on the product package. By engaging
19 in the actions, representations and conduct set forth in this Class Action Complaint, Defendant
20 has violated, and continues to violate, § 1770(a)(2), § 1770(a)(5), § 1770(a)(7), § 1770(a)(8),
21 and § 1770(a)(9) of the CLRA. In violation of California Civil Code § 1770(a)(2), Defendant's
22 acts and practices constitute improper representations regarding the source, sponsorship,
23 approval, or certification of the goods they sold. In violation of California Civil Code
24 § 1770(a)(5), Defendant's acts and practices constitute improper representations that the goods it
25 sells have sponsorship, approval, characteristics, ingredients, uses, benefits, or quantities, which
26 they do not have. In violation of California Civil Code § 1770(a)(7), Defendant's acts, practices,
27 and omissions constitute improper representations that the goods it sells are of a particular
28 standard, quality, or grade, when they are of another. In violation of California Civil Code
§ 1770(a)(8), Defendant deceptively markets and advertises that, unlike other protein product

1 manufacturers, it sells Products that nutritionally provide more grams of protein than the
 2 Products actually do. In violation of California Civil Code §1770(a)(9), Defendant has advertised
 3 goods or services with intent not to sell them as advertised. Finally, Defendant had a duty to
 4 disclose the corrected amount of protein per serving in the NFP as calculated by the PDCAAS
 5 method, which they failed to do. 21 C.F.R. § 101.9(c)(7)(i)-(iii).

6 79. Plaintiff requests that this Court enjoin Defendant from continuing to employ the
 7 unlawful methods, acts and practices alleged herein pursuant to California Civil Code
 8 § 1780(a)(2). If Defendant is not restrained from engaging in these types of practices in the
 9 future, Plaintiff and the other members of the Subclass will continue to suffer harm. Plaintiff and
 10 those similarly situated have no adequate remedy at law to stop Defendant's continuing practices.

11 80. On or about June 16, 2021, Defendant was provided with notice and a demand to
 12 correct, repair, replace or otherwise rectify the unlawful, unfair, false and/or deceptive practices
 13 complained of herein. Despite receiving the aforementioned notice and demand, Defendant
 14 failed to do so in that, among other things, they failed to identify consumers, notify them of their
 15 right to correction, repair, replacement or other remedy, and/or to provide that remedy.
 16 Accordingly, Plaintiff seeks, pursuant to California Civil Code § 1780(a)(3), on behalf of herself
 17 and those similarly situated Subclass members, compensatory damages, punitive damages and
 18 restitution of any ill-gotten gains due to Defendant's acts and practices.

19 81. Plaintiff also requests that this Court award her costs and reasonable attorneys'
 20 fees pursuant to California Civil Code § 1780(d).

21 **PLAINTIFF'S SECOND CAUSE OF ACTION**
 22 **(False Advertising, Business and Professions Code § 17500, *et seq.* ("FAL"))**
 23 **On Behalf of Plaintiff and the Subclass**

24 82. Plaintiff realleges and incorporates by reference the paragraphs of this Class
 25 Action Complaint as if set forth herein.

26 83. Beginning at an exact date unknown to Plaintiff, but within four (4) years
 27 preceding the filing of the Class Action Complaint, Defendant made untrue, false, deceptive
 28 and/or misleading statements in connection with the advertising and marketing of the Products.

1 84. Defendant made representations and statements (by omission and commission)
2 that led reasonable customers to believe that the Products that they were purchasing contained
3 more grams of protein per serving than the Products actually provided, and that the Products
4 were appropriate for meeting protein dietary needs. Defendant had a duty to disclose the
5 corrected amount of protein per serving in the NFP, as calculated according to the PDCAAS
6 method, which Defendant failed to do.

7 85. Plaintiff and those similarly situated relied to their detriment on Defendant's
8 false, misleading and deceptive advertising and marketing practices, including each of the
9 misrepresentations and omissions set forth above. Had Plaintiff and those similarly situated been
10 adequately informed and not intentionally deceived by Defendant, they would have acted
11 differently by, without limitation, refraining from purchasing Defendant's Products or paying
12 less for them.

13 86. Defendant's acts and omissions are likely to deceive the general public.

14 87. Defendant engaged in these false, misleading and deceptive advertising and
15 marketing practices to increase their profits. Accordingly, Defendant has engaged in false
16 advertising, as defined and prohibited by section 17500, *et seq.* of the California Business and
17 Professions Code.

18 88. The aforementioned practices, which Defendant used, and continues to use, to
19 their significant financial gain, also constitutes unlawful competition and provide an unlawful
20 advantage over Defendant's competitors as well as injury to the general public.

21 89. As a direct and proximate result of such actions, Plaintiff and the other members
22 have suffered, and continue to suffer, injury in fact and have lost money and/or property as a
23 result of such false, deceptive and misleading advertising in an amount which will be proven at
24 trial, but which is in excess of the jurisdictional minimum of this Court.

25 90. Plaintiff seeks, on behalf of herself and those similarly situated, full restitution of
26 monies, as necessary and according to proof, to restore any and all monies acquired by Defendant
27 from Plaintiff, the general public, or those similarly situated by means of the false, misleading
28 and deceptive advertising and marketing practices complained of herein, plus interest thereon.

Pursuant to Federal Rule of Civil Procedure 8(e)(2), Plaintiff makes the following allegations in this paragraph only hypothetically and as an alternative to any contrary allegations in their other causes of action, in the event that such causes of action will not succeed. Plaintiff and the Subclass may be unable to obtain monetary, declaratory and/or injunctive relief directly under other causes of action and will lack an adequate remedy at law, if the Court requires them to show classwide reliance and materiality beyond the objective reasonable consumer standard applied under the FAL, because Plaintiff may not be able to establish each Subclass member's individualized understanding of Defendant's misleading representations as described in this Complaint, but the FAL does not require individualize proof of deception or injury by absent Subclass members. *See, e.g., Ries v. Ariz. Bevs. USA LLC*, 287 F.R.D. 523, 537 (N.D. Cal. 2012) ("restitutionary relief under the UCL and FAL 'is available without individualized proof of deception, reliance, and injury.'"). In addition, Plaintiff and the Subclass may be unable to obtain such relief under other causes of action and will lack an adequate remedy at law, if Plaintiff is unable to demonstrate the requisite *mens rea* (intent, reckless, and/or negligence), because the FAL imposes no such *mens rea* requirement and liability exists even if Defendant acted in good faith.

91. Plaintiff seeks, on behalf of herself and those similarly situated, a declaration that the above-described practices constitute false, misleading and deceptive advertising.

92. Plaintiff seeks, on behalf of herself and those similarly situated, an injunction to prohibit Defendant from continuing to engage in the false, misleading and deceptive advertising and marketing practices complained of herein. Such misconduct by Defendant, unless and until enjoined and restrained by order of this Court, will continue to cause injury in fact to the general public and the loss of money and property in that Defendant will continue to violate the laws of California, unless specifically ordered to comply with the same. This expectation of future violations will require current and future consumers to repeatedly and continuously seek legal redress in order to recover monies paid to Defendant to which they are not entitled. Plaintiff, those similarly situated, and/or other consumers have no other adequate remedy at law to ensure

1 future compliance with the California Business and Professions Code alleged to have been
2 violated herein.

3 **PLAINTIFF'S THIRD CAUSE OF ACTION**
4 **(Common Law Fraud, Deceit and/or Misrepresentation)**
5 **On Behalf of Plaintiff and the Class**

6 93. Plaintiff realleges and incorporates by reference the paragraphs of this Class
7 Action Complaint as if set forth herein.

8 94. Defendant has fraudulently and deceptively informed Plaintiff that the Products
9 provide more grams of protein than they actually provide in a form useful to the human body.
10 Defendant failed to provide a statement of the corrected amount of protein per serving in the
11 NFP, calculated according to the PDCAAS method, on all the Products, as it was required to do.

12 95. These misrepresentations and omissions were known exclusively to, and actively
13 concealed by, Defendant, not reasonably known to Plaintiff, and material at the time they were
14 made. Defendant knew or should have known the composition of the Products, and knew or
15 should have known that the Products did not contain or provide the amount of protein represented
16 on the front label. Defendant's misrepresentations and omissions concerned material facts that
17 were essential to the analysis undertaken by Plaintiff as to whether to purchase Defendant's
18 Products. In misleading Plaintiff and not so informing her, Defendant breached their duty to her.
19 Defendant also gained financially from, and as a result of, their breach.

20 96. Plaintiff and those similarly situated relied to their detriment on Defendant's
21 misrepresentations and fraudulent omissions. Had Plaintiff and those similarly situated been
22 adequately informed and not intentionally deceived by Defendant, they would have acted
23 differently by, without limitation: (i) declining to purchase the Products, (ii) purchasing less of
24 them, or (iii) paying less for the Products.

25 97. By and through such fraud, deceit, misrepresentations and/or omissions,
26 Defendant intends to induce Plaintiff and those similarly situated to alter their position to their
27 detriment. Specifically, Defendant fraudulently and deceptively induced Plaintiff and those
28 similarly situated to, without limitation, purchase the Products.

98. Plaintiff and those similarly situated justifiably and reasonably relied on Defendant's misrepresentations and omissions, and, accordingly, were damaged by Defendant.

99. As a direct and proximate result of Defendant's misrepresentations and/or omissions, Plaintiff and those similarly situated have suffered damages, including, without limitation, the amount they paid for the Products.

100. Defendant's conduct as described herein was wilful and malicious and was designed to maximize Defendant's profits even though Defendant knew that it would cause loss and harm to Plaintiff and those similarly situated.

PLAINTIFF'S FOURTH CAUSE OF ACTION
(Unlawful, unfair, and fraudulent trade practices violation of Business and Professions Code § 17200, *et seq.*)
On Behalf of Plaintiff and the Subclass

101. Plaintiff realleges and incorporates by reference the paragraphs of this Class Action Complaint as if set forth herein.

102. Within four (4) years preceding the filing of this lawsuit, and at all times mentioned herein, Defendant has engaged, and continues to engage, in unlawful, unfair, and fraudulent trade practices in California by engaging in the unlawful, unfair, and fraudulent business practices outlined in this Complaint.

103. In particular, Defendant has engaged, and continues to engage, in unlawful practices by, without limitation, violating the following state and federal laws: (i) the CLRA as described herein; (ii) the FAL as described herein; (iii) the advertising provisions of the Sherman Law (Article 3), including without limitation, California Health & Safety Code §§ 110390, 110395, 110398 and 110400; (iv) the misbranded food provisions of the Sherman Law (Article 6), including without limitation, California Health & Safety Code §§ 110660, 110665, 110705, 110760, 110765, and 110770; and (v) and federal laws regulating the advertising and branding of food in 21 U.S.C. § 343(a), *et seq.* and FDA regulations, including but not limited to 21 C.F.R. 21 C.F.R. § 101.9 (c)(7), which are incorporated into the Sherman Law (California Health & Safety Code §§ 110100(a), 110380, and 110505).

104. In particular, Defendant has engaged, and continues to engage, in unfair and fraudulent practices by, without limitation, the following: (i) unlawfully making a protein claim

on the front of the package without complying with the regulatory requirements for making a protein claim set forth in 21 C.F.R. § 101.9(c)(7)(i)-(iii) and incorporated by reference by California's Sherman law; (ii) failing to provide a statement of the corrected amount of protein per serving in the NFP, calculated according to the PDCAAS method and expressed as a %DV, as required by FDA regulations; and (iii) misleading reasonable consumers regarding the amount of protein the Products provide nutritionally in a form that humans can use.

105. Plaintiff and those similarly situated relied to their detriment on Defendant's unlawful, unfair, and fraudulent business practices. Had Plaintiff and those similarly situated been adequately informed and not deceived by Defendant, they would have acted differently by, without limitation: (i) declining to purchase the Products, (ii) purchasing less of the Products, or (iii) paying less for the Products.

106. Defendant's acts and omissions are likely to deceive the general public.

107. Defendant engaged in these deceptive and unlawful practices to increase its profits. Accordingly, Defendant has engaged in unlawful trade practices, as defined and prohibited by section 17200, *et seq.* of the California Business and Professions Code.

108. The aforementioned practices, which Defendant has used to their significant financial gain, also constitute unlawful competition and provide an unlawful advantage over Defendant's competitors as well as injury to the general public.

109. As a direct and proximate result of such actions, Plaintiff and the other Subclass members have suffered and continue to suffer injury in fact and have lost money and/or property as a result of such deceptive and/or unlawful trade practices and unfair competition in an amount which will be proven at trial, but which is in excess of the jurisdictional minimum of this Court. Among other things, Plaintiff and the Subclass members lost the amount they paid for the Products.

110. As a direct and proximate result of such actions, Defendant has enjoyed, and continues to enjoy, significant financial gain in an amount which will be proven at trial, but which is in excess of the jurisdictional minimum of this Court.

1 111. Plaintiff seeks, on behalf of herself and those similarly situated, equitable relief,
2 including the restitution for the premium and/or full price that they or others paid to Defendant
3 as a result of Defendant's conduct. Plaintiff and the Subclass lack an adequate remedy at law to
4 obtain such relief with respect to their "unlawfulness" claims in this UCL cause of action because
5 the California Sherman Law does not provide a direct cause of action, so Plaintiff and the
6 Subclass must allege those violations as predicate acts under the UCL to obtain relief.

7 112. Plaintiff also seeks equitable relief, including restitution, with respect to her UCL
8 "fraudulent" prong claims. Pursuant to Federal Rule of Civil Procedure 8(e)(2), Plaintiff makes
9 the following allegations in this paragraph only hypothetically and as an alternative to any
10 contrary allegations in their other causes of action, in the event that such causes of action do not
11 succeed. Plaintiff and the Subclass may be unable to obtain monetary, declaratory and/or
12 injunctive relief directly under other causes of action and will lack an adequate remedy of law,
13 if the Court requires them to show classwide reliance and materiality beyond the objective
14 reasonable consumer standard applied under the UCL, because Plaintiff may not be able to
15 establish each Subclass member's individualized understanding of Defendant's misleading
16 representations as described in this Complaint, but the UCL does not require individualized proof
17 of deception or injury by absent class members. *See, e.g., Stearns v Ticketmaster*, 655 F.3d 1013,
18 1020, 1023-25 (distinguishing, for purposes of CLRA claim, among class members for whom
19 website representations may have been materially deficient, but requiring certification of UCL
20 claim for entire class). In addition, Plaintiff and the Subclass may be unable to obtain such relief
21 under other causes of action and will lack an adequate remedy at law, if Plaintiff is unable to
22 demonstrate the requisite *mens rea* (intent, reckless, and/or negligence), because the UCL
23 imposes no such *mens rea* requirement and liability exists even if Defendant acted in good faith.

24 113. Plaintiff seeks, on behalf of herself and those similarly situated, a declaration that
25 the above-described trade practices are fraudulent, unfair, and/or unlawful.

26 114. Plaintiff seeks, on behalf of herself and those similarly situated, an injunction to
27 prohibit Defendant from continuing to engage in the deceptive and/or unlawful trade practices
28 complained of herein. Such misconduct by Defendant, unless and until enjoined and restrained

by order of this Court, will continue to cause injury in fact to the general public and the loss of money and property in that Defendant will continue to violate the laws of California, unless specifically ordered to comply with the same. This expectation of future violations will require current and future consumers to repeatedly and continuously seek legal redress in order to recover monies paid to Defendant to which they were not entitled. Plaintiff and those similarly situated have no other adequate remedy at law to ensure future compliance with the California Business and Professions Code alleged to have been violated herein.

PLAINTIFF'S FIFTH CAUSE OF ACTION
(Unjust Enrichment)
On Behalf of Plaintiff and the Class

115. Plaintiff realleges and incorporates by reference the paragraphs of this Class Action Complaint as if set forth herein.

116. Plaintiff and members of the Class conferred a benefit on Defendant by purchasing the Products.

117. Defendant has been unjustly enriched in retaining the revenues from Plaintiff and Class members' purchases of the Products, which retention is unjust and inequitable, because Defendant falsely represented that the Products contained specific amounts of protein per serving, while failing to disclose that the daily value of the protein the Products actually provide.

118. Because Defendant's retention of the non-gratuitous benefit conferred on them by Plaintiff and Class members is unjust and inequitable, Defendant must pay restitution to Plaintiff and the Class members for its unjust enrichment, as ordered by the Court. Plaintiff and those similarly situated have no adequate remedy at law to obtain this restitution.

119. Plaintiff, therefore, seeks an order requiring Defendant to make restitution to them and other members of the Class.

PRAYER FOR RELIEF

WHEREFORE, Plaintiff, on behalf of herself and those similarly situated, respectfully request that the Court enter judgement against Defendant as follows:

A. Certification of the proposed Classes, including appointment of Plaintiff's counsel as class counsel;

1 B. An order temporarily and permanently enjoining Defendant from continuing the
2 unlawful, deceptive, fraudulent, and unfair business practices alleged in this Complaint;

3 C. An award of compensatory damages in an amount to be determined at trial, except
4 for those causes of action where compensatory damages are not legally available;

5 D. An award of statutory damages in an amount to be determined at trial, except for
6 those causes of action where statutory damages are not legally available;

7 E. An award of punitive damages in an amount to be determined at trial, except for
8 those causes of action where punitive damages are not legally available;

9 F. An award of treble damages, except for those causes of action where treble
10 damages are not legally available;

11 G. An award of restitution in an amount to be determined at trial;

12 H. An order requiring Defendant to pay both pre- and post-judgment interest on any
13 amounts awarded;

14 I. For reasonable attorneys' fees and the costs of suit incurred; and

15 J. For such further relief as this Court may deem just and proper.

16 **JURY TRIAL DEMANDED**

17 Plaintiff hereby demands a trial by jury.
