Totally thrilled with the results

"I have tried this product for two months now and am totally thrilled with the results I am having. A year ago I was told both knees were shot. So I gave this a try. I will continue purchasing this product."

Walking much better

"I have been taking the Advanced Instaflex for a couple of months. I am having less discomfort and walking much better without knee supports! I love this product and will continue to take it. Also, love the fact of one pill daily."

– Marsha T.  REAL USER

My knees haven't hurt since

"My knees haven't hurt since I've had it into my system. I have tried everything that comes along for them. This seems to be doing the job. Now to get rid of the stiffness since I wasn't doing a lot of walking my legs got stiff but we are working it out. Thanks.."

– Virginia B.  REAL USER

I am very impressed

"I am very impressed with the product. I have told several people about it, and I would like to get it for a friend. The 2 week supply. I have been using a cane for a couple of years. This past Saturday, I did not need it all the time. I am still using with steps. I am anxious to see more improvement as I continue to use Instaflex Advanced."

I can't wait for my next shipment

"I just wanted to say, Thank You! I was very skeptical, at first. I have tried a lot of over the counter stuff, to help my knee. I work in a Garden Center, and do a lot of walking, pushing, and pulling. I really noticed a big difference after I took Instaflex. I just ordered the sample kit, thinking that I wasn't going to get anymore, but boy am I wrong. I can't wait for my next shipment, and have been telling a lot of people about it. Thanks again."

"What makes this formula so impressive is that we only included ingredients backed by substantial clinical evidence. With more cutting-edge compounds like AprèsFlex and UC-II, this meant we could leave out glucosamine for those who might suffer from shellfish allergies or who have tried it in the past and didn't get the results they were expecting."

Common Household Relief Pills For Temporary Use Have Scary Consequences When Taken Daily

You know, those pills that most joint sufferers take multiple times per day to relieve and soothe their achy joints.

Taking these temporary relief pills regularly doesn't seem like a big deal. Right?

I mean, they sell them by the boxload right on the shelves at any store on any street.

Well...it's a bigger deal than you think.

These pills are only supposed to be taken on occasion.

If you do the research you'll find that taking these common household relief pills multiple times per day **can cause devastating long-term effects.**

Relying On Common Household Relief Pills Is Setting You Up For Unimaginable Health Risks

You're simply trying to find something to help

It's not fair.

Bending and moving shouldn't hurt this much.

You're simply trying to find something to help you get through the day a little easier.

Finding something that actually works to soothe your aching joints isn't a crime...but by taking them every day you're just setting yourself up for worse health problems down the road.

At that point, your joints will be the least of your worries!

The Comfort Provided By These 'Quick Relief' Pills Is Deceiving You

The big problem is that the relief they provide is actually deceiving.

These easily obtainable tablets may feel like they're soothing your achy and sore joints.

But truthfully, they are actually just covering up the issue by providing a **temporary solution**.

Common household relief pills are not a solution, and they could be doing more harm than good.

Did You Know?: There's A Rare 'Miracle' Plant That's Known For Providing Joint Relief...

When jungle explorers first came across the bizarre plant species growing deep in the forests of India, they cultivated it and began examining it closely.

What they quickly discovered is that it acted as a potent soother for achy joints, among other things.

News of this natural wonder spread far and wide, and now in more modern times it has undergone serious clinical scrutiny because of
