

**UNITED STATES DISTRICT COURT
MIDDLE DISTRICT OF FLORIDA
TAMPA DIVISION**

KERI MEARS,
*individually and on behalf of a class of
similarly situated persons,*

Plaintiff,

v.

**SUPPLYING DEMAND, INC. *doing
business as* LIQUID DEATH,**

Defendant.

Case No.: 8:26-cv-2674

JURY TRIAL DEMANDED

CLASS ACTION COMPLAINT

COMES NOW the Plaintiff, **KERI MEARS** (“Plaintiff” or “Ms. Mears”), individually and on behalf of all others similarly situated, by and through the undersigned counsel, and complains of the Defendant, **SUPPLYING DEMAND, INC. *doing business as* LIQUID DEATH** (“Liquid Death” or “Defendant”), stating as follows:

DESCRIPTION OF THE CASE

1. Defendant formulates, labels, markets, distributes, and sells the Liquid Death® Sparkling Energy drinks.
2. Plaintiff brings this action on behalf of herself and a Class of similarly situated consumers who purchased any of the following Liquid Death® Sparkling

Energy drink flavors: Scary Strawberry, Orange Horror, and Tropical Terror (hereafter referred to each as a “Product” and together as the “Products”).

3. Throughout this Complaint, Plaintiff uses the Liquid Death® Sparkling Energy Drink, Scary Strawberry (the "Representative Product") as a representative example. The Representative Product is illustrative of Defendant's “0g Sugar” representations and is not the only Product at issue. As alleged below, the “0g Sugar” representations, and the allulose sugar ingredient that contradicts them, are common to the aforementioned Products regardless of flavor or pack configuration.

4. Defendant sold, or otherwise provided, the Products to Publix, Walmart, Target, Amazon, and other retailers for resale to consumers.

5. Defendant thereby engaged in “trade or commerce” as defined by § 501.203(8), Fla. Stat.

6. Defendant prominently and conspicuously markets and sells the Products as “Zero Sugar” and “0g Sugar” (collectively, the “Representations”) on the front of the Products’ packaging and in its online listings.

7. The Representations are material claims about the basic nature and composition of the Products. They are express, objective, and quantitative claims about a measurable physical attribute of the Products.

8. Defendant further reinforces this deceptive health positioning by prominently printing the claim “BETTER-FOR-YOU ENERGY DRINK” directly on the front display panel of the Products, along with its “0g Sugar” Representation.

9. By labeling and advertising the Products as “0g Sugar,” Defendant represents to reasonable consumers, including Plaintiff, that the Products contain no sugar.

10. That representation is false. Each serving of the Representative Product contains allulose. Allulose is a monosaccharide and therefore a sugar under the federal and Florida labeling standards described below.

11. Reasonable consumers, including Plaintiff, purchased the Products on the reasonable but mistaken belief that they contained no sugar.

12. Defendant’s conduct violates Florida’s Deceptive and Unfair Trade Practices Act, § 501.201, *et seq.*, Fla. Stat. (“FDUTPA”), Florida’s prohibition against false and misleading advertising, § 817.41, Fla. Stat., and is otherwise grounds for restitution based on quasi-contract / unjust enrichment.

13. Plaintiff seeks damages, injunctive and declaratory relief, restitution, attorneys’ fees and costs, and a jury trial.

JURISDICTION AND VENUE

14. This Court has subject-matter jurisdiction under the Class Action Fairness Act, 28 U.S.C. § 1332(d)(2). Diversity jurisdiction exists as Defendant is a Delaware corporation with its principal place of business in Los Angeles, California, and Plaintiff is domiciled in Florida. The amount in controversy exceeds \$5,000,000 for Plaintiff and the putative Class, exclusive of interest and costs, calculated by a price premium which Plaintiff and the Classes paid for Defendant’s mislabeled Products on each sale.

15. Venue is proper in the Middle District of Florida under 28 U.S.C. § 1391(b)(2) because a substantial part of the events giving rise to Plaintiff's claims occurred within Pinellas County, Florida, which lies in this District and Division, where Plaintiff saw the Representations and purchased and received the Products.

PARTIES

16. Plaintiff, Ms. Mears, is an adult individual and a citizen of the State of Florida.

17. Ms. Mears maintains her primary residence in Pinellas Park, Pinellas County, Florida, and is thus domiciled in Pinellas County, Florida.

18. Plaintiff is a "consumer" as defined by § 501.203(7), Fla. Stat.

19. Plaintiff regularly purchased the Products for her personal use, in Florida, from the retailer Target.

20. Defendant, Liquid Death, is a Delaware corporation with its principal place of business at 4077 Redwood Ave., Los Angeles, CA 90066. Defendant is registered to conduct business in the State of Florida and may be served through its registered agent, NRAI Services, Inc., 1200 South Pine Island Road, Plantation, FL 33324.

21. Defendant formulates, manufactures, markets, labels, distributes, and sells the Liquid Death® Products, including the Products at issue in this action, throughout Florida and the United States. Defendant is responsible for the content of the Products' labels, packaging, and advertising.

FACTUAL ALLEGATIONS

Sugar Content is Material to Consumers' Purchasing Decisions

22. Whether a product contains sugar is a decisive purchasing factor for a large share of American consumers. In the International Food Information Council's 2025 Food & Health Survey, three in four Americans reported that they were trying to limit or avoid sugar in their diets, and more than six in ten said they were concerned about the amount of sugar they consume.¹ For these consumers, sugar is not a neutral attribute; rather, it is the thing they are shopping to avoid.

23. Public-health guidance reinforces that concern. The federal government's own nutrition policy reflects this concern: the 2025–2030 Dietary Guidelines for Americans state that “no amount of added sugars . . . is recommended or considered part of a healthy or nutritious diet.”² The World Health Organization strongly recommends that adults limit free sugars to below ten percent of total daily energy intake, and to aim for five percent or less.³ The American Heart Association sets a tighter ceiling still, recommending that added sugars be kept below six percent of daily

³ World Health Org., Guideline: Sugars Intake for Adults and Children (2015), <https://iris.who.int/server/api/core/bitstreams/4be74f01-de93-4596-bbd1-02a97afb1221/content> (last accessed September 3, 2026).

calories.⁴ Consumers who follow this guidance treat a product's sugar content as dispositive.

24. Consumers act on that concern at the shelf. Three in four Americans are trying to limit or avoid sugars in their diets.⁵ Among Americans who report trying to limit or avoid sugar, more than one in four (27%) buy products labeled “sugar free” when available.⁶ For a substantial segment of shoppers, then, a front-of-package “Sugar-Free” claim is not incidental marketing. It is the specific cue they look for and the basis on which they decide what products to purchase.

25. That demand supports a large and fast-growing market. One industry analyst valued the global sugar-free food market at roughly \$45.3 billion in 2024 and approximately \$48.1 billion in 2025, and projects it to approach \$83.2 billion by 2034. The growth of the sugar-free food market is driven by consumers shifting toward products they perceive as healthier.⁷ Sugar-free beverages — the category in which the Products at issue here are sold — led that market.⁸

⁸ *See Id.*

26. Manufacturers understand this demand and price to it. A “Sugar-Free” or “Zero Sugar” claim allows a product to command a premium over comparable products that carry no such claim, and manufacturers accordingly place these claims on the front of the package, where they are most likely to convert a shopper into a buyer.

27. Sugar content is therefore material. A reasonable consumer treats a “Sugar-Free” or similar representation as a genuine reason to select one product over another and to pay more for it and, being unable to test a product's chemistry in the aisle, takes the representation at face value and relies on it. Defendant built the Products’ packaging and advertising around that reliance, placing the “0g Sugar” claim front and center alongside the “BETTER-FOR-YOU ENERGY DRINK” front-of-package representation to capture both the price premium and the health-conscious buyers those claims attract even though, as set forth below, the Products are sweetened with a sugar.

28. Defendant has capitalized on that demand. It markets Products sweetened with allulose, a sugar, while labeling and advertising them as “0g Sugar” and “Zero Sugar.” Defendant thereby obtained an unfair advantage over competitors whose sugar-free claims are true, at the expense of unwitting consumers.

Defendant’s “Sugar-Free” Representations

29. Ms. Mears regularly purchased Liquid Death® Sparkling Energy Scary Strawberry drinks. As one example, on September 1, 2026, Ms. Mears purchased the Representative Product from the retailer Target.

30. Defendant places a prominent badge on the front of each Product's label that the Product contains "0g Sugar," as seen below:

31. In addition to the '0g Sugar' badge, Defendant prominently features the express representation "BETTER-FOR-YOU ENERGY DRINK" on the front of the packaging. This representation works in tandem with the "0g Sugar" claim to convey the deceptive message that the Product achieves its "better-for-you" status by being free of sugar.

32. Defendant carries the same Representation onto the online retailer listings, including on Amazon.com. The Amazon.com listing for the Representative Product is titled "Liquid Death Sparkling Energy – Scary Strawberry, Zero Sugar

Energy Drink, Unextreme Caffeine 100mg, Essential Vitamins 12, Fl Oz (Pack of 12).” The representation “Sugar Free” thus appears in the Product's name at the top of the listing, as seen below:

9

33. The listing's expandable “Top highlights” section repeats the Representation. Defendant describes the Product as containing “Zero Sugar.”

10

⁹ Liquid Death Sparkling Energy – Scary Strawberry, Amazon.com, https://www.amazon.com/dp/B0FV9BGJG1?maas=maas_adg_A938F5C09181951ACD B11C283978F5AF_afap_abs&ref_=aa_maas&tag=maas&th=1 (Amazon retail listing for the Representative Product).

¹⁰ *Id.*

34. The Representative Product's panel refutes the Representation. The panel declares "Total Sugars 0g" and "Incl. 0g Added Sugars," yet the ingredients list allulose, a sugar, as seen below.

35. The Representative Product confirms that Defendant's "Zero Sugar" and "0g Sugar" Representations bear no relationship to the Products' actual sugar content.

Allulose Is a Sugar

36. Allulose is a sugar. Chemically, allulose is a monosaccharide — the C-3 epimer of D-fructose — meaning that allulose and fructose share the same molecular formula and connectivity and differ only in the spatial orientation of a hydroxyl group at the third carbon.¹¹

37. Allulose is not merely a sugar as a matter of chemical classification; it is used as one. Allulose has roughly 70% of the sweetness of table sugar and is used in gram-scale quantities as a bulk sweetener and as a partial replacement for added sugars.¹² That is why each serving of the Products contains several grams of it, unlike high-intensity sweeteners that are used in trace amounts.

38. Allulose also behaves like sugar in food, with solubility, water activity, and viscosity similar to fructose.¹³ It is widely regarded as a substitute for table sugar — a substitute that is itself a sugar.

39. Allulose is the second-listed ingredient in the Products. The Representative Product's ingredient list, set out on its label, begins: "Carbonated

¹¹ Han-Joo Maeng et al., *Metabolic Stability of D-Allulose in Biorelevant Media and Hepatocytes*, 8 *Foods* art. 448, at 1-2 (2019), <https://doi.org/10.3390/foods8100448>; Youngji Han et al., *Gastrointestinal Tolerance of D-Allulose in Healthy and Young Adults*, 10 *Nutrients* art. 2010, at 1-2 (2018), <https://doi.org/10.3390/nu10122010>.

¹² See Youngji Han et al., *Gastrointestinal Tolerance of D-Allulose in Healthy and Young Adults. A Non-Randomized Controlled Trial*, 10 *Nutrients* 2010, at 2 (2018) (allulose "maintains approximately 70% of sweetness relative to sugar"); Han-Joo Maeng et al., *Metabolic Stability of D-Allulose in Biorelevant Media and Hepatocytes: Comparison with Fructose and Erythritol*, 8 *Foods* 448, at 2 (2019) ("D-allulose has 70% of the sweetness of sucrose")

¹³ See Han, *supra*, at 10 (allulose's "chemical properties are similar to those of fructose in terms of solubility, water activity, and viscosity").

Water, Allulose, Magnesium Lactate....” Under federal labeling law, ingredients are listed in descending order of predominance by weight. *See* 21 C.F.R. § 101.4(a)(1). Allulose, a sugar, is therefore the Products’ predominant ingredient by weight.

Allulose Is a “Sugar” Under the Governing Federal and Florida Standards

40. Congress authorized the U.S. Food and Drug Administration (“FDA”) to regulate food labeling under the Federal Food, Drug, and Cosmetic Act (“FDCA”), as amended by the Nutrition Labeling and Education Act, 21 U.S.C. § 301 *et seq.* FDA promulgated the relevant regulations at 21 C.F.R. part 101.

41. The “Zero Sugar” and “0g Sugar” statements are nutrient content claims because they expressly characterize the level of sugar in the Products. *See* 21 C.F.R. § 101.13(b). Such claims may be made only in accordance with FDA’s regulations.

42. Section 101.60(c)(1) governs the “sugar free” and “zero sugar” claims. It provides that such terms may not be used unless, among other requirements, the food (i) contains less than 0.5 grams of sugars per serving, and (ii) contains no ingredient that is a sugar. *See* 21 C.F.R. § 101.60(c)(1)(i)-(ii). These requirements are conjunctive.

43. To measure sugars, § 101.60(c)(1)(i) cross-references 21 C.F.R. § 101.9(c)(6)(ii), which defines “Total Sugars” as “the sum of all free mono- and disaccharides (such as glucose, fructose, lactose, and sucrose).” Allulose, a free monosaccharide, falls squarely within that definition.

44. The FDA has repeatedly confirmed that allulose is a sugar under this definition. In its 2016 rulemaking, the FDA stated that allulose, “as a monosaccharide, must be included” in the Total Sugars declaration pending any future rulemaking that

would exclude it. *See* 81 Fed. Reg. 33,742, 33,795-96 (May 27, 2016). The definition turns on chemical structure — “the number of saccharide units” — not on physiological effects such as caloric value or glycemic response. *See* 58 Fed. Reg. 2,079, 2,098 (Jan. 6, 1993).

45. The United States has recently reaffirmed this position. In an amicus brief filed at the invitation of the U.S. Court of Appeals for the Seventh Circuit in a materially identical allulose case, the Government stated that “allulose is a ‘sugar’ as that term is defined at 21 C.F.R. § 101.9(c)(6)(ii)” and that the phrase “all free mono- and disaccharides (such as glucose, fructose, lactose, and sucrose)” is inclusive and illustrative, not restrictive.¹⁴

The “Sugar-Free” Claim Is Prohibited, Not Permitted, by Federal Law

46. As set forth *supra*, Allulose is a listed ingredient in the Products.

47. Under FDA regulations, a food bearing a “sugar free” or “zero sugar” representation must contain less than 0.5 grams of sugars per reference amount customarily consumed. *See* 21 C.F.R. § 101.60(c)(1).

48. Because allulose is a sugar and, upon information and belief, the Products contain more than 0.5 grams of allulose, the Products cannot lawfully bear the “Zero Sugar” Representation.

¹⁴ Brief for the United States as Amicus Curiae at 2, 11-24, *Franco v. Chobani, LLC*, No. 25-2087 (7th Cir. June 29, 2026) (“allulose is a ‘sugar’ as that term is defined at 21 C.F.R. § 101.9(c)(6)(ii)”).

49. The FDA's 2020 guidance does not permit the Representations. In that guidance, FDA announced only that it would exercise enforcement discretion as to certain *Nutrition Facts* declarations for allulose — namely, the Total Sugars and Added Sugars quantities, the Added Sugars percent Daily Value, and the caloric value of allulose — pending future rulemaking.¹⁵

50. FDA made no comparable statement as to nutrient content claims. The 2020 guidance does not authorize “Sugar-Free,” “Zero Sugar,” or “0 Sugar” claims on allulose-sweetened products, and it disclaims any binding effect. A “Sugar-Free” claim on a product containing more than 0.5g of allulose therefore violates § 101.60(c)(1) regardless of the enforcement discretion FDA extended to the Nutrition Facts panel.

51. Accordingly, no federal or state law requires or specifically permits Defendant to represent the Products as “Sugar-Free” or “0 Sugar.” Plaintiff does not seek to impose any requirement different from, or in addition to, federal law; she seeks to enforce labeling requirements identical to the federal standards that Florida has adopted. See 21 U.S.C. § 343-1(a)(5).

The Products Are Misbranded Under Florida Law

52. Florida has adopted the federal food-labeling requirements as state law. Under the Florida Food Act, Chapter 500, Florida Statutes, the Florida Department

¹⁵ FDA, The Declaration of Allulose and Calories from Allulose on Nutrition and Supplement Facts Labels: Guidance for Industry 1-9 (Oct. 2020) (“2020 Allulose Guidance”), [/https://www.fda.gov/media/123342/download](https://www.fda.gov/media/123342/download).

of Agriculture and Consumer Services has adopted the federal food regulations at 21 C.F.R. Part 101 by reference, expressly incorporating them “as rules under the Florida Food Act, Chapter 500, F.S.” Fla. Admin. Code R. 5K-4.002(1)(d). The nutrient content claim regulation (§ 101.60), the sugars definition (§ 101.9(c)(6)(ii)), and the nutrient content claim framework (§ 101.13) are therefore Florida law.

53. A food is misbranded under Florida law if its labeling is false or misleading in any particular. *See* § 500.11(1)(a), Fla. Stat. It is unlawful to manufacture, sell, deliver, hold, or offer for sale any food that is misbranded. *See* § 500.04, Fla. Stat.; *see also* 21 U.S.C. § 343(a)(1), (r)(1)(A).

54. The Products cannot lawfully bear the “Sugar Free” or “0g Sugar” Representations for two independent reasons. First, a “sugar free” claim is prohibited on any food that “contains ... an ingredient that is a sugar,” regardless of quantity. 21 C.F.R. § 101.60(c)(1)(ii). Allulose is a sugar and is an ingredient in every Product, so the Representations are barred on that ground alone, without regard to how many grams each serving contains. Second, and independently, upon information and belief, each serving contains more than the 0.5-gram limit set forth in § 101.60(c)(1)(i).

55. On either ground, the Products are misbranded under Florida and federal law, and Defendant's advertising, distribution, and sale of the Products are unlawful.

Reasonable Consumers Cannot Detect Defendant's Deception

56. Reasonable consumers have no reason to look past the conspicuous “0g Sugar” claim on the front of the package. Consumers are not expected to look beyond a prominent front-label representation to discover that it is false, and are not required

to perform independent scientific research into the chemical classification of listed ingredients.

57. Allulose is not a common household term. Reasonable consumers, including Plaintiff, are unlikely to recognize it or infer from the ingredient list that it is a sugar. Reasonable consumers do not possess specialized knowledge of carbohydrate chemistry.

58. Defendant's deception is compounded by the "0g" Total Sugars line in the Nutrition Facts panel, which reinforces the no-sugar message and makes it effectively impossible for a consumer to discover that the Products do, in fact, contain sugar.

Defendant Knew the Representations Were False and Plaintiff Was Injured

59. Defendant knew, or should have known, that the Representations were false and misleading when it labeled, advertised, distributed, and sold the Products.

60. Defendant knew that the Products contain allulose, that allulose is a sugar, that its labels represented that the Products contained no sugar, that reasonable consumers would rely on those labels, and that the Representations enabled Defendant to charge a premium.

61. Defendant controlled, or participated in, making the Representations and could have stopped using them or ensured they were true. Despite its knowledge, Defendant continued to use the Representations, causing consumers to buy or overpay for the Products.

62. By deceiving consumers about the Products' nature and ingredients, Defendant took market share from truthful competitors and commanded a price premium, thereby increasing its profits.

63. When Plaintiff purchased the Products, she did so in reliance upon Defendant's representation that the Products contained "0g Sugar" and had "Zero Sugar."

64. Had Plaintiff known that the Products contained sugar, she would not have purchased the product, or would have paid less for it.

65. Plaintiff and the Class paid a price premium — that is, they paid more than they otherwise would have, or purchased Products they would not have purchased at all, because of the "0g Sugar" and "Zero Sugar" Representations. Plaintiff and the Class did not receive the benefit of their bargain because the Products were not, in fact, sugar free.

66. Plaintiff and the Class suffered injury in fact and lost money as a direct and proximate result of Defendant's wrongful conduct.

67. Plaintiff remains interested in purchasing energy drinks that are truly sugar free. She would purchase the Products again if she could rely on the "0g Sugar" and "Zero Sugar" Representations as truthful. Because she cannot determine whether the Representations have been or will be corrected, she is likely to be misled again absent injunctive relief.

68. Plaintiff lacks an adequate remedy at law for the future harm described above. Damages cannot remedy Plaintiff's inability to rely on the Representations in

deciding whether to purchase the Products in the future. Only injunctive relief requiring Defendant to cease or correct the misleading Representations can address that prospective harm.

CLASS ACTION ALLEGATIONS

69. Plaintiff brings this action under Federal Rules of Civil Procedure 23(a), 23(b)(2), and 23(b)(3), on behalf of herself and the following Classes:

The “National Class”: All natural persons who, within the four (4) years preceding the filing of this Complaint, purchased any of the Products in the United States for personal use and not for resale.

The “Florida Class”: All natural persons who, within the four (4) years preceding the filing of this Complaint, purchased any of the Products in the State of Florida for personal use and not for resale.

70. Subject to information obtained through discovery, the Class definitions may be amended or refined, including through the use of subclasses, and Plaintiff reserves the right to do so.

71. Excluded from the Classes are Defendant and its officers, directors, and employees; any entity in which Defendant has a controlling interest; the judge and magistrate judge assigned to this action and their staff and immediate families; and Plaintiff’s counsel.

72. **Numerosity (Fed. R. Civ. P. 23(a)(1)).** Members of the Classes are so numerous that joinder is impracticable. Upon information and belief, the Classes each include thousands of consumers. Their identities may be ascertained through

Defendant's and retailers' records, and they may be notified by mail and/or publication.

73. Commonality and Predominance (Fed. R. Civ. P. 23(a)(2), 23(b)(3)).

Common questions of law and fact exist as to all Class members and predominate over any individual questions, including:

- a. whether allulose is a sugar;
- b. whether the Products contained "0g Sugar" or "Zero Sugar";
- c. whether the Representations were false, misleading, or deceptive;
- d. whether the Representations were material to a reasonable consumer;
- e. whether the Products are misbranded under Florida and federal law;
- f. whether Defendant's conduct constitutes an unfair or deceptive act or practice under FDUTPA;
- g. whether Defendant's conduct violated § 817.41, Fla. Stat.;
- h. whether Defendant was unjustly enriched; and,
- i. whether Plaintiff and the Class are entitled to damages, restitution, and injunctive relief, and the proper measure thereof.

74. Typicality (Fed. R. Civ. P. 23(a)(3)). Plaintiff's claims are typical of the Class's claims. Plaintiff and the Classes were exposed to the same uniform Representations, purchased the same Products, and suffered the same injury — payment of a price premium for Products that were not sugar free.

75. Adequacy (Fed. R. Civ. P. 23(a)(4)). Plaintiff will fairly and adequately protect the interests of the Classes. Plaintiff has no interests antagonistic to the Classes

and has retained counsel experienced in consumer class-action litigation who intend to prosecute this action vigorously.

76. **Superiority (Fed. R. Civ. P. 23(b)(3)).** A class action is superior to other methods for the fair and efficient adjudication of this controversy. The claims arise from common, uniform conduct; the cost and burden of individual litigation make individual redress impracticable given the modest value of each claim; and concentrating the claims in one forum avoids inconsistent judgments and conserves judicial resources. Because the material question — whether “Sugar-Free” is false as applied to an allulose-sweetened product — turns on an objective, reasonable-consumer standard, it is common to the Classes and does not require individualized proof of reliance.

77. **Rule 23(b)(2).** Defendant has acted on grounds generally applicable to the Classes by uniformly labeling and marketing the Products as “0g Sugar,” making final injunctive and corresponding declaratory relief appropriate for the Classes as a whole.

78. All conditions precedent to this action have been performed, satisfied, waived, or excused.

COUNT I
VIOLATION OF FLORIDA’S DECEPTIVE AND UNFAIR TRADE
PRACTICES ACT, § 501.201 ET SEQ., FLA. STAT.
(On Behalf of the Florida Class)

79. Plaintiff re-alleges and incorporates by reference paragraphs 1 through 78 as if fully set forth herein.

80. The Products are tangible goods with value, which Defendant advertised, offered, distributed, and sold in Florida.

81. Defendant engaged in “trade or commerce” within Florida as defined by § 501.203(8), Fla. Stat.

82. Section 501.204(1), Fla. Stat., prohibits “unfair methods of competition, unconscionable acts or practices, and unfair or deceptive acts or practices in the conduct of any trade or commerce.” The standard is objective: whether the practice was likely to deceive a consumer acting reasonably in the same circumstances.

83. Defendant committed unfair and deceptive acts by representing that the Products have “Zero Sugar” and “0g Sugar,” and by framing the Products as a “BETTER-FOR-YOU ENERGY DRINK,” when each serving contains allulose, a sugar. Those combined Representations were likely to deceive, and did deceive, reasonable consumers into believing the Products contained no sugar ingredients.

84. Defendant's conduct is also a per se violation of FDUTPA because it violates the misbranding provisions of §§ 500.04 and 500.11(1)(a), (n), Fla. Stat., which adopt the federal food-labeling requirements of 21 U.S.C. § 343 and 21 C.F.R. §§ 101.13 and 101.60(c)(1).

85. The “0g Sugar” and “Zero Sugar” Representations violate § 101.60(c)(1) on two independent grounds: the Products contain an ingredient that is a sugar, §

101.60(c)(1)(ii), and each serving contains more than the 0.5-gram limit of § 101.60(c)(1)(i). Either violation renders the Products misbranded.

86. No federal or state law required or specifically permitted Defendant to label the Products “0g Sugar” or “Zero Sugar.” To the contrary, that labeling is prohibited by 21 C.F.R. § 101.60(c)(1). The safe harbor in § 501.212(1), Fla. Stat., therefore does not apply.

87. The Representations were material. A reasonable consumer would find them material to the decision whether to purchase the Products and how much to pay. The Representations, and the reasonable-consumer understanding of them, are uniform across the Products and the Florida Class.

88. Defendant’s violations were willful and knowing.

89. As a direct and proximate result of Defendant’s unfair and deceptive acts, Plaintiff and the Florida Class were injured and suffered actual damages. They paid a price premium for the Products — they paid more than they would have paid, or purchased Products they would not have purchased, because of the Representations.

90. Pursuant to § 501.211(2), Fla. Stat., Plaintiff and the Florida Class are entitled to recover actual damages, together with attorneys’ fees and court costs under § 501.2105, Fla. Stat.

91. Pursuant to § 501.211(1), Fla. Stat., Plaintiff and the Florida Class are also entitled to declaratory and injunctive relief directing Defendant to cease the false and misleading labeling and advertising and to disseminate corrective disclosures.

COUNT II
VIOLATION OF § 817.41, FLA. STAT. (FALSE AND MISLEADING
ADVERTISING)
(On Behalf of the Florida Class)

92. Plaintiff re-alleges and incorporates by reference paragraphs 1 through 78 as if fully set forth herein.

93. Section 817.41(1), Fla. Stat., makes it unlawful to make or disseminate any “misleading advertisement.” Defendant’s “0g Sugar” and “Zero Sugar” Representations, disseminated on the Products’ labels and in Defendant’s online marketing, are misleading advertisements because they represent that the Products contain no sugar when each serving contains allulose, a sugar.

94. Defendant made the Representations knowing they were false or misleading, or with reckless disregard for their truth, and with the intent that consumers, including Plaintiff and the Class, rely on them.

95. Plaintiff and the Class justifiably relied on the Representations to their detriment, purchasing the Products and paying a price premium they would not otherwise have paid.

96. As a direct and proximate result of Defendant’s misleading advertising, Plaintiff and the Class suffered damages and are entitled to recover actual damages, and, where warranted, punitive damages, together with attorneys’ fees and costs.

COUNT III
UNJUST ENRICHMENT
(On Behalf of the National Class)

97. Plaintiff re-alleges and incorporates by reference paragraphs 1 through 78 as if fully set forth herein, and asserts this claim in the alternative to the extent any contract does not govern the subject matter of the dispute.

98. Plaintiff and the Class conferred a benefit on Defendant in the form of the monies they paid for the Products, the proceeds of which flowed to Defendant through its distribution and sale of the Products, including through retailers such as Walmart. Defendant would not have received those monies but for the “0g Sugar” and “Zero Sugar” Representations.

99. Defendant had knowledge of, and voluntarily accepted and retained, that benefit.

100. Defendant obtained the benefit through its deceptive Representations. A portion of what Plaintiff and the Class paid — the price premium attributable to the Representations — reflects value Defendant obtained but did not confer. Under these circumstances, it would be inequitable for Defendant to retain that benefit without paying its value.

101. Plaintiff and the Class are entitled to restitution and disgorgement of the monies, profits, and other benefits Defendant obtained from its wrongful conduct, in an amount to be proven at trial.

PRAYER FOR RELIEF

WHEREFORE, Plaintiff, individually and on behalf of the National and Florida Classes, respectfully requests that this Court enter judgment against Defendant as follows:

- a. Certifying this action as a class action under Rule 23, appointing Plaintiff as class representative, and appointing the undersigned as class counsel;
- b. Declaring that Defendant's conduct violates the statutes referenced herein;
- c. Awarding actual damages as pled herein;
- d. Awarding restitution and all other equitable monetary relief;
- e. Granting injunctive and declaratory relief, including an order requiring Defendant to cease labeling, marketing, and selling the Products with the Representations and to make corrective disclosures;
- f. Awarding pre-judgment and post-judgment interest as provided by law;
- g. Awarding Plaintiff's and the Class's reasonable attorneys' fees, litigation expenses, and costs of suit; and
- h. Granting such other and further relief as the Court deems just and proper.

JURY TRIAL DEMANDED

Plaintiff hereby demands a trial by jury on all issues so triable.

Respectfully submitted on September 14, 2026 by,

SERAPH LEGAL, P. A.

/s/ Bryan J. Geiger

Civil Action No. 8:26-cv-2674

SUMMONS IN A CIVIL ACTION

To: *(Defendant's name and address)* SUPPLYING DEMAND, INC.
c/o NRAI Services, Inc.
1200 South Pine Island Road
Plantation, FL 33324

A lawsuit has been filed against you.

Within 21 days after service of this summons on you (not counting the day you received it) — or 60 days if you are the United States or a United States agency, or an officer or employee of the United States described in Fed. R. Civ. P. 12 (a)(2) or (3) — you must serve on the plaintiff an answer to the attached complaint or a motion under Rule 12 of the Federal Rules of Civil Procedure. The answer or motion must be served on the plaintiff or plaintiff's attorney, whose name and address are: **Bryan J. Geiger, Esq.**

Bryan J. Geiger, Esq.
Seraph Legal, P.A.
3505 E. Frontage Rd., Ste. 145
Tampa, Florida 33607
BGeiger@Seraphlegal.com

If you fail to respond, judgment by default will be entered against you for the relief demanded in the complaint. You also must file your answer or motion with the court.
